2022 IEEE 19th International Conference on Mobile Ad Hoc and Smart Systems (MASS)

MASS 2022

Table of Contents

Message from the General Chairs ..... **xx**
Message from the Program Chairs ..... **xxi**
Workshop - REUNS 2022 Chairs Message ..... **xxii**
Workshop - IoTEF 2022 Chairs Message ..... **xxiii**

AI/ML based Smart Design 1

Local Performance Trade-Off in Heterogeneous Federated Learning with Dynamic Client Grouping 1
Yingchi Mao (Hohai University, China), Jun Wu (Hohai University, China), Yangkun Cheng (Hohai University, China), Ping Ping (Hohai University, China), and Jie Wu (Temple University, USA)

Trip Planning for Autonomous Vehicles with Wireless Data Transfer Needs Using Reinforcement Learning 10
Yousef AlSaqabi (University of Southern California, USA) and Bhaskar Krishnamachari (University of Southern California, USA)

Fusing WiFi Signals and Camera for Driver Activity Recognition based on Deep Learning 18
Yunhao Bai (The Ohio State University), Guoyu Chen (The Ohio State University), and Xiaorui Wang (The Ohio State University)

Association of IoT Devices Using Fuzzy C-Means Clustering and Apriori Algorithms 27
Haesik Kim (VTT Technical Research Centre of Finland, Finland)

Adaptive Task Offloading for Mobile Aware Applications Based on Deep Reinforcement Learning 33
Xianming Liu (Tianjin University, China), Chaokun Zhang (Tianjin University, China), and Shen He (Tianjin University, China)

Algorithms and Theory 1

Spatio-Temporal Mobile Cooperative Charging for Low-Power Wireless Rechargeable Devices 40
Lijie Xu (Nanjing University of Posts and Telecommunications, China), Haodong Sha (Nanjing University of Posts and Telecommunications, China), Mingxiang Da (Nanjing University of Posts and Telecommunications, China), Jia Xu (Nanjing University of Posts and Telecommunications, China), and Haipeng Dai (Nanjing University, China)

Coalition Formation Game in the Cross-Silo Federated Learning System 49
Suhan Jiang (Temple University) and Jie Wu (Temple University)

A Deep Learning Assisted Approach for Minimizing the Age of Information in a WiFi Network 58
Suyang Wang (Illinois Institute of Technology, USA) and Yu Cheng (Illinois Institute of Technology, USA)

An Improved Spray-and-Wait Routing Algorithm Based on Social Relationship between Nodes in DTN 67
Jianqun Cui (Central China Normal University, China), Huanhuan Chen (Central China Normal University, China), Yanan Chang (Central China Normal University, China), Ziyi Chen (Central China Normal University, China), Shuang Gong (Central China Normal University, China), and Yang Yi (Northeastern Illinois University, USA)

PPGC: A Path Planning System by Grid Caching based on Cloud-Edge Collaboration for Unmanned Surface Vehicle in IoT Systems 74
Linjie Yan (Ningbo University, China), Haiming Chen (Ningbo University, China), Youpeng Tu (Ningbo University, China), Xinyan Zhou (Ningbo University, China), and Steve Drew (University of Calgary, Canada)

Security and Privacy 1

Solution Probing Attack Against Blockchain-Based Quality-Aware Crowdsourcing Platforms 81
Heng Wang (Nanjing University, China), Yunlong Mao (Nanjing University, China), and Sheng Zhong (Nanjing University, China)

Multi-Task Learning Framework for Detecting Hashtag Hijack Attack in Mobile Social Networks 90
Zheng Qu (Shanghai University of Finance and Economics, China), Chen Lyu (Shanghai University of Finance and Economics, China), and Chi-Hung Chi (Nanyang Technological University, Singapore)

An Intrusion Alarm Data Association Analysis Method 99
Xiao-ling Tao (Guangxi Key Laboratory of Cryptography and Information Security, Guilin University of Electronic Technology, China), Fei Jia (Guangxi Key Laboratory of Cryptography and Information Security, Guilin University of Electronic Technology, China), Yue-lin Yu (Guangxi Key Laboratory of Cryptography and Information Security, Guilin University of Electronic Technology, China), De-xuan Ding (Guangxi Key Laboratory of Cryptography and Information Security, Guilin University of Electronic Technology, China), Zi-shuo Cui (Guangxi Key Laboratory of Cryptography and Information Security, Guilin University of Electronic Technology, China), and Lan Shi (Guangxi Key Laboratory of Cryptography and Information Security, Guilin University of Electronic Technology, China)

An Uncertain Graph Privacy Preserving Scheme Based on Node Similarity in Social Networks 108
Jiayu Xu (Fujian Normal University, China), Hongyan Zhang (Fujian Normal University, China), and Li Xu (Fujian Normal University, China)

Bilinear Pairing and PUF Based Lightweight Authentication Protocol for IoD Environment 115
Cong Pu (Oklahoma State University, USA), Andrew Wall (Marshall University, USA), and Kim-Kwang Raymond Choo (University of Texas at San Antonio, USA)

