PROCEEDINGS OF SPIE

Second International Conference on Digital Signal and Computer Communications (DSCC 2022)

Sandeep Saxena
Editor

8–10 April 2022
Changchun, China

Organized by
Changchun University of Science and Technology (China)

Sponsored by
AEIC Academic Exchange Information Center (China)

Published by
SPIE

Volume 12306

Proceedings of SPIE 0277-786X, V. 12306

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Second International Conference on Digital Signal and Computer Communications (DSCC 2022)*, edited by Sandeep Saxena, Proc. of SPIE 12306, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SESSION 1 MOBILE DIGITAL COMMUNICATION AND IMAGE SIGNAL PROCESSING

12306 02 **Direction finding for mixed independent and correlated signals in impulse noise** [12306-40]

12306 03 **Design and implementation of 5G network user interface function selection method based on knowledge map** [12306-68]

12306 04 **Research on scheduling strategy for shockwave-field wireless collection nodes** [12306-16]

12306 05 **Medical image encryption based on hyper-chaotic system** [12306-32]

12306 06 **Research and implementation of land use and cover change monitoring methods** [12306-58]

12306 07 **Multi-task offloading in mobile edge computing networks** [12306-59]

12306 08 **Design of real-time acquisition and visual monitoring system of human breathing signal** [12306-35]

12306 09 **Research based on image inpainting** [12306-74]

12306 0A **Research on ultrasonic-based long-distance and sub-millimeter real-time ranging system** [12306-70]

12306 0B **Research on the design of nationalized of intelligent 1553B communication module** [12306-76]

12306 0C **Design of air electromagnetic combat environment simulation system** [12306-65]

12306 0D **Research on 2 queues LRU cache in satellite network** [12306-26]

12306 0E **Design of a 4-channel high-reliability video processing module** [12306-51]

12306 0F **A time steps reduced successive cancellation list for short CRC-aided polar codes** [12306-23]

12306 0G **SanSim: an FPGA-based satellite network simulator** [12306-63]

12306 0H **Design and implementation of multi-source multi-standard audio processing system** [12306-49]

12306 0I **Audio-visual multimodal speech recognition method fusing audio and video data** [12306-42]

12306 0J **Intelligent bladder monitoring system based on STM32** [12306-60]

12306 0K **Analysis of intelligent fire-proof anti-theft security system based on image recognition** [12306-78]

12306 0L **Research on 4-PAM signal compensation technology for high-speed indoor FSOC based on FNN** [12306-44]

12306 0M **Study of the problem of energy-efficient patches under wireless sensors** [12306-48]

12306 0N **Research on parallel convolution algorithm for radar excitation signal of arbitrary length** [12306-22]

12306 0O **Compatibility evaluation and technical analysis of C-band broadcasting satellite receiving stations against 5G base station** [12306-36]

12306 0P **Research on automatic lane line extraction method based on onboard lidar point cloud data** [12306-72]

SESSION 2 ARTIFICIAL INTELLIGENCE ALGORITHMS AND TARGET DETECTION AND RECOGNITION

12306 0Q **Research on flow and planning of scenic spots based on multi-objective dynamic programming and NSGA-II** [12306-2]

12306 0R **5G marketing system based on multi-sensor collaborative filtering algorithm** [12306-71]

12306 0S **DDoS network attack detection technology based on double-stacked LSTM** [12306-4]

12306 0T **Research on semantic segmentation of UAV images based on deep learning** [12306-52]

12306 0U **Efficient aircraft object detection based on faster R-CNN in remote sensing images** [12306-73]

12306 0V **Network intrusion detection method based on one-dimensional CNN and GWO-SVM** [12306-43]

12306 0W **Pole-2p: Improved consensus algorithm based on Proof of Learning** [12306-14]

12306 0X **Semi-asynchronous federated learning algorithm based on clustering and training efficiency** [12306-55]

12306 0Y **Human action recognition based on attention mechanism and two-stream non-local graph convolution** [12306-64]

