2022 IEEE 22nd International Conference on Software Quality, Reliability and Security (QRS) **QRS 2022**

Table of Contents

Message from the QRS 2022 Steering Committee Chairs, General Chairs, and Program Chairs ..	xix
QRS 2022 Steering Committee	xxi
QRS 2022 Organizing Committee	xxii
QRS 2022 Program Committee	xxiii
Chairs of Workshops Co-Located with QRS 2022	xxvi
QRS 2022 Keynote Speech	xxviii

Software Vulnerability

A Taxonomy of Software Flaws Leading to Buffer Overflows	1
<i>Raphaël Khoury (Université du Québec en Outaouais)</i>	
A Comprehensive Analysis of NVD Concurrency Vulnerabilities	9
<i>Lili Bo (Yangzhou University), Xing Meng (Yangzhou University), Xiaobing Sun (Yangzhou University), Jingli Xia (Yangzhou University), and Xiaoxue Wu (Yangzhou University)</i>	
IntJect: Vulnerability Intent Bug Seeding	19
<i>Benjamin Petit (University of Namur, Belgium), Ahmed Khanfir (University of Luxembourg, Luxembourg), Ezekiel Soremekun (University of Luxembourg, Luxembourg), Gilles Perrouin (University of Namur, Belgium), and Mike Papadakis (University of Luxembourg, Luxembourg)</i>	
Separating the Wheat from the Chaff: Using Indexing and Sub-sequence Mining Techniques to Identify Related Crashes During Bug Triage	31
<i>Kedrian James (UNC Chapel Hill, USA), Yufei Du (UNC Chapel Hill, USA), Sanjeev Das (Independent Researcher, USA), and Fabian Monroe (Georgia Institute of Technology, USA)</i>	
Exploring Transformers for Multi-label Classification of Java Vulnerabilities	43
<i>Cláudia Mamede (Faculty of Engineering of University of Porto), Eduard Pinconschi (Faculty of Engineering of University of Porto), Rui Abreu (Faculty of Engineering of University of Porto, INESC-ID), and José Campos (Faculty of Engineering of University of Porto)</i>	

System and Software Reliability

A BiLSTM-Attention Model for Detecting Smart Contract Defects More Accurately	53
<i>Chen Qian (Southeast University, China), Tianyuan Hu (Southeast University, China), and Bixin Li (Southeast University, China)</i>	
Security Countermeasure Selection for Component-based Software-intensive Systems	63
<i>Charilaos Skandylas (Linnaeus University), Narges Khakpour (Newcastle University), and Javier Cámara (University of Málaga)</i>	
A Detection Method for Scarcity Defect of Blockchain Digital Asset Based on Invariant Analysis	73
<i>Jinlei Sun (Army Engineering University of PLA, China), Song Huang (Army Engineering University of PLA, China), Xingya Wang (Nanjing Tech University, China), Meijuan Wang (Army Engineering University of PLA, China), and Jinhui Du (Army Engineering University of PLA, China)</i>	
Salus: A Novel Data-Driven Monitor that Enables Real-Time Safety in Autonomous Driving Systems	85
<i>Bohan Zhang (University of Iowa), Yafan Huang (University of Iowa), and Guanpeng Li (University of Iowa)</i>	
Automatic Collaborative Testing of Applications Integrating Text Features and Priority Experience Replay	95
<i>Lizhi Cai (East China University of Science and Technology, China; Shanghai Development Center of Computer Software Technology, China), Jin Wang (East China University of Science and Technology, China; Shanghai Development Center of Computer Software Technology, China), Mingang Chen (Shanghai Development Center of Computer Software Technology, China), and Jilong Wang (East China University of Science and Technology, China; Shanghai Development Center of Computer Software Technology, China)</i>	

Security

Cast Away: On the Security of DLNA Deployments in the SmartTV Ecosystem	105
<i>Guangwei Tian (Shandong University), Jiongyi Chen (National University of Defense Technology), Kailun Yan (Shandong University), Shishuai Yang (Shandong University), and Wenrui Diao (Shandong University)</i>	
GAN-Based Privacy-Preserving Unsupervised Domain Adaptation	117
<i>Dongdong Zhao (Wuhan University of Technology, China), Zhao Wang (Wuhan University of Technology, China), Huanhuan Li (China University of Geosciences, China), and Jianwen Xiang (Wuhan University of Technology, China)</i>	
Conceptualizing the Secure Machine Learning Operations (SecMLOps) Paradigm	127
<i>Xinrui Zhang (Carleton University, Canada) and Jason Jaskolka (Carleton University, Canada)</i>	
Identity Authentication strategy of Mobile Crowd Sensing Based on CFL	139
<i>Lin Wang (China University of Petroleum), Fangxiao Li (China University of Petroleum), Yunfei Xie (China University of Petroleum), and Leyi Shi (China University of Petroleum)</i>	