Experimental Evaluation and Testbeds

A Simulator Driven by Trajectory Big Data for Network Feature Extraction and Data Transmission 122
Xiaohui Wang (Ocean University of China, China), Ruobing Jiang (Ocean University of China, China), He Zhang (Ocean University of China, China), Chao Liu (Ocean University of China, China), and Feng Hong (Ocean University of China, China)

Emulating Your eXtended World: An Emulation Environment for XR App Development 131
Jaewon Choi (Yonsei University, Republic of Korea), Seungchan Jeong (Ajou University, Republic of Korea), and JeongGil Ko (Yonsei University, Republic of Korea)

A Measurement Study of RFID-Based Face Recognition 140
Yijing Huang (Shenzhen University, China), Yuehong Ma (Shenzhen University, China), Xingyu Feng (Shenzhen University, China), Zhongru Yang (Shenzhen University, China), Jin Zhang (Shenzhen University, China), Chengwen Luo (Shenzhen University, China), and Jianqiang Li (Shenzhen University, China)

Analysis of Temperature Effects in Heterogeneous Outdoor Wireless Sensor Networks 148
Robert Hartung (Technische Universität Braunschweig, Germany), Ulf Kulau (Hamburg University of Technology, Germany), Torben Petersen (Technische Universität Braunschweig, Germany), and Lars Wolf (Technische Universität Braunschweig, Germany)

Multi-AGV Scheduling based on Hierarchical Intrinsically Rewarded Multi-Agent Reinforcement Learning 155
Jiangshan Zhang (Northwestern Polytechnical University, China), Bin Guo (Northwestern Polytechnical University, China), Zhuo Sun (Northwestern Polytechnical University, China), Mengyuan Li (Northwestern Polytechnical University, China), Jiaqi Liu (Northwestern Polytechnical University, China), Zhiwen Yu (Northwestern Polytechnical University, China), and Xiaopeng Fan (Hangzhou Institute of Advanced Technology, China)

Emerging Technologies 1

Resource Allocation in 5G Multi-Tenancy Network Slicing for Balancing Distribution Power Systems 162
Vajiheh Farhadi (Bucknell University), Thomas La Porta (Pennsylvania State University), Ting He (Pennsylvania State University), and Nilanjan Ray Chaudhuri (Pennsylvania State University)

R-Drive: Resilient Data Storage and Sharing for Mobile Edge Clouds 171
Mohammad Sagor (Texas A&M University, USA), Radu Stoleru (Texas A&M University, USA), Amran Haroon (Texas A&M University, USA), Suman Bhunia (Texas A&M University, USA), Mengyuan Chao (Texas A&M University, USA), Ala Altaweel (Texas A&M University, USA), Maxwell Maurice (National Institute of Standards and Technology, USA), and Roger Blalock (National Institute of Standards and Technology, USA)

Aequitas: A Uniformly Fair 5G Scheduler for Minimizing Outdated Information 180
Chengzhang Li (Virginia Polytechnic Institute and State University), Qingyu Liu (Virginia Polytechnic Institute and State University), Thomas Hou (Virginia Polytechnic Institute and State University), Wenjing Lou (Virginia Polytechnic Institute and State University), and Sastry Kompella (US Naval Research Laboratory)

DQN-Based QoE Enhancement for Data Collection in Heterogeneous IoT Network 188
Hansong Zhou (Florida State University, USA), Sihan Yu (Clemson University, USA), Xiaonan Zhang (Florida State University, USA), Linke Guo (Clemson University, USA), and Beatriz Lorenzo (University of Massachusetts, USA)

Indy528 - Federated Learning Model Tokenization with Non-Fungible Tokens(NFT) and Model Cards 195
Eranga Bandara (Old Dominion University, USA), Xueping Liang (University of North Carolina, USA), Sachin Shetty (Old Dominion University, USA), Ravi Mukkamala (Old Dominion University, USA), Abdul Rahman (Deloitte & Touche LLP), and Ng Wee Keong (Nanyang Technological University, Singapore)

Systems and Applications 1

OSWireless: Enhancing Automation for Optimizing Intent-Driven Software-Defined Wireless Networks 202
Sabarish Krishna Moorthy (University at Buffalo, USA), Zhangyu Guan (University at Buffalo, USA), Nicholas Mastronarde (University at Buffalo, USA), Elizabeth Serena Bentley (Air Force Research Laboratory, USA), and Michael Medley (Air Force Research Laboratory, USA)

Ultra-Low Power Analog Recurrent Neural Network Design Approximation for Wireless Health Monitoring 211
Yung-Ting Hsieh (Rutgers University, USA), Khizar Anjum (Rutgers University, USA), and Dario Pompili (Rutgers University, USA)

Task-Oriented Source Coding for Real-Time Applications 220
Junjie Wu (Tsinghua University, China) and Wei Chen (Tsinghua University, China)

