**Volume 12297**

Proceedings of SPIE 0277-786X, V. 12297

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sixteenth Conference on Education and Training in Optics and Photonics: ETOP 2021*, edited by A. Danner, A. Poulin-Girard, N. Wong, Proc. of SPIE 12297, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## CURRICULUM DEVELOPMENT AND IMPROVEMENT IN OPTICS AND PHOTONICS II

---

- 12297 02 **Simulation led optical design assessments in upper division optics** [12297-1]
- 12297 03 **Optics in action: an overview of the advancements in information display education** [12297-2]
- 12297 04 **Optics manufacturing technician apprenticeships** [12297-3]
- 12297 05 **The PBL projects webinars: a pandemic creates new opportunities** [12297-4]
- 12297 06 **Max Planck School of Photonics: developing curriculum and outreach measures for a network of excellence** [12297-5]
- 12297 07 **Undergraduate program in nanoscience and nanoengineering: 5 years after the NSF grant** [12297-6]
- 12297 08 **A simple and ready to use code to simulate paraxial beam propagation** [12297-7]

---

## TEACHING OPTICS AND PHOTONICS USING NEW TECHNOLOGIES

---

- 12297 09 **Fostering flow and feedback in the classroom: increasing the successful implementation of active learning instruction** [12297-8]
- 12297 0A **Teaching silicon photonics using new technologies** [12297-9]
- 12297 0B **Remote laboratory activities for color science education** [12297-10]
- 12297 0C **Designing at-home experiment on the inverse-square law of light during pandemic: an action research** [12297-11]
- 12297 0D **A neural network to explore the Fresnel diffraction of a sharp opaque semi-infinite screen** [12297-12]
- 12297 0E **Utilizing open spaces for community-driven development of XR teaching applications in photonics** [12297-13]
- 12297 0F **Freely available optics lectures and a proposal for universal free online education** [12297-14]

---

**NEW METHODS, TOOLS, KITS, AND MODELS FOR PHOTONICS EDUCATION III**

---

- 12297 OG **Understanding resolution with Galileo's telescopes** [12297-15]
- 12297 OH **Computer-assisted training tool for evaluating operator's delivery skills during laser skin treatment** [12297-16]
- 12297 OI **Learning optics with a DIY polarization-based 3D display** [12297-17]
- 12297 OJ **Demonstration tools for changes in visible colors of transmitting light beams to be caused by optical rotation in syrup as optical active material and their predictions** [12297-18]
- 12297 OK **Discovering light: an alternative approach to the teaching of optics and photonics in primary and secondary school** [12297-19]
- 12297 OL **Birefringence in transparent household films: quantitative measurement and dazzling demonstrations** [12297-20]
- 12297 OM **Scalable laboratory experimentation using iLabs: the digital twins for experiments** [12297-21]
- 12297 ON **An optical prototype for simulating the laser delivery method in a typical LASIK device** [12297-22]

---

**ETOP CELEBRATES HOLOGRAPHY/50TH ANNIVERSARY OF DENNIS GABOR'S NOBEL PRIZE; STRATEGIES AND TOOLS FOR REMOTE LEARNING II**

---

- 12297 OO **Holography: 50th anniversary of Dennis Gabor's Nobel Prize: Part I. A historical perspective** [12297-23]
- 12297 OP **Holography: 50th anniversary of Dennis Gabor's Nobel Prize: Part II. An engineering perspective** [12297-24]
- 12297 OQ **Online training in the design-fabricate-test of silicon photonic circuits** [12297-25]
- 12297 OR **Hands on vs. VR lectures in times of the pandemic** [12297-26]
- 12297 OS **Hybrid teaching during a pandemic of advanced labs and their lecture classes** [12297-27]
- 12297 OT **Online learning combining virtual lectures, at-home experiments and computer simulations: a multidisciplinary teaching and learning approach** [12297-28]
- 12297 OU **Digital teaching in photonics: new possibilities for lab work training programs** [12297-29]

