2022 IEEE International Conference on Trust, Security and Privacy in Computing and Communications (TrustCom)

TrustCom 2022

Table of Contents

Message from the General Chairs ..... **xxxviii**
Message from the Program Chairs ..... **xxxix**
Organizing Committee ..... **xl**
Program Committee ..... **xlii**
Steering Committee ..... **xlviii**
Reviewers ..... **xlix**
Sponsors ..... **lv**

Trust Track

Booting IoT Terminal Device Securely with eMMC 1
Siyuan Ma (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yuewu Wang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Lingguang Lei (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yingjiao Niu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Haotian Shi (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Jie Wang (Huazhong University of Science and Technology, China)

Malicious Family Identify Combining Multi-Channel Mapping Feature Image and Fine-Tuned CNN 9
Chenghua Tang (Guilin University of Electronic Technology, China), Chen Zhou (Guilin University of Electronic Technology, China), Min Hu (Guilin University of Electronic Technology, China), Mengmeng Yang (Nanyang Technological University, Singapore), and Baohua Qiang (Guilin University of Electronic Technology, China)

Truthfully Negotiating Usage Policy for Data Sovereignty 20
Chunlei Yang (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), Yunchuan Guo (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences), Mingjie Yu (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Science and Technology of China), and Lingcui Zhang (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences)

GTMS: A Gated Linear Unit Based Trust Management System for Internet of Vehicles Using Blockchain Technology 28
Yong Kuang (South China University of Technology, China), Hongyun Xu (South China University of Technology, China), Rui Jiang (South China University of Technology, China), and Zhikang Liu (South China University of Technology, China)

TECS: A Trust Model for VANETs Using Eigenvector Centrality and Social Metrics 36
Yu'ang Zhang (Wuhan University, China), Yujie Song (Wuhan University, China), Yu Wang (Wuhan University, China), Yue Cao (Wuhan University, China; Huali iSmartWays Technology Inc., China), Xuefeng Ren (Huali iSmartWays Technology Inc., China), and Fei Yan (Wuhan University, China)

Efficiently Constructing Topology of Dynamic Networks 44
Fenghua Li (University of Chinese Academy of Sciences, China), Cao Chen (University of Chinese Academy of Sciences, China), Yunchuan Guo (Institute of Information Engineering, Chinese Academy of Sciences, China), Liang Fang (Institute of Information Engineering, Chinese Academy of Sciences, China), Chao Guo (Beijing Electronics Science and Technology Institute, China), and Zifu Li (Institute of Information Engineering, Chinese Academy of Sciences, China)

Hash Proof System with Auxiliary Inputs and Its Application 52
Cailing Cai (The University of Hong Kong), Tsz Hon Yuen (The University of Hong Kong), and Siu-Ming Yiu (The University of Hong Kong)

The Power Allocation for SWIPT-Based Cognitive Two-Way Relay Networks with Rate Fairness Consideration 60
Guozhong Wang (Chongqing College of Electronic Engineering, China), Chunling Peng (Chongqing University of Technology, China), and Yi Huang (Chongqing College of Electronic Engineering, China)

HashDroid:Extraction of Malicious Features of Android Applications Based on Function Call Graph Pruning 66
Pengfei Liu (Central South University, China), Weiping Wang (Central South University, China), Hong Song (Central South University, China), Shigeng Zhang (Central South University, China), and Yulu Hong (Central South University, China)

Coverage Reliability of IoT Intrusion Detection System Based on Attack-Defense Game Design.. 74
Siyu Sun (Huazhong University of Science and Technology, China), Xiaoxuan Fan (Huazhong University of Science and Technology, China), Yunzhi Xia (Huazhong University of Science and Technology, China), Chenlu Zhu (Hubei Chutian Expressway Digital Technology Co.Ltd, China), Shenghao Liu (Huazhong University of Science and Technology, China), and Lingzhi Yi (Zhongnan University of Economics and Law, China)

Security Track

A Lightweight Honeynet Design In the Internet of Things 83
Xiaoyu Du (Henan University), Guanying Zhou (Henan University), Yujing Wang (Henan University), and Song Tao (Henan University)

Graph Encryption for Shortest Path Queries With k Unsorted Nodes 89
Meng Li (Hefei University of Technology, China), Jianbo Gao (Hefei University of Technology, China), Zijian Zhang (Beijing Institute of Technology, China), Chaoping Fu (Huaqiao University, China), Chhagan Lal (TU Delft, Netherland), and Mauro Conti (University of Padua, Italy)

Differential Game Approach for Modelling and Defense of False Data Injection Attacks Targeting Energy Metering Systems 97
Jichao Bi (Zhejiang University, China), Shibo He (Zhejiang University, China), Fengji Luo (University of Sydney, China), Jiming Chen (Zhejiang University, China), Da-Wen Huang (Sichuan Normal University, China), and Mingyang Sun (Zhejiang University, China)

TPIPD: A Robust Model for Online VPN Traffic Classification 105
Yongwei Meng (State Key Laboratory of Communication Content Cognition, China; Xi'an Jiaotong University, China), Tao Qin (State Key Laboratory of Communication Content Cognition, China; Xi'an Jiaotong University, China), Haonian Wang (State Key Laboratory of Communication Content Cognition, China; Xi'an Jiaotong University, China), and Zhouguo Chen (30th Research Institute of China Electronics Technology Group Corporation, China)

MATTER: A Multi-Level Attention-Enhanced Representation Learning Model for Network Intrusion Detection 111
Jinghong Lan (Beihang University, China), Yanan Li (Guilin University of Electronic Technology, China), Bo Li (Beihang University, China), and Xudong Liu (Beihang University, China)

A Longitudinal Measurement and Analysis Study of Mozi, an Evolving P2P IoT Botnet 117
Binglai Wang (University of Chinese Academy of Sciences, China), Yafei Sang (Institute of Information Engineering, Chinese Academy of Sciences, China), Yongzheng Zhang (China Assets Cybersecurity Technology CO., LTD.), Shuhao Li (Institute of Information Engineering, Chinese Academy of Sciences, China), and Xiaolin Xu (National Computer Network Emergency Response Technical Team/Coordination Center of China, China)

SecretHunter: A Large-Scale Secret Scanner for Public Git Repositories 123
Elliott Wen (The University of Auckland), Jia Wang (The Xi'an Jiaotong-Liverpool University), and Jens Dietrich (Victoria University of Wellington)

SEEKER: A Root Cause Analysis Method Based on Deterministic Replay for Multi-Type Network Protocol Vulnerabilities 131
Runhao Liu (National University of Defense Technology, China), Bo Yu (National University of Defense Technology, China), Baosheng Wang (National University of Defense Technology, China), Jianbin Ye (National University of Defense Technology, China), Jianxin Huang (National University of Defense Technology, China), and Xiangdong Kong (National University of Defense Technology, China)

Challenges and Approaches for Mitigating Byzantine Attacks in Federated Learning 139
Junyu Shi (Huazhong University of Science and Technology; National Engineering Research Center for Big Data Technology and System; Services Computing Technology and System Lab; Hubei Engineering Research Center on Big Data Security), Wei Wan (Huazhong University of Science and Technology; National Engineering Research Center for Big Data Technology and System; Services Computing Technology and System Lab; Hubei Engineering Research Center on Big Data Security), Shengshan Hu (Huazhong University of Science and Technology; National Engineering Research Center for Big Data Technology and System; Services Computing Technology and System Lab; Hubei Engineering Research Center on Big Data Security), Jianrong Lu (Huazhong University of Science and Technology; National Engineering Research Center for Big Data Technology and System; Services Computing Technology and System Lab; Hubei Engineering Research Center on Big Data Security), and Leo Yu Zhang (Deakin University)

HAXSS: Hierarchical Reinforcement Learning for XSS Payload Generation 147
Myles Foley (Imperial College London) and Sergio Maffeis (Imperial College London)

From Passive to Active: Near-Optimal DNS-Based Data Exfiltration Defense Method Based on Sticky Mechanism 159
Jiawen Diao (Key Laboratory of Trustworthy Distributed Computing and Service (Beijing University of Posts and Telecommunications), Ministry of Education, China), Binxing Fang (Key Laboratory of Trustworthy Distributed Computing and Service (Beijing University of Posts and Telecommunications), Ministry of Education, China), Xiang Cui (Zhongguancun Laboratory, China), Zhongru Wang (Chinese Academy of Cyberspace Studies, China), Tian Wang (Key Laboratory of Trustworthy Distributed Computing and Service (Beijing University of Posts and Telecommunications), Ministry of Education, China), and Shouyou Song (Beijing DigApis Technology Co., Ltd, China)

IDROP: Intelligently Detecting Return-Oriented Programming Using Real-Time Execution Flow and LSTM 167
Jie Li (University of Electronic Science and Technology of China, China), Weina Niu (University of Electronic Science and Technology of China, China), Ran Yan (University of Electronic Science and Technology of China, China), Zhiqin Duan (University of Electronic Science and Technology of China, China), Beibei Li (Sichuan University, China), and Xiaosong Zhang (University of Electronic Science and Technology of China, China)

Mal-Bert-GCN: Malware Detection by Combining Bert and GCN 175
Zhenquan Ding (University of Chinese Academy of Sciences, China), Hui Xu (Institute of Information Engineering, Chinese Academy of Sciences, China), Yonghe Guo (Telecommunication Branch, State Grid Information, China), Longchuan Yan (Telecommunication Branch, State Grid Information, China), Lei Cui (Institute of Information Engineering, Chinese Academy of Sciences, China), and Zhiyu Hao (Institute of Information Engineering, Chinese Academy of Sciences, China)

Towards Adversarial Robustness with Multidimensional Perturbations via Contrastive Learning 184
Chuanxi Chen (Wuhan University, China), Dengpan Ye (Wuhan University, China), Hao Wang (Wuhan University, China), Long Tang (Wuhan University, China), and Yue Xu (Wuhan University, China)

DRSN with Simple Parameter-Free Attention Module for Specific Emitter Identification 192
Xiuhua Wen (Hainan University, China), Chunjie Cao (Hainan University, China), Yifan Li (Hainan University, China), and Yang Sun (Hainan University, China)

Secure Access Control for eHealth Data in Emergency Rescue Case Based on Traceable Attribute-Based Encryption 201
Yuan Shen (Wuhan University, China; Pingdingshan University, China), Wei Song (Wuhan University, China), Changsheng Zhao (Wuhan University, China), and Zhiyong Peng (Wuhan University, China)

Deceiving Learning-Based Sketches to Cause Inaccurate Frequency Estimation 209
Xuyang Jing (Xidian University, China), Xiaojun Cheng (Institute for Future (IFF), Qingdao University, China), Zheng Yan (Xidian University, China), and Xian Li (Institute for Future (IFF), Qingdao University, China)

AVMiner: Expansible and Semantic-Preserving Anti-Virus Labels Mining Method 217
Ligeng Chen (Nanjing University, China; Asiainfo Security Technologies Co., Ltd), Zhongling He (Nanjing University, China), Hao Wu (Nanjing University, China), Yuhang Gong (Nanjing University, China), and Bing Mao (Nanjing University, China)