CamPressID: Optimizing Camera Configuration and Finger Pressure for Biometric Authentication 229
Weizheng Wang (Delft University of Technology, The Netherlands), Marek Vette (Delft University of Technology, The Netherlands), Qing Wang (Delft University of Technology, The Netherlands), Jie Yang (Delft University of Technology, The Netherlands), and Marco Zuniga (Delft University of Technology, The Netherlands)

BECT: Beacon-Based Contact Tracing for Detecting Direct & Indirect Contacts 236
Akshay Madan (University of Pittsburgh, USA), David Tipper (University of Pittsburgh, USA), Balaji Palanisamy (University of Pittsburgh, USA), Mai Abdelhakim (University of Pittsburgh, USA), and Prashant Krishnamurthy (University of Pittsburgh, USA)

WiPd: Contactless Water-Injected Pork Detection Using Commodity WiFi Devices 243
Pengming Hu (Henan University of Technology, China), Weidong Yang (Henan University of Technology, China), Xuyu Wang (Florida International University, USA), Shiwen Mao (Department of Electrical and Computer Engineering, Auburn University, USA), and Chao Niu (Henan University of Technology, China)

Poster & Demo Session and Reception

False Data Injection Attacks Detection in Real Smart Grid with Edge Computing 252
Wen Han (University of Electronic Science and Technology of China, China), Hong Wen (University of Electronic Science and Technology of China, China), Wenxin Lei (University of Electronic Science and Technology of China, China), Haojie Lin (University of Electronic Science and Technology of China, China), Haoran Sun (University of Electronic Science and Technology of China, China), and Ning Zhang (University of Windsor, Canada)

A Device-Edge-Cloud Collaborative Framework for Hierarchical Computation Offloading 254
Wenjing Hou (University of Electronic Science and Technology of China, China), Hong Wen (University of Electronic Science and Technology of China, China), Ning Zhang (University of Windsor, Canada), Wenxin Lei (University of Electronic Science and Technology of China, China), and Xianfu Chen (VTT Technical Research Centre of Finland, Finland)

Packet Classification using Tuple Space with Improved Cuckoo Filter 256
Jiayao Wang (National University of Defense Technology, China), Qiujie Wang (Guangdong University of Technology, China), Ziling Wei (National University of Defense Technology, China), and Baosheng Wang (National University of Defense Technology, China)

CIOFL: Collaborative Inference-Based Online Federated Learning for UAV Object Detection 258
Feiyu Wu (Nanjing University of Aeronautics and Astronautics, China), Chao Dong (Nanjing University of Aeronautics and Astronautics, China), Yuben Qu (Nanjing University of Aeronautics and Astronautics, China), Hao Sun (Nanjing University of Aeronautics and Astronautics, China), Lei Zhang (Nanjing University of Aeronautics and Astronautics, China), and Qihui Wu (Nanjing University of Aeronautics and Astronautics, China)

A Mobile App for Intersectional Traffic Optimization through Real-Time Vehicle-to-Infrastructure (V2I) Communication and Cyber-Physical Control 260
Haowen Xu (Oak Ridge National Laboratory, USA), Jinghui Yuan (Oak Ridge National Laboratory, USA), Chieh Wang (Oak Ridge National Laboratory, USA), Yunli Shao (Oak Ridge National Laboratory, USA), Andy Berres (Oak Ridge National Laboratory, USA), and Tim Laclair (Oak Ridge National Laboratory, USA)

Share-Not-To-Waste: Scalable IoT Networking through Subscriber Identity Sharing 262
Amirahmad Chapnevis (Virginia Commonwealth University) and Eyuphan Bulut (Virginia Commonwealth University)

AI/ML based Smart Design 2

SSTGCN: A Deep Learning Framework for Road Intersection Similarity Learning 264
Hang Gu (Northwestern Polytechnical University, China), Bin Guo (Northwestern Polytechnical University, China), Jiangshan Zhang (Northwestern Polytechnical University, China), Sicong Liu (Northwestern Polytechnical University, China), Zhenli Sheng (Huawei Technologies CO.LTD., China), and Zhongyi Wang (Huawei Technologies CO.LTD., China)

Escaping Filter-Based Adversarial Example Defense: A Reinforcement Learning Approach 272
Kaijian Dan (Chongqing University, China), Xinyu Lei (Department of Computer Science, Michigan Technological University, USA), Yantao Li (Chongqing University, China), Huafeng Qin (Computer Science and Information Engineering, Chongqing Technology and Business University, China), Shaojiang Deng (Chongqing University, China), and Gang Zhou (Department of Computer Science, William and Mary, USA)

A Quantum Feature Selection Method for Network Intrusion Detection 281
Mingze Li (University of Houston, USA), Hongliang Zhang (Princeton University, USA), Lei Fan (University of Houston, USA), and Zhu Han (University of Houston, USA)