AuthROS: Secure Data Sharing Among Robot Operating Systems Based on Ethereum	147
<i>Shenhui Zhang (Hainan University, China), Wenkai Li (Hainan University, China), Xiaoqi Li (Hainan University, China), and Boyi Liu (The Hong Kong University of Science and Technology, China)</i>	

Software Defect Prediction

Semantic Feature Learning Based on Double Sequences Structure for Software Defect Number Prediction	157
<i>Tao Wang (Nanjing University of Aeronautics and Astronautics, China), Chuanqi Tao (Nanjing University of Aeronautics and Astronautics, China), Hongjing Guo (Nanjing University of Aeronautics and Astronautics, China), and Lijin Tang (Nanjing University of Aeronautics and Astronautics, China)</i>	
An Empirical Study on Software Defect Prediction using Function Point Analysis	167
<i>Xinghan Zhao (Xidian University; the 27th Research Institute of CETC) and Cong Tian (Xidian University)</i>	
An Empirical Study of the Bug Link Rate	177
<i>Chenglin Li (Zhejiang Sci-Tech University, China), Yangyang Zhao (Zhejiang Sci-Tech University, China), and Yibiao Yang (Nanjing University, China)</i>	
Visualization-Based Software Defect Prediction via Convolutional Neural Network with Global Self-Attention	189
<i>Shaojian Qiu (South China Agricultural University), Shaosheng Wang (South China Agricultural University), Xuhong Tian (South China Agricultural University), Mengyang Huang (South China Agricultural University), and Qiong Huang (South China Agricultural University)</i>	
Telemetry-based Software Failure Prediction by Concept-space Model Creation	199
<i>Bahareh Afshinpour (University Grenoble Alpes, France), Roland Groz (University Grenoble Alpes, France), and Massih-Reza Amini (University Grenoble Alpes, France)</i>	

Program Debugging

Towards Extending the Range of Bugs That Automated Program Repair Can Handle	209
<i>Omar I. Al-Bataineh (Simula Research Laboratory, Norway) and Leon Moonen (Simula Research Laboratory, Norway)</i>	
Division by Zero: Threats and Effects in Spectrum-Based Fault Localization Formulas	221
<i>Dániel Vince (University of Szeged), Attila Szatmári (University of Szeged), Ákos Kiss (University of Szeged), and Árpád Beszédes (University of Szeged)</i>	
CGMBL: Combining GAN and Method Name for Bug Localization	231
<i>Hao AA Chen (Central South University, China), Haiyang Yang (Central South University, China), Zilun Yan (Central South University, China), Li Kuang (Central South University, China), and Lingyan Zhang (Central South University, China)</i>	

The Use of Pretrained Model for Matching App Reviews and Bug Reports	242
<i>Xiaojuan Wang (Hainan University, China), Wenyu Zhang (Hainan University, China), Shanyan Lai (Hainan University, China), Chunyang Ye (Hainan University, China), and Hui Zhou (Hainan University, China)</i>	
Context-aware Program Simplification to Improve Information Retrieval-based Bug Localization	252
<i>Yilin Yang (State Key Laboratory for Novel Software Technology, Nanjing University, China), Ziyuan Wang (Nanjing University of Posts and Telecommunications, China), Zhenyu Chen (State Key Laboratory for Novel Software Technology, Nanjing University, China), and Baowen Xu (State Key Laboratory for Novel Software Technology, Nanjing University, China)</i>	

