PROCEEDINGS OF SPIE

16th International Workshop on Breast Imaging (IWBI2022)

Hilde Bosmans
Nicholas Marshall
Chantal Van Ongeval
Editors

22–25 May 2022
Leuven, Belgium

Organized by
The Committee of the International Workshop on Breast Imaging

Sponsored by
ab-CT (Germany) • Barco (Belgium) • Belgian Hospital Physicists Association (Belgium) • Benetec (Belgium) • Bracco (Italy) • GE Healthcare (France) • Hologic (United States) • Planmed (Finland) • Qaelum NV (Belgium) • RMS Medical Devices (Belgium) • Screenpoint Medical (Netherlands) • Siemens-Healthineers (Germany) • Therapixel (France) • Tromp Medical (Netherlands)

Published by
SPIE

Volume 12286

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

VIRTUAL CLINICAL TRIALS

12286 02 **Development of a 3D model of clinically relevant microcalcifications** [12286-38]

12286 03 **Using virtual clinical trials to assess objective image quality metrics in the task of microcalcification localization in digital mammography** [12286-34]

12286 04 **Optimized signal of calcifications in wide-angle digital breast tomosynthesis systems: a virtual clinical study** [12286-39]

12286 05 **Empirical detector model for simulated breast exams with a dedicated breast CT scanner** [12286-19]

12286 06 **Denoising of mammograms subject to structural and spatially-correlated noise: a virtual clinical trial** [12286-52]

NEW BREAST IMAGING TECHNIQUES AND TECHNOLOGIES; MULTI-MODALITY IMAGING

12286 07 **Simultaneous digital breast tomosynthesis and mechanical imaging in women recalled from screening: a preliminary analysis** [12286-29]

12286 08 **A sparse-readout quantitative PET scanner for breast cancer therapy optimization** [12286-54]

12286 09 **Iodine quantification in dual-energy mammography: linearity, bias and variability** [12286-46]

12286 0A **Lesion detection in contrast enhanced spectral mammography** [12286-24]

12286 0B **Prediction of Ki-67 expression of breast cancer with a multi-parametric model using MRI parameters from ultrafast DCE-MRI and DWI** [12286-35]

12286 0C **MRI breast segmentation using unsupervised neural networks for biomechanical models** [12286-18]

12286 0D **Refraction-contrast CT measurement system based on x-ray dark field imaging for µm-order scale imaging of breast tissue specimens** [12286-9]

EVALUATION OF BREAST SHAPE AND BREAST POSITIONING

12286 0E **Simultaneous pectoral muscle and nipple location in MLO mammograms, considering image quality assumptions** [12286-42]

12286 0F **Objective and subjective assessment of mammographic positioning quality** [12286-22]

12286 0G **iPhone TrueDepth cameras performance compared to optical 3D scanner for imaging the compressed breast shape** [12286-4]

12286 0H **Breast shape estimation and correction in CESM biopsy** [12286-43]

PHANTOMS FOR BREAST IMAGING

12286 0I **A homemade phantom for image quality evaluation in contrast enhanced spectral mammography (CESM)** [12286-3]

12286 0J **Evaluation of 3D printed contrast detail phantoms for mammography quality assurance** [12286-32]

ARTIFICIAL INTELLIGENCE IN BREAST IMAGING

12286 0K **Correspondence between areas causing recall in breast cancer screening and artificial intelligence findings** [12286-31]

12286 0L **Multiclass segmentation of suspicious findings in simulated breast tomosynthesis images using a U-Net** [12286-49]

12286 0M **Automated multi-class segmentation of digital mammograms with deep convolutional neural networks** [12286-51]

12286 0N **Comparison of deep learned and texture features in mammographic mass classification** [12286-40]

12286 0O **Including temporal changes information to an AI system for breast cancer detection to reduce false positive rate** [12286-10]

12286 0P **DeepLook: a deep learning computed diagnosis support for breast tomosynthesis** [12286-27]

12286 0Q **Sharing generative models instead of private data: a simulation study on mammography patch classification** [12286-45]

12286 0R **Analysis of the effects of image quality differences on CAD performance in AI-based benign-malignant discrimination processing of breast masses** [12286-6]

12286 0S **Prediction of pathological complete response with neoadjuvant chemotherapy by using radiomic features in breast ultrasound image** [12286-8]

12286 0T **Robustness of a U-net model for different image processing types in segmentation of the mammary gland region** [12286-11]

12286 0U **Synthetic data of simulated microcalcification clusters to train and explain deep learning detection models in contrast-enhanced mammography** [12286-2]

12286 0V **Automatic classification and detection of abnormalities in mammograms using deep learning** [12286-17]

12286 0W **Lesion detection in digital breast tomosynthesis: method, experiences and results of participating to the DBTex challenge** [12286-33]

12286 0X **Using deep learning for triple-negative breast cancer classification in DCE-MRI** [12286-44]

12286 0Y **Classification of intrinsic subtypes and histological grade for breast cancers by multimodality images** [12286-47]

BREAST CANCER SCREENING

12286 0Z **Classification and reviewing of prior screening mammograms from screen-detected breast cancer cases** [12286-37]

12286 10 **Evaluation of an AI system designed for breast cancer detection** [12286-7]

12286 11 **Prior mammogram review may affect the performance of radiology trainees in identifying breast cancers and normal cases** [12286-16]

12286 12 **Mammographic compression pressure as a predictor of interval cancer** [12286-28]

12286 13 **Tumor growth rate estimations in a breast cancer screening population** [12286-30]

RADIOMICS, RISK AND LESION DETECTABILITY IN BREAST IMAGING

12286 14 **Applying radiomics-based risk prediction models from digital mammography to digital breast tomosynthesis: a preliminary reliability survey** [12286-25]

12286 15 **Comprehensive study on the difference in radiomic feature values between for-processing and for-presentation mammographic images and their discriminative power regarding BI-RADS density classification** [12286-41]

12286 16 **Mammographic image metadata learning for model pretraining and explainable predictions** [12286-48]

12286 17 **External validation of an AI-driven breast cancer risk prediction model in a racially diverse cohort of women undergoing mammographic screening** [12286-55]

12286 18 **Spatial dependency of lesion detectability in digital breast tomosynthesis** [12286-50]

NOISE MEASUREMENTS IN BREAST IMAGING

12286 19 **Noise and spatial resolution characteristics of a clinical computed tomography scanner dedicated to the breast** [12286-20]

12286 1A **Normalized image noise as an absolute quantity for performance assessment in 2D mammography** [12286-23]

12286 1B **Suppressing noise correlation in digital breast tomosynthesis using convolutional neural network and virtual clinical trials** [12286-26]

12286 1C **Imposing noise correlation fidelity on digital breast tomosynthesis restoration through deep learning techniques** [12286-53]

12286 1D **Assessment of video frame interpolation network to generate digital breast tomosynthesis projections** [12286-36]