Wireless Network Fault Localization via Metric Classification 290
Yongqi Han (Tongji University, China), Qingfeng Du (Tongji University, China), and Jincheng Xu (Tongji University, China)

A Universal Adversarial Attack on Time-Series DNNs for Connected Autonomous Vehicles 297
Qichang Liu (University of Virginia), Tanmoy Sen (University of Virginia), Haiying Shen (University of Virginia), and Sai Manoj (George Mason University)

Algorithms and Theory 2

An Adaptive Fault-Tolerant Transmission Mechanism for CMT in Unreliable Wireless Networks .. 304
Wenfeng Du (Shenzhen University, China), Liqian Lai (Jiaying University, China), and Kaishun Wu (Shenzhen University, China)

SFC-Enabled Reliable Service Provisioning in Mobile Edge Computing via Digital Twins 311
Jing Li (The Hong Kong Polytechnic University, P. R. China), Song Guo (The Hong Kong Polytechnic University, P. R. China), Weifa Liang (City University of Hong Kong, P. R. China), Quan Chen (Guangdong University of Technology, P. R. China), Zichuan Xu (Dalian University of Technology, P. R. China), and Wenzheng Xu (Sichuan University, P. R. China)

Data Collection in Wireless Sensor Networks: A Truck-Assisted Multi-UAV Method 318
Yuchao Zhu (Nanjing University, China) and Shaowei Wang (Nanjing University, China)

Time Constraint Finite-Horizon Path Planning Solution for Micromouse Extreme Problem 325
Anway Bose (Temple University, USA), Joseph Bruno (Temple University, USA), Philip Dames (Temple University, USA), and Li Bai (Temple University, USA)

LCFIL: A Loss Compensation Mechanism for Latest Data in Federated Incremental Learning 332
Bokai Cao (Sun Yat-Sen University, China), Jieying Zhou (Sun Yat-Sen University, China), and Weigang Wu (Sun Yat-Sen University, China)

Localization of Autonomous Vehicle with Low Cost Sensors 339
Mohamad Albilani (Télécom SudParis - Institut Polytechnique de Paris, France) and Amel Bouzeghoub (Télécom SudParis - Institut Polytechnique de Paris, France)

Security and Privacy 2

Gas Price Prediction Based on Machine Learning Combined with Ethereum Mempool 346
Dongwan Lan (Nanjing University of Aeronautics and Astronautics, China), Hao Wang (Nanjing University of Aeronautics and Astronautics, China), Changchun Yin (Nanjing University of Aeronautics and Astronautics, China), Chunpeng Ge (Nanjing University of Aeronautics and Astronautics, China), Lu Zhou (Nanjing University of Aeronautics and Astronautics, China), and Xiaozhen Lu (Nanjing University of Aeronautics and Astronautics, China)

Anomaly Detection based on Robust Spatial-Temporal Modeling for Industrial Control Systems.... 355
Shijie Li (University of Chinese Academy of Sciences, China; Institute of Information Engineering, Chinese Academy of Sciences, China), Junjiao Liu (University of Chinese Academy of Sciences, China; Institute of Information Engineering, Chinese Academy of Sciences, China), Zhiwen Pan (Institute of Information Engineering, Chinese Academy of Sciences, China), Shichao Lv (University of Chinese Academy of Sciences, China; Institute of Information Engineering, Chinese Academy of Sciences, China), Shuaizong Si (Institute of Information Engineering, Chinese Academy of Sciences, China), and Limin Sun (University of Chinese Academy of Sciences, China; Institute of Information Engineering, Chinese Academy of Sciences, China)

Towards Characterization of General Conditions for Correlated Differential Privacy 364
Shuying Qin (Shanghai Jiao Tong University, China), Chongrong Fang (Shanghai Jiao Tong University, China), and Jianping He (Shanghai Jiao Tong University, China)

A Bi-Layer Intrusion Detection Based on Device Behavior Profiling for Smart Home IoT 373
Feng He (Southeast University, China), Fei Tong (Southeast University, China; Jiangsu Province Engineering Research Center of Security for Ubiquitous Network, China; Purple Mountain Laboratories, China), and Yujian Zhang (Southeast University, China; Jiangsu Province Engineering Research Center of Security for Ubiquitous Network, China)

Cooperative Attack Detection of Power CPS Based on Feature Relation Graph Convolutional Network 380
Da Li (Beihang University, China), Tao Shang (Beihang University, China), Xueqin Gao (Beihang University, China), and Yao Tang (Beihang University, China)

Systems and Applications 2

Towards WiFi-Based Real-Time Sensing Model Deployed on Low-Power Devices 385
Xinxin Lu (Dalian University of Technology, China; Key Laboratory for Ubiquitous Network and Service Software of Liaoning Province, China), Lei Wang (Dalian University of Technology, China; Key Laboratory for Ubiquitous Network and Service Software of Liaoning Province, China; The Center of Underwater Robot, China), Yuan Tian (OPPO US Research Center, USA), Jiayi Hu (Dalian University of Technology, China), Yuhao Pan (Dalian University of Technology, China), Enze Zhang (Dalian University of Technology, China), and Yichi Zhang (Dalian University of Technology, China)

