**Volume 12455**

Proceedings of SPIE 0277-786X, V. 12455

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Signal Processing and Communication Security (ICSPCS 2022)*, edited by Min Xiao, Lisu Yu, Proc. of SPIE 12455, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

## **SESSION 1 SIGNAL PROCESSING AND IMAGE INFORMATION ANALYSIS**

---

- 12455 02 **A novel micro-motion feature extraction and estimation method for multicomponent signal** [12455-33]
- 12455 03 **Reconstruction algorithm of sample missing signal based on factor analysis** [12455-40]
- 12455 04 **A novel approach to maneuvering target tracking based on random motion model using random Kalman filtering** [12455-22]
- 12455 05 **Traffic optimization method at five-way intersection based on green building materials and signal processing** [12455-29]
- 12455 06 **Sound source localization method based on dual microarrays and deep learning** [12455-13]
- 12455 07 **A non-convex optimization method for identification of cascaded nonlinear systems** [12455-45]
- 12455 08 **Signal detection based on deep learning in MIMO-OFDM systems** [12455-19]
- 12455 09 **ZY-3 satellite image based analysis of overall landscape patterns in Huai'an-Yangzhou section along the Grand Canal** [12455-28]
- 12455 0A **Simulation of direct water-air communication by using an acousto-optic method** [12455-41]
- 12455 0B **The design and implementation of I2C driver for wireless sensor terminal equipment** [12455-43]
- 12455 0C **Approximate expressions of target's scattering information** [12455-34]
- 12455 0D **Fingerprint map construction based on multi-chain interpolation** [12455-11]
- 12455 0E **Greyscale correction algorithm for stripe edge of filter array multispectral image** [12455-18]
- 12455 0F **Scale matching based remote sensing image cloud detection in southwest mountainous areas** [12455-2]
- 12455 0G **A high-performance Webshell detection model** [12455-27]
- 12455 0H **The design of wireless sensor terminal on Internet of Things of power transmission and transformation equipment** [12455-30]

- 12455 OI      **A robust unwrapping method for local noise phase** [12455-16]
- 12455 OJ      **Feature fusion method for speaker recognition based on embedding mechanism** [12455-26]
- 12455 OK      **A reduced-dimension post-Doppler STAP method based on tensor Tucker decomposition**  
[12455-36]

---

**SESSION 2      COMMUNICATION SECURITY AND INTELLIGENT NETWORK MONITORING**

- 12455 OL      **A multiple target detection radar for monitoring aircraft docking** [12455-46]
- 12455 OM      **Improved EMD-PSO-LSSVM train wireless network time-delay prediction** [12455-21]
- 12455 ON      **Research on application of radio physical layer key generation technology to proximity communication in 6G** [12455-32]
- 12455 OO      **Build intrusion detection model based on CNN and ensemble learning** [12455-4]
- 12455 OP      **A method of unbalanced twin auxiliary classifiers GAN for network intrusion based mutual information** [12455-17]
- 12455 OQ      **URL generative recognition method based on generative countermeasure network** [12455-38]
- 12455 OR      **Detecting malicious domain names from domain generation algorithms using bi-directional LSTM network** [12455-9]
- 12455 OS      **Reinforcement learning based access control architecture of Internet of Things big data peak clustering model** [12455-1]
- 12455 OT      **Research on lightweight encryption algorithm for IoT devices** [12455-31]
- 12455 OU      **Research and implementation of network defense and non-repeated substring pattern matching algorithm** [12455-42]
- 12455 OV      **Research on task offloading strategy of mobile edge computing in 5G environment** [12455-20]
- 12455 OW      **Research on distributed competition big data hierarchical storage method based on Ceph architecture** [12455-39]
- 12455 OX      **City administrative region tourism route recommendation algorithm based on naive Bayes data mining** [12455-14]
- 12455 OY      **Attack research of multilayer network vulnerability in the urban transport system** [12455-5]

12455 0Z **Digital car key scheme based on BLE SIM card** [12455-8]

12455 10 **Research on smart city architecture system based on cloud-edge-terminal and blockchain technology** [12455-10]