EnShare: Sharing Files Securely and Efficiently in the Cloud Using Enclave 225
Yun He (Institute of Information Engineering, Chinese Academy of Sciences; University of Chinese Academy of Sciences), Xiaoqi Jia (Institute of Information Engineering, Chinese Academy of Sciences; University of Chinese Academy of Sciences), Shengzhi Zhang (Boston University), and Lou Chitkushev (Boston University)

Steganalysis for Small-Scale Training Image Pairs with Cover-Stego Feature Difference Model 233
Chao Xia (Beijing Electronic Science and Technology Institute, China), Yaqi Liu (Beijing Electronic Science and Technology Institute, China), Qingxiao Guan (Jimei University, China), Sai Ma (Academy of Broadcasting Science, China), Yu Nan (Zhengzhou Science and Technology Institute, China), and Jiahui Fu (Zhengzhou Xinda Institute of Advanced Technology, China)

AutoSlicer: Automatic Program Partitioning for Securing Sensitive Data Based-On Data Dependency Analysis and Code Refactoring 239
Weizhong Qiang (Hubei Engineering Research Center on Big Data Security, Huazhong University of Science and Technology, China) and Hao Luo (Hubei Engineering Research Center on Big Data Security, Huazhong University of Science and Technology, China)

Security Support on Memory Controller for Heap Memory Safety 248
Chaochao Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences) and Rui Hou (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences)

CGDF-GNN: Cascaded GNN Fraud Detector with Dual Features Facing Imbalanced Graphs with Camouflaged Fraudsters 258
Qichang Wan (Huazhong University of Science and Technolog, P.R. China), Peisen Wang (Huazhong University of Science and Technolog, P.R. China), and Xiaobing Pei (Huazhong University of Science and Technolog, P.R. China)

You Cannot Fully Trust Your Device: An Empirical Study of Client-Side Certificate Validation in WPA2-Enterprise Networks 266
Li Song (State Key Laboratory of Information Security, Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Qiongxiao Wang (State Key Laboratory of Information Security, Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Shijie Jia (State Key Laboratory of Information Security, Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Jingqiang Lin (University of Science and Technology of China, China; Beijing Institute of USTC, China), Linli Lu (State Key Laboratory of Information Security, Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Yanduo Fu (State Key Laboratory of Information Security, Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

CPGBERT: An Effective Model for Defect Detection by Learning Program Semantics via Code Property Graph 274
Jingqiang Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xiaoxi Zhu (Institute of Information Engineering, Chinese Academy of Sciences, China), Chaoge Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xiang Cui (Zhongguancun Laboratory, China), and Qixu Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

Detecting Unknown Network Attacks With Attention Encoding and Deep Metric Learning 283
Chunlan Fu (Huazhong University of Science and Technology, China), Shirong Han (Huazhong University of Science and Technology, China), and Gang Shen (Huazhong University of Science and Technology, China)

A Lightweight Graph-Based Method to Detect Pornographic and Gambling Websites with Imperfect Datasets 291
Xiaoqing Ma (Institute of Information Engineering, Chinese Academy of Sciences, China; National Engineering Laboratory for Information Security Technologies, China; University of Chinese Academy of Sciences, China), Chao Zheng (Geedge Networks, China), Zhao Li (Institute of Information Engineering, Chinese Academy of Sciences, China; National Engineering Laboratory for Information Security Technologies, China; University of Chinese Academy of Sciences, China), Jiangyi Yin (Institute of Information Engineering, Chinese Academy of Sciences, China; National Engineering Laboratory for Information Security Technologies, China; University of Chinese Academy of Sciences, China), Qingyun Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; National Engineering Laboratory for Information Security Technologies, China), and Xunxun Chen (National Computer Network Emergency Response Technical Team/Coordination Center of China, China)

A Terminal Security Authentication Protocol for Zero-Trust Satellite IoT 299
Minqiu Tian (Institute of Information Engineering, Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), Zifu Li (Institute of Information Engineering, Chinese Academy of Sciences, China), Fenghua Li (Institute of Information Engineering, Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), Jin Cao (Xidian University, China), and Chao Guo (Institute of Information Engineering, Chinese Academy of Sciences, Beijing Electronics Science and Technology Institute, China)

DCC-Find: DNS Covert Channel Detection by Features Concatenation-Based LSTM 307
Dongxu Han (Institute of Information Engineering, Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), Pu Dong (Institute of Information Engineering, Chinese Academy of Sciences, China), Ning Li (Institute of Information Engineering, Chinese Academy of Sciences, China), Xiang Cui (Cyberspace Institute Advanced Technology, Guangzhou University, China), Jiawen Diao (Key Laboratory of Trustworthy Distributed Computing and Service (Beijing University of Posts and Telecommunications), Ministry of Education, China), Qing Wang (School of Cyber Security, University of Chinese Academy of Science, China), Dan Du (Institute of Information Engineering, Chinese Academy of Sciences, China), and Yuling Liu (Institute of Information Engineering, Chinese Academy of Sciences, China)

To Fix or Not to Fix: A Critical Study of Crypto-Misuses in the Wild 315
Anna-Katharina Wickert (Technische Universität Darmstadt, Germany), Lars Baumgärtner (Technische Universität Darmstadt, Germany), Michael Schlichtig (Paderborn University, Heinz Nixdorf Institute, Germany), Krishna Narasimhan (Technische Universität Darmstadt, Germany), and Mira Mezini (Technische Universität Darmstadt, Germany)

Bidirectional LSTM-Based Attention Mechanism for CNN Power Theft Detection 323
Zhuoqun Xia (Changsha University of Science and Technology, China), Kaixin Zhou (Changsha University of Science and Technology, China), Jingjing Tan (Central South University, China), and Hongmei Zhou (Changsha University of Science and Technology, China)

An Efficient Certificateless Authentication Scheme for Satellite Internet 331
Tongwei Liu (National University of Defense Technology, China), Baokang Zhao (National University of Defense Technology, China), and Wei Peng (National University of Defense Technology, China)

tTree+: A Threat Tree Model for Representing Complex Semantics 339
Zhitao Wu (China Electronic Product Reliability and Environmental Testing Research Institute, China), Jingjing Hu (China Electronic Product Reliability & Environmental Testing Research Institute, China), Xiaowei Zhang (China University of Geosciences, China), and Wei Ren (China University of Geosciences, China)

Data Poisoning Attack to χ-Armed Bandits 345
Zhi Luo (Huazhong University of Science and Technology), Youqi Li (Beijing Institute of Technology), Lixing Chen (Shanghai Jiao Tong University), Zichuan Xu (Dalian University of Technology), and Pan Zhou (Huazhong University of Science and Technology)

CDGA: A GAN-Based Controllable Domain Generation Algorithm 352
You Zhai (Beihang University), Jian Yang (Beihang University), Zixiang Wang (Beihang University), Longtao He (National Computer Network Emergency Response Technical Team/Coordination Center of China), Liqun Yang (Beihang University), and Zhoujun Li (Beihang University)

WBA: A Warping-Based Approach to Generating Imperceptible Adversarial Examples 361
Chengyao Hua (Central South University, China), Shigeng Zhang (Central South University, China), Weiping Wang (Central South University, China), Zhankai Li (Central South University, China), and Jian Zhang (Central South University, China)

Optimal Block Propagation and Incentive Mechanism for Blockchain Networks in 6G 369
Jinbo Wen (Guangdong University of Technology, China), Xiaojun Liu (Beijing University of Technology, China), Zehui Xiong (Singapore University of Technology and Design, Singapore), Meng Shen (Beijing Institute of Technology, China), Siming Wang (Guangdong University of Technology, China), Yutao Jiao (Army Engineering University of PLA, China), Jiawen Kang (Nanyang Technological University, Singapore), and He Li (Guangdong University of Technology, China)

Eye-Based Keystroke Prediction for Natural Texts -- a Feasibility Analysis 375
José Reverte Cazorla (Universidad Carlos III de Madrid, Spain), José Maria de Fuentes (Universidad Carlos III de Madrid, Spain), and Lorena González-Manzano (Universidad Carlos III de Madrid, Spain)

"Comments Matter and The More The Better!": Improving Rumor Detection with User Comments 383
Yang Xu (Shanghai Jiao Tong University, China), Jie Guo (Shanghai Jiao Tong University, China), Weidong Qiu (Shanghai Jiao Tong University, China), Zheng Huang (Shanghai Jiao Tong University, China), Enes Altuncu (University of Kent, UK), and Shujun Li (University of Kent, UK)

MFFAN: Multiple Features Fusion with Attention Networks for Malicious Traffic Detection ... 391
Weiqing Huang (Institute of Information Engineering, Chinese Academy of Sciences, China), Xinbo Han (Institute of Information Engineering, Chinese Academy of Sciences, China), Meng Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China), Min Li (Institute of Information Engineering, Chinese Academy of Sciences, China), Wen Liu (Institute of Information Engineering, Chinese Academy of Sciences, China), Zheng Yang (Institute of Information Engineering, Chinese Academy of Sciences, China), and Haitian Yang (Institute of Information Engineering, Chinese Academy of Sciences, China)

A Comparative Study on the Security of Cryptocurrency Wallets in Android System 399
Minfeng Qi (Swinburne University of Technology, Australia), Zhiyu Xu (Hyper Laboratory, Australia), Tengyun Jiao (Swinburne University of Technology, Australia), Sheng Wen (Swinburne University of Technology, Australia), Yang Xiang (Swinburne University of Technology, Australia), and Gary Nan (Hyper Laboratory, Australia)

TFCFI: Transparent Forward Fine-Grained Control-Flow Integrity Protection 407
Cairui She (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Liwei Chen (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Gang Shi (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

Improved Zero-Knowledge Proofs for Commitments from Learning Parity with Noise 415
Mengfan Wang (Institute of Information Engineering, University of Chinese Academy of Sciences, China), Guifang Huang (Institute of Information Engineering, University of Chinese Academy of Sciences, China), Hongmin Gao (Institute of Information Engineering, University of Chinese Academy of Sciences, China), and Lei Hu (Institute of Information Engineering, Chinese Academy of Sciences, University of Chinese Academy of Sciences, China)

An Optimized Isomorphic Design for the SM4 Block Cipher Over the Tower Field 422
Chuang Wang (National University of Defence Technology, China), Yan Ding (National University of Defence Technology, China), Chenlin Huang (National University of Defence Technology, China), and Liantao Song (National University of Defence Technology, China)

CECAS: A Cloud-Edge Collaboration Authentication Scheme Based on V2G Short Randomizable Signature 429
Zhuoqun Xia (Changsha University of Science and Technology, China), Hongrui Li (Changsha University of Science and Technology, China), and Ke Gu (Changsha University of Science and Technology, China)

Neural-FacTOR: Neural Representation Learning for Website Fingerprinting Attack over TOR Anonymity 435
Haili Sun (Huazhong University of Science and Technology, China), Yan Huang (Huazhong University of Science and Technology, China), Lansheng Han (Huazhong University of Science and Technology, China), Xiang Long (Huazhong University of Science and Technology, China), Hongle Liu (Huazhong University of Science and Technology, China), and Chunjie Zhou (Huazhong University of Science and Technology, China)

