2022 IEEE International Conference on Data Mining Workshops (ICDMW) ICDMW 2022

Table of Contents

Message from the ICDM 2022 General Chairs	xxv
Message from the ICDM 2022 Program Chairs	xxvii
Message from the Workshops Chairs	xxix
Organizing Committee	xxxi

UNIT: Urban Internet-of-Things Intelligence

A Multi-source Information Learning Framework for Airbnb Price Prediction	1
<i>Lu Jiang (Northeast Normal University), Yuanhan Li (Northeast Normal University), Na Luo (Northeast Normal University), Jianan Wang (Northeast Normal University), and Qiao Ning (Dalian Maritime University)</i>	
A Comparison of Ambulance Redeployment Systems on Real-World Data	8
<i>Niklas Strauß (Munich Center for Machine Learning, LMU Munich, Germany), Max Berrendorf (Munich Center for Machine Learning, LMU Munich, Germany), Tom Haider (Fraunhofer-Institut für Kognitive Systeme IKS, Germany), and Matthias Schubert (Munich Center for Machine Learning, LMU Munich, Germany)</i>	
Streaming Traffic Flow Prediction Based on Continuous Reinforcement Learning	16
<i>Yanan Xiao (Northeast Normal University), Minyu Liu (Northeast Normal University), Zichen Zhang (Northeast Normal University), Lu Jiang (Northeast Normal University), Minghao Yin (Northeast Normal University), and Jianan Wang (Northeast Normal University)</i>	

DLC: Deep Learning and Clustering

Augmenting Graph Convolution with Distance Preserving Embedding for Improved Learning	23
<i>Guojing Cong (Oakridge National Laboratory), Seung-Hwan Lim (Oakridge National Laboratory), and Steven Young (Oakridge National Laboratory)</i>	
Emerging Properties from Bayesian Non-Parametric for Multiple Clustering: Application for Multi-view Image Dataset	31
<i>Reda Khoufache (Université Sorbonne Paris Nord, France), Mohamed Djallel Dilmi (Université Sorbonne Paris Nord, France), Hanene Azzag (Université Sorbonne Paris Nord, France), Etienne Goffinet (Technology Innovation Institute, United Arab Emirates, France), and Mustapha Lebbah (Université de Versailles, Université Paris-Saclay, France)</i>	

Unsupervised Deep One-Class Classification with Adaptive Threshold Based on Training Dynamics	39
<i>Minkyung Kim (KAIST, Republic of Korea), Junsik Kim (Harvard University, USA), Jongmin Yu (King's College London, United Kingdom), and Jun Kyun Choi (KAIST, Republic of Korea)</i>	
cSmartML-Glassbox: Increasing Transparency and Controllability in Automated Clustering	47
<i>Radwa ElShawi (University of Tartu, Estonia) and Sheirf Sakr (University of Tartu, Estonia)</i>	
Joint Debaised Representation Learning and Imbalanced Data Clustering	55
<i>Mina Rezaei (LMU Munich, Germany; MCML, Germany), Emilio Dorigatti (LMU Munich, Germany; Helmholtz Center Munich, German Research Center for Environmental Health, Germany), David Rugamer (LMU Munich, Germany; MCML, Germany; TU Dortmund, Germany), and Bernd Bischl (LMU Munich, Germany; MCML, Germany)</i>	
Joint Low-Rank and Orthogonal Deep Multi-view Subspace Clustering Based on Local Fusion	63
<i>Guixiang Wang (Huzhou University, China), Hongwei Yin (Huzhou University, China), Wenjun Hu (Huzhou University, China), Yong Liu (Zhejiang University, China), and Ruiqin Wang (Huzhou University, China)</i>	

DMS: Data Mining for Service

User Value in Modern Payment Platforms: A Graph Approach	71
<i>Laura Arditti (Larus Business Automation, Italy), Martino Trevisan (University of Trieste, Italy), Luca Vassio (Politecnico di Torino, Italy), Alberto De Lazzari (Larus Business Automation, Italy), and Alberto Danese (Nexi, Italy)</i>	
An Application of Customer Embedding for Clustering	79
<i>Ahmet Tuğrul Bayrak (Ata Technology Platforms, Turkey)</i>	
Simplifying Process Navigations – Divide and Rule way	83
<i>Sai Charan Emmadi (Tata Consultancy Services, India), Satya Samudrala (Tata Consultancy Services, India), Parag Agrawal (Tata Consultancy Services, India), and Maitreya Natu (Tata Consultancy Services, India)</i>	
Scene and Texture Based Feature Set for DeepFake Video Detection	90
<i>Amit Neil Ramkissoon (The University of the West Indies at St Augustine, Trinidad and Tobago), Vijayanandh Rajamanickam (The University of the West Indies at St Augustine, Trinidad and Tobago), and Wayne Goodridge (The University of the West Indies at St Augustine, Trinidad and Tobago)</i>	

