2022 International Conference on Machine Learning, Cloud Computing and Intelligent Mining (MLCCIM) **MLCCIM 2022**

Table of Contents

Preface	xvi
Committees	xviii
Sponsors	xx
Reviewers	xxiii

Cloud Computing

Bandwidth Resources Prediction for Dynamic Networking Slicing Based on Time Series Analysis	1
<i>Haoxian Feng (Fujian Agriculture and Forestry University, China), Zhaogang Shu (Fujian Agriculture and Forestry University, China), Zhifang Zhang (Fujian Agriculture and Forestry University, China), Yuantao Wang (Fujian Agriculture and Forestry University, China), and Zhiwei Liu (Fujian Agriculture and Forestry University, China)</i>	
Optimal Design of Resource Discovery-Allocation-Transmission-Offloading Strategy in Mobile Edge Computing	6
<i>Rongzong Guo (Minnan Normal University, China), Yi Liu (Minnan Normal University, China), Ziqiong Lin (Minnan Normal University, China), Yifeng Zheng (Minnan Normal University, China), Wenjie Zhang (Minnan Normal University, China), and Jingmin Yang (Taipei University of Technology, China)</i>	
Application Study of UAV and IOT Technology in Intelligent Detection of Bridge Engineering	13
<i>Zhen Li (JianYan Testing Group Chongqing CO., Ltd, China) and Baile Zhang (JianYan Testing Group Chongqing CO., Ltd, China)</i>	

Intelligent Mining

A Cross-Mutation Global Harmony Search Algorithm Based on Lévy Flight	19
<i>Tianqi Liu (Wuhan Polytechnic University, China), Hua Yang (Wuhan Polytechnic University, China), Jing Yu (Wuhan Polytechnic University, China), and Kang Zhou (Wuhan Polytechnic University, China)</i>	

Entity Recognition of Power Fault Disposal Based on Attention Model	26
<i>Yupeng He (Information & Communication Company of Ningxia Electric Power, China), Shaohua Zhang (Information & Communication Company of Ningxia Electric Power, China), Jinpeng Zhang (Information & Communication Company of Ningxia Electric Power, China), Renhe Zhang (Information & Communication Company of Ningxia Electric Power, China), and Lin Zhu (Information & Communication Company of Ningxia Electric Power, China)</i>	
Traffic Flow Prediction Based on Spatio-Temporal Attention Block	32
<i>Junhan Liu (Shandong University, China), Hao Qu (Shandong University, China), Meng Chen (Shandong University, China), and Yunshun Gong (Shandong University, China)</i>	
An Adaptive Plotting Method for Large-Scale Symbols	40
<i>Zhinong Zhong (National University of Defense Technology, China), Hao Ni (National University of Defense Technology, China), Feng Liu (National University of Defense Technology, China), and Anran Yang (National University of Defense Technology, China)</i>	
Multi-hop Question Answering Model Based on Chinese Open Domain Knowledge Graph	46
<i>Bin Lang (The 52th Research Institute of China Electronics Technology Group Corporation, China), Yufeng Ma (The 52th Research Institute of China Electronics Technology Group Corporation, China), Yongjin Zhang (The 52th Research Institute of China Electronics Technology Group Corporation, China), Da Lei (The 52th Research Institute of China Electronics Technology Group Corporation, China), and Changjun Fan (The 52th Research Institute of China Electronics Technology Group Corporation, China)</i>	
Real-Time Medical Electronic Data Mining Based on Shapelet Pattern Recognition	55
<i>Yi Mao (Nanjing University of Posts and Telecommunications(NJUPT), China), Yun Li (Nanjing University of Posts and Telecommunications(NJUPT), China), Jingyu Han (Nanjing University of Posts and Telecommunications(NJUPT), China), and Yixin Chen (Washington University in St.Louis, USA)</i>	
Mining Hub Nodes Based on Fast Brandes Betweenness Centrality in a Weighted Complex Transportation Network	62
<i>Tao Liu (Nanjing Normal University, China; Jiangsu Police Institute, China), Weiyan Liu (Jiangsu Open University, China), and Jun Chen (Nanjing Tech University, China)</i>	
Application of Computer Intelligent Data Mining in Quantitative Analysis of Interior Space Design	68
<i>Feng Wang (ShanDong Youth University of political science, China), Jie Liu (Qilu Normal University, China), Yichen Qi (ShanDong Youth University of political science, China), and Xiangyun Wang (ShanDong Youth University of political science, China)</i>	
Evaluation Method Based on Random Forests for Empirical Algorithms of Penetration Effects	73
<i>Lei Zhang (Institute of Defense Engineering, AMS. PLA Luoyang, China), Jimin Wang (Hohai University, China), Mingwei Jiang (Hohai University, China), and Changzheng Ji (Hohai University, China)</i>	