DRICP: Defect Risk Identification Using Sample Category Perception 441
Lixia Xie (Civil Aviation University of China, China), Siyu Liu (Civil Aviation University of China, China), Hongyu Yang (Civil Aviation University of China, China), and Liang Zhang (The University of Arizona, USA)

Zero Trust-NIDS: Extended Multi-View Approach for Network Trace Anonymization and Auto-Encoder CNN for Network Intrusion Detection 449
Abeer Z. Alalmaie (University of Technology Sydney, Australia), Priyadarsi Nanda (University of Technology Sydney, Australia), and Xiangjian He (University of Nottingham, China)

Source Code Vulnerability Detection Using Vulnerability Dependency Representation Graph . 457
Hongyu Yang (Civil Aviation University of China, China), Haiyun Yang (Civil Aviation University of China, China), Liang Zhang (The University of Arizona, USA), and Xiang Cheng (Yangzhou University, China)

Code-Based Encryption Algorithms for Generating and Verifying Digital Signature 465
Aneta Poniszewska-Maranda (Institute of Information Technology, Lodz University of Technology, Poland) and Kacper Pradzynski (Institute of Information Technology, Lodz University of Technology, Poland)

An Efficient and Secure Scheme of Verifiable Computation for Intel SGX 473
Wenxiu Ding (Xidian University, China), Wei Sun (Xidian University, China), Zheng Yan (Xidian University, China), Robert H. Deng (Singapore Management University, Singapore), and Zhiguo Wan (Zhejiang Laboratory, China)

Intelligent Recognition Method of Web Application Categories Based on Multi-Layer Simhash Algorithm 483
Fuji Han (Huazhong University of Science and Technology, China) and Dongjun Zhu (Huazhong University of Science and Technology, China)

Near Field Air-Gap Covert Channel Attack 490
Mordechai Guri (Ben Gurion University of the Negev, Israel)

Privacy Track

Diabetes Mellitus Type 2 Data Sharing System Based on Blockchain and Attribute-Encryption . 498
Weiqi Dai (National Engineering Research Center for Big Data Technology and System, Hubei Engineering Research Center on Big Data Security, Huazhong University of Science and Technology, China), Zhenhui Lu (National Engineering Research Center for Big Data Technology and System, Huazhong University of Science and Technology, China), Xia Xie (Hainan University), Duoqiang Wang (National Engineering Research Center for Big Data Technology and System, Huazhong University of Science and Technology, China), and Hai Jin (National Engineering Research Center for Big Data Technology and System, Huazhong University of Science and Technology, China)

Shared Incentive System for Clinical Pathway Experience 506
Weiqi Dai (Huazhong University of Science and Technology, China), Wenhao Zhao (Huazhong University of Science and Technology, China), Xia Xie (Hainan University), Song Wu (Huazhong University of Science and Technology, China), and Hai Jin (Huazhong University of Science and Technology, China)

Dynamically Selected Mixup Machine Unlearning 514
Zhiwen Zhou (Fuzhou University, China), Ximeng Liu (Fuzhou University, China), Jiayin Li (Fujian Normal University, China), Junxi Ruan (Fuzhou University, China), and Mingyuan Fan (Fuzhou University, China)

Efficient and Highly Accurate Differentially Private Statistical Genomic Analysis Using Discrete Fourier Transform 525
Akito Yamamoto (The University of Tokyo, Japan) and Tetsuo Shibuya (The University of Tokyo, Japan)

An Efficient Epsilon Selection Method for DP-ERM with Expected Accuracy Constraints 533
Yuzhe Li (Institute of Information Engineering, Chinese Academy of Sciences, China), Bo Li (Institute of Information Engineering, Chinese Academy of Sciences, China), Weiping Wang (Institute of Information Engineering, Chinese Academy of Sciences, China), and Nan Liu (Institute of Information Engineering, Chinese Academy of Sciences, China)

Energy-Efficient Privacy-Preserving Time-Series Forecasting on User Health Data Streams 541
Muhammad Arsalan (Technische Universität Braunschweig, Germany), Davide Di Matteo (KTH Royal Institute of Technology, Sweden), Sana Imtiaz (KTH Royal Institute of Technology, Sweden; KRY International AB, Sweden), Zainab Abbas (KTH Royal Institute of Technology, Sweden; KRY International AB, Sweden), Vladimir Vlassov (KTH Royal Institute of Technology, Sweden), and Vadim Issakov (Technische Universität Braunschweig, Germany)

Marking Based Obfuscation Strategy to Resist Side Channel Attack in Cross-User Deduplication for Cloud Storage 547
Xin Tang (University of International Relations, China), Xiong Chen (University of International Relations, China), Ran Zhou (University of International Relations, China), Linchi Sui (University of International Relations, China), and Tian'e Zhou (University of International Relations, China)

Privacy-Preserving and Verifiable Outsourcing Message Transmission and Authentication Protocol in IoT 556
Hongjun Li (Shandong University, China; Qingdao University, China), Fanyu Kong (Shandong University, China), Jia Yu (Qingdao University, China), Hanlin Zhang (Qingdao University, China), Luhong Diao (Faculty of Science, Beijing University of Technology, China), and Yunting Tao (Shandong University, China)

An Enhanced MinHash Encryption Scheme for Encrypted Deduplication 565
Qiaowen Jia (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Guanxiong Ha (Nankai University, China; Tianjin Key Laboratory of Network and Data Security Technology, China), Hanwei Wang (Nankai University, China), Haoyu Ma (Zhejiang Lab, China; Xidian University, China), and Hang Chen (Nankai University, China; Tianjin Key Laboratory of Network and Data Security Technology, China)

Extending Expressive Access Policies with Privacy Features 574
Stefan More (Graz University of Technology, Austria), Sebastian Ramacher (AIT Austrian Institute of Technology, Austria), Lukas Alber (Graz University of Technology, Austria), and Marco Herzl (Graz University of Technology, Austria)

Robust Secure Aggregation with Lightweight Verification for Federated Learning 582
Chao Huang (Beihang University, China; State Key Laboratory of Cryptology, China; Key Laboratory of Aerospace Network Security, Ministry of Industry and Information Technology, Beihang University, China), Yanqing Yao (Beihang University, China; State Key Laboratory of Cryptology, China; Key Laboratory of Aerospace Network Security, Ministry of Industry and Information Technology, Beihang University, China; Beijing Key Laboratory of Network Technology, Beihang University, China), Xiaojun Zhang (Southwest Petroleum University, China), Da Teng (Beihang University, China; State Key Laboratory of Cryptology, China; Key Laboratory of Aerospace Network Security, Ministry of Industry and Information Technology, Beihang University, China), Yingdong Wang (Beihang University, China), and Lei Zhou (Beihang University, China)

Privacy-Preserving Recommendation With Debiased Obfuscaiton 590
Chennan Lin (Ningbo University, China), Baisong Liu (Ningbo University, China), Xueyuan Zhang (Ningbo University, China), Zhiye Wang (Ningbo University, China), Ce Hu (Ningbo University, China), and Linze Luo (Ningbo University, China)

Privacy-Preserving Robust Federated Learning With Distributed Differential Privacy 598
Fayao Wang (Huazhong University of Science and Technology, China), Yuanyuan He (Huazhong University of Science and Technology, China), YunChuan Guo (Institute of Information Engineering, China), Peizhi Li (Huazhong University of Science and Technology, China), and Xinyu Wei (Huazhong University of Science and Technology, China)

A Green Neural Network with Privacy Preservation and Interpretability 606
De Li (Guangxi Normal University, China), Hongyan Zheng (Shaoyang University, China), Zeming Gan (Guangxi Normal University, China), Xianxian Li (Guangxi Normal University, China), and Jinyan Wang (Guangxi Normal University, China)

HyperMean: Effective Multidimensional Mean Estimation with Local Differential Privacy 615
Tao Zhang (Xidian University, China), Bowen Deng (Xidian University, China), Lele Zheng (Xidian University, China), Ze Tong (Xidian University, China), and Qi Li (Nanjing University of Posts and Telecommunications, China)

VoiceSketch: a Privacy-Preserving Voiceprint Authentication System 623
Baochen Yan (Xidian University, China), Rui Zhang (Xidian University, China), and Zheng Yan (Xidian University, China)

LLDP: A Layer-Wise Local Differential Privacy in Federated Learning 631
Qian Chen (Xidian University, China), Hongbo Wang (Xidian University, China), Zilong Wang (Xidian University, China), Jiawei Chen (Xidian University, China), Haonan Yan (Xidian University, China), and Xiaodong Lin (University of Guelph, Canada)

Towards Automated Detection and Prevention of Regrettable (Self-)Disclosures on Social Media 638
Hervais Simo (Fraunhofer SIT, Germany; ATHENE, Germany) and Michael Kreutzer (Fraunhofer SIT, Germany; ATHENE, Germany)

Enabling Anonymous Authenticated Encryption with a Novel Anonymous Authenticated Credential Key Agreement (AACKA) 646
Raphael Schermann (Institute for Technical Informatics, Graz University of Technology, Austria; Development Center Graz, Infineon Technologies AG, Austria), Rainer Urian (Infineon Technolgies AG, Germany), Ronald Toegl (Development Center Graz, Infineon Technologies AG, Austria), Holger Bock (Development Center Graz, Infineon Technologies AG, Austria), and Christian Steger (Institute for Technical Informatics, Graz University of Technology, Austria)

Adap DP-FL: Differentially Private Federated Learning with Adaptive Noise 656
Jie Fu (East China Normal University, China), Zhili Chen (East China Normal University, China; CCCC Intelligence Transportation Co., Ltd., China), and Xiao Han (East China Normal University, China)

Privacy-Preserving Smart Lock System for IoT-Enabled Rental House Markets 664
Bo Wang (Qingdao University of Science and Technology, China), Lingling Wang (Qingdao University of Science and Technology, China), Hongliang Guo (Qingdao University of Science and Technology, China), and Peng Zhou (Qingdao University of Science and Technology, China)

Kgastor: a Privacy By Design Knowledge Graph Anonymized Store 670
Maxime Thouvenot (Université Gustave Eiffel, France), Olivier Curé (Université Gustave Eiffel, France), and Philippe Calvez (ENGIE Lab Crigen, France)

Utility-Aware Privacy-Preserving Federated Learning Through Information Bottleneck 680
Shaolong Guo (Xi'an Jiaotong University, China), Zhou Su (Xi'an Jiaotong University, China), Zhiyi Tian (University of Technology Sydney, Australia), and Shui Yu (University of Technology Sydney, Australia)

FLightNER: A Federated Learning Approach to Lightweight Named-Entity Recognition 687
Macarious Abadeer (Carleton University, Canada), Wei Shi (Carleton University, Canada), and Jean-Pierre Corriveau (Carleton University, Canada)

Federated Learning Scheme with Dual Security of Identity Authentication and Verification 695
Yuting Xu (Nanjing University of Science and Technology, China), Mang Su (Nanjing University of Science and Technology, China), Jinpeng Hou (Nanjing University of Science and Technology, China), and Chong Nie (Nanjing University of Science and Technology, China)