Using Spatial Data and Cluster Analysis to Automatically Detect non-Trivial Relationships Between Environmental Transgressors	98
<i>José Alberto Sousa Torres (University of Brasilia, Brazil), Paulo Henrique dos Santos (Advocacy-general of the Union of Brazil, Brazil), Daniel Alves da Silva (University of Brasília, Brazil), Carlos Eduardo Lacerda Veiga (Advocacy-general of the Union of Brazil, Brazil), Márcio Bastos Medeiros (Advocacy-general of the Union of Brazil, Brazil), Guilherme Fay Vergara (University of Brasília, Brazil), Fábio Lúcio Lopes Mendonça (University of Brasilia, Brazil), and Rafael Timóteo de Sousa Júnior (University of Brasilia, Brazil)</i>	
Identify Malfunctions and Their Possible Causes Using Rules, Application to Process Mining	105
<i>Benoit Vuillemin (University of Technology of Troyes, France) and Frédéric Bertrand (University of Technology of Troyes, France)</i>	
Weight-Training Ensemble Model for Stock Price Forecast	113
<i>Jianing Zhao (Nagoya University, Japan), Ayana Takai (Nagoya University, Japan), and Eisuke Kita (Nagoya University, Japan)</i>	

ISAW: International Sustainable AI Workshop

Domain Adaptation Through Cluster Integration and Correlation	119
<i>Vishnu Manasa Devagiri (Blekinge Institute of Technology, Sweden), Veselka Boeva (Blekinge Institute of Technology, Sweden), and Shahrooz Abghari (Blekinge Institute of Technology, Sweden)</i>	
Data-Driven Usage Profiling and Anomaly Detection in Support of Sustainable Machining Processes	127
<i>Fabian Fingerhut (EluciDATA Lab of Sirris, Belgium), Chaitra Harsha (EluciDATA Lab of Sirris, Belgium), Amirmohammad Eghbalian (EluciDATA Lab of Sirris, Belgium), Tom Jacobs (Precision Manufacturing, Sirris, Belgium), Mahdi Tabassian (EluciDATA Lab of Sirris, Belgium), Robbert Verbeke (EluciDATA Lab of Sirris, Belgium), and Elena Tsiporkova (EluciDATA Lab of Sirris, Belgium)</i>	
Equal Confusion Fairness: Measuring Group-Based Disparities in Automated Decision Systems ...	137
<i>Furkan Gursoy (University of Houston, USA) and Ioannis A. Kakadiaris (University of Houston, USA)</i>	
FastFlow: AI for Fast Urban Wind Velocity Prediction	147
<i>Shi Jer Low (National University Singapore, Singapore), Venugopalan S.G. Raghavan (Agency for Science, Technology and Research, Singapore), Harish Gopalan (Agency for Science, Technology and Research, Singapore), Jian Cheng Wong (Agency for Science, Technology and Research, Singapore), Justin Yeoh (National University of Singapore, Singapore), and Chin Chun Ooi (Agency for Science, Technology and Research, Singapore)</i>	
Empirical Analysis of Fairness-Aware Data Segmentation	155
<i>Seiji Okura (Fujitsu Limited, Japan) and Takao Mohri (Fujitsu Limited, Japan)</i>	

Interpreting Categorical Data Classifiers Using Explanation-Based Locality	163
<i>Peyman Rasouli (University of Oslo, Norway), Ingrid Chieh Yu (University of Oslo, Norway), and Ernesto Jiménez-Ruiz (City, University of London, UK)</i>	