---

## NEW METHODS, TOOLS, KITS, AND MODELS FOR PHOTONICS EDUCATION II

---

- 12297 0V **20/21 Central Event in Spain of the International Day of Light: outreach and citizen engagement in time of pandemic** [12297-30]
- 12297 0W **Calling all artists, musicians, gamers, chefs, mechanics, and athletes** [12297-31]
- 12297 0X **TP3.0: How can virtual reality enrich practical teaching?** [12297-32]
- 12297 0Y **Project-based learning case in photonics engineering course: implementation of a spectrophotometer** [12297-33]
- 12297 0Z **Modular open-source toolbox for optics education (openUC2)** [12297-34]

---

## EDUCATION AND TRAINING IN MULTIDISCIPLINARY ENVIRONMENTS; LOW-COST EXPERIMENTS FOR HIGHER EDUCATION

---

- 12297 10 **Should optics be taught as continuing medical education to optometrists?** [12297-35]
- 12297 11 **Architectural lighting design education: teaching science to designers** [12297-36]
- 12297 12 **The magic of Stonehenge or how to predict solar and lunar eclipses** [12297-37]
- 12297 13 **Simple and low cost LED current-voltage curve tracer based on a general purpose microcontroller** [12297-38]
- 12297 14 **A very low-cost assembly for studying interference and diffraction in remote laboratories** [12297-39]
- 12297 15 **Homemade interferometer based on a non-ideal beam splitter and a home mirror** [12297-40]
- 12297 16 **Publication-driven research experience for undergraduates (REU) program in optics and photonics in the Philippines using circuit analogue-based research experiments** [12297-41]

---

## PLENARY: ETOP RETROSPECTIVE: AN UPDATE

---

- 12297 17 **Ray Davies, Photonics Academy of Wales at Bangor: a tribute** [12297-42]
- 12297 18 **ETOP retrospective: an update** [12297-43]

---

**POSTER SESSION**

---

- 12297 19 **The pros and cons of a self-paced introductory optics laboratory during the pandemic**  
[12297-44]
- 12297 1A **Optics LAB as a base for transdisciplinary knowledge between art and science** [12297-45]
- 12297 1B **Exploring network communication in classroom using a homemade optical fiber system**  
[12297-46]
- 12297 1C **Spatial filtering of structured light** [12297-47]
- 12297 1D **Coherent beam combining as a multidisciplinary education and training environment**  
[12297-48]
- 12297 1E **Optics professionals, get involved in fundamental physics, both in teaching and in research**  
[12297-49]
- 12297 1F **Multidisciplinary knowledge in teaching electrodynamics for undergraduate major in optics and photonics** [12297-50]
- 12297 1G **Defining sensitivity of integrated optical biosensors: a multidisciplinary lesson approach**  
[12297-51]
- 12297 1H **Enriching the course material for principle and technology of laser: structured light as an example** [12297-52]
- 12297 1I **A python tool to control and virtualize laser diodes characterization benches** [12297-53]

---

**OUTREACH EDUCATION IN OPTICS AND PHOTONICS II**

---

- 12297 1J **Creating effective virtual reality learning experiences: lessons learned** [12297-54]
- 12297 1K **“Santander es Luz” International Day of Light in Spain** [12297-55]
- 12297 1L **Outreaching optics during the COVID-19 Pandemic: from face-to-face to social networks**  
[12297-56]
- 12297 1M **Examples of optics and astronomy related activities for K-12 teachers** [12297-57]
- 12297 1N **Exploring optics: a kit and curriculum for teaching eighth graders about light waves and their applications** [12297-58]
- 12297 1O **Teaching the Scouts BSA Engineering Merit Badge with an optics and photonics emphasis**  
[12297-59]