Intrusion Detection and Prevention

Anomaly Detection in Encrypted Identity Resolution Traffic Based on Machine Learning	264
<i>Zhishen Zhu (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, Chinese Academy of Sciences), Hao Zhou (China Industrial Control Systems Cyber Emergency Response Team), Qingya Yang (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, Chinese Academy of Sciences), Chonghua Wang (China Industrial Control Systems Cyber Emergency Response Team), and Zhen AA Li (Institute of Information Engineering, Chinese Academy of Sciences)</i>	
Evaluating Performance and Security of a Hybrid Moving Target Defense in SDN environments ...	276
<i>Minjune Kim (The University of Queensland), Jin-Hee Cho (Virginia Tech), Hyuk Lim (Korea Institute of Energy Technology (KENTECH)), Terrence J. Moore (DEVCOM Army Research Lab.), Frederica F. Nelson (DEVCOM Army Research Lab.), Ryan K. L. Ko (The University of Queensland), and Dan Dongseong Kim (The University of Queensland)</i>	
An Anomaly-based Approach for Detecting Modularity Violations on Method Placement	287
<i>Kazuki Yoda (The University of Tokyo), Tomoki Nakamaru (The University of Tokyo), Soramichi Akiyama (Ritsumeikan University), and Shigeru Chiba (The University of Tokyo)</i>	
LogGD: Detecting Anomalies from System Logs with Graph Neural Networks	299
<i>Yongzheng Xie (The University of Adelaide, Australia), Hongyu Zhang (The University of Newcastle, Australia), and Muhammad Ali Babar (The University of Adelaide, Australia)</i>	
An Ontological Analysis of Safety-critical Software and Its Anomalies	311
<i>Hezhen Liu (Huawei Technologies Co., Ltd.), Zhi Jin (Peking University), Zheng Zheng (Beihang University), Chengqiang Huang (Huawei Technologies Co., Ltd.), and Xun Zhang (Huawei Technologies Co., Ltd.)</i>	

Information and Software Quality Assurance

A New Code Review Method based on Human Errors	321
<i>Fuqun Huang (University of Coimbra, CISUC), Bo Zhao (The School of Software, Beihang University), and Henrique Madeira (University of Coimbra, CISUC)</i>	
Contextual Operationalization of Metrics As Scores: Is My Metric Value Good?	333
<i>Sebastian Hönel (Linnaeus University), Morgan Ericsson (Linnaeus University), Welf Löwe (Linnaeus University), and Anna Wingkvist (Linnaeus University)</i>	
A Collaboration-Aware Approach to Profiling Developer Expertise with Cross-Community Data ..	344
<i>Xiaotao Song (School of Software, Taiyuan University of Technology), Jiafei Yan (SKLSDE Lab, Beihang University), Yuexin Huang (SKLSDE Lab, Beihang University), Hailong Sun (SKLSDE Lab, Beihang University), and Hongyu Zhang (The University of Newcastle)</i>	
Proposing a Quality Model for Evaluating and Identifying Opportunities in Clinical Practice Guideline Engines	356
<i>Manuel Carrero (University of Seville, Spain), Elena Enamorado-Díaz (University of Seville, Spain), Julián García-García (University of Seville, Spain), and María José Escalona (University of Seville, Spain)</i>	
Emotional Dashboard: A Non-intrusive Approach to Monitor Software Developers' Emotions and Personality Traits	366
<i>Leo Silva (Centre of Informatics and Systems, University of Coimbra, Portugal), Marília Castro (University of Coimbra, Portugal), Miriam Silva (University of Coimbra, Portugal), Milena Santos (University of Coimbra, Portugal), Uirá Kulesza (Federal University of Rio Grande do Norte, Brazil), Margarida Lima (University of Coimbra, Portugal), and Henrique Madeira (Centre of Informatics and Systems, University of Coimbra, Portugal)</i>	

Formal Methods

A Novel Approach for Bounded Model Checking Through Full Parallelism	376
<i>Debao Sang (East China Normal University, China), Jing AA Liu (East China Normal University, China), Haiying Sun (East China Normal University, China), Jin Xu (Peking University, China), and Jiexiang Kang (China Aeronautical Radio Electronics Research Institute, China)</i>	
Safety SysML: An Executable Safety-Critical Avionics Requirement Modeling Language	388
<i>Huiyu Liu (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, China), Jing AA Liu (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, China), Wei Yin (China Aeronautical Radio Electronics Research Institute, China), Haiying Sun (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, China), and Chenchen Yang (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, China)</i>	

Model Checking the Safety of Raft Leader Election Algorithm	400
<i>Qihao Bao (Southeast University, China), Bixin Li (Southeast University, China), Tianyuan Hu (Southeast University, China), and Dongyu Cao (Southeast University, China)</i>	
Formal Verification of Hierarchical Ptolemy II Synchronous-Reactive Models with Bounded Model Checking	410
<i>Xiaozhen Zhang (Dalian University of Technology, China), Zhaoming Yang (Dalian University of Technology, China), Hui Kong (Huawei Technologies Co., Ltd., China), and Weiqiang Kong (Dalian University of Technology, China)</i>	
Coverage Testing of Industrial Simulink Models Using Monte-Carlo and SMT-Based Methods	422
<i>Daisuke Ishii (Japan Advanced Institute of Science and Technology, Japan), Takashi Tomita (Japan Advanced Institute of Science and Technology, Japan), Toshiaki Aoki (Japan Advanced Institute of Science and Technology, Japan), The Quyen Ngo (VNU University of Science, Vietnam), Thi Bich Ngoc Do (Posts and Telecommunications Institute of Technology, Vietnam), and Hideaki Takai (GAIO Tech. Co., Japan)</i>	