OEDM: Optimization Based Techniques for Emerging Data Mining Problems

DeepDive: Deep Latent Factor Model for Enhancing Diversity in Recommender Systems	171
<i>Kriti Kumar (Indraprastha Institute of Information Technology Delhi (IIITD) and TCS Research, India), Angshul Majumdar (Indraprastha Institute of Information Technology Delhi (IIITD), India), and M Girish Chandra (TCS Research, India)</i>	
Understanding Concept Identification as Consistent Data Clustering Across Multiple Feature Spaces	180
<i>Felix Lanfermann (Honda Research Institute Europe, Germany), Sebastian Schmitt (Honda Research Institute Europe, Germany), and Patricia Wollstadt (Honda Research Institute Europe, Germany)</i>	
FLAG: Stock Movement Prediction via Fusing Logic and Semantic Graphs of Financial News	190
<i>Angela Li (Peking University), Jiduan Liu (Wangxuan Institute of Computer Technology, Peking University; Center for Data Science, AAIS, Peking University), Yuyong Li (Peking University), and Fan Meng (Peking University)</i>	
Solving Non-Linear Optimization Problem in Engineering by Model-Informed Generative Adversarial Network (MI-GAN)	198
<i>Yuxuan Li (Oklahoma State University, USA), Chaoyue Zhao (University of Washington, USA), and Chenang Liu (Oklahoma State University, USA)</i>	
Towards Practical Explainability with Cluster Descriptors	206
<i>Xiaoyuan Liu (Fujitsu Research of America, Inc., USA), Ilya Tyagin (University of Delaware, USA), Hayato Ushijima-Mwesigwa (Fujitsu Research of America, Inc., USA), Indradeep Ghosh (Fujitsu Research of America, Inc., USA), and Ilya Safro (University of Delaware, USA)</i>	
MetaSieve: Performance vs. Complexity Sieve for Time Series Forecasting	216
<i>Pavel Shumkovskii (National Center for Cognitive Research, ITMO University, St Petersburg, Russia), Anton Kovantsev (National Center for Cognitive Research, ITMO University, St Petersburg, Russia), Elizaveta Stavinova (National Center for Cognitive Research, ITMO University, St Petersburg, Russia), and Petr Chunaev (National Center for Cognitive Research, ITMO University, St Petersburg, Russia)</i>	

A Study of Automatic Speech Recognition in Portuguese by the Brazilian General Attorney of the Union	226
<i>Rodrigo Fay Vergara (Cyber Security INCT Unit 6, Laboratory for Decision-Making Technologies (LATITUDE), University of Brasília (UnB)), Paulo Henrique dos Santos (Advocacy-general of the Union of Brazil), Guilherme Fay Vergara (University of Brasília (UnB)), Fábio Lúcio Lopes Mendonça (University of Brasília (UnB)), Carlos Eduardo Lacerda Veiga (Advocacy-general of the Union of Brazil), Bruno Justino Garcia Praciano (University of Brasília (UnB)), Daniel Alves da Silva (University of Brasília (UnB)), and Rafael Timóteo de Sousa Júnior (University of Brasília (UnB))</i>	
SV-Learn: Learning Matrix Singular Values with Neural Networks	232
<i>Derek Xu (Ayala High School, USA), William Shiao (UC Riverside, USA), Jia Chen (UC Riverside, USA), and Evangelos Papalexakis (UC Riverside, USA)</i>	

ARIAL: AI for Aging, Rehabilitation, and Intelligent Assisted Living

MAISON – Multimodal AI-Based Sensor Platform for Older Individuals	238
<i>Ali Abedi (University Health Network, Canada), Faranak Dayyani (University of Toronto, Canada; University Health Network, Canada), Charlene Chu (University of Toronto, Canada; University Health Network, Canada), and Shehroz S. Khan (University of Toronto, Canada; University Health Network, Canada)</i>	
Domain-Specific Deep Learning Feature Extractor for Diabetic Foot Ulcer Detection	243
<i>Reza Basiri (Institute of Biomedical Engineering, University of Toronto, Canada; KITE, Toronto Rehabilitation Institute, University Health Network, Canada), Milos R. Popovic (Institute of Biomedical Engineering, University of Toronto, Canada; KITE, Toronto Rehabilitation Institute, University Health Network, Canada), and Shehroz S. Khan (Institute of Biomedical Engineering, University of Toronto, Canada; KITE, Toronto Rehabilitation Institute, University Health Network, Canada)</i>	
Detection of Mild Cognitive Impairment from Quantitative Analysis of Timed Up and Go (TUG)...	248
<i>Mahmoud Seifallahi (Florida Atlantic University Boca Raton, USA), James E. Galvin (University of Miami, USA), and Behnaz Ghoraani (Florida Atlantic University Boca Raton, USA)</i>	

DMLS: Data Mining in Learning Science

Diagonally Colorized iVAT Images for Labeled Data	254
<i>Elizabeth Hathaway (University of Tennessee, USA) and Richard Hathaway (Hartwell Research Institute, USA)</i>	