A Joint Model Based on Prior Knowledge for War Research Report Information Extraction	79
<i>Jimin Wang (Hohai University, China), Bin Han (Hohai University, China), Lei Zhang (Institute of Defense Engineering, AMS. PLA, China), and Jiang Yang (Hohai University, China)</i>	
FF-HMM: A Novel Fluctuation Fusion Based Markov Model for Stock Prediction	85
<i>Ke Liang (National University of Defense Technology, China) and Shaojie Yang (National University of Defense Technology, China)</i>	
An Improved Variational Bayesian Adaptive Robust Kalman Filter	93
<i>Ding Li (National University of Defense Technology, China), Xudong Yu (National University of Defense Technology, China), Pengfei Jiang (National University of Defense Technology, China), and Wanli Jian (National university of Defense Technology, China)</i>	
Adaptive Robust Kalman Filter for AUV Polar Integrated Navigation	99
<i>Zhonghong Liang (National University of Defense Technology, China), Ming Tian (National University of Defense Technology, China), Zhikun Liao (National University of Defense Technology, China), Chongwei Wang (National University of Defense Technology, China), and Jingsui Li (National University of Defense Technology, China)</i>	
Penetration Depth Prediction of Infinite Thick Metal Target Based on Prior Knowledge	106
<i>Zhengchao Zhang (Institute of Engineering Protection IDS, AMS, PLA, China), Lei Zhang (Institute of Engineering Protection IDS, AMS, PLA., China), and Jimin Wang (College of Computer and Information Hohai University, China)</i>	

Machine Learning

Segmentation and Edge Detection for Ionogram Automatic Scaling	115
<i>Yijie Zheng (Beijing Jiaotong University, China), Xiaoqing Wang (Beijing Jiaotong University, China), Yefei Luo (Beijing Jiaotong University, China), Hao Tian (Beijing Jiaotong University, China), and Ziwei Chen (Beijing Jiaotong University, China)</i>	
A COVID-19 Control Policy Evaluation and Prediction Method Based on Clustering	121
<i>Yunxiao Guo (National University of Defense Technology, China), Ziang Zhao (Kunming Medical University Haiyuan College, China), Han Long (National University of Defense Technology, China), and Xinjia Xie (National University of Defense Technology, China)</i>	
A NoC-Oriented Prediction Mechanism for Communication Behavior of Program	128
<i>Yi Li (China Xi'an Satellite Control Center, China), Yuanyuan Li (China Xi'an Satellite Control Center, China), Xiaojun Du (China Xi'an Satellite Control Center, China), and Hong Zhang (China Xi'an Satellite Control Center, China)</i>	
Short-Term Photovoltaic Power Forecasting using the Combined KSVD and LSTM Method	134
<i>Jiemeng Wang (Lanzhou Jiaotong University, China) and Jun Li (Lanzhou Jiaotong University, China)</i>	
Research on Node Similarity in Attention Flow Network Based on GAT	139
<i>Manfu Ma (Northwest Normal University, China), Yiding Zhang (Northwest Normal University, China), Yong Li (Northwest Normal University, China), and Jingpeng Wu (Northwest Normal University, China)</i>	

