Volume 12134

Proceedings of SPIE 0277-786X, V. 12134

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Terahertz Photonics II*, edited by Mona Jarrahi, Sascha Preu, Dmitry Turchinovich, Proc. of SPIE 12134, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 SOURCES AND DETECTORS I

12134 02 **A new single shot THz detection strategy with electro-optic sampling** [12134-2]

SESSION 2 SOURCES AND DETECTORS II

12134 03 **THz resonant-tunneling diodes, oscillators, detectors, and applications (Invited Paper)** [12134-6]

SESSION 3 SOURCES AND DETECTORS III

12134 05 **Terahertz time domain spectroscopy data processing: analysing uncertainties to push boundaries (Invited Paper)** [12134-9]

SESSION 4 METAMATERIALS

12134 06 **Light matter interaction enhancement through spatial confinement in the THz range: towards spectral analysis of single objects** [12134-13]

12134 07 **A 135°, spoof surface plasmon polariton bend for 1 THz band** [12134-15]

SESSION 5 COMMUNICATION AND APPLICATIONS

12134 08 **THz metrology with monolithic tunable two-color diode lasers (Invited Paper)** [12134-16]

12134 09 **Terahertz waveguide: the fundamental component for sustainable world connectivity (Invited Paper)** [12134-17]

12134 0A **THz photonics-based transmitter using multicore fiber combined with UTC-PD array for high data transmission in 300 GHz band** [12134-18]

12134 0B **Shear interferometry for terahertz wavefront sensing** [12134-21]

12134 0C **Injection-seeded backward terahertz-wave parametric oscillators at 0.3 and 0.5 THz bands for nondestructive imaging applications** [12134-20]

POSTERS SESSION

- 12134 0D **Optimizing the performance of the CPW-to-spoof surface plasmon polariton waveguides for 0.3 THz band** [12134-23]
- 12134 0E **Assessing the hydration state of agarose-based hydrogels using terahertz spectroscopy** [12134-24]
- 12134 0F **Rapid genetic discrimination in plants through terahertz spectroscopy** [12134-26]
- 12134 0G **Investigation of the loss performance of the spoof surface plasmon polariton waveguides at 1 THz band** [12134-28]
- 12134 0H **Comparison of time-domain antenna performances for the terahertz photoconductive sources and detectors** [12134-30]