Students Temporal Profiling and e-Learning Resources Recommendation Based on NLP's Terms Extraction	264
<i>André Picado (Instituto Superior Técnico - Universidade de Lisboa, Portugal), Carolina Finamore (Instituto Superior Técnico - Universidade de Lisboa, Portugal), Ana Moura Santos (Instituto Superior Técnico - Universidade de Lisboa, Portugal), and Claudia Antunes (Instituto Superior Técnico - Universidade de Lisboa, Portugal)</i>	
Sentence-BERT Distinguishes Good and Bad Essays in Cross-Prompt Automated Essay Scoring	274
<i>Toru Sasaki (Rikkyo University, Japan) and Tomonari Masada (Rikkyo University, Japan)</i>	
Deep Knowledge Tracing with Learning Curves	282
<i>Shanghai Yang (East China Normal University, China), Xin Liu (East China Normal University, China), Hang Su (East China Normal University, China), Mengxia Zhu (ByteDance, China), and Xuesong Lu (East China Normal University, China)</i>	
Online Deep Knowledge Tracing	292
<i>Wenxin Zhang (Northwestern Polytechnical University; Key Laboratory of Data Storage and Management of MIIT, China), Yupei Zhang (Northwestern Polytechnical University; Key Laboratory of Data Storage and Management of MIIT, China), Shuhui Liu (Northwestern Polytechnical University; Key Laboratory of Data Storage and Management of MIIT, China), and Xuequn Shang (Northwestern Polytechnical University; Key Laboratory of Data Storage and Management of MIIT, China)</i>	
Programming Knowledge Tracing: A Comprehensive Dataset and A New Model	298
<i>Renyu Zhu (East China Normal University, China), Dongxiang Zhang (Zhejiang University, China), Chengcheng Han (East China Normal University, China), Ming Gao (East China Normal University, China), Xuesong Lu (East China Normal University, China), Weining Qian (East China Normal University, China), and Aoying Zhou (East China Normal University, China)</i>	

DMBIH: Data Mining in Biomedical Informatics and Healthcare

AWS-EP: A Multi-Task Prediction Approach for MBTI-Big5 Personality Tests	308
<i>Fahed Elourajini (université de montréal, Canada) and Esma Aïmeur (université de montréal, Canada)</i>	
HMM-Boost: Improved Time Series State Prediction via Supervised Hidden Markov Models: Case Studies in Epileptic Seizure and Complex Care Management	316
<i>Georgios Mavroudeas (Rensselaer Polytechnic Institute, USA), Malik Magdon-Ismaïl (Rensselaer Polytechnic Institute, USA), Xiao Shou (Rensselaer Polytechnic Institute, USA), and Kristin Bennett (Rensselaer Polytechnic Institute, USA)</i>	

Model Personalization with Static and Dynamic Patients' Data	324
<i>Paul Youssef (University of Duisburg-Essen, Cancer Research Center Cologne Essen (CCCE), Germany), Jörg Schlötterer (University of Duisburg-Essen, Cancer Research Center Cologne Essen (CCCE), Germany), Sultan Imangaliyev (University of Duisburg-Essen, Cancer Research Center Cologne Essen (CCCE), Germany), and Christin Seifert (University of Duisburg-Essen, Cancer Research Center Cologne Essen (CCCE), Germany)</i>	
Adversarial Removal of Population Bias in Genomics Phenotype Prediction	334
<i>Honggang Zhao (Cornell University) and Wenlu Wang (Texas A&M University-Corpus Christi)</i>	
U-Net Transfer Learning for Image Restoration on Sparse CT Reconstruction in Pre-Clinical Research	341
<i>Huanyi Zhou (Auburn University), Honggang Zhao (Cornell University), and Wenlu Wang (Texas A&M University - Corpus Christi)</i>	
VGG-FusionNet: A Feature Fusion Framework from CT Scan and Chest X-ray Images Based Deep Learning for COVID-19 Detection	349
<i>Yihan Zhou (The University of Sydney, Australia), Jiali Liu (The University of Sydney, Australia), Zekun Yang (The University of Sydney, Australia), Tianyi Liu (The University of Sydney, Australia), Xinyue Meng (The University of Sydney, Australia), Zhuocheng Zhou (The University of Sydney, Australia), Ali Anaissi (The University of Sydney, Australia), and Ali Braytee (The University of Sydney, Australia; University of Technology Sydney, Australia)</i>	

EDMML: Evolutionary Data Mining and Machine Learning

A Paraphrase Identification Approach in Paragraph Length Texts	358
<i>Arwa Al Saqaabi (University of Durham, United Kingdom), Eleni Akrida (University of Durham, United Kingdom), Alexandra Cristea (University of Durham, United Kingdom), and Craig Stewart (University of Durham, United Kingdom)</i>	
Using Genetic Programming to Identify Probability Distribution Behind Data: A Preliminary Trial	368
<i>Yang Syu (National Taipei University of Education, Taiwan (R.O.C.)) and Chien-Min Wang (Institute of Information Science, Academia Sinica, Taiwan (R.O.C.))</i>	
A Genetic Programming Approach to Automatically Construct Informative Attributes for Mammographic Density Classification	378
<i>Qurrat Ul Ain (Victoria University of Wellington, New Zealand), Bing Xue (Victoria University of Wellington, New Zealand), Harith Al-Sahaf (Victoria University of Wellington, New Zealand), and Mengjie Zhang (Victoria University of Wellington, New Zealand)</i>	