Optimization

Availability and Cost Aware Multi-domain Service Deployment Optimization	434
<i>Chuangchuang Zhang (School of Information and Electrical Engineering, Ludong University, China), Yanming Liu (School of Information and Electrical Engineering, Ludong University, China), Hongyong Yang (School of Information and Electrical Engineering, Ludong University, China), Yihao Li (School of Information and Electrical Engineering, Ludong University, China), and Shuning Zhang (School of Information and Electrical Engineering, Ludong University, China)</i>	
Cache Optimizations for Test Case Reduction	442
<i>Dániel Vince (University of Szeged) and Ákos Kiss (University of Szeged)</i>	
Nimbus: Toward Speed Up Function Signature Recovery via Input Resizing and Multi-task Learning	454
<i>Yi Qian (Nanjing University, China), Ligeng Chen (Nanjing University, China), Yuyang Wang (Nanjing University, China), and Bing Mao (Nanjing University, China)</i>	
Reuse of Test Case Based on Attributes Weight Optimization	464
<i>Yaqing Shi (Army Engineering University of PLA, China), Song Huang (Army Engineering University of PLA, China), and Jinyong Wan (Army Engineering University of PLA, China)</i>	
GOV: A Verification Method for Smart Contract Gas-Optimization	473
<i>Yuan Huang (Sun Yat-sen University, China), Rong Wang (Sun Yat-sen University, China), Xiangping Chen (Sun Yat-sen University, China), Xiaocong Zhou (Sun Yat-sen University, China), and Ziyang Wang (Sun Yat-sen University, China)</i>	
Stateful Depletion and Scheduling of Containers on Cloud Nodes for Efficient Resource Usage	480
<i>Amirali Amiri (University of Vienna, Austria), Utwe Zdun (University of Vienna, Austria), and Konstantinos Plakidas (fiskaly GmbH, Austria)</i>	

Malware Detection and Analysis

Understanding and Mitigating Label Bias in Malware Classification: An Empirical Study	492
<i>Jia AA Yan (Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xiangkun Jia (Institute of Software Chinese Academy of Sciences, China;), Lingyun Ying (QI-ANXIN Technology Group Inc., China), Jia Yan (Institute of Software Chinese Academy of Sciences, China), and Purui Su (Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i>	
Can PoW Consensus Protocol Resist the Whale Attack?	504
<i>Xueyong Sun (Southeast University, China), Qihao Bao (Southeast University, China), and Bixin Li (Southeast University, China)</i>	
Towards Improving Multiple Authorship Attribution of Source Code	516
<i>Pengnan Hao (Hebei University), Zhen Li (Hebei University), Cui Liu (Hebei University), Yu Wen (Hebei University), and Fanming Liu (Hebei University)</i>	
CBSDI: Cross-Architecture Binary Code Similarity Detection Based on Index Table	527
<i>Longmin Deng (Wuhan University of Technology), Dongdong Zhao (Wuhan University of Technology), Junwei Zhou (Wuhan University of Technology), Zhe Xia (Wuhan University of Technology), and Jianwen Xiang (Wuhan University of Technology)</i>	
PDG2VEC: Identify the Binary Function Similarity with Program Dependence Graph	537
<i>Yuntao Zhang (Beijing University of Posts and Telecommunications), Yanhao Wang (QI-ANXIN, Beijing, China), Yuwei Liu (Institute of Software, Chinese Academy of Sciences, Beijing, China), Zhengyuan Pang (Beijing DigApis Technology Co., Ltd, Beijing, China), and Binxing Fang (Beijing University of Posts and Telecommunications)</i>	

Internet of Things and Cloud Computing

Uncertainty-Aware Behavior Modeling and Quantitative Safety Evaluation for Automatic Flight Control Systems	549
<i>Huiyu Liu (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, China), Jing AA Liu (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, China), Haiying Sun (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, China), Tengfei Li (CASCO Signal Ltd., China), and John Zhang (Xidian University, China)</i>	
ucXception: A Framework for Evaluating Dependability of Software Systems	561
<i>Pedro David Almeida (Universidade de Coimbra), Frederico Cerveira (Universidade de Coimbra), Raul Barbosa (Universidade de Coimbra), and Henrique Madeira (Universidade de Coimbra)</i>	
SAS-GKE: A Secure Authenticated Scalable Group Key Exchange	571
<i>Abu Faisal (Queen's University, Canada) and Mohammad Zulkernine (Queen's University, Canada)</i>	