Secure and Efficient Publicly Verifiable Ridge Regression Outsourcing Scheme 703
Ou Ruan (Hubei University of Technology, China) and ShanShan Qin (Hubei University of Technology, China)

Privacy-Preserving Data Analysis Without Trusted Third Party 710
Atsuko Miyaji (Osaka University, Japan; JAIST, Japan), Tomoka Takahashi (Osaka University, Japan), Ping-Lun Wang (Carnegie Mellon University, USA), Tatsuta Yamatsuki (Osaka University, Japan), and Tomoaki Mimoto (Advanced Telecommunications Research Institute Internationa, Japan)

Privacy-Preserving Top-k Spatio-Textual Similarity Join 718
Yiping Teng (Shenyang Aerospace University, China), Dongyue Jiang (Shenyang Aerospace University, China), Mengmeng Sun (Shenyang Aerospace University, China), Liang Zhao (Shenyang Aerospace University, China), Li Xu (Shenyang Aerospace University, China), and Chunlong Fan (Shenyang Aerospace University, China)

Privacy-Preserving Decision Making Based on Q-Learning in Cloud Computing 727
Zhipeng Zhou (Sun Yat-sen University, China), Chenyu Dong (Sun Yat-sen University, China), Donger Mo (Sun Yat-sen University, China), and Peijia Zheng (Sun Yat-sen University, China; Zhengzhou Xinda Institute of Advanced Technology, China)

Forensics and Analytics Track

Forgery Detection Scheme of Deep Video Frame-Rate Up-Conversion Based on Dual-Stream Multi-Scale Spatial-Temporal Representation 733
Qing Gu (Hunan University of Science and Technology, P.R. China), Xiangling Ding (Hunan University of Science and Technology, Chinese Academy of Sciences, Zhengzhou Xinda Institute of Advanced Technology, Guangdong Key Laboratory of Information Security Technology, P.R. China), Dengyong Zhang (Changsha University of Science and Technology, P.R. China), and Ce Yang (Hunan University of Science and Technology, P.R. China)

Pyramid Copy-Move Forgery Detection Using Adversarial Optimized Self Deep Matching Network..... 739
Yaqi Liu (Beijing Electronic Science and Technology Institute, China), Chao Xia (Beijing Electronic Science and Technology Institute, China), Qiang Cai (Beijing Technology and Business University, China), and Xin Jin (Beijing Electronic Science and Technology Institute, China)

DEEPRO: Provenance-Based APT Campaigns Detection via GNN 747
Na Yan (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yu Wen (Institute of Information Engineering, Chinese Academy of Sciences, China), Luyao Chen (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yanna Wu (Institute of Information Engineering, Chinese Academy of Sciences, China), Boyang Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China), Zhaoyang Wang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Dan Meng (Institute of Information Engineering, Chinese Academy of Sciences, China)

A General Backdoor Attack to Graph Neural Networks Based on Explanation Method 759
LuYao Chen (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Na Yan (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), BoYang Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China), ZhaoYang Wang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yu Wen (Institute of Information Engineering, Chinese Academy of Sciences, China), and YanFei Hu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

APT Attribution for Malware Based on Time Series Shapelets 769
Qinqin Wang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Hanbing Yan (National Computer Network Emergency Response Technical Team/Coordination Center of China, China), Chang Zhao (Beijing Chaitin Technology Co., Ltd, China), Rui Mei (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Zhihui Han (National Computer Network Emergency Response Technical Team/Coordination Center of China, China), and Yu Zhou (National Computer Network Emergency Response Technical Team/Coordination Center of China, China)

ProcGuard: Process Injection Behaviours Detection Using Fine-Grained Analysis of API Call Chain with Deep Learning 778
Juan Wang (Wuhan University, China), Chenjun Ma (Wuhan University, China), Ziang Li (Wuhan University, China), Huanyu Yuan (Wuhan University, China), and Jie Wang (Wuhan University, China)

A Novel Asynchronous Evolution Opinion Dynamics Model 786
Xiao Xiao (State Key Laboratory of Communication Content Cognition; Huazhong University of Science and Technology), Minghua Xu (Huazhong University of Science and Technology), and Han Xu (Huazhong University of Science and Technology)

SpecRNet: Towards Faster and More Accessible Audio DeepFake Detection 792
Piotr Kawa (Wrocław University of Science and Technology, Poland), Marcin Plata (Wrocław University of Science and Technology, Poland), and Piotr Syga (Wrocław University of Science and Technology, Poland)

Software Side Channel Vulnerability Detection Based on Similarity Calculation and Deep Learning 800
Wei Sun (Xidian University, China), Zheng Yan (Xidian University, China), Xi Xu (Xi'an Jiaotong University, China), Wenxiu Ding (Xidian University, China), and Lijun Gao (Xidian University, China)

Robust Document Image Forgery Localization Against Image Blending 810
Liang Weipeng (Ningbo University), Dong Li (Ningbo University), Wang Rangding (Ningbo University), Yan Diqun (Ningbo University), and Li Yuanman (Shenzhen University)

A Dynamic Transaction Pattern Aggregation Neural Network for Money Laundering Detection ... 818
Xuejiao Luo (Qilu University of Technology (Shandong Academy of Sciences), China), Xiaohui Han (Qilu University of Technology (Shandong Academy of Sciences), China), Wenbo Zuo (Qilu University of Technology (Shandong Academy of Sciences), China), Zhengyuan Xu (Qilu University of Technology (Shandong Academy of Sciences), China), Zhiwen Wang (Qilu University of Technology (Shandong Academy of Sciences), China), and Xiaoming Wu (Qilu University of Technology (Shandong Academy of Sciences), China)

Emerging Tech Track

Leveraging Model Poisoning Attacks on License Plate Recognition Systems 827
Jian Chen (Huazhong University of Science and Technology, China), Yuan Gao (Huazhong University of Science and Technology, China), Yang Liu (JD Logistics, China), Chen Wang (Huazhong University of Science and Technology, China), and Kai Peng (Huazhong University of Science and Technology, China)

Smarkchain: An Amendable and Correctable Blockchain Based on Smart Markers 835
Chin-Tser Huang (University of South Carolina, USA), Laurent Njilla (Air Force Research Laboratory, USA), and Tieming Geng (University of South Carolina, USA)

CNN-Based Autonomous Traffic Detection on Unknown Home Security Cameras 843
Shuhe Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xiaolin Xu (National Computer Network Emergency Response Technical Team/Coordination Center, China), and Zhefeng Nan (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

Implementation of One-Time Editable Blockchain Chameleon Hash Function Construction Scheme..... 851
Yixuan Qiao (Hubei Minzu University, China), Minghui Zheng (Hubei Minzu University, China), and Jingyi Yang (Hubei Minzu University, China)

Data Integrity Verification Scheme Based on Blockchain Smart Contract 857
Kai Zhang (Jiangxi University of Science and Technology, China), He Xiao (Jiangxi University of Science and Technology, China), and Qiuming Liu (Jiangxi University of Science and Technology, Nanchang Key laboratory of Virtual Digital Factory and Cultural Communications, China)

A Faster Blockchain Sharding Protocol for Decentralized Ledger 864
Dongdong Liu (SKLOIS, Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Mingsheng Wang (SKLOIS, Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Taotao Li (SKLOIS, Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Ya Han (Peking University, China; Key Lab of High Confidence Software Technologies (Peking University), Ministry of Education, China)

Squeezing Network Performance for Secure and Efficient PoW With Better Difficulty Adjustment 874
Yuhang Ding (Renmin University of China, China), Zihan Yang (Renmin University of China, China), Bo Qin (Renmin University of China, China), Qin Wang (CSIRO Data61, Australia), Yanran Zhang (Renmin University of China, China), and Qianhong Wu (Beihang University, China)

Practical Side-Channel Attack on Message Encoding in Masked Kyber 882
Jian Wang (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academic of Sciences, China), Weiqiong Cao (Institute of Software, Chinese Academy of Sciences, China), Hua Chen (Institute of Software, Chinese Academy of Sciences, China), and Haoyuan Li (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academic of Sciences, China)

Efficient SM2 Hardware Design for Digital Signature of Internet of Vehicles 890
Mei Yang (University of South China, China; Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China), Chong Liu (University of South China, China), Huiyun Li (Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China), and Cuiping Shao (Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China)

MCFM: Discover Sensitive Behavior from Encrypted Traffic in Industrial Control System 897
Zhishen Zhu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Junzheng Shi (Institute of Information Engineering, Chinese Academy of Sciences, China), Chonghua Wang (China Industrial Control Systems Cyber Emergency Response Team, China), Gang Xiong (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Zhiqiang Hao (China Industrial Control Systems Cyber Emergency Response Team, China), and Gaopeng Gou (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

One-Time Rewritable Blockchain with Traitor Tracing and Bilateral Access Control 905
Lifeng Guo (Shanxi University, China), Huide Lei (Shanxi University, China), and Wei-Chuen Yau (Xiamen University Malaysia, Malaysia)

A Flow Attack Strategy Based on Critical Links for Cyber-Attack 913
Qi Jiming (Huazhong University of Science and Technology, China), Jiazheng Zhang (Huazhong University of Science and Technology, China), Qingxia Liu (Huazhong University of Science and Technology, China), and Bang Wang (Huazhong University of Science and Technology, China)

Reducing Gas Consumption of Tornado Cash and Other Smart Contracts in Ethereum 921
Jingyan Yang (Southeast University, China), Shang Gao (The Hong Kong Polytechnic University, China), Guyue Li (Southeast University, China), Rui Song (The Hong Kong Polytechnic University, China), and Bin Xiao (The Hong Kong Polytechnic University, China)

A Quantum Inspired Differential Evolution Algorithm with Multiple Mutation Strategies 927
Jie Liu (Guangxi Normal University, China), XingShe Qin (n/a), and F Jiang (University of Technology, Australia)

A Multidimensional Blockchain Framework For Mobile Internet of Things 935
Hussein Zangoti (Florida International University, USA), Alex Pissinou Makki (University of California, USA), Niki Pissinou (Florida International University, USA), Abdur R. Shahid (Robert Morris University, USA), Omar J. Guerra (Florida International University, USA), and Joel Rodriguez (Florida International University, USA)

CDEdit: Redactable Blockchain with Cross-Audit and Diversity Editing 945
Xiaofeng Chen (Beihang University, China) and Ying Gao (Beihang University, China; Key Laboratory of Aerospace Network Security, China)

VecSeeds: Generate Fuzzing Testcases from Latent Vectors Based on VAE-GAN 953
Xin Sun (State Grid Zhejiang Electric Power Co., Ltd. Research Institute, China), Wen Wang (State Grid Zhejiang Electric Power Co., Ltd., China), Xujian Liu (Southeast University, China), Jiarong Fan (Southeast University, China), Zeru Li (Southeast University, China), Yubo Song (Southeast University, China), and Zhongyuan Qin (Southeast University, China)