Deep Neural Networks and Data Accentuation for Standoff Detection of Dangerous Chemicals	388
<i>Eric Yao (Winston Churchill High School, USA), Christopher A. Kendziora (U.S. Naval Research Laboratory, USA), Robert Furstenberg (U.S. Naval Research Laboratory, USA), Christopher J. Breshike (U.S. Naval Research Laboratory, USA), Drew M. Finton (U.S. Naval Research Laboratory, USA), and Drew C. Kendziora (U.S. Naval Research Laboratory, USA)</i>	

SENTIRE: Sentiment Elicitation from Natural Text for Information Retrieval and Extraction

Linguistic Knowledge Application to Neuro-Symbolic Transformers in Sentiment Analysis	395
<i>Joanna Baran (Wroclaw University of Science and Technology, Poland) and Jan Kocoń (Wroclaw University of Science and Technology, Poland)</i>	
Sentic Parser: A Graph-Based Approach to Concept Extraction for Sentiment Analysis	403
<i>Erik Cambria (Nanyang Technological University, Singapore), Rui Mao (Nanyang Technological University, Singapore), Sooji Han (Nanyang Technological University, Singapore), and Qian Liu (Nanyang Technological University, Singapore)</i>	
Making Sense of Sentiments for Aesthetic Plastic Surgery	411
<i>Anand Choudhary (Indian Institute of Technology Roorkee, India) and Erik Cambria (Nanyang Technological University, Singapore)</i>	
Compression Methods for Transformers in Multidomain Sentiment Analysis	419
<i>Wojciech Korczyński (Wroclaw University of Science and Technology, Poland) and Jan Kocoń (Wroclaw University of Science and Technology, Poland)</i>	
Stress Identification in Online Social Networks	427
<i>Ashok Kumar (Anna University, India), Tina Esther Trueman (Anna University, India), and Erik Cambria (Nanyang Technological University, Singapore)</i>	
Feature Extraction and Prediction of Combined Text and Survey Data Using Two-Stage Modeling	435
<i>Asif Ahmed Nelay (University of Manitoba, Canada) and Maxime Turgeon (University of Manitoba, Canada)</i>	
MultiAspectEmo: Multilingual and Language-Agnostic Aspect-Based Sentiment Analysis	443
<i>Joanna Szolomicka (Wroclaw University of Science and Technology, Poland) and Jan Kocoń (Wroclaw University of Science and Technology, Poland)</i>	

MRL: Multi-view Representation Learning

Multi-view Representation Learning from Malware to Defend Against Adversarial Variants	451
<i>James Hu (University of Arizona, USA), Mohammadreza Ebrahimi (University of South Florida, USA), Weifeng Li (University of Georgia, USA), Xin Li (University of Arizona, USA), and Hsinchun Chen (University of Arizona, USA)</i>	

Deep Transfer Tensor Factorization for Multi-View Learning	459
<i>Penghao Jiang (The Australian National University, Australia), Ke Xin (University of Technology Sydney, Australia), and Chunxi Li (University of Technology Sydney, Australia)</i>	
MORI-RAN: Multi-view Robust Representation Learning via Hybrid Contrastive Fusion	467
<i>Guanzhou Ke (Beijing Jiaotong University, China), Yongqi Zhu (Beijing Jiaotong University, China), and Yang Yu (Beijing Jiaotong University, China)</i>	
Personalized User Recommendation Based on Various User Behavior in Local Domain	475
<i>Junhyung Kim (HyperLocal Personalization Team, NAVER Corporation, Republic of Korea) and Yeonghwan Jeon (HyperLocal Personalization Team, NAVER Corporation, Republic of Korea)</i>	
Graph Convolutional Networks with Dependency Parser Towards Multiview Representation Learning for Sentiment Analysis	482
<i>Minqiang Yang (Lanzhou University, China), Xinqi Liu (Lanzhou University, China), Chengsheng Mao (Northwestern University, USA), and Bin Hu (Lanzhou University, China)</i>	

