Volume 12186

Proceedings of SPIE 0277-786X, V. 12186

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Observatory Operations: Strategies, Processes, and Systems IX*, edited by David S. Adler, Robert L. Seaman, Chris R. Benn, Proc. of SPIE 12186, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

DIVERSITY

12186 04 **Equity, diversity, and inclusion (EDI) at ESO: updates on the current practices and strategies for the future** [12186-3]

12186 05 **The US-ELTP research inclusion collaboration toolkit** [12186-4]

12186 07 **Creating an inclusive and diverse environment at Vera C. Rubin Observatory** [12186-2]

OPERATIONS BENCHMARKS AND METRICS

12186 08 **Towards a greener W. M. Keck Observatory** [12186-6]

12186 09 **Planning scientific operations for the Maunakea Spectroscopic Explorer** [12186-7]

12186 0A **Results of the dome turbulence sensor at the Anglo-Australian Telescope** [12186-8]

12186 0B **Astronomy operations with the Southern African Large Telescope (SALT): It's all happening** [12186-9]

12186 0C **Improving the telescope guiding with field stabilization on the VLT/UTs** [12186-10]

DATA FLOW AND MANAGEMENT

12186 0D **The ESO science archive** [12186-11]

12186 0E **The ESO Data Processing System (EDPS): a unified system for science data processing** [12186-12]

12186 0F **DRAW in the US Extremely large Telescope Program Platform** [12186-13]

12186 0H **Integration of data reduction and near real-time archiving into the Keck Observing Model** [12186-15]

TIME DOMAIN/TRANSIENTS

12186 0I **Las Cumbres Observatory: preparing for second decade operations** [12186-16]

12186 0J **Searching for time-domain anomalies in high energy catalogs** [12186-17]

12186 0K **Exploring the nature of sub-second optical flashes in the night sky** [12186-18]

12186 0L **The transients handler system for the Cherenkov Telescope Array Observatory** [12186-19]

OPERATIONS PLANNING I

12186 0M **The new ESO Phase1 system: from the call for proposals to the OPC review process** [12186-20]

12186 0N **Preparing observations for ESO telescopes: a versatile approach** [12186-21]

12186 0O **Accessing SALT proposals in a browser and with an API** [12186-23]

OPERATIONS PLANNING II

12186 0P **Toward the remotization and robotization of the OARPAF Telescope** [12186-24]

12186 0Q **The Observatory Control System (OCS): open-source applications for managing the users, proposals, observation requests, scheduling, and science data for an observatory** [12186-25]

12186 0S **Optimal control of wide field small aperture telescope arrays with reinforcement learning** [12186-27]

SITE AND FACILITIES OPERATIONS: CALIBRATION/PERFORMANCE

12186 0T **Performance characterization and near-real-time monitoring of MUSE adaptive optics modes at Paranal** [12186-28]

12186 0U **Moving beyond traditional KPIs: an end-to-end data driven approach for improved system understanding and performance** [12186-29]

12186 0W **Calibration-TOM: managing calibration observations for a global network of telescopes** [12186-31]

12186 0X **New pointing calibration technique using star signals in the ASTRI Cherenkov camera and the variance method** [12186-32]

SITE AND FACILITIES OPERATIONS: AUTOMATION/ACCESIBILITY

12186 0Y **Costs and benefits of automation for astronomical facilities** [12186-33]

12186 0Z **Broadening access to remote observing at W. M. Keck Observatory** [12186-34]

12186 11 **Informing observatory operations with accessible telemetry and automated performance metrics** [12186-36]

12186 12 **Design of an operational control system for a telescope system based on RACS2** [12186-37]

SITE AND FACILITIES OPERATIONS: INFRASTRUCTURE/EXTERNAL IMPACTS

12186 13 **ALMA recovers from COVID** [12186-38]

12186 14 **Improving SALT operations resource planning and collaboration in COVID-19 times** [12186-39]

12186 17 **On the importance of the electrical grid power quality for astronomical observatories** [12186-42]

12186 18 **How we completed major maintenance and new installations at Las Cumbres Observatory during the COVID-19 pandemic** [12186-43]

12186 19 **A laser cleaning system for astronomical mirrors** [12186-44]

SITE AND FACILITIES OPERATIONS: INSTRUMENTS/OPERATIONS I

12186 1B **Validation of the operations manual for EIRSAT-1, a 2U CubeSat with a novel gamma-ray burst detector** [12186-46]

12186 1C **Gemini visiting instrument program** [12186-47]

12186 1E **Las Campanas Observatory operations: current scheme and future challenges** [12186-49]

SITE AND FACILITIES OPERATIONS: INSTRUMENTS/OPERATIONS II

12186 1F **Observation scheduling and automatic data reduction for the Antarctic Telescope, ASTEP+** [12186-50]

12186 1G **Lessons learned from the Arecibo Observatory auxiliary M4N socket analysis and implications for future observatory designs** [12186-51]

12186 1H **The GRANDMA network in preparation for the fourth gravitational-wave observing run** [12186-52]

POSTER SESSION: DATA FLOW

12186 1K **The ESO science archive experience in adopting VO technologies** [12186-55]

POSTER SESSION: OBSERVATION PLANNING AND SCHEDULING

12186 1N **Observation planning to better track Solar instrument degradation** [12186-22]

12186 1O **ExoTOM: a target-observation-manager automating exoplanet transit follow-up** [12186-59]

POSTER SESSION: OPERATIONS BENCHMARKS AND METRICS

12186 1P **The conceptual design of SCal: a facility calibration system for the Maunakea Spectroscopic Explorer** [12186-61]

12186 1Q **Joint ALMA Observatory data science exploration on the cloud** [12186-62]

POSTER SESSION: SITE AND FACILITIES OPERATIONS

12186 1R **LoRaWAN usage for remote telescope operations** [12186-63]

12186 1S **Rubin Observatory LSST camera shipping container testing and analysis** [12186-64]

12186 1U **MARVEL: extracting high-precision radial velocities of exoplanet hosts** [12186-67]

POSTER SESSION: TIME DOMAIN

12186 1W **A low cost and automatic meteorites detection system with commercial camera and neural networks** [12186-71]