12306 0Z **Arbitrary-oriented object detection algorithm based on cross-layer integrating attention mechanism for remote images** [12306-45]

12306 10 **Research on multipath scheduling algorithm in time sensitive networks** [12306-3]

12306 11 **WiFi indoor positioning based on AP comprehensive algorithm** [12306-46]

12306 12 **Critical node identification for emergencies** [12306-34]

12306 13 **White blood cell detection based on improved YOLOv5s** [12306-31]

12306 14 **An improved MDNet target tracking algorithm** [12306-17]

12306 15 **Design of detection system based on low frequency noise of IGBT** [12306-47]

12306 16 **Research on non-contact heart rate detection method based on GP-XGBoost** [12306-57]

12306 17 **Design of massive marketing data mining system based on WeChat** [12306-12]

12306 18 **Research on rehabilitation training system for autistic children based on virtual reality** [12306-37]

12306 19 **Research on intelligent analysis system for judicial case judgment** [12306-10]

12306 1A **Enhanced attention one shot SAR ship detection algorithm based on cluster analysis and transformer** [12306-61]

12306 1B **Fingerprint image classification based on deep learning** [12306-54]

12306 1C **Research on wireless sensor network intrusion detection based on AL-SVM algorithm** [12306-11]

12306 1D **Research on intelligent energy-saving algorithm based on the integration of 5G low-carbon network service characteristics** [12306-28]

12306 1E **Research on space-based IR small target detection** [12306-67]

12306 1F **Epilepsy EEG classification and recognition algorithm based on PSO-CNN.** [12306-9]

12306 1G **Eye posture protection means for mobile phone based on apparatus vision analysis** [12306-24]

SESSION 3 COMPUTER INFORMATION PROCESSING AND MODELING PREDICTIVE ANALYSIS

12306 1H **Prediction of high stock transfer of listed companies based on deep learning** [12306-20]

12306 1I **Application analysis of petri network modeling in lower extremity auxiliary rehabilitation control system** [12306-29]

12306 1J **Douyin clues forensics analysis using knowledge graph** [12306-38]

12306 1K **Adaptive iterative clustering and decision tree for multimodal personal credit prediction** [12306-8]

12306 1L **The design of phase-modulation silicon all-dielectric coding metasurface in the S-band** [12306-13]

12306 1M **A CTR prediction model based on attention mechanism and logarithmic transformation** [12306-41]

12306 1N **A new two-dimensional coupled chaos and semi-tensor compressed sensing are used for joint compression encryption** [12306-30]

12306 1O **Driver behavior recognition based on attention module and bilinear fusion network** [12306-53]

12306 1P **A method for channel modeling and parameter calculation of 5 conductor three-core armored cable** [12306-7]

12306 1Q **Optimization research of information management system based on big data technology** [12306-75]

12306 1R **Research and practice of browser electronic data forensics based on SVM** [12306-69]

12306 1S **The signed domination number of generalized Sierpiński networks** [12306-15]

12306 1T **Predictive modeling of gasoline octane loss based on XGboost algorithm and multiple linear regression analysis** [12306-66]

12306 1U **Forecasting the dynamic of the COVID-19 pandemic by an adaptive Cauchy quantum-behaved particle swarm optimization algorithm** [12306-6]

12306 1V **Research on computer information management and application management** [12306-77]

12306 1W **Research on task scheduling based on improved particle swarm optimization in cloud computing environment** [12306-19]

12306 1X **Computer simulation prediction of the coordination binding ability of N-hybridized perhydroxycalix[4]arene to uranyl ions** [12306-39]

12306 1Y **BGA solder joint air bubbles under the background of interference threshold segmentation method** [12306-56]

12306 1Z **FPGA-based 10Msps high-speed encoder** [12306-5]

12306 20 **Research on semantic segmentation technology based on attention mechanism and residual learning** [12306-18]

12306 21 **Environment information collection system based on the Internet of Things** [12306-62]