Assessing the Quality of Low-Code and Model-Driven Engineering Platforms for Engineering IoT Systems	583
<i>Felicien Ihrwe (Intecs Solutions S.p.A, Italy), Davide Di Ruscio (University of L'Aquila, Italy), Simone Gianfranceschi (Intecs Solutions S.p.A, Italy), and Alfonso Pierantonio (University of L'Aquila, Italy)</i>	

Software Testing and Verification (I)

A Pattern-Based Test Platform for Families of Smart Health Products	595
<i>Pedro Almeida (Faculty of Engineering of the University of Porto, Portugal), João Pascoal Faria (Faculty of Engineering of the University of Porto, Portugal), and Bruno Lima (Faculty of Engineering of the University of Porto, Portugal)</i>	
cPV - Simulation and Verification for Membrane Computing	606
<i>Yezhou Liu (University of Auckland, New Zealand), Jing Sun (University of Auckland, New Zealand), Radu Nicolescu (University of Auckland, New Zealand), and Hai Wang (Aston University, United Kingdom)</i>	
Multi-transaction Sequence Vulnerability Detection for Smart Contracts based on Inter-Path Data Dependency	616
<i>Shuai Zhang (Hebei University, China), Meng Wang (Hebei University, China), Yi Liu (Xidian University, China), Yuhan Zhang (Xidian University, China), and Bin Yu (Xidian University, China)</i>	
Valkyrie: Improving Fuzzing Performance Through Deterministic Techniques	628
<i>Yuyang Rong (University of California, Davis), Chibin Zhang (ShanghaiTech University), Jianzhong Liu (ShanghaiTech University), and Hao Chen (University of California, Davis)</i>	
Automated Grey-Box Testing of Microservice Architectures	640
<i>Luca Giamattei (Università degli Studi di Napoli Federico II, Napoli, Italy), Antonio Guerriero (Università degli Studi di Napoli Federico II, Napoli, Italy), Roberto Pietrantuono (Università degli Studi di Napoli Federico II, Napoli, Italy), and Stefano Russo (Università degli Studi di Napoli Federico II, Napoli, Italy)</i>	
TokenAuditor: Detecting Manipulation Risk in Token Smart Contract by Fuzzing	651
<i>Mingpei Cao (Peking University, China), Yuezhe Zhang (Technical University of Munich, Germany), Zhenxuan Feng (Peking University, China), Jiahao Hu (Peking University, China), and Yuesheng Zhu (Peking University, China)</i>	

Software Testing and Verification (II)

Crowdsourced Testing Task Assignment based on Knowledge Graphs	663
<i>Peng Yang (South China Normal University, China), Chao Chang (South China Normal University, China), and Yong Tang (South China Normal University, China)</i>	

A Functional FMECA approach for the assessment of critical infrastructure resilience	672
<i>Gonçalo Carvalho (University of Coimbra, Portugal), Nádía Medeiros (University of Coimbra, Portugal), Henrique Madeira (University of Coimbra, Portugal), and Bruno Cabral (University of Coimbra, Portugal)</i>	
Predictive Mutation Analysis of Test Case Prioritization for Deep Neural Networks	682
<i>Zhengyuan Wei (City University of Hong Kong), Haipeng Wang (City University of Hong Kong), Imran Ashraf (City University of Hong Kong), and W.K. Chan (City University of Hong Kong)</i>	
Automated Synthesis of Quantum Circuits Using Neural Network	694
<i>Kentaro Murakami (Kyushu University) and Jianjun Zhao (Kyushu University)</i>	
Test Reuse Based on Adaptive Semantic Matching across Android Mobile Applications	703
<i>Shuqi Liu (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, China), Yu Zhou (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, China), Tingting Han (Birkbeck, University of London, UK), and Taolue Chen (Birkbeck, University of London, UK)</i>	

