Volume 12232

Proceedings of SPIE 0277-786X, V. 12232

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Earth Observing Systems XXVII*, edited by James J. Butler, Xiaoxiong (Jack) Xiong, Xingfa Gu, Proc. of SPIE 12232, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SESSION 1 PRELAUNCH CALIBRATION

- 12232 01 **Comparison of lamp and detector-based integrating sphere radiance calibrations using the NASA GSFC Filter Radiometer Monitoring System (FRMS) [12232-1]**
- 12232 02 **Comparison of BRDF results from two different scatterometers for instrument validation in support of satellite instrumentation [12232-2]**
- 12232 03 **Assessment of the pre-launch JPSS-4 VIIRS near-field response in an ambient environment [12232-3]**
- 12232 04 **Mitigation of sample dependent non-linearity in JPSS VIIRS day-night band radiometric calibration [12232-5]**

SESSION 2 NEW INSTRUMENTS AND TECHNOLOGIES

- 12232 05 **In-orbit real-time CMOS TDI detector validation and control to meet constant imaging quality over the mission life time [12232-6]**
- 12232 06 **Polarization uncertainty and error equivalent radiance for an ultra-broadband, wide field-of-view push-broom imaging radiometer [12232-7]**
- 12232 08 **Development and test of 3-mirror freeform telescope for Earth remote sensing applications [12232-9]**

SESSION 3 EOS INSTRUMENTS: MODIS AND AIRS

- 12232 0A **Trends in 20 years of AIRS data: indications of climate change? [12232-11]**
- 12232 0B **AIRS polarization and radiometric calibration update using data from the Aqua deep space maneuver [12232-12]**
- 12232 0C **Lunar calibration enhancements for MODIS collection 7 [12232-13]**
- 12232 0D **MODIS solar diffuser calibration strategies for the post orbital drift era [12232-14]**
- 12232 0E **Assessment of polarization sensitivity of Aqua MODIS using co-incident POLDER-3 polarized measurements over marine stratocumulus clouds [12232-15]**

- 12232 0F **The MODIS reflective solar band short-term stability assessment using the Spectro-Radiometric Calibration Assembly [12232-16]**
- 12232 0G **Detector linearity assessment of MODIS reflective solar bands using on-board calibrators [12232-17]**

SESSION 4 DATA PROCESSING AND ANALYTICAL TECHNIQUES

- 12232 0I **Assessing urban greenery using remote sensing [12232-19]**
- 12232 0K **Temporally Adjusted Atmospheric Compensation (TAAC) for space-based multispectral imagery [12232-59]**

SESSION 5 SNPP, JPSS, AND GOES-R MISSIONS I

- 12232 0L **Initial assessment of stray light contaminations in SNPP VIIRS RSB on-orbit calibrator views [12232-22]**
- 12232 0N **Striping analysis and correction for Suomi NPP VIIRS reflective solar bands [12232-24]**
- 12232 0P **S-NPP and NOAA-20 VIIRS day-night band on-orbit calibration and performance [12232-26]**

SESSION 6 SNPP, JPSS, AND GOES-R MISSIONS II

- 12232 0Q **NOAA-20 VIIRS operational radiometric calibration updates for the reflective solar bands [12232-27]**
- 12232 0R **Calibration of NOAA-20 VIIRS reflective solar bands with combined solar diffuser and lunar data for NASA Collection 2 L1B [12232-28]**

SESSION 7 LANDSAT 9

- 12232 0U **Early radiometric performance of Landsat-9 Thermal Infrared Sensor [12232-31]**
- 12232 0V **Early in mission Landsat 9 geometric performance [12232-32]**
- 12232 0W **Radiometric performance of the Landsat 9 Operational Land Imager over the first 8 months on orbit [12232-33]**
- 12232 0X **Landsat 9 Operational Land Imager2 (OLI2) on-orbit results of new special characterizations [12232-34]**

12232 0Y **Inter-calibration of Landsat 8 and 9 operational land imagers [12232-35]**

12232 0Z **OLI-2 telescope post-alignment performance [12232-36]**

SESSION 8 PACE OCI

12232 10 **Infrared spectral responses of the Ocean Color Instrument (OCI) pre-assembly and integration [12232-38]**

12232 11 **Spatial characterization of PACE OCI ETU using time-delay mode [12232-39]**

12232 12 **PACE OCI short-wave infrared detection assembly frequency-dependent linearity characterization and uncertainty analysis [12232-40]**

SESSION 9 VICARIOUS CALIBRATION I

12232 14 **Preliminary evaluation of the mirror-based empirical line method using FLARE system [12232-42]**

12232 15 **Ground viewing radiometer equipped with autonomous linear motion: two year field deployment summary and analysis [12232-43]**

12232 16 **Development of a commercial micro-spectrometer for remote field deployment [12232-44]**

SESSION 10 VICARIOUS CALIBRATION II

12232 17 **The University of Arizona's Radiometric Calibration Test Site (RadCaTS): lessons learned after 10 years in operation at Railroad Valley, Nevada [12232-45]**

12232 18 **Intercomparison of Landsat and Joint Polar Satellite System using Radiometric Calibration Network [12232-46]**

12232 19 **Additional characterization of Libya-4 in support of post-launch vicarious calibration of satellite imagers [12232-47]**

12232 1A **Evaluation of spectral band adjustment factors for cross-calibration of visible imagers [12232-48]**

POSTER SESSION

12232 1B **Pre-launch characterization of VIIRS straylight [12232-4]**

12232 1D **Improvements in the identification of CTIA saturation in NASA VIIRS L1B [12232-54]**

- 12232 1E **Assessment of VIIRS DNB on-orbit calibration performance using Dome C observations**
[12232-55]
- 12232 1G **JPSS-4 VIIRS polarization sensitivity performance comparison with heritage VIIRS sensors**
[12232-58]
- 12232 1H **Retrieval of chlorophyll-a concentration based on Sentinel-2 images in inland lakes** [12232-49]
- 12232 1I **Snow depth mapping in agricultural areas of Northeast China based on deep learning and multi-temporal Sentinel-1 data** [12232-50]
- 12232 1J **Research on water body extraction based on a joint probability model of convolution neural network and spectral information** [12232-51]
- 12232 1K **Deep learning combined with topology and channel features for road extraction from remote sensing images** [12232-52]
