Volume 12209

Proceedings of SPIE 0277-786X, V. 12209

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Organic, Hybrid, and Perovskite Photovoltaics XXIII*, edited by Gang Li, Natalie Stingelin, Proc. of SPIE 12209, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

HYBRID ORGANIC/INORGANIC PHOTOVOLTAICS I

12209 02 **The interplay between device's and material's properties in determining solar cells' performance (Invited Paper) [12209-9]**

HYBRID ORGANIC/INORGANIC PHOTOVOLTAICS II

12209 03 **Crystallized 2D perovskite for x-ray and visible light detection applications (Invited Paper) [12209-13]**

STABILITY, LIFETIME, AND RELIABILITY

12209 04 **Low-cost perovskite materials for decentralized energy generation and Department of Defense environmental impact reduction [12209-33]**

POSTER SESSION

12209 05 **Fabricate anti-solvent free tin-lead based perovskite solar cells with MAAC additives [12209-53]**

12209 06 **Neutral-colored semitransparent perovskite solar cells by controlling aperture ratios [12209-58]**

12209 09 **Synthesis and optical study of ultra-stable inorganic double perovskite $\text{Cs}_2\text{CuBiCl}_6$ for optoelectronic applications [12209-44]**

12209 0A **Experimental investigation of structural and photophysical nature of non-toxic $\text{Cs}_2\text{AlBiCl}_6$ double perovskite for photovoltaic applications [12209-45]**