Test Case Generation

Test Case Generation for Ethereum Smart Contract Based on Data Dependency Analysis of State Variable	710
<i>Jinhu Du (Army Engineering University of PLA, China), Song Huang (Army Engineering University of PLA, China), Xingya Wang (Nanjing Tech University, China), Changyou Zheng (Army Engineering University of PLA, China), and Jinlei Sun (Army Engineering University of PLA, China)</i>	
Extracting Temporal Models from Data Episodes	721
<i>Nour Chetouane (Institute for Software Technology, Graz University of Technology, Austria) and Franz Wotawa (Institute for Software Technology, Graz University of Technology, Austria)</i>	
MC/DC Test Case Automatic Generation for Safety-Critical Systems	732
<i>Cong Wang (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, China), Haiying Sun (Software Engineering Institute, East China Normal University, China), Hui Dou (Huawei Technology, China), Hongtao Chen (Huawei Technology, China), and Jing AA Liu (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, China)</i>	
Generating Abstract Test Cases from User Requirements using MDSE and NLP	744
<i>Sai Chaithra Allala (Florida International University, USA), Juan P. Sotomayor (Florida International University, USA), Dionny Santiago (Florida International University, USA), Tariq M. King (EPAM, USA), and Peter J. Clarke (Florida International University, USA)</i>	
DeepRTest: A Vulnerability-guided Robustness Testing and Enhancement Framework for Deep Neural Networks	754
<i>Minghao Yang (Beihang University), Shunkun Yang (Beihang), and Wenda Wu (Beihang University)</i>	

Machine Learning/Deep Learning Systems (I)

An Effective Low-dimensional Software Code Representation using BERT and ELMo	763
<i>Srijoni Majumdar (Indian Institute of Technology, Kharagpur), Ashutosh Varshney (Indian Institute of Technology, Kharagpur), Partha Pratim Das (Indian Institute of Technology, Kharagpur), Paul D Clough (Sheffield University UK, TPXimpact, London, UK), and Samiran Chattopadhyay (Jadavpur University, Kolkata, West Bengal, India, TCG CREST Centres for Research and Education in Science and Technology)</i>	
Building Safe and Stable DNN Controllers using Deep Reinforcement Learning and Deep Imitation Learning	775
<i>Xudong He (Florida International University)</i>	
Evaluating the Robustness of Deep Reinforcement Learning for Autonomous Policies in a Multi-agent Urban Driving Environment	785
<i>Aizaz Sharif (Simula Research Laboratory) and Dusica Marijan (Simula Research Laboratory)</i>	
ParGCN: Abnormal Transaction Detection based on Graph Neural Networks	797
<i>Lian Yu (Peking University, China), Qi Jing (Peking University, China), Ruomiao Li (Peking University, China), Zhiya Cheng (Peking University, China), and Chang Xu (Peking University, China)</i>	
A Survey on Backdoor Attack and Defense in Natural Language Processing	809
<i>Xuan Sheng (Nanjing University of Aeronautics and Astronautics, China), Zhaoyang Han (Nanjing University of Aeronautics and Astronautics, China), Piji Li (Nanjing University of Aeronautics and Astronautics, China), and Xiangmao Chang (Nanjing University of Aeronautics and Astronautics, China)</i>	

Machine Learning/Deep Learning Systems (II)

Mutation Testing based Safety Testing and Improving on DNNs	821
<i>Yuhao Wei (Army Enginnering University of PLA, China), Song Huang (Army Enginnering University of PLA, China), Yu Wang (Army Enginnering University of PLA, China), Ruilin Liu (Agricultural Bank of China Chengdu R & D Center, China), and Chunyan Xia (Army Enginnering University of PLA, China)</i>	
Focus on New Test Cases in Continuous Integration Testing Based on Reinforcement Learning	830
<i>Fanliang Chen (College of Information Science and Technology, Beijing University of Chemical Technology, China), Zheng Li (College of Information Science and Technology, Beijing University of Chemical Technology, China), Ying Shang (College of Information Science and Technology, Beijing University of Chemical Technology, China), and Yang Yang (School of Information Science and Engineering, Zhejiang Sci-Tech University, China)</i>	
A Distance-Based Dynamic Random Testing Strategy for Natural Language Processing DNN Models	842
<i>Yuechen Li (Beihang University, China), Hanyu Pei (Beihang University, China), Linzhi Huang (Beihang University, China), and Beibei Yin (Beihang University, China)</i>	

EDDNet: An Efficient and Accurate Defect Detection Network for the Industrial Edge Environment	854
<i>Runbing Qin (School of Computer and Electronic Information, Guangxi University, China), Ningjiang Chen (School of Computer and Electronic Information, Guangxi University, China), and Yihui Huang (School of Computer and Electronic Information, Guangxi University, China)</i>	
Evaluation of the Architecture Alternatives for Real-Time Intrusion Detection Systems for Vehicles	864
<i>Mubark Jedh (Iowa State University, USA), Jian Kai Lee (Iowa State University, USA), and Lot i ben Othmane (University of North Texas, USA)</i>	
Strategies for Improving the Error Robustness of Convolutional Neural Networks	874
<i>Antonio Morais (University of Coimbra, CISUC, DEI), Raul Barbosa (University of Coimbra, CISUC, DEI), Nuno Lourenco (University of Coimbra, CISUC, DEI), Frederico Cerveira (University of Coimbra, CISUC, DEI), Michele Lombardi (University of Bologna, DISI), and Henrique Madeira (University of Coimbra, CISUC, DEI)</i>	