Development of Blockchain-Based e-Voting System: Requirements, Design and Security Perspective 959
Md Jobair Hossain Faruk (Kennesaw State University, USA), Bilash Saha (Kennesaw State University, USA), Mazharul Islam (Sultan Idris Education University, Malaysia), Fazlul Alam (Daffodil International University, Bangladesh), Hossain Shahriar (Sultan Idris Education University, Malaysia), Maria Valero (Sultan Idris Education University, Malaysia), Akond Rahman (Auburn University, USA), Fan Wu (Tuskegee University, USA), and Zakirul Alam (Fordham University, USA)

CPDT: A Copyright-Preserving Data Trading Scheme Based on Smart Contracts and Perceptual Hashing 968
Baowei Wang (Engineering Research Center of Digital Forensics, China; Nanjing University of Information Science and Technology, China), Bin Li (Nanjing University of Information Science and Technology, China), Yi Yuan (Nanjing University of Information Science and Technology, China), Changyu Dai (Nanjing University of Information Science and Technology, China), Yufeng Wu (Nanjing University of Information Science and Technology, China), and Weiqian Zheng (Nanjing University of Information Science and Technology, China)

Dynamic and Diverse Transformations for Defending Against Adversarial Examples 976
Yongkang Chen (National Key Laboratory of Science and Technology on Information System Security, China), Ming Zhang (National Key Laboratory of Science and Technology on Information System Security, China), Jin Li (National Key Laboratory of Science and Technology on Information System Security, China), Xiaohui Kuang (National Key Laboratory of Science and Technology on Information System Security, China), Xuhong Zhang (Zhejiang University, China), and Han Zhang (Tsinghua University, China)

A Hardware Security Isolation Architecture for Intelligent Accelerator 984
Rui Gong (National University of Defense Technology, China), Lei Wang (National University of Defense Technology, China), Wei Shi (National University of Defense Technology, China), Wei Liu (National University of Defense Technology, China), and Jianfeng Zhang (National University of Defense Technology, China)

A Blockchain-Based Privacy-Preserving Scheme for Cross-Domain Authentication 992
Junfeng Jiang (Southeast University, China), Yujian Zhang (Southeast University, China; Jiangsu Province Engineering Research Center of Security for Ubiquitous Network, China), and Junhao Li (Southeast University, China)

Self-Supervised Adversarial Example Detection by Disentangled Representation 1000
Zhaoxi Zhang (Southwest University, China), Leo Yu Zhang (Deakin University, Australia), Xufei Zheng (Southwest University, China), Jinyu Tian (University of Macau, Macau), and Jiantao Zhou (University of Macau, Macau)

Multi-Pipeline HotStuff: A High Performance Consensus for Permissioned Blockchain 1008
Taining Cheng (Yunnan University, China), Wei Zhou (Yunnan University, China), Shaowen Yao (Yunnan University, China), Libo Feng (Yunnan University, China), and Jing He (Yunnan University, China)

MLIA: Modulated LED Illumination-Based Adversarial Attack on Traffic Sign Recognition System for Autonomous Vehicle 1020
Yixuan Shen (Guangdong Provincial Key Laboratory of Optical Fiber Sensing and Communications, China; Guangdong Provincial Engineering Technology Research Center on VLC, China; Guangzhou Municipal Key Laboratory of Engineering Technology on VLC, China; Jinan University, China), Yu Cheng (Guangdong Provincial Key Laboratory of Optical Fiber Sensing and Communications, China; Guangdong Provincial Engineering Technology Research Center on VLC, China; Guangzhou Municipal Key Laboratory of Engineering Technology on VLC, China; Jinan University, China), Yini Lin (Guangdong Provincial Key Laboratory of Optical Fiber Sensing and Communications, China; Guangdong Provincial Engineering Technology Research Center on VLC, China; Guangzhou Municipal Key Laboratory of Engineering Technology on VLC, China; Jinan University, China), Sicheng Long (Guangdong Provincial Key Laboratory of Optical Fiber Sensing and Communications, China; Guangdong Provincial Engineering Technology Research Center on VLC, China; Guangzhou Municipal Key Laboratory of Engineering Technology on VLC, China; Jinan University, China), Canjian Jiang (Guangdong Provincial Key Laboratory of Optical Fiber Sensing and Communications, China; Guangdong Provincial Engineering Technology Research Center on VLC, China; Guangzhou Municipal Key Laboratory of Engineering Technology on VLC, China; Jinan University, China), Danjie Li (Guangdong Provincial Key Laboratory of Optical Fiber Sensing and Communications, China; Guangdong Provincial Engineering Technology Research Center on VLC, China; Guangzhou Municipal Key Laboratory of Engineering Technology on VLC, China; Jinan University, China), Siyuan Dai (Guangdong Provincial Key Laboratory of Optical Fiber Sensing and Communications, China; Guangdong Provincial Engineering Technology Research Center on VLC, China; Guangzhou Municipal Key Laboratory of Engineering Technology on VLC, China), You Jiang (Guangdong Provincial Key Laboratory of Optical Fiber Sensing and Communications, China; Guangdong Provincial Engineering Technology Research Center on VLC, China; Guangzhou Municipal Key Laboratory of Engineering Technology on VLC, China; Jinan University, China), Junbin Fang (Guangdong Provincial Key Laboratory of Optical Fiber Sensing and Communications, China; Guangdong Provincial Engineering Technology Research Center on VLC, China; Guangzhou Municipal Key Laboratory of Engineering Technology on VLC, China; Jinan University, China), Zoe Jiang (Harbin Institute of Technology, China), and Siu-Ming Yiu (The University of Hong Kong, China)

Workshops

"The Need for Speed": Extracting Session Keys From the Main Memory Using Brute-Force and Machine Learning 1028
Stewart Sentanoe (University of Passau, Germany), Christofer Fellicious (University of Passau, Germany), Hans P. Reiser (Reykjavík University, Iceland), and Michael Granitzer (University of Passau, Germany)

5G-A Capability Exposure Scheme Based on Harmonized Communication and Sensing 1036
Lin Lin (China Unicom Research Institute, China), Bin Zhu (China Unicom Research Institute, China), Zelin Wang (China Unicom Research Institute, China), Guangquan Wang (China Unicom Research Institute, China), Jianzhi Wang (China Unicom Research Institute, China), Lexi Xu (China Unicom Research Institute, China), Sai Han (China Unicom Research Institute, China), and Yuwei Jia (China Unicom Research Institute, China)

A Blockchain-Assisted Collaborative Ensemble Learning for Network Intrusion Detection 1042
Lijian Liu (Shanghai University of Electric Power, China) and Jinguo Li (Shanghai University of Electric Power, China)

A Compatible and Identity Privacy-Preserving Security Protocol for ACARS 1048
Xinwei Li (Beihang University, China), Qianyun Zhang (Beihang University, China), Lexi Xu (China United Network Communications Corporation, China), and Tao Shang (Beihang University, China)

A Formalization-Based Vulnerability Detection Method for Cross-Subject Network Components ... 1054
Jinfu Chen (Jiangsu University, China), Haodi Xie (Jiangsu University, China), Saihua Cai (Jiangsu University, China), Ye Geng (Jiangsu University, China), Yemin Yin (Jiangsu University, China), and Zikang Zhang (Jiangsu University, China)

A Heart Sound Classification Method Based on Residual Block and Attention Mechanism 1060
Yujie Chen (Soochow University, China), Wenliang Zhu (University of Science and Technology of China, China), Jinke Xu (Soochow University, China), Junwei Zhang (Soochow University, China), Zhanpeng Zhu (Department of Neurosurgery, The First Hospital of Jilin University, China), and Lirong Wang (Soochow University, China)

A Hybrid BCI System Combining Motor Imagery and Conceptual Imagery in a Smart Home Environment 1066
Ruixuan Liu (Beijing Normal University, China), Muyang Lyu (Beijing Normal University, China), and Jiangrong Yang (Beijing Normal University, China)

A K-Induction Method Extended with Value Analysis for C Program Safety Verification 1072
Hui Guo (Tianjin University of Technology, China), Chunyan Hou (Tianjin University of Technology, China), Jinsong Wang (Tianjin University of Technology, China), and Chen Chen (Nankai University, China)

A Novel User Mobility Prediction Scheme Based on the Weighted Markov Chain Model 1078
Yuwei Jia (Research Institute, China United Network Communications Corporation, China), Kun Chao (Research Institute, China United Network Communications Corporation, China), Xinzhou Cheng (Research Institute, China United Network Communications Corporation, China), Lin Lin (Research Institute, China United Network Communications Corporation, China), Lijuan Cao (Research Institute, China United Network Communications Corporation, China), Yi Li (Research Institute, China United Network Communications Corporation, China), Yuchao Jin (Research Institute, China United Network Communications Corporation, China), Zixiang Di (Research Institute, China United Network Communications Corporation, China), and Chen Cheng (Research Institute, China United Network Communications Corporation, China)

A Secure Remote Password Protocol From The Learning With Errors Problem 1084
Huapeng Li (North China University of Technology, China) and Baocheng Wang (North China University of Technology, China)

A Study on the Exoskeleton Motion Intent Recognition Algorithm for Embedded Calculation 1091
Lei Shi (Mechanical and Automotive Engineering, South China University of Technology, China; Guangzhou Shiyuan Electronic Technology Company Limited, China), Peng Yin (Mechanical and Automotive Engineering, South China University of Technology, China; Guangzhou Shiyuan Electronic Technology Company Limited, China), Ming Yang (Guangzhou Shiyuan Electronic Technology Company Limited, China), Shengguan Qu (Mechanical and Automotive Engineering, South China University of Technology, China), and Zhen Liu (Nagasaki Institute of Applied Science, Japan)

A Thermal-Aware Digital Twin Model of Permanent Magnet Synchronous Motors (PMSM) Based on
BP Neural Networks 1099
Heng Li (Central South University, China), Zeyu Zhu (Central South University, China), Peinan He (Central South University, China), Yingze Yang (Central South University, China), Bin Chen (Changsha University of Science and Technology, China), Jun Peng (Central South University, China), and Zhiwu Huang (Central South University, China)

A Trusted, Verifiable and Differential Cyber Threat Intelligence Sharing Framework Using Blockchain 1107
Kealan Dunnett (Queensland University of Technology, Australia), Shantanu Pal (Deakin University, Australia), Guntur Dharma Putra (University of New South Wales, Australia), Zahra Jadidi (Griffith University, Australia), and Raja Jurdak (Queensland University of Technology, Australia)

Action-Manipulation Attack and Defense to χ-Armed Bandits 1115
Zhi Luo (Huazhong University of Science and Technology), Youqi Li (Beijing Institute of Technology), Lixing Chen (Shanghai Jiao Tong University), Zichuan Xu (Dalian University of Technology), and Pan Zhou (Huazhong University of Science and Technology)

Adversarial Attacks on Deep Learning-Based Methods for Network Traffic Classification 1123
Meimei Li (Institution of Information Engineering, University of Chinese Academy of Sciences, China), Yiyan Xu (Institution of Information Engineering, University of Chinese Academy of Sciences, China), Nan Li (Institution of Information Engineering, University of Chinese Academy of Sciences, China), and Zhongfeng Jin (Institution of Information Engineering, University of Chinese Academy of Sciences, China)

