SPIE

Volume 12239

Proceedings of SPIE 0277-786X, V. 12239
SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Unconventional Imaging and Adaptive Optics 2022*, edited by Jean J. Dolne, Mark F. Spencer, Proc. of SPIE 12239, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ATMOSPHERIC PROPAGATION AND CHARACTERIZATION II: JOINT SESSION WITH CONFERENCES 12237 AND 12239

12239 03 **Estimating the turbulence profile with differential scintillations measured by a Shack-Hartmann wave front sensor** [12239-2]

12239 04 **Quantifying surface layer moisture flux from MWIR imagery** [12239-4]

ATMOSPHERIC PROPAGATION AND CHARACTERIZATION IV: JOINT SESSION WITH CONFERENCES 12237 AND 12239

12239 05 **Profiling atmospheric turbulence using a non-cooperative target and a camera bank and validating with sonic anemometers** [12239-5]

12239 06 **Inner scale measurements with SMASH: Small Mobile Atmospheric Sensing Hartmann** [12239-6]

12239 07 **Comparison between SODAR and anemometer-based turbulence measurements** [12239-7]

UNCONVENTIONAL ADAPTIVE OPTICS

12239 08 **Influence of bandwidth error on the performance of adaptive optics systems for uncooperative beacons: plane wave and spherical wave analysis (Invited Paper)** [12239-8]

12239 0A **Solving coherent-imaging inverse problems using deep neural networks: an experimental demonstration** [12239-10]

DIGITAL HOLOGRAPHY AND LADAR

12239 0C **Effects of speckle decorrelation on motion-compensated, multi-wavelength, 3D digital holography (Invited Paper)** [12239-12]

12239 0D **Experimental validation of model-based digital holographic imaging using multi-shot data** [12239-14]

12239 0E **Laser range profiling: concept, simulation, and target identification** [12239-15]

AERO EFFECTS

12239 0F **Modal analysis of pressure fields on and around turrets with different protrusions** [12239-19]

12239 0G **The story of the airborne Aero-Optics Laboratory (Invited Paper)** [12239-16]

12239 0H **Neural network forecasting of transonic turbulent flow for adaptive optics control** [12239-17]

12239 0J **Effects of shock-related discontinuities on SHWFS measurements: modeling and simulation** [12239-20]

UNCONVENTIONAL IMAGING

12239 0K **Bridging the gap between electron and optical microscopy through neural network-enabled training and imaging** [12239-22]

12239 0M **Statistical and imaging comparisons of FFT-based phase screens and fractal-based phase screens** [12239-24]

12239 0N **Semi-analytical angular spectrum method in lensless digital inline holography: effects on resolution and detection of microparticles** [12239-29]