Program Comprehension (I)

Parameter Description Generation with the Code Parameter Flow	884
<i>Qiuyuan Chen (Zhejiang University), Zezhou Yang (Harbin Institute of Technology), Zhongxin Liu (Zhejiang University), Shanping Li (Zhejiang University), and Cuiyun Gao (Harbin Institute of Technology)</i>	
GitHub Considered Harmful? Analyzing Open-Source Projects for the Automatic Generation of Cryptographic API Call Sequences	896
<i>Catherine Tony (Hamburg University of Technology), Nicolás E. Díaz Ferreyra (Hamburg University of Technology), and Riccardo Scandariato (Hamburg University of Technology)</i>	
Improved Methods of Pointer Mixture Network for Code Completion	907
<i>Cheng Wei (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, China), Zhiqiu Huang (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China), and Yaoshen Yu (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, China; Key Laboratory of Safety-Critical Software, Nanjing University of Aeronautics and Astronautics, China)</i>	
Automated Identification of Performance Changes at Code Level	916
<i>David Georg Reichelt (Universität Leipzig, Germany), Stefan Kühne (Universität Leipzig, Germany), and Wilhelm Hasselbring (Christian-Albrechts-Universität zu Kiel, Germany)</i>	
Cross Platform API Mappings based on API Documentation Graphs	926
<i>Yanjie Shao (Institute of Software, Chinese Academy of Sciences), Tianyue Luo (Institute of Software, Chinese Academy of Sciences), Xiang Ling (Institute of Software, Chinese Academy of Sciences), Limin Wang (Institute of Software, Chinese Academy of Sciences), and Senwen Zheng (Institute of Software, Chinese Academy of Sciences)</i>	

Program Comprehension (II)

CodeBERT-nt: Code Naturalness via CodeBERT	936
<i>Ahmed Khanfir (University of Luxembourg, Luxembourg), Matthieu Jimenez (University of Luxembourg, Luxembourg), Mike Papadakis (University of Luxembourg, Luxembourg), and Yves Le Traon (University of Luxembourg)</i>	
RetCom: Information Retrieval-Enhanced Automatic Source-Code Summarization	948
<i>Yubo Zhang (Beihang University, China), Yanfang Liu (Beihang University, China), Xinxin Fan (Chinese Academy of Sciences, China), and Yunfeng Lu (Beihang University, China)</i>	
API Misuse Detection Method Based on Transformer	958
<i>Jingbo Yang (School of Computer Science and Engineering, Beihang University, China), Jian Ren (School of Computer Science and Engineering, Beihang University, China), and Wenjun Wu (Institute of Artificial Intelligence, Beihang University, China)</i>	
CRUST: Towards a Unified Cross-Language Program Analysis Framework for Rust	970
<i>Shuang Hu (University of Science and Technology of China, China), Baojian Hua (University of Science and Technology of China, China), Lei Xia (University of Science and Technology of China, China), and Yang Wang (University of Science and Technology of China, China)</i>	
Comprehensiveness, Automation and Lifecycle: A New Perspective for Rust Security	982
<i>Shuang Hu (University of Science and Technology of China, China), Baojian Hua (University of Science and Technology of China, China), and Yang Wang (University of Science and Technology of China, China)</i>	

Simulation and Evaluation

A Proactive Self-Adaptation Approach for Software Systems Based on Environment-Aware Model Predictive Control	992
<i>Zhengyin Chen (Peking University, China) and Wenpin Jiao (Peking University, China)</i>	
MetaA: Multi-dimensional Evaluation of Testing Ability via Adversarial Examples in Deep Learning	1004
<i>Siqi Gu (Nanjing University), Jiawei Liu (Nanjing University), Zhanwei Hui (Military Academy of Science), Wenhong Liu (Beijing Institute of Tracking and Telecommunication Technology), and Zhenyu Chen (Nanjing University)</i>	
MiSim: A Simulator for Resilience Assessment of Microservice-Based Architectures	1014
<i>Sebastian Frank (University of Hamburg, Germany), Lion Wagner (University of Stuttgart, Germany), Alireza Hakamian (University of Stuttgart, Germany), Martin Straesser (University of Würzburg, Germany), and André van Hoorn (University of Hamburg, Germany)</i>	