A Structural Expansion Method of Fuzzy Cognitive Map Under Cognitive Limitations	146
<i>Huijian Han (Shandong University of Finance and Economics, China), Zongwei Li (Shandong University of Finance and Economics, China), Lei Li (Shandong University of Finance and Economics, China), and Rui Zhang (Shandong University of Finance and Economics, China)</i>	
A Novel Approach for Coral Image Classification with Dual-Branch Feature Fusion Neural Network	155
<i>Dandan Bai (Fujian Agriculture and Forestry University, China), Jiaxiang Lin (Fujian Agriculture and Forestry University, China), Yigong Huang (Fujian Agriculture and Forestry University, China), Changying Wang (Fujian Agriculture and Forestry University, China), and Jianwei Wu (Ministry of Natural Resources, China)</i>	
Application of Extended Kernel Recursive Least Squares Method Based on Unscented Kalman Filter in Short-Term Photovoltaic Power Prediction	161
<i>Runjie Wang (Lanzhou Jiaotong University, China) and Jun Li (Lanzhou Jiaotong University, China)</i>	
Improved N-Gram Algorithm for Unknown Malware Detection	165
<i>Jianliang Dou (Hainan Normal University, China), Yu Zhang (Guangdong Polytechnic Normal University, China), Yuanquan Shi (Huaihua University, China), and Liyan Jiang (Hainan Normal University, China)</i>	
A Weighted Random Routing Hopping Scheme Based on Network State Constraints	171
<i>Zhaoyang Li (Zhengzhou University, China), JingLei Tan (PLA Information Engineering University, China), Ruiqin Hu (PLA Information Engineering University, China), Hongqi Zhang (PLA Information Engineering University, China), Fenggang Chen (PLA Information Engineering University, China), and Xiaoyu Xu (Academy of People's Armed Police, China)</i>	
Tibetan Automatic Word Segmentation Method Based on Deep Learning	175
<i>Gadeng Luosang (Tibet University, China) and Nuo Qun (Tibet University, China)</i>	
A Reasonable Investment Method Based on Multiple Factors Time Series	179
<i>Yunxiao Guo (National University of Defense Technology, China), Runhao Zhao (National University of Defense Technology, China), Xiaying Ma (National University of Defense Technology, China), Chenglan Zhu (National University of Defense Technology, China), and Xinjia Xie (National University of Defense Technology, China)</i>	
Microservice Resource Optimization Mechanism Based on the Model of Curve Inflection Point	188
<i>Dong Xu (Zhengzhou University, China), YingJie Yang (PLA Information Engineering University, China), RuiQin Hu (PLA Information Engineering University, China), and HongQi Zhang (PLA Information Engineering University, China)</i>	
On the Split Delivery Vehicle Routing Problem Based on Python	192
<i>Xiaonian He (Hunan International Economics University, China)</i>	

Design and Analysis of a Modified ZNN with Dynamic Parameter for Time Varying Generalized Sylvester Equation	196
<i>Yongsheng Zhang (Hunan International Economics University, China), Jifeng Chen (Hunan International Economics University, China), Yongjun He (Hunan Normal University, China), Hao Peng (Hunan International Economics University, China), and Ping Li (Hunan International Economics University, China)</i>	
Optimal Fusion-Based Asymmetric Two-Stream Networks for Multispectral Image Pedestrian Detection	200
<i>Wenli Zhang (Beijing University of Technology, China), Ning Wang (Beijing University of Technology, China), Guoqiang Cui (Beijing University of Technology, China), Xinyu Peng (Beijing University of Technology, China), and Jian Tai (Beijing University of Technology, China)</i>	
A Document Retrieval Method Based on Knowledge Map	206
<i>Shiqing Cheng (Unit 31511, China), Siyu Wang (Unit 31511, China), Congliang Luo (National University of Defense Technology, China), and Renping Chen (Unit 31511, China)</i>	
A Novel Scene Matching Algorithm via Deep Learning for Vision-Based UAV Absolute Localization	211
<i>Yan Ren (School of Artificial Intelligence Shenyang Aerospace University Shenyang, China) and Zhiqiang Wang (School of Automation Shenyang Aerospace University Shenyang, China)</i>	
A Knowledge Tracing Model Based on Attention Mechanism	219
<i>Jingjiang Li (University of Chinese Academy of Sciences, China), Chong Jiang (University of Chinese Academy of Sciences, China), and Shiwei Ye (University of Chinese Academy of Sciences, China)</i>	
Multi Sensor Gesture Recognition System Based on MCU	225
<i>Yong Jiang (Shandong Institute of Commerce and Technology, China), Jun Wang (Shandong Institute of Commerce and Technology, China), and Liangliang Wang (Shandong Institute of Commerce and Technology, China)</i>	
Multi-Feature PM2.5 Prediction with ARIMA-LSTM	229
<i>Junwei Xiao (Wuhan Polytechnic University, China), Qingfang Wang (Wuhan Polytechnic University, China), Jiawang Cui (Wuhan Polytechnic University, China), and Jing Yu (Wuhan Polytechnic University, China)</i>	
Multi-Granularity Perceptual Ensemble Learning Model with An Application	234
<i>Xueqin Huang (Science and Technology on Information Systems Engineering Laboratory, National University of Defense Technology, China), Xianqiang Zhu (Science and Technology on Information Systems Engineering Laboratory, National University of Defense Technology, China), Xiang Xu (Science and Technology on Information Systems Engineering Laboratory, National University of Defense Technology, China), Mengting Zhu (Science and Technology on Information Systems Engineering Laboratory, National University of Defense Technology, China), Aixin Nian (Science and Technology on Information Systems Engineering Laboratory, National University of Defense Technology, China), and Yuanyuan Guo (Science and Technology on Information Systems Engineering Laboratory, National University of Defense Technology, China)</i>	

