PROCEEDINGS OF SPIE

International Conference on Advanced Algorithms and Neural Networks (AANN 2022)

Rajeev Tiwari
Editor

25–27 February 2022
Zhuhai, China

Organized by
Sichuan University (China)
Nanchang University (China)

Sponsored by
AEIC Academic Exchange Information Center

Published by
SPIE

Volume 12285

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Advanced Algorithms and Neural Networks (AANN 2022)*, edited by Rajeev Tiwari, Proc. of SPIE 12285, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510655751
ISBN: 9781510655768 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

INTERNATIONAL CONFERENCE ON ADVANCED ALGORITHMS AND NEURAL NETWORKS (AANN 2022)

12285 02 **An estimation method of wind power generation capacity of dry bulk cargo terminal** [12285-3]

12285 03 **Research on application of neural networks based on rough set in earthquake prediction** [12285-4]

12285 04 **Research on audio recognition and processing based on MLP model** [12285-5]

12285 05 **Application of clustering algorithm of data mining technology in network security detection** [12285-6]

12285 06 **A low power digital decimation filter circuit ASIC design for Sigma-Delta ADC** [12285-7]

12285 07 **Application of BP neural network in human factors analysis in dam break** [12285-8]

12285 08 **Vehicle-mounted multi-object tracking based on self-query** [12285-9]

12285 09 **MADDPG: an efficient multi-agent reinforcement learning algorithm** [12285-10]

12285 0A **PCB defect detection based on PP-YOLOv2** [12285-11]

12285 0B **A fast colorization method of grayscale image based on neural network** [12285-14]

12285 0C **Centralized group key management algorithm based on polynomial construction** [12285-15]

12285 0D **Research on person Re-ID based on joint attention mechanism** [12285-16]

12285 0E **Attention based discriminative visual object tracking algorithm** [12285-17]

12285 0F **A tunable Gm-C narrow-band complex filter for low intermediate frequency receivers** [12285-18]

12285 0G **Short-term forecasting of travel time utilizing deep learning approach** [12285-19]

12285 0H **Design of improved K-medoids algorithm for adaptive clustering number selection** [12285-20]

12285 0I **Study on localization detection method of indoor garage in weak texture scene** [12285-21]

12285 0J **Landslide detection based on deep learning and Google Earth imagery** [12285-23]

12285 0K **MPPT study of PV system based on improved PSO optimized BP neural network algorithm** [12285-24]

12285 0L **An airport object tracking method in foggy weather based on Siamese network** [12285-25]

12285 0M **Research on stock index forecast based on improved BP neural network model** [12285-26]

12285 0N **Region normalization for image inpainting based on dual-channel generative adversarial network** [12285-29]

12285 0O **A method to recognize spams based on Dynamic-LSTM** [12285-30]

12285 0P **LegalNLI: natural language inference for legal compliance inspection** [12285-32]

12285 0Q **Graph attention network with edge weights for question answering over knowledge graph** [12285-33]

12285 0R **Improved wind power output forecasting method based on combination of grey model and BP neural network** [12285-34]

12285 0S **Application of edge computing technology in dynamic diagnosis of power supply equipment of underwater junction box** [12285-35]

12285 0T **Transformer with sequence relative position for continuous sign language translation** [12285-36]

12285 0U **Effective application of feedforward neural networks in environmental economics: based on the comparison between traditional methods and neural network methods** [12285-38]

12285 0V **Capsule routing based on Dirichlet process mixture model** [12285-39]

12285 0W **Standardized design of database schema to eliminate structural redundancy** [12285-40]

12285 0X **Analysis on the co-movement effect between sectoral linkage and economic growth of agriculture in Fujian Province based on input-output model** [12285-41]

12285 0Y **Graph attentive transfer learning for few-shot session-based recommendation** [12285-42]

12285 0Z **SAR target recognition based on inverted residual and knowledge distillation** [12285-43]

12285 10 **Prediction of enhancer-promoter interaction based on ResNeXt** [12285-44]

12285 11 **Short-term prediction of BP neural network optimized by improved particle swarm optimization algorithm** [12285-45]

12285 12 **Genetic algorithm based hyper-parameters optimization for transfer convolutional neural network** [12285-46]

12285 13 **Multi-model ensemble for motor imagery classification using factorization machine** [12285-47]

12285 14 **Research on hail recognition based on multi-layer neural network** [12285-48]

12285 15 **Home appliance integrity detection model based on improved YOLOv4-Tiny** [12285-49]

12285 16 **A Roberta-Seq2Seq based model for Chinese text abstractive summarization** [12285-50]

12285 17 **Optimization of policy innovation effect of new energy vehicles driven by big data** [12285-52]

12285 18 **Research and algorithm design of higher vocational teacher evaluation system based on big data** [12285-53]

12285 19 **Deep reinforcement learning trading strategy based on lstm-a2c model** [12285-54]

12285 1A **A high-performance nuisance SMS recognition model** [12285-55]

12285 1B **Predictive uncertainties for multi-task learning network** [12285-56]

12285 1C **Short-term temperature prediction based on hybrid CEEMDAN, neural networks, and linear regression methods** [12285-57]

12285 1D **Research on transformer condition monitoring based on short time Fourier transform (STFT)** [12285-58]

12285 1E **Fast 3D body reconstruction of continuous 2D human joint data** [12285-59]

12285 1F **Cutting tool wear detection method based on fusion of ELM and wavelet packet decomposition** [12285-61]

12285 1G **Stock text topic recognition based on Stu-BERT** [12285-62]

12285 1H **Application of using R language to call SNNS neural network learning platform function in econometric prediction: take the price fluctuation prediction of gold and bitcoin as an example** [12285-63]

12285 1I **Analysis of multi-vehicle quantity in logistics system of intermediate warehouse of steel plant based on queuing theory optimization function** [12285-64]

12285 1J **Clothing classification method based on convolutional network and attention mechanism** [12285-65]

12285 1K **Research on green intelligent building design method based on advanced algorithm and BIM technology** [12285-66]

12285 1L **Analysis of decorative patterns of Minnan architectural ceramics based on digital image processing technology** [12285-67]

12285 1M **Analysis of anti-synchronization of multi-valued logical networks** [12285-68]
