Volume 12214

Proceedings of SPIE 0277-786X, V. 12214

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Light in Nature IX*, edited by Vasudevan Lakshminarayanan, Katherine Creath, Joseph A. Shaw, Proc. of SPIE 12214, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

LIGHT IN ART

12214 02 **Design of immersive scenarios and pieces of light art** [12214-2]

POLARIZED LIGHT

12214 03 **Brightness and color of the sky during the 2017 solar eclipse** [12214-3]

12214 04 **Spectropolarimetry of life: airborne measurements from a hot air balloon** [12214-4]

12214 05 **Depth-resolved color separation using diffuse reflectance polarization-based images** [12214-6]

12214 07 **Jones matrices and photography** [12214-5]

BIO-INSPIRED DESIGN

12214 08 **Structural colors of blue butterflies: from photonic nanoarchitectures to DNA (Invited Paper)**
[12214-8]

12214 09 **Understanding the anti-reflective glasswing butterfly for enhanced solar concentrator optics**
[12214-9]