AI Based Collaborative Optimization Scheme for Multi-Frequency Heterogeneous 4G/5G Networks 1129
Tian Xiao (China Unicom Research Institute, China), Guoping Xu (China United Network Communications Group Co.Ltd), Bei Li (China Unicom Research Institute, China), Lexi Xu (China Unicom Research Institute, China), Xinzhou Cheng (China Unicom Research Institute, China), Feibi Lyu (China Unicom Research Institute, China), Guanghai Liu (China Unicom Research Institute, China), Yi Zhang (China Unicom Research Institute, China), and Qingqing Zhang (China Unicom Research Institute, China)

An Attribute-Attack-Proof Watermarking Technique for Relational Database 1136
Shuguang Yuan (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Chi Chen (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Ke Yang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Tengfei Yang (National Computer Network Emergency Response Technical Team/Coordination Center of China), and Jing Yu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

An Empirical Study Towards SAR Adversarial Examples 1144
Zhiwei Zhang (National University of Defense Technology, China), Xunzhang Gao (National University of Defense Technology, China), Shuowei Liu (National University of Defense Technology, China), and Yujia Diao (National University of Defense Technology, China)

An End-to-End Multi-Label Classification Model for Arrhythmia Based on Varied-Length ECG Signals 1149
Yanfang Dong (Suzhou Institute of Biomedical Engineering and Technology, China), Wenqiang Cai (Soochow University, China), Wenliang Zhu (Suzhou Institute of Biomedical Engineering and Technology, China), and Lirong Wang (Soochow University, China)

An Energy-Efficient Scheme for Industrial Wireless Sensor Network Based on Hierarchical Network Structure 1155
Huamei Qi (Central South University, China), Jie Li (Central South University, China), and Wangping Xiong (Jiangxi University of Chinese Medicine, China)

An Improved Actor-Critic Method for Auto-Combating In Infantry Vehicles 1162
Ruizhu Chen (Xi'an University of Technology, China), Rong Fei (Xi'an University of Technology, China), Lili Wu (Xi'an University of Technology, China), and Lu Yang (Xi'an University of Technology, China)

Arteriovenous Fistula Stenosis Classification Method Based on Auxiliary Wave and Transformer 1168
Jinke Xu (Soochow University, China), Junwei Zhang (Soochow University, China), Yujie Chen (Soochow University, China), Gang Ma (University of Science and Technology of China, China), Zhanpeng Zhu (The First Hospital of Jilin University, China), and Lirong Wang (Soochow University, China)

Automatic Association of Cross-Domain Network Topology 1173
Sai Han (China Unicom Research Institute, China), Zelin Wang (China Unicom Research Institute, China), Guangquan Wang (China Unicom Research Institute, China), Qiukeng Fang (China United Network Communications Company Limited Guangdong Branch, China), Hongbing Ma (China United Network Communications Group Company Limited, China), Lin Lin (China Unicom Research Institute, China), Lexi Xu (China Unicom Research Institute, China), and Heng Zhang (China Unicom Research Institute, China)

Battery Aging-Robust Driving Range Prediction of Electric Bus 1179
Heng Li (Central South University, China), Zhijun Liu (Central South University, China), Yongting Liu (Central South University, China), Hui Peng (Central South University, China), Rui Zhang (Changsha University, China), Jun Peng (Central South University, China), and Zhiwu Huang (Central South University, China)

Benchmark Tool for Detecting Anomalous Program Behaviour on Embedded Devices 1187
Michal Borowski (University of Essex, UK), Sangeet Saha (University of Essex, UK), Xiaojun Zhai (University of Essex, UK), and Klaus McDonald-Maier (University of Essex, UK)

Big Data Based Potential Fixed-Mobile Convergence User Mining 1193
Qingqing Zhang (Research Institute, China United Network Communications Corporation, China), Tao Zhang (Research Institute, China United Network Communications Corporation, China), Shikun Jiang (Government and Enterprise Customer Business Group, China United Network Communications Group Corporation, China), Qiang Zhang (China United Network Communications Corporation Qinghai Provincial Branch, China), Yuhui Han (Research Institute, China United Network Communications Corporation, China), Xinzhou Cheng (Research Institute, China United Network Communications Corporation, China), Yunyun Wang (Research Institute, China United Network Communications Corporation, China), Xin He (Research Institute, China United Network Communications Corporation, China), and Tian Xiao (Research Institute, China United Network Communications Corporation, China)

Cache Design Effect on Microarchitecture Security: A Contrast Between Xuantie-910 and BOOM… 1199
Zhe Zhou (Southeast University, China), Xiaoyu Cheng (Southeast University, China), Yang Sun (Southeast University, China), Fang Jiang (Southeast University, China), Fei Tong (Southeast University, China; Purple Mountain Laboratories, China), Yuxing Mao (Chongqing University, China), and Ruilin Wang (Newcastle University, United Kingdom)

Cache Top-Level Domain Locally: Make DNS Respond Quickly in mobile network 1205
Haisheng Yu (Macau University of Science and Technology; University of Electronic Science and Technology of China), Yan Liu (Macau University of Science and Technology), Lihong Duan (China Mobile Communications Group Henan Co., China), Sanwei Liu (China Mobile Communications Group Henan Co., China), Wenyong Wang (Macau University of Science and Technology; University of Electronic Science and Technology of China), Dong Liu (Macau University of Science and Technology; BII Group Holdings Ltd.), Zirui Peng (Beijing University of Posts and Telecommunication), and Daobiao Gong (BII Group Holdings Ltd.)

CAHOOT: A Context-Aware veHicular Intrusion Detection sysTem 1211
Davide Micale (University of Catania, Italy), Gianpiero Costantino (IIT-CNR, Italy), Ilaria Matteucci (IIT-CNR, Italy), Florian Fenzl (Fraunhofer SIT, Germany), Roland Rieke (Fraunhofer SIT, Germany), and Giuseppe Patanè (Park Smart Srl, Italy)

CCTVCV: Computer Vision Model/dataset Supporting CCTV Forensics and Privacy Applications . 1219
Hannu Turtiainen (University of Jyvaskyla, Finland), Andrei Costin (University of Jyvaskyla, Finland), Timo Hämäläinen (University of Jyvaskyla, Finland), Tuomo Lahtinen (University of Jyvaskyla, Finland), and Lauri Sintonen (University of Jyvaskyla, Finland)

CCTV-FullyAware: Toward end-to-end Feasible Privacy-Enhancing and CCTV Forensics Applications 1227
Hannu Turtiainen (University of Jyvaskyla), Andrei Costin (University of Jyvaskyla), Timo Hämäläinen (University of Jyvaskyla), Tuomo Lahtinen (University of Jyvaskyla), and Lauri Sintonen (University of Jyvaskyla)

Clean-Label Backdoor Attack on Machine Learning-Based Malware Detection Models and Countermeasures 1235
Wanjia Zheng (University of Tsukuba, Japan) and Kazumasa Omote (University of Tsukuba, Japan)

Collaborative Improvement of User Experience and Network Quality Based on Big Data 1243
Chuntao Song (Research Institute, China United Network Communications Corporation, China), Jie Gao (Research Institute, China United Network Communications Corporation, China), Fan Zhang (Research Institute, China United Network Communications Corporation, China), Tao Zhang (Research Institute, China United Network Communications Corporation, China), Yi Zhang (Research Institute, China United Network Communications Corporation, China), Lixia Liu (China United Network Communications Corporation Qinghai Branch, China), Bei Li (Research Institute, China United Network Communications Corporation, China), Yong Wang (China United Network Communications Group Corporation, China), and Lexi Xu (Research Institute, China United Network Communications Corporation, China)

Confusing Traffic Against Intra-Domain Webpage Fingerprinting Attacks 1249
Weilin Yang (Guangzhou University, China), Zhonghui Du (Guangzhou University, China), Yonghui Wu (Guangzhou University, China), and Yi Tang (Guangzhou University, China)

Coverage Estimation of Wireless Network Using Attention U-Net 1255
Feibi Lyu (Research Institute, China United Network Communications Corporation, China), XinZhou Cheng (Research Institute, China United Network Communications Corporation, China), Lexi Xu (Research Institute, China United Network Communications Corporation, China), Liang Liu (Research Institute, China United Network Communications Corporation, China), Jinjian Qiao (Research Institute, China United Network Communications Corporation, China), Lu Zhi (Research Institute, China United Network Communications Corporation, China), Zixiang Di (Research Institute, China United Network Communications Corporation, China), Tian Xiao (Research Institute, China United Network Communications Corporation, China), and Chen Cheng (Research Institute, China United Network Communications Corporation, China)

Create Persona of Elderly Users by Clustering Analysis of Needs 1261
Xiaoying Li (Huaiyin Institute of Technology, China; Nagasaki Institute of Applied Science, Japan), Guangxiang Zhang (Huaiyin Institute of Technology, China), Yuzhou Wu (Huaiyin Institute of Technology, China), Yang Yang (Huaiyin Institute of Technology, China), Yuelei Wang (Huaiyin Institute of Technology, China), and Zhen Liu (Nagasaki Institute of Applied Science, Japan)

Data Driven Based Malicious URL Detection Using Explainable AI 1266
Saranda Poddar (RCC Institute of Information Technology, India), Deepraj Chowdhury (International Institute of Information Technology, India), Ashutosh Dhar Dwivedi (Centre for Business Data Analytics, Denmark), and Raghava Rao Mukkamala (Centre for Business Data Analytics, Denmark)

Denoising Method of ECG Signal Based on Channel Attention Mechanism 1273
Junwei Zhang (Soochow University, China), Rui Bao (Soochow University, China), Lirong Wang (Soochow University, China), Jinke Xu (Soochow University, China), Yujie Chen (Soochow University, China), and Xueqin Chen (Soochow University, China)

Design and Development of Operation Status Monitoring System for Large Glass Substrate Handling Robot 1278
Xinhe Pu (Wuhan University of Technology, China), Xiaofang Yuan (Wuhan University of Technology, China), Liangsen Li (Wuhan University of Technology, China), and Weiming Ji (Wuhan University of Technology, China)

Detection of Impurity Content in Wheat Based on Cone-Beam CT 1286
Gangyang Wang (Henan University of Technology, China), Chunhua Zhu (Henan University of Technology, China), and Jianhou Wang (GCOM Technologies Inc, China)

DIV-SC: A Data Integrity Verification Scheme for Centralized Database Using Smart Contract..... 1290
Siqi He (Guangzhou University, China), Xiaofei Xing (Guangzhou University, China), and Guojun Wang (Guangzhou University, China)

Dynamic Resource Allocation for Beam Hopping Satellites Communication System: An Exploration 1296
XinQing Du (Beijing University of Posts and Telecommunications, China), Xin Hu (Beijing University of Posts and Telecommunications, China), Yin Wang (Beijing University of Posts and Telecommunications, China), and WeiDong Wang (Beijing University of Posts and Telecommunications, China)