UDML: 5th International Workshop on Utility-Driven Mining and Learning

Mining High Utility Itemset with Multiple Minimum Utility Thresholds Based on Utility Deviation	490
<i>Naji Alhusaini (chuzhou university, China), Jing Li (University of Science and Technology of China, China), Philippe Fournier-Viger (Shenzhen University, China), Ammar Hawbani (University of Sinc and Technology of China, China), and Guilin Chen (Chuzhou University)</i>	
Cut the Peaches: Image Segmentation for Utility Pattern Mining in Food Processing	497
<i>Diletta Chiaro (University of Naples Federico II, Italy), Edoardo Prezioso (University of Naples Federico II, Italy), Stefano Izzo (University of Naples Federico II, Italy), Fabio Giampaolo (University of Naples Federico II, Italy), Salvatore Cuomo (University of Naples Federico II, Italy), and Francesco Piccialli (University of Naples Federico II, Italy)</i>	
Active Keyword Selection to Track Evolving Topics on Twitter	507
<i>Sacha Lévy (McGill University; Mila - Quebec AI Institute, Canada), Farimah Poursafaei (McGill University; Mila - Quebec AI Institute, Canada), Kellin Pelrine (McGill University; Mila - Quebec AI Institute, Canada), and Reihaneh Rabbany (McGill University; Mila - Quebec AI Institute, Canada)</i>	
Towards Efficient Discovery of Target High Utility Itemsets	517
<i>Vincent Mwintieru Nofong (University of Mines and Technology, Ghana), Priscilla Okai Owiredo (Deloitte Ghana, Ghana), Hamidu Abdel-Fatao (University of Mines and Technology, Ghana), Selasi Kwashie (CSIRO Data61, Australia), Michael Bewong (Charles Sturt University, Australia), and John Wondoh (University of South Australia, Australia)</i>	

A Machine Learning-Based Approach for Mercury Detection in Marine Waters	527
<i>Francesco Piccialli (University of Naples Federico II, Italy), Fabio Giampaolo (University of Naples Federico II, Italy), Vincenzo Schiano di Cola (University of Naples Federico II, Italy), Federico Gatta (University of Naples Federico II, Italy), Diletta Chiaro (University of Naples Federico II, Italy), Edoardo Prezioso (University of Naples Federico II, Italy), Stefano Izzo (University of Naples Federico II, Italy), and Salvatore Cuomo (University of Naples Federico II, Italy)</i>	
Mining Valuable Fuzzy Patterns via the RFM Model	537
<i>Yanlin Qi (Harbin Institute of Technology (Shenzhen), China), Fuyin Lai (Harbin Institute of Technology (Shenzhen), China), Guoting Chen (Harbin Institute of Technology (Shenzhen), China), and Wensheng Gan (Jinan University, China)</i>	
Skyline Pattern Mining by Quantity-Utility Constraints in Large-Scale Databases	547
<i>Jimmy Ming-Tai Wu (Shandong University of Science and Technology, China), Ranran Li (Shandong University of Science and Technology, China), and Jerry Chun-Wei Lin (Western Norway University of Applied Sciences, Norway)</i>	
Large-Scale Sequential Utility Pattern Mining in Uncertain Environments	553
<i>Jimmy Ming-Tai Wu (Shandong University of Science and Technology, China), Shuo Liu (Shandong University of Science and Technology, China), and Jerry Chun-Wei Lin (Western Norway University of Applied Sciences, Norway)</i>	

MLC: Machine Learning for Cybersecurity

EW-Tune: A Framework for Privately Fine-Tuning Large Language Models with Differential Privacy	560
<i>Rouzbeh Behnia (University of South Florida, USA), Mohammadreza (Reza) Ebrahimi (University of South Florida, USA), Jason Pacheco (University of Arizona, USA), and Balaji Padmanabhan (University of South Florida, USA)</i>	
An Adversarial Reinforcement Learning Framework for Robust Machine Learning-Based Malware Detection	567
<i>Mohammadreza Ebrahimi (University of South Florida, USA), Weifeng Li (University of Georgia, USA), Yidong Chai (Hefei University of Technology, China), Jason Pacheco (University of Arizona, USA), and Hsinchun Chen (University of Arizona)</i>	
Backdoor Poisoning of Encrypted Traffic Classifiers	577
<i>John Holodnak (MIT Lincoln Laboratory), Olivia Brown (MIT Lincoln Laboratory), Jason Mattered (MIT Lincoln Laboratory), and Andrew Lemke (MIT Lincoln Laboratory)</i>	