---

**SPECIAL TOPIC: STRATEGIES AND TOOLS FOR REMOTE LEARNING I**

---

- 12297 1P **Designing a LEGO-based microscope for an educational setting** [12297-60]
- 12297 1Q **Virtual training on biomedical nanophotonics** [12297-61]
- 12297 1R **Multifunctional teaching studios for virtual classrooms during the pandemic and beyond** [12297-62]
- 12297 1S **Motivating and engaging lighting students when learning remotely** [12297-63]
- 12297 1T **Building an online collaborative environment for graduate researchers' development: the 2020 Montreal Photonics Networking Event** [12297-64]
- 12297 1U **Biophotonics computer app: fostering multidisciplinary distance self-paced learning with a user-friendly interface** [12297-65]

---

**NEW METHODS, TOOLS, KITS, AND MODELS FOR PHOTONICS EDUCATION I**

---

- 12297 1V **A multi-disciplinary project to combine electronic design and photonics** [12297-66]
- 12297 1W **Model of digital image sensor for optics curriculum: a mathematical derivation** [12297-67]
- 12297 1X **Integrated testlets in optics and photonics: a novel assessment tool and its online deployment** [12297-68]
- 12297 1Y **Lowering the entry barrier for novel photonic designers** [12297-69]
- 12297 1Z **Plasmonics for Dummies: a proposal for teaching fundamentals of plasmonics** [12297-70]
- 12297 20 **Demonstrating a modal approach to paraxial light propagation for photonics education** [12297-71]
- 12297 21 **Using the Lorentz Reciprocity Theorem with the Transfer Matrix Method in Python** [12297-72]
- 12297 22 **Interferometry training through a virtual learning environment** [12297-73]

---

**SPECIAL TOPIC: EDUCATION IN QUANTUM OPTICS**

---

- 12297 23 **Improving student learning: the dual roles of conceptual understanding and reasoning ability** [12297-74]
- 12297 24 **An inquiry approach to learning EM waves and quantum physics with photonics-based Nobel prizes** [12297-75]

- 12297 25 **15 years of Quantum Optics Educational Facility at the Institute of Optics, University of Rochester** [12297-76]
- 12297 26 **Quantum information science in the optics curriculum** [12297-77]
- 12297 27 **Teaching quantum concepts with classical optics** [12297-78]
- 12297 28 **Open source experiments in quantum photonics: an affordable approach** [12297-79]
- 12297 29 **Light emission problem in classical and quantum optics** [12297-80]

---

#### **CURRICULUM DEVELOPMENT AND IMPROVEMENT IN OPTICS AND PHOTONICS I**

---

- 12297 2B **Creating a quantum community in Latin America** [12297-82]
- 12297 2C **Undergraduate seminar course on physicists from underrepresented groups** [12297-83]
- 12297 2D **Curricular structure for teaching ethical and professional conduct in optics and photonics** [12297-84]
- 12297 2E **Optical surface profilometry as a means to build experimental research skills including planning** [12297-85]
- 12297 2F **Student learning through independent projects in introductory optics** [12297-86]
- 12297 2G **First-year seminar course on the people of medical imaging** [12297-87]

---

#### **OUTREACH EDUCATION IN OPTICS AND PHOTONICS I**

---

- 12297 2H **Communicating science worldwide with the International Day of Light** [12297-88]
- 12297 2I **A thematic review of the present photonic education** [12297-89]
- 12297 2J **Diamond: the game: a board game promoting scientific careers and experiences via synchrotron science** [12297-90]
- 12297 2K **Education and training for inter- and multidisciplinary applications: methods and techniques for educational outreach for inspiring photonics careers** [12297-91]
- 12297 2L **Biophotonics box: educational kit for multidisciplinary outreach activities in optics and photonics** [12297-92]
- 12297 2M **A pilot biophotonics outreach program** [12297-93]

12297 2N

**Pre-college students learn cross-cutting STEM concepts by building an optical imaging projector [12297-94]**