A Novel Video Quality Evaluation Method Based on Coarse-to-Fine Strategy in Traffic Scenario	243
<i>Huafeng Wang (North China University of Technology, China), Haoyu Chen (North China University of Technology, China), Huanqing Tu (North China University of Technology, China), and Yawen Yang (North China University of Technology, China)</i>	
SV-UNet:A Lightweight Fracture Segmentation Model for Logging Images	248
<i>Xian Bai (North China University of Technology, China), Huafeng Wang (North China University of Technology, China), and Yuehai Wang (North China University of Technology, China)</i>	
An Autoencoder Aided Dynamic Inner Principal Component Analysis for Wind Turbine Process Monitoring	253
<i>Zhenheng Wang (Hunan University of Science and Technology, China), Wenxin Yu (Hunan University of Science and Technology, China), and Junnian Wang (Hunan University of Science and Technology, China)</i>	
Inverse-Projection Transformation Based Feature Learning Method for Edge Intelligence Approaches Under Different Working Conditions	258
<i>Xuren Gong (Academy of Military Sciences, China), Jianfeng Zhang (National University of Defense Technology, China), Yusen Zhang (National University of Defense Technology, China), Yusong Tan (National University of Defense Technology, China), and Jie Song (Joint Logistics Support Force 921 Hospital, China)</i>	
LoBERTa: A Composition Named Entity Recognition Method Based on Longformer and DeBERTa Model	266
<i>Yida Wang (Xi'an Jiaotong-Liverpool University, China), Yaxuan Zheng (Xi'an Jiaotong-Liverpool University, China), Jiayuan Zhu (Xi'an Jiaotong-Liverpool University, China), and Yaqi Yu (Xi'an Jiaotong-Liverpool University, China)</i>	
Computer-Aided Diagnosis of COVID-19 Radiography using Deep Transfer Deep Learning Model TLDeNet	271
<i>Yutong Yao (Xi'an Jiaotong-liverpool University, China) and Xingjie Zuo (Xi'an Jiaotong-liverpool University, China)</i>	
Regression Testing Prioritization Technique Based on Historical Execution Information	276
<i>Rongshang Chen (Xiamen University of Technolog, China), Zhengxinchao Xiao (Xiamen University of Technology, China), Lei Xiao (Xiamen University of Technology, China), and Zilong Li (Xiamen University of Technology, China)</i>	
Motion Accumulation and Selection Network for Video Understanding	282
<i>Huafeng Wang (North China University of Technology, China) and Hanlin Li (North China University of Technology, China)</i>	
Post-War Assessment Method for Over-The-Horizon Air Combat	285
<i>Cheng Zhang (The 52th Research Institute of China Electronics Technology Group Corporation, China), Qing Xia (The 52th Research Institute of China Electronics Technology Group Corporation, China), Chongxiao Qu (The 52th Research Institute of China Electronics Technology Group Corporation, China), Changjun Fan (The 52th Research Institute of China Electronics Technology Group Corporation, China), and Liaoyuan Zhu (The 52th Research Institute of China Electronics Technology Group Corporation, China)</i>	