Adaptive Cross-Camera Video Analytics at the Edge 394
Kaiyang Chen (Shanghai Jiao Tong University, China), Yifei Zhu (Shanghai Jiao Tong University, China), Zhu Han (University of Houston, USA), and Xudong Wang (Shanghai Jiao Tong University, China)

Is Universal Broadband Service Impossible? 403
Micah Beck (University of Tennessee, USA) and Terry Moore (University of Tennessee, USA)

Outdoor 2.5D-Terrain IoT Deployment Algorithms: Repairing Partitions While Mitigating Coverage Loss 410
Kerry Veenstra (University of California, USA) and Katia Obraczka (University of California, USA)

Emerging Technologies 2

A Stackelberg Queuing Model and Analysis for the Emerging Connection-Based Pricing in IoT Markets 417
Yifei Zhu (Shanghai Jiao Tong University, China), Wei Bao (The University of Sydney, Australia), Dan Wang (The Hong Kong Polytechnic University, China), and Jiangchuan Liu (Simon Fraser University, Canada)

Mobile Tracking in 5G and Beyond Networks: Problems, Challenges, and New Directions 426
Changlai Du (Virginia Polytechnic Institute and State University, USA), Hexuan Yu (Virginia Polytechnic Institute and State University, USA), Yang Xiao (University of Kentucky, USA), Wenjing Lou (Virginia Polytechnic Institute and State University, USA), Chonggang Wang (InterDigital, Inc., USA), Robert Gazda (InterDigital, Inc., USA), and Y. Thomas Hou (Virginia Polytechnic Institute and State University, USA)

Teleoperation Technologies for Enhancing Connected and Autonomous Vehicles 435
Sidi Lu (Wayne State University, USA), Ren Zhong (Wayne State University, USA), and Weisong Shi (Wayne State University, USA)

EdgeKeeper: Resilient and Lightweight Coordination for Mobile Edge Clouds 444
Suman Bhunia (Texas A&M University, USA), Radu Stoleru (Texas A&M University, USA), Amran Haroon (Texas A&M University, USA), Mohammad Sagor (Texas A&M University, USA), Ala Altaweel (Texas A&M University, USA), Mengyuan Chao (Texas A&M University, USA), Maxwell Maurice (National Institute of Standards and Technology, USA), and Roger Blalock (National Institute of Standards and Technology, USA)

An Accurate and Energy-Efficient Anomaly Detection in Edge-Cloud Networks 451
Yi Li (China University of Geosciences, China), Deng Zhao (China University of Geosciences, China), Patrick C.K. Hung (Ontario Tech University, Canada), Lei Shu (Nanjing Agricultural University, China), and Zhangbing Zhou (China University of Geosciences (Beijing), China; TELECOM SudParis, France)

System and Applications 3

PRE-SLAM: Persistence Reasoning in Edge-Assisted Visual SLAM 458
Timothy Chase (University at Buffalo, USA), Ali Ben Ali (Binghamton University, USA), Steven Ko (Simon Fraser University, Canada), and Karthik Dantu (University at Buffalo, USA)

Continuous Indoor Tracking via Differential RSS Fingerprinting 467
Yunzhi Li (University of Delaware), Yidan Hu (Rochester Institute of Technology), Aisha Aseeri (King Abdulaziz University, Saudi Arabia), Yukun Dong (University of Delaware), and Rui Zhang (University of Delaware)

Who Moved My Cheese? Human and Non-Human Motion Recognition with WiFi 476
Guozhen Zhu (University of Maryland, USA; Origin Wireless, Inc., USA), Chenshu Wu (The University of Hong Kong, China; Origin Wireless, Inc., USA), Xiaolu Zeng (Beijing Institute of Technology, China), Beibei Wang (Origin Wireless, Inc., USA), and K. J. Ray Liu (Origin Wireless, Inc., USA)

Distracted Driving Detection Utilizing Wearable-Based Bluetooth 485
Travis Mewborne (Trinity University), Youngone Lee (Trinity University), Sheng Tan (Trinity University), and Jie Yang (Florida State University)

3D Reconstruction of Multiple Objects by mmWave Radar on UAV 491
Yue Sun (Umass Boston), Zhuoming Huang (Umass Boston), Honggang Zhang (Umass Boston), and Xiaohui Liang (Umass Boston)

Security and Privacy 3

De-Anonymizing Online Social Network with Conditional Generative Adversarial Network 496
Tianchong Gao (Southeast University, China) and Feng Li (Indiana University-Purdue University Indianapolis, USA)