Cascaded Multi-class Network Intrusion Detection with Decision Tree and Self-Attentive Model	586
<i>Yuchen Lan (National University of Singapore, Singapore; Institute for Infocomm Research (I²R), Agency for Science, Technology and Research (A*STAR), Singapore), Tram Truong-Huu (Singapore Institute Technology (SIT), Singapore), Jiyan Wu (Institute for Infocomm Research, Agency for Science, Technology and Research (A*STAR), Singapore), and Sin G. Teo (Institute for Infocomm Research, Agency for Science, Technology and Research (A*STAR), Singapore)</i>	
ENiD: An Encrypted Web Pages Traffic Identification Based on Web Visiting Behavior	593
<i>Ge Mengmeng (Harbin Institute of Technology, Nanyang Technological University, China), Yu Xiangzhan (Harbin Institute of Technology, China), Sachidananda Vinay Mysore (Nanyang Technological University, Singapore), Liu Shangqing (Nanyang Technological University, Singapore), and Liu Likun (Harbin Institute of Technology, China)</i>	
Extracting Entities and Events from Cyber-Physical Security Incident Reports	602
<i>Nitin Ramrakhiani (TCS Research, India), Sangameshwar Patil (TCS Research, India), Manideep Jella (TCS Research, India), Alok Kumar (TCS Research, India), and Girish K. Palshikar (TCS Research, India)</i>	
Identifying Patterns of Vulnerability Incidence in Foundational Machine Learning Repositories on GitHub: An Unsupervised Graph Embedding Approach	610
<i>Agrim Sachdeva (Indiana University, USA), Ben Lazarine (Indiana University, USA), Ruchik Dama (Indiana University, USA), Sagar Samtani (Indiana University, USA), and Hongyi Zhu (University of Texas San Antonio, USA)</i>	

HDM: High Dimensional Data Mining

AARS: A Novel Adaptive Archive-Based Efficient Counting Method for Machine Learning Applications	618
<i>Sajib K. Biswas (South Asian University, India), Pranab K. Muhuri (South Asian University, India), and Uttam K. Roy (South Asian University, India)</i>	
Unsupervised DeepView: Global Uncertainty Visualization for High Dimensional Data	626
<i>Carina Newen (TU Dortmund University) and Emmanuel Müller (TU Dortmund University)</i>	
Polytopal Complex Construction and Use in Persistent Homology	634
<i>Rohit P. Singh (University of Cincinnati, USA) and Philip A. Wilsey (University of Cincinnati, USA)</i>	
An Efficient and Reliable Tolerance-Based Algorithm for Principal Component Analysis	642
<i>Michael Yeh (University of California, Berkeley) and Ming Gu (University of California, Berkeley)</i>	
Unknown Type Streaming Feature Selection via Maximal Information Coefficient	650
<i>Peng Zhou (Anhui University, China), Yunyun Zhang (Anhui University, China), Yuanting Yan (Anhui University, China), and Shu Zhao (Anhui University, China)</i>	

MLOG: Machine Learning on Graphs

Extensive Attention Mechanisms in Graph Neural Networks for Materials Discovery	658
<i>Guojing Cong (Oakridge National Laboratory), Talia Ben-Naim (Oakridge National Laboratory), Victor Fung (Oakridge National Laboratory), Anshul Gupta (Oakridge National Laboratory), Rodrigo Neumann (Oakridge National Laboratory), and Mathias Steiner (Oakridge National Laboratory)</i>	
SGKD: A Scalable and Effective Knowledge Distillation Framework for Graph Representation Learning	666
<i>Yufei He (Beijing Institute of Technology) and Yao Ma (New Jersey Institute of Technology)</i>	
EnD: Enhanced Dedensification for Graph Compressing and Embedding	674
<i>Tanvir Hossain (Georgia State University), Esra Akbas (Georgia State University), and Muhammad Ifta Khairul Islam (Oklahoma State University)</i>	
Improving Graph Neural Network with Learnable Permutation Pooling	682
<i>Yu Jin (University of Maryland, College Park) and Joseph JaJa (University of Maryland, College Park)</i>	
LSP: Acceleration of Graph Neural Networks via Locality Sensitive Pruning of Graphs	690
<i>Eitan Kosman (Bosch Center for Artificial Intelligence, Israel), Joel Oren (General Motors, Israel), and Dotan Di Castro (Bosch Center for Artificial Intelligence, Israel)</i>	
HeteroGuard: Defending Heterogeneous Graph Neural Networks Against Adversarial Attacks	698
<i>Udesh Kumarasinghe (University of Colombo, Sri Lanka; SCoRe Lab, Sri Lanka), Mohamed Nabeel (Palo Alto Networks Inc., USA), Kasun De Zoysa (University of Colombo, Sri Lanka), Kasun Gunawardana (University of Colombo, Sri Lanka), and Charitha Elvitigala (SCoRe Lab, Sri Lanka)</i>	
Self-Organizing Map-Based Graph Clustering and Visualization on Streaming Graphs	706
<i>Prabin B Lamichhane (Tennessee Tech University, USA) and William Eberle (Tennessee Tech University, USA)</i>	
Representing Social Networks as Dynamic Heterogeneous Graphs	714
<i>Negar Maleki (University of South Florida, USA), Balaji Padmanabhan (University of South Florida, USA), and Kaushik Dutta (University of South Florida, USA)</i>	
Graph Convolutional Neural Network Based on the Combination of Multiple Heterogeneous Graphs	724
<i>Caihong Mu (Xidian University, China), Heyuan Huang (Xidian University, China), Yi Liu (Xidian University, China), and Jiashen Luo (Xidian University, China)</i>	
Physics-Informed Graph Learning	732
<i>Ciyuan Peng (Federation University Australia, Australia), Feng Xia (Federation University Australia, Australia), Vidya Saikrishna (Federation University Australia, Australia), and Huan Liu (Arizona State University, USA)</i>	
Forecasting Unobserved Node States with Spatio-Temporal Graph Neural Networks	740
<i>Andreas Roth (TU Dortmund University, Germany) and Thomas Liebig (TU Dortmund University, Germany)</i>	