EEG Classification Algorithm of Motor Imagery Based on CNN-Transformer Fusion Network 1302
Haofeng Liu (Inner Mongolia University of Science & Technology, China), Yuefeng Liu (Inner Mongolia University of Science & Technology, China), Yue Wang (Inner Mongolia University of Science & Technology, China), Bo Liu (Inner Mongolia University of Science & Technology, China), and Xiang Bao (Inner Mongolia University of Science & Technology, China)

End-to-End Speech Recognition Technology Based on Multi-Stream CNN 1310
Hao Xiao (Xi'an University of Technology, China), Yuan Qiu (Xi'an University of Technology, China), Rong Fei (Xi'an University of Technology, China), Xiongbo Chen (Guangxi CAIH Smart Telecom Tech Co., Ltd., Xi'an University of Technology, China), Zuo Liu (Guangxi CAIH Smart Telecom Tech Co., Ltd., Xi'an University of Technology, China), and Zongling Wu (Xi'an University of Technology)

Energy-Efficient and Traffic-Aware VNF Placement for Vertical Services in 5G Networks 1316
Yi Yue (China Unicom Research Institute, China), Wencong Yang (China Unicom Research Institute, China), Xiao Liang (École Nationale de l'Aviation Civil, France), Xihuizi Meng (China Unicom Research Institute, China), Rong Huang (China Unicom Research Institute, China), and Xiongyan Tang (China Unicom Research Institute, China)

Enhancing Intellectual Property Protection in Deep Neural Network with Confidential Computing ..... N/A
Wensheng Tian (China)

False Data Injection Attack Detection in a Platoon of CACC in RSU 1324
Kai Gao (Changsha University of Science & Technology, China), Xiangyu Cheng (Changsha University of Science & Technology, China), Hao Huang (Changsha University of Science & Technology, China), Xunhao Li (Changsha University of Science & Technology, China), Tingyu Yuan (Changsha University of Science & Technology, China), and Ronghua Du (Changsha University of Science & Technology, China)

Ferrite Microstrip Limiter Based on the Equivalent Nonlinear Loss Simulation Model for the Narrow Microwave Pulse Environment 1330
Mingyu Yang (University of Electronic Science and Technology of China, China), Tao Yang (University of Electronic Science and Technology of China, China), Haiyang Wang (University of Electronic Science and Technology of China, China), Hao Li (University of Electronic Science and Technology of China, China), Tianming Li (University of Electronic Science and Technology of China, China), and Biao Hu (University of Electronic Science and Technology of China, China)

Forgery Trajectory Injection Attack Detection for Traffic Lights Under Connected Vehicle Environment 1333
Yanghui Zhang (Changsha University of Science and Technology, China), Kai Gao (Changsha University of Science and Technology, China), Shuo Huang (Changsha University of Science and Technology, China), Xunhao Li (Changsha University of Science and Technology, China), and Ronghua Du (Changsha University of Science and Technology, China)

Fuzzy Keyword Search over Encrypted Cloud Data with Dynamic Fine-Grained Access Control ... 1340
Boshen Shan (University of Science and Technology of China, China), Yuanzhi Yao (University of Science and Technology of China, China), Weihai Li (University of Science and Technology of China, China), Xiaodong Zuo (University of Science and Technology of China, China), and Nenghai Yu (University of Science and Technology of China, China)

Guide Tracking Method Based on Particle Filter Fusion 1348
Zilong Wang (Xi'an University of Technology, China) and Junhuai Li (Xi'an University of Technology, China)

Hierarchical Classification of Android Malware Traffic 1354
Giampaolo Bovenzi (University of Napoli Federico II, Italy), Valerio Persico (University of Napoli Federico II, Italy), Antonio Pescapé (University of Napoli Federico II, Italy), Anna Piscitelli (University of Napoli Federico II, Italy), and Vincenzo Spadari (University of Napoli Federico II, Italy)

HOLMES: An Efficient and Lightweight Semantic Based Anomalous Email Detector 1360
Peilun Wu (Lenovo Global Security Laboratory, Lenovo Research) and Hui Guo (University of New South Wales)

Image Encryption Algorithm Based on Convolutional Neural Network and Four Square Matrix Encoding 1368
Bin Ge (Anhui University of Science and Technology, China), Ting Wang (Anhui University of Science and Technology, China), Chenxing Xia (Anhui University of Science and Technology, China), and Gaole Dai (Anhui University of Science and Technology, China)

Listing the Ingredients for IFTTT Recipes 1376
Shirin Kalantari (imec-DistriNet, KU Leuve, Belgium), Danny Hughes (imec-DistriNet, KU Leuven, Belgium), and Bart De Decker (imec-DistriNet, KU Leuven, Belgium)

Mahalanobis Distance and Pauta Criterion Based Log Anomaly Detection Algorithm for 5G Mobile Network 1384
Yuting Zheng (Research Institute, China United Network Communications Corporation, China), Yi Li (Research Institute, China United Network Communications Corporation, China), Yuchao Jin (Research Institute, China United Network Communications Corporation, China), Xiaomeng Zhu (Research Institute, China United Network Communications Corporation, China), Lexi Xu (Research Institute, China United Network Communications Corporation, China), Tian Xiao (Research Institute, China United Network Communications Corporation, China), Bei Li (Research Institute, China United Network Communications Corporation, China), and Xinzhou Cheng (Research Institute, China United Network Communications Corporation, China)

Measurement of Malware Family Classification on a Large-Scale Real-World Dataset 1390
Qinqin Wang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Hanbing Yan (National Computer Network Emergency Response Technical Team/Coordination Center of China, China), Chang Zhao (Beijing Chaitin Technology Co., Ltd, China), Rui Mei (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Zhihui Han (National Computer Network Emergency Response Technical Team/Coordination Center of China, China), and Yu Zhou (National Computer Network Emergency Response Technical Team/Coordination Center of China, China)

MGF-GAN: Multi Granularity Text Feature Fusion for Text-Guided-Image Synthesis 1398
Xingfu Wang (University of Science and Technology of China), Xiangyu Li (University of Science and Technology of China), Ammar Hawbani (University of Science and Technology of China), Liang Zhao (Shenyang Aerospace University), and Saeed Hamood Alsamhi (Insight Centre for Data Analytics, National University of Ireland, Ireland; IBB University, Yemen)

Multi-Channel Live Video Processing Method Based on Cloud-Edge Collaboration 1404
Zhen Guo (Communication University of China, China; China Unicom Smart City Research Institute, China), Pengzhou Zhang (Communication University of China, China), Junjie Xia (China Unicom Smart City Research Institute, China), Zhe Zhou (China Unicom Zhe Jiang Province, China), and Juan Cao (Communication University of China, China)

Multimodal Graph Reasoning and Fusion for Video Question Answering 1410
Shuai Zhang (University of Science and Technology of China), Xingfu Wang (University of Science and Technology of China), Ammar Hawbani (University of Science and Technology of China), Liang Zhao (Shenyang Aerospace University), and Saeed Alsamhi (National University of Ireland, Ireland; IBB University, Yemen)

On the Performance of Deep Learning Methods for Identifying Abnormal Encrypted Proxy Traffic 1416
Hongce Zhao (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Shunliang Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Zhuang Qiao (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xianjin Huang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Xiaohui Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

PAPR Suppression in Radar Communication Integration System Based on Subcarrier Reservation.. 1424
Biao Yang (Nanjing University of Posts and Telecommunications, China), Shanshan Zhao (Nanjing University of Posts and Telecommunications, China), Hongfei Du (Nanjing University of Posts and Telecommunications, China), Minju Yi (Nanjing University of Posts and Telecommunications, China), and Ziwei Liu (Nanjing University of Posts and Telecommunications, China)

Performance Analysis for Bearings-Only Geolocation Based on Constellation of Satellites 1429
Jinzhou Li (Beijing Institute of Remote Sensing Information, China), Shouye Lv (Beijing Institute of Remote Sensing Information, China), Liu Yang (Beijing Institute of Remote Sensing Information, China), Sheng Wu (Beijing University of Posts and Telecommunications, China), Yang Liu (Beijing Institute of Remote Sensing Information, China), and Qijun Luan (Beijing Institute of Remote Sensing Information, China)

Performance Analysis of IEEE 802.11p for the Internet of Vehicles with Bursty Packet Errors 1435
Ning Wang (University of Exeter, UK) and Jia Hu (University of Exeter, UK)

Personalized User Profiles-Based Insider Threat Detection for Distributed File System 1441
Wu Xin (Peking University, China), Qingni Shen (Peking University, China), Ke Feng (Peking University, China), Yutang Xia (Peking University, China), Zhonghai Wu (Peking University, China), and Zhenghao Lin (Boston University, United States)

Pre-Training Fine-Tuning Data Enhancement Method Based on Active Learning 1447
Deqi Cao (Key Laboratory of Information System Engineering, National University of Defense Technology, China), Zhaoyun Ding (Key Laboratory of Information System Engineering, National University of Defense Technology, China), Fei Wang (Key Laboratory of Information System Engineering, National University of Defense Technology, China), and Haoyang Ma (Key Laboratory of Information System Engineering, National University of Defense Technology, China)

Redactable Blockchain with K-Time Controllable Editing 1455
Yong Li (Beijing Jiaotong University, China), Zhenghao Zhang (Beijing Jiaotong University, China), Xi Chen (Linklogis, China), Ruxian Li (Linklogis, China), and Liang Zhang (Linklogis, China)

Research and Application of 5G Edge AI in Medical Industry 1462
Shangyu Tang (China United Network Communications Corporation, China), Mingde Huo (China United Network Communications Corporation, China), Yi Du (Donghua University, China), Yuwen Huo (Southwest University, China), Yan Zhang (China United Network Communications Corporation, China), Lexi Xu (Research Institute, China United Network Communications Corporation, China), Ying Ji (China United Network Communications Corporation, China), and Guoyu Zhou (China United Network Communications Corporation, China)

Research and Implementation of Fault Diagnosis of Switch Machine Based on Data Enhancement and CNN 1467
MingYue Li (Xi'an University of Technology, China) and Rong Fei (Xi'an University of Technology, China)

Research on 5G Network Capacity and Expansion 1473
Xiaomeng Zhu (Research Institute, China United Network Communications Corporation, China), Yi Li (Research Institute, China United Network Communications Corporation, China), Yuting Zheng (Research Institute, China United Network Communications Corporation, China), Rui Xia (Research Institute, China United Network Communications Corporation, China), Lexi Xu (Research Institute, China United Network Communications Corporation, China), Bei Li (Research Institute, China United Network Communications Corporation, China), Zixiang Di (Research Institute, China United Network Communications Corporation, China), Lu Zhi (China Unicom Research Institute, China), and Xinzhou Cheng (Research Institute, China United Network Communications Corporation, China)