Improving Nuclei Segmentation in Pathological Image via Reinforcement Learning	290
<i>Mengjiao Yao (Northwestern Polytechnical University, China), Xiang Gao (Northwestern Polytechnical University, China), Jiabin Wang (Northwestern Polytechnical University, China), and Min Wang (Jiangsu Siyuan integrated circuit and Intelligent Technology Research Institute Co., Ltd, China)</i>	
An Improved MIMU Joint Noise Reduction Method	296
<i>Zhiwen Ning (National University of Defense Technology, China), Meiping Wu (National University of Defense Technology, China), and Xianfei Pan (National University of Defense Technology, China)</i>	
Effect Verification of a Feature Extraction Method Based on Graph Convolutional Networks	301
<i>Yunzhe Zhu (National University of Defense Technology, China), Yusong Tan (National University of Defense Technology, China), and Qingbo Wu (National University of Defense Technology, China)</i>	
Deep Convolutional Dictionary Learning for Multi-Modal Image Denoising	308
<i>Xiaojing Yang (LiaoCheng University, China), Mengdi Sun (LiaoCheng University, China), Mingzhu Zhang (LiaoCheng University, China), and Zhonggui Sun (LiaoCheng University, China)</i>	
Attention Mechanism-Based CNN for Surface Damage Detection of Wind Turbine Blades	313
<i>Qi Chen (Hunan University of Science and Technology, China), Zhao-Hua Liu (Hunan University of Science and Technology, China), and Ming-Yang Lv (Hunan University of Science and Technology, China)</i>	
Optimal Layout of Rotor-Bearing System Sensors Based on Fault Diagnosability	320
<i>Yuwei Liu (National University of Defense Technology, China), Yuqiang Cheng (National University of Defense Technology, China), Liangchao Guo (National University of Defense Technology, China), Shuming Yang (National University of Defense Technology, China), and Han Long (National University of Defense Technology, China)</i>	
Video Moving Objects Detection by Minimizing the Partial Sum of Singular Values of the Matrix	328
<i>Faguang Chang (National University of Defense Technology, China), Qian Yin (National University of Defense Technology, China), Zhen Dong (National University of Defense Technology, China), Zhengbin Wang (National University of Defense Technology, China), and Liang Li (National University of Defense Technology, China)</i>	
Adagard Accelerated Gradient with Weight Decay for Adversarial Attacks	333
<i>Jiajun Tang (Rocket Force University of Engineering, China), Zhong Wang (Rocket Force University of Engineering, China), and Qingdong Wei (Rocket Force University of Engineering, China)</i>	
CSAFNet: Channel Spatial Attention Fusion Network for RGB-T Semantic Segmentation	339
<i>Xiaozhong Tong (National University of Defense Technology, China), Junyu Wei (National University of Defense Technology, China), Runze Guo (National University of Defense Technology, China), and Congnan Yang (National University of Defense Technology, China)</i>	