Joint User Association and Resource Pricing for Metaverse: Distributed and Centralized Approaches 505
Xumin Huang (Guangdong University of Technology, China), Weifeng Zhong (Guangdong University of Technology, China), Jiangtian Nie (Nanyang Technological University, Singapore), Qin Hu (Indiana University-Purdue University Indianapolis, USA), Zehui Xiong (Singapore University of Technology and Design, Singapore), Jiawen Kang (Guangdong University of Technology, China), and Tony Q. S. Quek (Singapore University of Technology and Design, Singapore)

Real-Time Video Anonymization in Smart City Intersections 514
Alex Angus (Columbia University), Zhuoxu Duan (Columbia University), Gil Zussman (Columbia University), and Zoran Kostic (Columbia University)

Layered Malicious Nodes Detection with Graph Attention Network in Human-Cyber-Physical Networks 523
Yuhang Lin (Fujian Normal University, China), Yanze Huang (Fujian Normal University, Fujian University of Technology, China), Sun-Yuan Hsieh (National Cheng Kung University, Taiwan), Limei Lin (Fujian Normal University, China), and Feng Xia (Federation University Australia, Australia)

Anomaly Detection for CPS via Memory-Augmented Reconstruction and Time Series Prediction .. 530
Zhe Sun (Shanghai University of Electric Power, China) and Jinguo Li (Shanghai University of Electric Power, China)

Protocols and Cross-Layer Technologies

Joint Participant Selection and Learning Scheduling for Multi-Model Federated Edge Learning 537
Xinliang Wei (Temple University, USA), Jiyao Liu (Temple University, USA), and Yu Wang (Temple University, USA)

Delay Efficient D2D Communications Over 5G Edge-Computing Mobile Networks with Power Control 546
Zhenhao Tan (University of Science and Technology of China, China), Qian Luo (University of Science and Technology of China, China), Xiaohua Xu (University of Science and Technology of China, China), and Xiang-yang Li (University of Science and Technology of China, China)

Congestion Control with Deterministic Service Delay Guarantee 555
Xinglin Yang (Zhejiang University, China), Wei Wang (Zhejiang University, China), Jiangping Han (University of Science and Technology of China, China), Kaiping Xue (University of Science and Technology of China, China), and Zhaoyang Zhang (Zhejiang University, China)

A Case for Line-of-Sight Blockage Detection as a Primitive in Millimeter-Wave Networks 564
Sanjib Sur (University of South Carolina) and Srihari Nelakuditi (University of South Carolina)

An Enhanced Tree Routing through Multi-Criteria Decision Making over Wireless Sensor Networks 570
Beom-Su Kim (Chungnam National Universityn, Republic of Korea), Beomkyu Suh (Chungnam National University, Republic of Korea), Ki-Il Kim (Chungnam National University, Republic of Korea), In Jin Seo (Korea Electric Power Research Institute, Republic of Korea), Han Byul Lee (Korea Electric Power Research Institute, Republic of Korea), and Ji Seon Gong (Korea Electric Power Research Institute, Republic of Korea)

Emerging Technologies 3

A Novel Emergency Light Based Smart Building Solution: Design, Implementation, and Use Cases 577
Weitao Xu (City University of Hong Kong Shenzhen Research Institute; City University of Hong Kong; UNSW Sydney), Jun Young Kim (WBS Technology), Walter Huang (WBS Technology), Salil S. Kanhere (UNSW Sydney), Sanjay K. Jha (UNSW Sydney), Wen Hu (UNSW Sydney), and Prasant Misra (TATA Consultancy Services Ltd.)

Analysis on the Scalability Issues of Wireless Mesh Networks: Key Factors and Potential Solutions 586
Lei Lei (Shanghai Jiao Tong University, China), Aimin Tang (Shanghai Jiao Tong University, China), and Xudong Wang (Shanghai Jiao Tong University, China)

Collaborative Task Offloading in Vehicular Edge Computing Networks 592
Geng Sun (Jilin University, China), Jiayun Zhang (Jilin University), Zemin Sun (Jilin University, China), Long He (Jilin University, China), and Jiahui Li (Jilin University, China)

Communication-Efficient Federated Learning Design with Fronthaul Awareness in NG-RANs 599
Ayman Younis (Rutgers University, USA), Chuanneng Sun (Rutgers University, USA), and Dario Pompili (Rutgers University, USA)

Blockchain-Based Federated Learning with Contribution-Weighted Aggregation for Medical Data Modeling 606
Yibei Chen (Zhejiang Normal University, P. R. China), Feilong Lin (Zhejiang Normal University, P. R. China), Zhongyu Chen (Zhejiang Normal University, P. R. China), Changbing Tang (Zhejiang Normal University, P. R. China), Riheng Jia (Zhejiang Normal University, P. R. China), and Minglu Li (Zhejiang Normal University, P. R. China)

fuzzyCom: Privacy-Aware Trajectory Data Compression Using Fuzzy Sets in Edge Vehicular Networks 613
Yinglong Li (Zhejiang University of Technology, China), Jinyuan Shi (Zhejiang University of Technology, China), Dan Meng (Zhejiang University of Technology, China), Tieming Chen (Zhejiang University of Technology, China), Xinchen Xu (Zhejiang University of Technology, China), and Fan Liu (Zhejiang University of Technology, China)

