

PROCEEDINGS OF SPIE

1st International Conference on UltrafastX 2021

Jiangbo She
Ping Chen
Editors

14–15 April 2022
Xi'an, China

Hosted by
Optica (United States)
Chinese Optical Society (China)
Chinese Society for Optical Engineering (China)
Xi'an Institute of Optics and Precision Mechanics, CAS (China)
RIKEN Center for Advanced Photonics (RAP) (Japan)

Organized by
Xi'an Institute of Optics and Precision Mechanics, CAS (China)
State Key Laboratory of Transient Optics and Photonics (China)

Co-organized by
Key Laboratory of Ultrafast Photoelectric Diagnostics Technology of CAS (China)
Key Laboratory of Optical Physics, Institute of Physics CAS (China)
Optica & SPIE Student Chapter of XIOPM (China)
Youth Innovation Promotion Association Group of XIOPM, CAS (China)
Ultrafast Science Editorial Office (China)
Acta Photonica Sinica Editorial Office (China)
WaveQuanta (China)

Volume 12291

Proceedings of SPIE 0277-786X, V. 12291

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *1st International Conference on UltrafastX 2021*, edited by Jiangbo She, Ping Chen, Proc. of SPIE 12291, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

1ST INTERNATIONAL CONFERENCE ON ULTRAFSTX 2021

High precision phase-space reconstruction method for emittance measurement of low energy high intensity electron beam [12291-2]

Field-free orientation of linear molecules by femtosecond co-rotating two-color circularly polarized laser pulses [12291-5]

Isolated attosecond light pulse generation from plasma surfaces at varying laser intensities and incidence angles [12291-11]

High-power all-fiber Mamyshev oscillator [12291-18]

Temporal compression of bunch train with picosecond spacing via THz-driven resonator [12291-19]

A novel jitter-free ultrafast electron beam length measurement driven by self-emission THz pulse [12291-20]

A proposal of multipulse-driven split-ring resonator for femtosecond resolution bunch length measurement [12291-38]

Theoretical investigation of THz radiation generation from air-plasma based on an improved FDTD algorithm [12291-53]