Application of Reinforcement Learning in SINS/GNSS/DVL Integrated Navigation	346
<i>Xiangyuan Li (National University of Defense Technology, China), Xuesong Tang (PLA unit 63895, China), Xingshu Wang (National University of Defense Technology, China), Wenfeng Tan (National University of Defense Technology, China), Jiaxing Zheng (National University of Defense Technology, China), and Yingwei Zhao (National University of Defense Technology, China)</i>	
Tau Content Prediction Based on Brain Network MLP-att Model	353
<i>Li Sun (Donghua University, China), Quanqian Peng (Donghua University, China), Chen Qian (Donghua University, China), and Jiyun Li (Donghua University, China)</i>	
Cascading Dynamics of Invulnerable Complex Networks Based on Markov Decision	359
<i>Siyuan Wang (National University of Defense Technology, China) and Fei Cai (National University of Defense Technology, China)</i>	
Research on Parkinson's Disease Diagnosis Based on Improved Particle Swarm Optimization Support Vector Machine Algorithm	365
<i>Qiong Zhang (Nantong Institute of technology, China), Hu Zhao (Nantong Institute of technology, China), YiLiu Hang (Nantong Institute of technology, China), and Xi Lu (Nantong Institute of technology, China)</i>	
A Scalable Deep Reinforcement Learning Algorithm for Partially Observable Pursuit-Evasion Game	370
<i>Yihao Sun (National University of Defense Technology, China), Chao Yan (National University of Defense Technology, China), Zhen Lan (National University of Defense Technology, China), Bo Lin (National University of Defense Technology, China), Han Zhou (National University of Defense Technology, China), and Xiaojia Xiang (National University of Defense Technology, China)</i>	
An Improved Method for Infrared Vehicle and Pedestrian Detection Based on YOLOv5s	377
<i>Huanxi Zhao (Xiamen University of Technology, China), Zurong Liang (Xiamen University of Technology, China), Dehua Cai (Xiamen University of Technology, China), and Yi Wang (Xiamen University of Technology, China)</i>	
Semi-Supervised Intrusion Detection Joint Extreme Value Theory and Conditional Auto-Encoder for Smart Grid	384
<i>Lei Chen (Hunan University of Science and Technology Xiangtan, China), Fadong Chen (Hunan University of Science and Technology Xiangtan, China), Derun Zhao (Hunan University of Science and Technology Xiangtan, China), Xuewen He (Hunan University of Science and Technology Xiangtan, China), and Wenbo Lv (Hunan University of Science and Technology Xiangtan, China)</i>	
Consciousness Neural Network for Path Tracking Control of Floating Objects at Sea	391
<i>Minghao Zhao (University of Jinan, China), Tianchi Zhang (Chongqing Jiaotong University, China), and Jing Zhang (University of Jinan, China)</i>	

Illumination Parameter Estimation of Outdoor Scene using BP Neural Network <i>Rui Zhang (Shandong University of Finance and Economics, China; Financial Information Engineering Technology Research Centre of Shandong Province, China), Mingrui Wang (Shandong University of Finance and Economics, China), Huijian Han (Shandong University of Finance and Economics, China; Financial Information Engineering Technology Research Centre of Shandong Province, China), Wenxia Tong (Shandong University of Finance and Economics, China), and Jing Fang (Headquarters of China Minsheng Bank Corporation, China)</i>	398
Blind Recognition of LDPC Codes by Average LLR in Multi-Channels Based on CNN <i>Yongjie Zhao (National University of Defense Technology, China), Longqing Li (National University of Defense Technology, China), Junhao Ba (National University of Defense Technology, China), Changxin Zhang (National University of Defense Technology, China), Zongmin Liu (National University of Defense Technology, China), Han Long (National University of Defense Technology, China), and Zhiping Huang (National University of Defense Technology, China)</i>	404
User Role Discovery Method in Virtual Community Based on DBSCAN Clustering <i>Chi Xu (Zhoukou normal university), Zhongyuan Hua (Wuhan Textile University, China), HuaYong Xiao (Wuhan Textile University Wuhan, China), and Xianteng Gu (Wuhan Textile University, China)</i>	412
Cooperation Pattern Exploration for Multi-Agent Reinforcement Learning <i>Chenran Zhao (National University of Defense Technology, China), Kecheng Peng (National University of Defense Technology, China), and Xiaogun Cao (National University of Defense Technology, China)</i>	418
Event-Processing Model for Smart Contracts with Oracle and EEG <i>Xiaofang Jiang (Beihang University, China) and Wei-Tek Tsai (Beihang University, China)</i>	425
A Counting Method Based on Deep Reinforcement Learning Combined with Generative Adversarial Network <i>Zhoubao Sun (Nanjing Audit University, China) and Yi Zhu (Nanjing Audit University, China)</i>	431
A Method for Image Steganography Based on NICE Model <i>Zhuo Zhang (Key Laboratory of PAP for Cryptology and Information Security, China), Hongjun Wang (ShanDong People Armed Police, China), and Jia Liu (Key Laboratory of PAP for Cryptology and Information Security, China)</i>	435
UAV Cooperative Search Based on Multi-Agent Generative Adversarial Imitation Learning <i>Xiang Yu (The 52th Research Institute of China Electronics Technology Group Corporation, China), Wenkun Liao (The 52th Research Institute of China Electronics Technology Group Corporation, China), Chongxiao Qu (The 52th Research Institute of China Electronics Technology Group Corporation, China), Qihao Bao (The 52th Research Institute of China Electronics Technology Group Corporation, China), and Zhiwei Xu (The 52th Research Institute of China Electronics Technology Group Corporation, China)</i>	441
Optimization Method of SLAM Mapping Based on Plane Fitting and Intensity Information <i>Na Li (North China University of Technology, China) and Gozho Amanda (North China University of Technology, China)</i>	447