Quantity-Simulation-Analysis Method Based Novel RSA Timing Attack Algorithm for Single-Chip Microcomputer Platform	1026
<i>Cong Li (School of Computer Science and Engineering, North Minzu University, China), Qiang Han (School of Computer Science and Engineering, North Minzu University, China), Tao Zhang (School of Computer Science and Engineering, Macau University of Science and Technology, China), Bingbing Lei (School of Computer Science and Engineering, North Minzu University, China), and Yu He (School of Computer Science and Engineering, North Minzu University, China)</i>	
Continuous Usability Requirements Evaluation Based on Runtime User Behavior Mining	1036
<i>Tong Li (Beijing University of Technology) and Tianai Zhang (Beijing University of Technology)</i>	

Empirical Studies

Adopting Misclassification Detection and Outlier Modification to Fault Correction in Deep Learning-Based Systems	1046
<i>Chuan-Min Chu (National Tsing Hua University), Chin-Yu Huang (National Tsing Hua University), and Neil C. Fang (National Tsing Hua University)</i>	
Quantitative Analysis of Sparsely Synchronized Fail-Safe Processors	1057
<i>Jun Inoue (National Institute of Advanced Industrial Science and Technology), Hideaki Nishihara (National Institute of Advanced Industrial Science and Technology), and Akira Mori (National Institute of Advanced Industrial Science and Technology)</i>	
An Empirical Study on Source Code Feature Extraction in Preprocessing of IR-Based Requirements Traceability	1069
<i>Bangchao Wang (School of Computer Science and Artificial Intelligence, Wuhan Textile University, China), Yang Deng (School of Computer Science and Artificial Intelligence, Wuhan Textile University, China), Ruiqi Luo (School of Computer Science and Artificial Intelligence, Wuhan Textile University, China), and Huan Jin (School of Computer Science and Artificial Intelligence, Wuhan Textile University, China)</i>	
Pain Pickle: Bypassing Python Restricted Unpickler for Automatic Exploit Generation	1079
<i>Nan-Jung Huang (National Yang Ming Chiao Tung University, Taiwan), Chih-Jen Huang (National Yang Ming Chiao Tung University, Taiwan), and Shih-Kun Huang (National Yang Ming Chiao Tung University, Taiwan)</i>	
An Empirical Study on Software Aging of Long-Running Object Detection Algorithms	1091
<i>Roberto Pietrantuono (University of Naples Federico II), Domenico Cotroneo (University of Naples Federico II), Ermeson Andrade (Federal Rural University of Pernambuco), and Fumio Machida (University of Tsukuba)</i>	

Mobile and Smartphone Applications

Scriptless GUI Testing on Android and iOS Applications	1103
<i>Thorn Jansen (ING, The Netherlands), Fernando Pastor Ricos (Universitat Politecnica de Valencia, Spain), Yaping Luo (ING, The Netherlands), Kevin van der Vlist (ING, The Netherlands), Robbert van Dalen (ING, The Netherlands), Pekka Aho (Open Universiteit, The Netherlands), and Tanja E. J. Vos (Universitat Politecnica de Valencia, Spain; Open Universiteit, The Netherlands)</i>	
An Exploratory Study for GUI posts on Stack Overflow	1113
<i>Jing Ding (Zhejiang Sci-Tech University, China), Liming Nie (Nanyang Technological University, Singapore), Yang Liu (Zhejiang Sci-Tech University, China; Nanyang Technological University, Singapore), Zuohua Ding (Zhejiang Sci-Tech University, China), and Jifeng Xuan (Wuhan University, China)</i>	
Fine-Tuning Pre-trained Model to Extract Undesired Behaviors from App Reviews	1125
<i>Wenyu Zhang (Hainan University, China), Xiaojuan Wang (Hainan University, China), Shanyan Lai (Hainan University, China), Chunyang Ye (Hainan University, China), and Hui Zhou (Hainan University, China)</i>	
A Framework for Scanning Privacy Information based on Static Analysis	1135
<i>Yuan Zhao (State Key Laboratory for Novel Software Technology Nanjing University, Nanjing, China), Gaolei Yi (State Key Laboratory for Novel Software Technology Nanjing University, Nanjing, China), Fan Liu (State Key Laboratory for Novel Software Technology Nanjing University, Nanjing, China), Zhanwei Hui (Military Academy of Sciences, Beijing, China), and Jianhua Zhao (State Key Laboratory for Novel Software Technology Nanjing University, Nanjing, China)</i>	
EWDDL: Software Aging State Identification Based on LightGBM-LR Hybrid Model	1146
<i>Xueyong Tan (Inner Mongolia University, China) and Jing Liu (Inner Mongolia University, China)</i>
