Volume 12109

Proceedings of SPIE 0277-786X, V. 12109

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Thermosense: Thermal Infrared Applications XLIV*, edited by Arantza Mendioroz, Nicolas P. Avdelidis, Proc. of SPIE 12109, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

ADDITIVE MANUFACTURING

12109 02 **Comparison of in-situ near infrared melt pool imagery to optical microscopy measurements**
[12109-2]

NOVEL TECHNIQUES

12109 03 **Thermographic testing using 2D pseudo-random illumination and photothermal super resolution reconstruction (Best Student Paper)** [12109-5]

12109 04 **Long wave infrared wavefront sensing through a thin diffuser** [12109-6]

THERMOPHYSICAL PROPERTIES

12109 05 **Assessing the thermal diffusivity and principal directions of moving samples by infrared thermography: towards fiber orientation monitoring in production chains** [12109-36]

12109 06 **Non-destructive thermographic method for the assessment of heat treatment in boron steel**
[12109-8]

12109 07 **Application of step heating thermography for material category recognition** [12109-9]

HYPERSPECTRAL AND MULTI-IMAGING APPLICATIONS

12109 08 **Drone-based near-infrared multispectral and hyperspectral imaging in monitoring structural changes in mine tailing ponds** [12109-10]

12109 09 **Multi-sensor infrared imaging for floating waste monitoring** [12109-11]

12109 0A **Combining thermography and stress analysis for tensile testing in a single sensor** [12109-13]

IR NDT AT THE MICROSCALE

12109 0B **High resolution mapping of thermal contact resistance using lock-in thermography** [12109-14]

12109 0C **Quantification of early-stage fatigue damage on cross-ply CFRP laminates by lock-in thermographic thermal diffusivity measurement** [12109-15]

IR NDT OF COMPOSITE AND MULTILAYERED STRUCTURES

12109 0D **Machine learning on thermographic images for the detection and classification of damage on composites** [12109-18]

12109 0E **Weather-dependent passive thermography of unheated wind turbine blades** [12109-19]

12109 0F **Multimodal radiothermomic biomarkers for breast cancer screening** [12109-45]

12109 0G **Infrared thermographic modelling of defects in hybrid nature composite materials for new rail carbodies** [12109-42]

AI IN THERMAL IMAGING APPLICATIONS

12109 0H **A Gaussian process emulator for radiative transfer: a proof of concept** [12109-23]

12109 0I **Deep visible to thermal infrared style transfer in dynamic video sequences** [12109-25]

IR NDT IN INDUSTRY AND INFRASTRUCTURE I

12109 0J **Quantitative evaluation of the welded area in Resistance Projection Welded (RPW) thin joints by pulsed laser thermography** [12109-26]

BIOMEDICAL APPLICATIONS

12109 0K **Use of components analysis to identify internal heat in breast dynamic thermal images** [12109-29]

THERMAL MODELLING AND SIGNAL PROCESSING

12109 0L **Seebeck bowtie antenna for 2THz radiation detection** [12109-33]

12109 0M **Sensitivities and uncertainties in predicting thermal contrast between a target and a background** [12109-34]

12109 0N **Thermal imaging and simulation of a droplet on a hydrophobic substrate** [12109-37]