Blockchain-Based Edge Resource Sharing for Metaverse 620
Zhilin Wang (Indiana University-Purdue University Indianapolis, USA), Qin Hu (Indiana University-Purdue University Indianapolis, USA), Minghui Xu (Shandong University, USA), and Honglu Jiang (Miami University, USA)

AI/ML based Smart Design 3

Edge-AI Enabled Automated Flaggers for Roadway Work Zone Management 627
Foad Hajiaghajani Memar (University, USA), Chunming Qiao (University, USA), and Adel Sadek (University, USA)

A 3D-DCT and Convolutional FEC Approach to Agile Video Streaming 636
Han Yang (Tsinghua University), Xiangyu Chen (Huawei), Xi Chen (Chinatelecom Cloud), Bin Guo (Chinatelecom Cloud), Shaoteng Liu (Huawei), Xia Zhu (Huawei), and Zongpeng Li (Tsinghua University)

Distributed Deep Learning in An Edge Computing System 645
Tanmoy Sen (University of Virginia), Haiying Shen (University of Virginia), and Zakaria Mehrab (University of Virginia)

Signal Restoration and Prediction for End-to-End Learning of Practical Wireless Communication System 654
Zhe Chen (Northeastern University, China)

A Deep Reinforcement Learning-Based Adaptive Charging Policy for WRSNs 661
Ngoc Bui (Hanoi University of Science and Technology, Vietnam; VinAI Research, Vietnam), Phi Le Nguyen (Hanoi University of Science and Technology, Vietnam), Viet Anh Nguyen (VinAI Research, Vietnam), and Phan Thuan Do (Hanoi University of Science and Technology, Vietnam)

Reinforcement Learning Based Route and Stop Planning For Autonomous Vehicle Shuttle Service 668
Shohaib Mahmud (University of Virginia), Haiying Shen (University of Virginia), Ying Natasha Zhang Foutz (University of Virginia), and Joshua Anton (XMODE social)

REUNS 2022 Workshops

Cloud Computing and Systems

Self-Driving Vehicle Data Scheduling in Edge-Clouds 675
Brandon Burtchell (Texas State University), Michael Finch (Gonzaga University), and Xiao Chen (Texas State University)

Optimizing Energy Utilization of Flexible Deep Neural Network Accelerators via Cache Incorporation 681
Dalton Hensley (University of Morehead, USA) and Wei Zhang (University of Louisville, USA)

Developing, Analyzing, and Evaluating Self-Drive Algorithms Using Electric Vehicles on a Test Course 687
Ryan Kaddis (Larwrence Technological University), Enver Stading (Nebraska Wesleyan University), Aarna Bhuptani (Vanderbilt University), Heather Song (The Ohio State University), Chan-Jin Chung (Lawrence Technological University), and Joshua Siegel (Michigan State University)

Evaluation of Various Defense Techniques Against Targeted Poisoning Attacks in Federated Learning 693
Charles Richards (Rochester Institute of Technology, USA), Sofia Khemani (Yale University, USA), and Feng Li (Indiana University-Purdue University Indianapolis, USA)

Ubiquitous/Mobible/Wearable Computing

Development and Implementation of an AI-Embedded and ROS-Compatible Smart Glove System in Human-Robot Interaction 699
Laury Rodriguez (Montclair State University, USA), Zofia Przedworska (Montclair State University, USA), Omar Obidat (Montclair State University, USA), Jesse Parron (Montclair State University, USA), and Weitian Wang (Montclair State University, USA)

Performance of Camera-Assisted Underwater Visible Light Communication 705
Razat Sutradhar (Georgia State University, USA), Dulmini Dissanayake (Georgia State University, USA), Venkata Avinash Samsani (Georgia State University, USA), Durgabhavani Pothineni (Georgia State University, USA), and Ashwin Ashok (Georgia State University, USA)

Integrating Computer Science and Physical Education in Elementary Schools with Data Science Learning Modules Using Wearable Microcontrollers 710
Hyun Jeong (Fordham University, USA), Jamie Payton (Temple University, USA), Christine Julien (University of Texas at Austin, USA), and Darla Castelli (University of Texas at Austin, USA)

Poster Session (Simultaneus)

Modeling Human-Cyber Interactions in Safety-Critical Cyber-Physical/Industrial Control Systems 716
Steven Ngo (California Polytechnic State University, USA), Dave DeAngelis (University of Southern California, Information Sciences Institute, USA), and Luis Garcia (University of Southern California, Information Sciences Institute, USA)

Assessing Purpose-Extraction for Automated Corpora Annotations 718
Vincent Miller (Columbus State University), Jesus Rijo Candelario (Mercer University), Lydia Ray (Columbus State University), and Alfredo Perez (University of Nebraska)