Research on Capability Building of Mobile Network Data Analysis and Visualization 1479
Jian Guan (Research Institute, China United Network Communications Corporation, China), Xinzhou Cheng (Research Institute, China United Network Communications Corporation, China), Kun Chao (Research Institute, China United Network Communications Corporation, China), Xin He (Research Institute, China United Network Communications Corporation, China), Yuwei Jia (Research Institute, China United Network Communications Corporation, China), Lexi Xu (Research Institute, China United Network Communications Corporation, China), Yunyun Wang (Research Institute, China United Network Communications Corporation, China), Tian Xiao (Research Institute, China United Network Communications Corporation, China), and Bei Li (Research Institute, China United Network Communications Corporation, China)

Research on Enterprises Loss in Regional Economic Risk Management 1485
Heng Zhang (Research Institute, China United Network Communications Corporation, China), Wenyu Li (China Academy of Information and Communications Technology, China), Lianbo Song (China Academy of Information and Communications Technology, China), Lexi Xu (Research Institute, China United Network Communications Corporation, China), Xinzhou Cheng (Research Institute, China United Network Communications Corporation, China), Lijuan Cao (Research Institute, China United Network Communications Corporation, China), Kun Chao (Research Institute, China United Network Communications Corporation, China), Wei Xia (Global Tone Communication Technology Corporation, China), Qinqin Yu (Global Tone Communication Technology Corporation, China), and Sai Han (Research Institute, China United Network Communications Corporation, China)

Research on Intelligent 5G Remote Interference Avoidance and Clustering Scheme 1491
Tian Xiao (Research Institute, China United Network Communications Corporation, China), Bei Li (Research Institute, China United Network Communications Corporation, China), Zixiang Di (Research Institute, China United Network Communications Corporation, China), Guanghai Liu (Research Institute, China United Network Communications Corporation, China), Lexi Xu (Research Institute, China United Network Communications Corporation, China), Jian Guan (Research Institute, China United Network Communications Corporation, China), Zhaoning Wang (Research Institute, China United Network Communications Corporation, China), Chen Cheng (Research Institute, China United Network Communications Corporation, China), and Yi Li (Research Institute, China United Network Communications Corporation, China)

Research on OTFS Systems for 6G 1498
Bei Li (Research Institute, China United Network Communication Corporation, China), Tian Xiao (Research Institute, China United Network Communication Corporation, China), Kai Zhou (Zhejiang University of Technology, China), Lexi Xu (Research Institute, China United Network Communication Corporation, China), Guanghai Liu (Research Institute, China United Network Communication Corporation, China), Bo Wang (China United Network Communication Group Corporation, China), Jie Gao (Research Institute, China United Network Communication Corporation, China), Jian Guan (Research Institute, China United Network Communication Corporation, China), and Zixiang Di (Research Institute, China United Network Communication Corporation, China)

Research on User Complaint Problem Location and Complaint Early Warning Stragegy Based on Big Data Analysis 1504
Jie Gao (Research Institute, China United Network Communications Corporation, China), Lixia Liu (China United Network Communications Corporation Qinghai Branch, China), Tao Zhang (Research Institute, China United Network Communications Corporation, China), Shenghao Jia (China United Network Communications Corporation Qinghai Branch, China), Chuntao Song (Research Institute, China United Network Communications Corporation, China), Lexi Xu (Research Institute, China United Network Communications Corporation, China), Yang Wu (Research Institute, China United Network Communications Corporation, China), Bei Li (Research Institute, China United Network Communications Corporation, China), Yunyun Wang (Research Institute, China United Network Communications Corporation, China), and Xinjie Hou (China United Network Communications Corporation Qinghai Branch, China)

Research on Voice Quality Evaluation Method Based on Artificial Neural Network 1510
Zixiang Di (Research Institute, China United Network Communications Corporation, China), Tian Xiao (Research Institute, China United Network Communications Corporation, China), Yi Li (Research Institute, China United Network Communications Corporation, China), Xinzhou Cheng (Research Institute, China United Network Communications Corporation, China), Bei Li (Research Institute, China United Network Communications Corporation, China), Lexi Xu (Research Institute, China United Network Communications Corporation, China), Xiaomeng Zhu (Research Institute, China United Network Communications Corporation, China), Lu Zhi (Research Institute, China United Network Communications Corporation, China), and Rui Xia (Research Institute, China United Network Communications Corporation, China)

Robust Perception for Autonomous Vehicles Using Dimensionality Reduction 1516
Shivam Garg (Indian Institute of Technology, India), Nandish Chattopadhyay (Nanyang Technological University, Singapore), and Anupam Chattopadhyay (Nanyang Technological University, Singapore)

SCEVD: Semantic-Enhanced Code Embedding for Vulnerability Discovery 1522
Joseph Gear (Queensland University of Technology, Australia), Yue Xu (Queensland University of Technology, Australia), Ernest Foo (Griffith University, Australia), Praveen Gauravaran (Tata Consultancy Services, Australia), Zahra Jadidi (Griffith University, Australia), and Leonie Simpson (Queensland University of Technology, Australia)

Short Signatures via Multiple Hardware Security Modules with Key Splitting in Circuit Breaking Environments 1528
Łukasz Krzywiecki (Wrocław University of Science and Technology, Poland) and Hannes Salin (Swedish Transport Administration, Sweden)

Smart Grid Data Aggregation Scheme Based on Local Differential Privacy 1534
Lei Zhang (Southeast University Nanjing, China), Dong Mao (State Grid Zhejiang Electric Power Company Information & Telecommunication Branch Hangzhou, China), Zuge Chen (State Grid Zhejiang Electric Power Company Information & Telecommunication Branch Hangzhou, China), Yubo Song (Southeast University Nanjing, China), Liquan Chen (Southeast University Nanjing, China), and Zhongyuan Qin (Southeast University Nanjing, China)

Study on Gateway Station Deployment for Large Scale LEO Satellite Constellation Networks 1540
Lei Cheng (Institute of Software Chinese Academy of Sciences & University of Chinese Academy of Sciences, China), Shuaijun Liu (Institute of Software Chinese Academy of Sciences, China), Lixaing Liu (Institute of Software Chinese Academy of Sciences & University of Chinese Academy of Sciences, China), Hailong Hu (Institute of Software Chinese Academy of Sciences, China), Jingyi Chen (Institute of Software Chinese Academy of Sciences, China), and Xiandong Mneg (Tianlong Communication Co., Ltd, China)

Sybil-Resistant Truth Discovery in Crowdsourcing by Exploiting the Long-Tail Effect 1545
Dejia Lin (Jinan University, China), Yongdong Wu (Jinan University, China), and Wensheng Gan (Jinan University, China)

Technical Architecture of Integrated Big Data Platform 1551
Yuan Liu (China Academy of Information and Communications Technology, China), Yanmei Liu (China Academy of Information and Communications Technology, China), and Minjing Zhong (China Academy of Information and Communications Technology, China)

Telecom Big Data Assisted Algorithm and System of Campus Safety Management 1557
Chen Cheng (Research Institute, China United Network Communications Corporation, China), Xinzhou Cheng (Research Institute, China United Network Communications Corporation, China), Shikun Jiang (Government and Enterprise Customer Business Group, China United Network Communications Group Corporation, China), Xin Zhao (Management of Technology Division Science & Technology Innovation Department, China United Network Communications Group Corporation, China), Yuhui Han (Research Institute, China United Network Communications Corporation, China), Tao Zhang (Research Institute, China United Network Communications Corporation, China), Lijuan Cao (Research Institute, China United Network Communications Corporation, China), Yuwei Jia (Research Institute, China United Network Communications Corporation, China), Tian Xiao (Research Institute, China United Network Communications Corporation, China), and Bei Li (Research Institute, China United Network Communications Corporation, China)

Telecom Customer Churn Prediction Based on Half Termination Dynamic Label and XGBoost 1563
Yi Zhang (Research Institute, China United Network Communications Corporation, China), Fan Zhang (Research Institute, China United Network Communications Corporation, China), Chuntao Song (Research Institute, China United Network Communications Corporation, China), Xinzhou Cheng (Research Institute, China United Network Communications Corporation, China), Chen Cheng (Research Institute, China United Network Communications Corporation, China), Lexi Xu (Research Institute, China United Network Communications Corporation, China), Tian Xiao (Research Institute, China United Network Communications Corporation, China), and Bei Li (Research Institute, China United Network Communications Corporation, China)

TINKER: A Framework for Open Source Cyberthreat Intelligence 1569
Nidhi Rastogi (Rochester Institute of Technology, USA), Sharmishtha Dutta (Rensselaer Polytechnic Institute, USA), Alex Gittens (Rensselaer Polytechnic Institute, USA), Mohammed J. Zaki (Rensselaer Polytechnic Institute, USA), and Charu Aggarwal (IBM Research, USA)

Towards Logical Specification of Adversarial Examples in Machine Learning 1575
Marwa Zeroual (Université Paris Saclay, CEA, France), Brahim Hamid (IRIT, Université de Toulouse CNRS UT2, France), Morayo Adedjouma (Université Paris Saclay, CEA, France), and Jason Jaskolka (Carleton University, Canada)

Towards the Concept of Trust Assurance Case 1581
Emilia Cioroaica (Fraunhofer IESE, Germany), Barbora Buhnova (Masaryk University, Czech Republic), Daniel Schneider (Fraunhofer IESE, Germany), Ioannis Sorokos (Fraunhofer IESE, Germany), Thomas Kuhn (Fraunhofer IESE, Germany), and Emrah Tomur (Ericsson, Turkey)

Trusted Hart for Mobile RISC-V Security 1587
Vladimir Ushakov (Huawei Technologies, Finland), Sampo Sovio (Huawei Technologies, Finland), Qingchao Qi (Movial Oy, Finland), V. Nayani (Huawei Technologies, Finland), Valentin Manea (Huawei Technologies, Finland), Philip Ginzboorg (Huawei Technologies, Finland), and Jan Erik Ekberg (Huawei Technologies, Finland)

Understanding the Penetration Test Workflow: a Security Test with Tramonto in an e-Government Application 1597
Daniel Dalalana Bertoglio (Pontifical Catholic University of Rio Grande do Sul (PUCRS), Brazil), Luis Gustavo Bier Schüler (Feevale University (FEEVALE), Brazil), Avelino Francisco Zorzo (Pontifical Catholic University of Rio Grande do Sul (PUCRS), Brazil), and Roben Castagna Lunardi (Federal Institute of Education, Science and Technology of Rio Grande do Sul (IFRS), Brazil)

User Analysis and Traffic Prediction Method Based on Behavior Slicing 1605
Xin He (China United Network Communications Corporation, China), Lijuan Cao (China United Network Communications Corporation, China), Yuwei Jia (China United Network Communications Corporation, China), Kun Chao (China United Network Communications Corporation, China), Miaoqiong Wang (China Academy of Information and Communications Technology, China), Chao Wang (China Communications Standards Association, China), Yunyun Wang (China United Network Communications Corporation, China), Runsha Dong (China United Network Communications Corporation, China), and Zhenqiao Zhao (China United Network Communications Corporation, China)

Vehicle Classification System With Mobile Edge Computing Based on Broad Learning 1611
Xiting Peng (Shenyang University of Technology, China), Naixian Zhao (Shenyang University of Technology, China), Lexi Xu (Research Institute, China United Network Communications Corporation, China), and Shi Bai (Shenyang University of Technology, China)
