SPIE

Volume 12223

Proceedings of SPIE 0277-786X, V. 12223

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Interferometry XXI*, edited by Michael B. North-Morris, Katherine Creath, Rosario Porras-Aguilar, Proc. of SPIE 12223, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ON THE FRINGE

- 12223 02 **Heterodyne interferometer microscopy for high precision surface measurement (Invited Paper)** [12223-1]
- 12223 03 **Wavefront sensor fusion via shallow decoder neural networks for aero-optical predictive control** [12223-3]
- 12223 04 **Vision ray metrology: a new versatile tool for the metrology and alignment of optics** [12223-4]
- 12223 05 **Microwave-photonic dynamic frequency-swept interferometry for fast ranging** [12223-5]

CHARACTERIZATION AND TECHNIQUES

- 12223 06 **Characterization of surface texture-measuring optical microscopes using a binary pseudo-random array standard (Invited Paper)** [12223-6]
- 12223 07 **Binary pseudo-random array standards for calibration of 3D optical surface profilers used for metrology with aspheric x-ray optics** [12223-7]
- 12223 08 **Calibration, modeling, parameterization, and verification of the instrument transfer function of an interferometric microscope** [12223-8]
- 12223 09 **Fast locally adaptive method for optical fringe pattern filtering** [12223-9]
- 12223 0A **Determination of the characteristics of a self-built coherence scanning interferometer with a universal calibration artefact** [12223-10]

VIKRAM LECTURE

- 12223 0B **Holography: a 60 years journey with outstanding achievements (Invited Paper)** [12223-11]

BIOLOGICAL MEASUREMENT TECHNIQUES

- 12223 0E **Digital holographic microscopy for volumetric, three-dimensional characterization of bacterial motility** [12223-14]

- 12223 OG **Common-path grating-based interferometers with altered temporal and spatial coherence of illumination for quantitative phase microscopy and tomography** [12223-16]
- 12223 OH **Single-shot quantitative phase microscopy in common-path configuration** [12223-30]

NOVEL TECHNIQUES

- 12223 OI **Vibration insensitive fiber optic spectral interferometric probe for metrology of topography and thickness of multilayer samples (Invited Paper)** [12223-17]
- 12223 OJ **A new optical diagnostics tools for grading additive manufactured parts** [12223-18]
- 12223 OK **Optomechanical technologies for broadband inertial sensing** [12223-19]
- 12223 OL **A nanophotonic interferometer for small particle detection** [12223-20]
- 12223 OM **Variable shearing holography with geometric phase elements** [12223-21]

POSTER SESSION

- 12223 OO **Investigation on output variations of ring laser gyroscope in the presence of non-ideal sinusoidal dithering** [12223-23]
- 12223 OS **Design and implementation of a fiber-fed Fourier transform spectrograph for astronomical applications** [12223-29]
- 12223 OT **Modified Fizeau interferometer with the polynomial and FFT smoothing algorithm** [12223-26]