Blockchain Ensured Physical Visitor Access Control and Authentication 720
Frederick Stock (University of Massachusetts Lowell, USA), Jarel Hearst (Columbus State University, USA), and Yesem Peker (Columbus State University, USA)

Formal UML-Based Modeling and Analysis for Securing Location-Based IoT Applications 722
Hector Cardenas (Texas A&M International University), Ryan Zimmerman (Columbus State University), Antonio Rosales Viesca (Texas A&M International University), Mustafa Al Lail (Texas A&M International University), and Alfredo J. Perez (University of Nebraska at Omaha)

A Collaborative Augmented Reality Platform for Interactive and Immersive Education 724
Owen Sweeny (Pennsylvania State University, USA), Zhanchen Dong (Pennsylvania State University, USA), and Bin Li (Pennsylvania State University, USA)

Poster: Near-Zero Power Underwater Acoustic Networks Using Scatter Communications Principles 726
Parker Wilmoth (University of Texas at Tyler, USA), Tariq Wardak (Palm Beach State College, USA), Ynes Ineza (Texas Tech University, USA), Steven Givens (Florida Atlantic University, USA), Craig Peroni (Florida Atlantic University, USA), George Sklivanitis (Florida Atlantic University, USA), and Dimitris A. Pados (Florida Atlantic University, USA)

Virtual Reality-Based Gymnastics Visualization Using Real-Time Motion Capture Suit 728
Michael Artlip (Pennsylvania State University, USA), Jiangong Chen (Pennsylvania State University, USA), and Bin Li (Pennsylvania State University, USA)

Investigating the State of Security of Household Smart Appliances 730
Jonathan Derenge (Dakota State University)

Security and Privacy

Automatic Classification of Web and IoT Privacy Policies 732
Jasmine Carson (Mount Holyoke College, USA), Lisa DiSalvo (Arcadia University, USA), and Lydia Ray (Columbus State University, USA)

Internet of Medical Things: Forensics Investigation on Zebra Phones 736
Kasey Sager (University of Alabama in Huntsville), Charles Fofie (Minot State University), and Ashley Podhradsky (Dakota State University)

Medical Device Security Regulations and Assessment Case Studies 742
Kai Taylor (Montreat College), Alexandra Smith (Dakota State University), Adam Zimmel (Dakota State University), Korina Alcantara (Texas A&M University- San Antonio), and Yong Wang (Dakota State University)

Formulating Parallel Supervised Machine Learning Designs for Anomaly-Based Network Intrusion Detection in Resource Constrained use Cases 748
Varun Joshi (Georgia State University, USA) and John Korah (California State Polytechnic University, USA)

Malware Network Traffic Classification on the Edge 754
Eric Chen (University of Florida, USA) and Alexander Perez-Pons (Florida International University, USA)

Machine Learning

A Convolutional Neural Network for Emotion Assessment and Recognition 759
Comfort Anyanwu (University of South Florida, USA) and Caitlin Hays (University of South Florida, USA)

Investigating the Effect of Machine-Translation on Automated Classification of Toxic Comments 764
James Roy (University of Cambridge, UK), Siddhi Suresh (Southern Connecticut State University, USA), Mohamed Elsayed (New York Institute of Technology, USA), Ronie Rocca (New York Institute of Technology, USA), Ziqian Dong (New York Institute of Technology, USA), Huanying Gu (New York Institute of Technology, USA), and N. Sertac Artan (New York Institute of Technology, USA)

A Python Library for Matrix Algebra on GPU and Multicore Architectures 770
Delario Nance (Davidson College, USA), Stanimire Tomov (University of Tennessee, USA), and Kwai Wong (University of Tennessee, USA)

How To Convince People To Get A COVID-19 Vaccine: An Opinion Dynamics Model for REUNS 2022 776
Micah Payton (Tufts University) and Natasa Dragovic (Tufts University)

Spatial Analysis of Tumor Heterogeneity Using Machine Learning Techniques 781
Chancharik Mitra (University of California), Jin Young Yoo (University of Illinois Urbana-Champaign), Zeynep Madak-Erdogan (University of Illinois Urbana-Champaign), and Aiman Soliman (University of Illinois Urbana-Champaign)

IoTEF 2022 Workshops

Towards Analysis of the Performance of IDSs in Software-Defined Networks 787
Nadia Niknami (Temple University), Emily Inkrott (Gonzaga University), and Jie Wu (Temple University)

On Off-Grid Green Solar Panel Supplied Edge Computing 794
Roberto Beraldi (University of Rome "La Sapienza", Italy) and Gabriele Proietti Mattia (University of Rome "La Sapienza", Italy)

DARwIn-OP: A Smart Elderly-Assistant and Companion 800
Anway Bose (Temple University) and Li Bai (Temple University)

Relay Assisted Network Coded (RANC) Wireless Multicast 805
Nadieh Moghadam (University of San Diego, USA), Mikaya Lumori (University of San Diego, USA), Subramanian Shastri (University of San Diego, USA), and Hongxiang Li (University of Louisville, USA)