Improving Your Graph Neural Networks: A High-Frequency Booster	748
<i>Jiaqi Sun (Shenzhen International Graduate School, Tsinghua University, China), Lin Zhang (Tencent, China), Shenglin Zhao (Tencent, China), and Yujiu Yang (Shenzhen International Graduate School, Tsinghua University, China)</i>	
Degree-Related Bias in Link Prediction	757
<i>Yu Wang (Vanderbilt University, USA) and Tyler Derr (Vanderbilt University, USA)</i>	
Deep Heterogeneous Graph Neural Networks via Similarity Regularization Loss and Hierarchical Fusion	759
<i>Zhilong Xiong (Guangdong University of Finance & Economics, China) and Jia Cai (Guangdong University of Finance & Economics, China)</i>	
Behavioral Graph Fraud Detection in E-Commerce	769
<i>Hang Yin (eBay China, China), Zitao Zhang (eBay China, China), Zhurong Wang (eBay China, China), Yilmazcan Özyurt (ETH Zürich, Switzerland), Weiming Liang (eBay China, China), Wenyu Dong (eBay China, China), Yang Zhao (eBay China, China), and Yinan Shan (eBay China, China)</i>	

IncrLearn: Incremental Classification and Clustering, Concept Drift, Novelty Detection, Active Learning in big/fastdatacontext

Efficient Distributed Algorithms for Minimum Spanning Tree in Dense Graphs	777
<i>MohammadHossein Bateni (Google Research, USA), Morteza Monemizadeh (TU Eindhoven, The Netherlands), and Kees Voorintholt (NAVARA, The Netherlands)</i>	
InQMAD: Incremental Quantum Measurement Anomaly Detection	787
<i>Joseph A. Gallego-Mejia (Universidad Nacional de Colombia, Colombia), Oscar A. Bustos-Brinez (Universidad Nacional de Colombia, Colombia), and Fabio A. González (Universidad Nacional de Colombia, Colombia)</i>	
Discovering Unknown Labels for Multi-label Image Classification	797
<i>Jun Huang (Anhui University of Technology, China; Institute of Artificial Intelligence, Comprehensive National Science Center, China), Yu Yan (Anhui University of Technology, China), Xiao Zheng (Anhui University of Technology, China; Institute of Artificial Intelligence, Comprehensive National Science Center, China), Xiwen Qu (Anhui University of Technology, China), and Xudong Hong (Anhui University of Technology, China)</i>	
Reconstruction-Based Unsupervised Drift Detection over Multivariate Streaming Data	807
<i>Daniil Kaminskyi (TU Dortmund University, Germany), Bin Li (TU Dortmund University, Germany), and Emmanuel Müller (TU Dortmund University, Germany)</i>	
Incremental Constrained Clustering with Application to Remote Sensing Images Time Series	814
<i>Baptiste Lafabregue (Université de Strasbourg, France), Pierre Gançarski (Université de Strasbourg, France), Jonathan Weber (Université de Haute-Alsace, France), and Germain Forestier (Université de Haute-Alsace, France)</i>	

A Study of the Dream Net Model Robustness Across Continual Learning Scenarios	824
<i>Marion Mainsant (Univ. Grenoble Alpes, CEA, List, France), Martial Mermillod (LPNC, Univ. Grenoble Alpes, Univ. Savoie Mont Blanc, CNRS, France), Christelle Godin (Univ. Grenoble Alpes, CEA, Leti, France), and Marina Reyboz (Univ. Grenoble Alpes, CEA, List, France)</i>	
Nearest Neighbors with Incremental Learning for Real-Time Forecasting of Electricity Demand	834