A Survey of Semantic Segmentation Methods in Traffic Scenarios	452
<i>Yuanhui Guo (Jilin University, China) and Biao Yang (Changzhou University\ China)</i>	
Distributed Optimization and Sampling with Constraints from Machine Learning	458
<i>Yi Feng (Shanghai University of Finance and Economics, China) and Xiao Wang (Shanghai University of Finance and Economics, China)</i>	
An Approach to Rating Prediction for Personality Recommendation via Attention Mechanism and Denoising Autoencoder	463
<i>Hui Zhu (Jiangxi University of Finance & Economics, China), Zhongshen Qian (Jiangxi University of Finance & Economics, China), Zulai Ye (Jiangxi University of Finance & Economics, China), and Ding Zhang (Jiangxi University of Finance & Economics, China)</i>	
Analysis of Lyapunov Chaos in Game Dynamics	470
<i>Yishu Wang (Shanghai University of Finance and Economics, China) and Xiao Wang (Shanghai University of Finance and Economics, China)</i>	
Noisy Label Rectification using Weighted Fusion for Deep Unsupervised Salient Object Detection	478
<i>Xiaohui Dong (Changzhou University, China) and Yi Liu (Changzhou University, China)</i>	
Employing Offset-Attention for 3D Few-Shot Semantic Segmentation	482
<i>Lujun Zhang (Changzhou University, China), Shoukun Xu (Changzhou University, China), and Yi Liu (Changzhou University, China)</i>	
The Design and Implementation of the Analysis and Visualization System of Deformation Monitoring By InSAR Based on HBase	486
<i>Qun Su (Xiamen University of Technology, China), Dongkun Li (Xiamen University of Technology, China), Xiaoying Cai (Xiamen University of Technology, China), Yuanrong He (Xiamen University of Technology, China), and Yingchuan Wen (Xiamen University of Technology, China)</i>	
Study on Chl-a Concentration in Yuehai National Wetland Park using Remote Sensing Data	493
<i>Chenyang Wei (Xiamen University of Technology, China), Peng Yu (Xiamen University of Technology, China), Xiaojing Zhong (Jimei University, China), Yongfei Song (Ningxia Survey and Monitor Institute of Land and Resources, China), Yuanrong He (Xiamen University of Technology, China), and Zujin Peng (Xiamen University of Technology, China)</i>	
Perturbed Multiplicative Weights Update in Learning of Game	498
<i>Yi Feng (Shanghai University of Finance and Economics, China) and Xiao Wang (Shanghai University of Finance and Economics, China)</i>	
Identifying Categories of Domain Names by using Deep Learning Methods	504
<i>Zhenzhong Zhang (The 6th Research Institute of China Electronic Corporations, China; Xidian University, China), Majing Su (The 6th Research Institute of China Electronic Corporations, China), Zhenjing Bao (The 6th Research Institute of China Electronic Corporations, China), Xudong Liu (The 6th Research Institute of China Electronic Corporations, China), Yun Yao (The 6th Research Institute of China Electronic Corporations, China), and Shen Su (Cyberspace Institute of Advanced Technology, Guangzhou University, China)</i>	

Deep Attention Factorization Machine Network for Distributed Recommendation System	511
<i>Jingmin Li (Wuyi University, China) and Mingfen Wu (Wuyi University, China)</i>	
Design of an Official Document Multi Machine Retrieval System Based on NLP	518
<i>Shiqing Cheng (Unit 31511, China), Siyu Wang (Unit 31511, China), Renping Chen (Unit 31511, China), and Congliang Luo (National University of Defense Technology, China)</i>	
Author Index	525
