

# **2022 12th International Electric Drives Production Conference (EDPC 2022)**

**Regensburg, Germany  
29-30 November 2022**

**IEEE Catalog Number: CFP2285P-POD  
ISBN: 978-1-6654-5405-6**

## Table of contents

<b>2.</b>	<b>Trends in Electric Machine Design</b>	
2.1.	Additive Manufactured Copper Conductors: Impedance Characteristics of Samples with Varying Density and Cross-section profile Christian Wachter, Deutsches Zentrum für Luft- und Raumfahrt e.V. (DE)....	3
2.2.	Inductance Evaluation and Average Torque Separation of Externally Excited Synchronous Machines using Frozen Permeability Samar Singh, Mercedes-Benz AG.....	8
2.3.	Development of Alternative Magnetic Fixation Technologies for Axial Flux Machines Mike Fuchslocher, Mercedes Benz AG (DE).....	14
<b>6.</b>	<b>Aluminium as Conductor Material</b>	
6.1.	Weldability study of round aluminium magnet wires for lightweight low-cost traction electric motor applications Benjamin Hunt, The University of Warwick (GB) .....	23
6.2.	Anodised Aluminium Foil Winding Axial Flux Machine for (Quasi-)Direct-Drive Robotice Applications: Preliminary Design and Manufacturing Jordi Van Damme, Ghent University (BE).....	34
6.3.	Electromagnetic Actuators Suitable for High Temperatures Using Thin Aluminium Foils as Conductor Material Johannes von Lindenfels, University of Erlangen-Nuremberg (FAU) (DE)..	43
<b>7.</b>	<b>Hairpin Stators</b>	
7.1.	Flexible Twisting Process of Stators with Hairpin Winding Ludwig Hausmann, Karlsruhe Institute of Technology (KIT) (DE).....	55
7.2.	Analysis of the Behaviour of the Winding Head of a Hairpin Stator Christian Stäck, PEM of RWTH Aachen University (DE) .....	64
7.3.	Effects of the Reduction of the Copper Wire Cross-Section on the Welding Process in the Manufacturing of Hairpin Stators for Electric Traction Motors Florian Brans and Sebastian Hartmann, PEM of RWTH Aachen University (DE).....	73
<b>8.</b>	<b>Litz Wires</b>	
8.1.	Experinental Investigation of a New Manufacturing Technology for Hairpin Stators with Litz Wires Andreas Riedel, University of Erlangen-Nuremberg (FAU) (DE).....	85
8.2.	Development of a Production Process for Formed Litz Wire Stator Windings Henrik Christoph Born, RWTH Aachen University Aachen (DE).....	91

8.3.	Manufacutring Process and Design Requirements of Litz Wire with Focus on Efficiency Improvement of Traction Motors Henrik Christoph Born, Volkmar Platte, Dr. Florian Sell-Le Blanc, Chair of Production Engineering of E-Mobility Components (DE) .....	100
<b>10.</b>	<b>Insulation Technologies I</b>	
10.1.	Comparison of Insulation Capability of Round Wire and Hairpin Windings by Partial Discharge Measurements Lucas Vincent Hanisch, TU Braunschweig (DE).....	109
<b>11.</b>	<b>E-Mobility</b>	
11.1.	Electric Propulsion Units in Aviation – Approach for a Mechanical Permanent Magnet Rotor Design and the Related Manufacturing Concept Johannes von Lindenfels, University of Erlangen-Nuremberg (FAU) (DE) .....	117
11.2.	Design of an Electric Drive Axle for Heavy Duty Commercial Vehicles in the Long-Haul Application under Consideration of Energy Consumption Till Augustin Backes and Michael Betz, Chair of Production Engineering of EMobility Components RWTH Aachen (DE) .....	126
11.3.	Impact of Electric Vehicle Charging Behavior on the Transmission System and the Electricity Market in Germany Franz Teske, University of Erlangen-Nuremberg (FAU) (DE) .....	134
<b>12.</b>	<b>Soft Magnetic Materials</b>	
12.1.	Effect of Higher-Strength Low-Loss Electrical Steel on the Electric Energy Saving of Traction Motors Considering Thermal Analysis Dr. Ahmed Abouelyazied, ArcelorMittal (BE).....	145
12.2.	Modified Magnetic Properties due to Roller Leveling of Electrical Steel Dr. Hannes Alois Weiss, Lifa AG (CH).....	151
<b>13.</b>	<b>Insulation Technologies II</b>	
13.1.	Investigation of Ceramic-Coated Profile Conductors Regarding Insulation Strength with the aim of Better Thermal Connection to the Laminated Core of Electrical Machines Christian Weber, Dr. Florian Liebetrau, Deutsches Zentrum für Luft- und Raumfahrt e.V. (DE).....	159
13.2.	Experimental Investigation of an Extrusion Profile for Slot Liner Insulation of an Electric Traction Machine with Winding Direct Cooling Florian Braunbeck, Dr.-Ing. H.c. F. Porsche AG (DE).....	164
<b>14.</b>	<b>Trends in Production Processes for Electric Drives II</b>	
14.1.	Challenges in Cost-Effective Automated Detection of Enameled Flat Wires in the Context of Robot-Based Stator Manipulation Alexander Vogel, University of Erlangen-Nuremberg (FAU) (DE) .....	173

14.2.	Further Developments in the Production of an Innovative Motor Concept with Radially Laminated Stator Sheets and Flux Barriers Mirko Bach, Universität der Bundeswehr München (DE).....	181
14.3.	Framework for Integration and Substitution of Process Technologies in Existing Production Systems under Consideration of Limited Technology Experiences Florian Brans, PEM of RWTH Aachen University (DE).....	187
<b>15.</b>	<b>Lamination Stacks</b>	
15.1.	Numerical Simulation of the Laser Welding Process for Electrical Steel Laminations Marco Ziegler, Friedrich-Alexander University of Erlangen-Nuremberg (DE).....	197
<b>16.</b>	<b>Contacting Technologies</b>	
16.1.	Inline Process Monitoring of Hairpin Welding Using Optical and Acoustic Quality Metrics Markus Omlor, Dr.-Ing. h.c.F. Porsche AG (DE).....	207
16.2.	Optimization of the Ultrasonic Crimping Process of High-Frequency Litz Wires by Using Process Data Monitoring Johannes Seefried, University of Erlangen-Nuremberg (FAU) (DE) .....	215
16.3.	Suitability of a 2 kw 515 nm Continuous Wave Laser for Deep Penetration Welding of Copper Manuela Ockel, University of Erlangen-Nuremberg (FAU) (DE).....	222
<b>17.</b>	<b>Control of Electric Drives</b>	
17.1.	MRAS-based Sensorless Control of AFPMSM Using Minimum Current Point Tracking to Reduce Multiple Parameter Variation Effects Michael Brüns , Hamburg University of Applied Sciences (HAW Hamburg).....	233
17.2.	Inverter Control and its Effect on Copper Losses in Electrical Machines Equipped with Hairpin Winding Robin Krüger, Mercedes-Benz AG (DE) .....	238
17.3.	Efficiency-Optimized Control of a Variable Speed Reluctance Machines Prof. Dr. Martin Hoffmann, Hochschule Mannheim – University of Applied Sciences (DE).....	244
