2022 IEEE 22nd International Conference on Software Quality, Reliability, and Security Companion (QRS-C)

QRS-C 2022

Table of Contents

Message from the QRS 2022 Steering Committee Chairs, General Chairs, and Program Chairs .... **xx**
QRS 2022 Steering Committee ..... **xxii**
QRS 2022 Organizing Committee ..... **xxiii**
QRS 2022 Program Committee ..... **xxiv**
Chairs of Workshops Co-Located with QRS 2022 ..... **xxvii**
QRS 2022 Keynote Speech ..... **xxix**

Security and Vulnerability

A Hierarchical Deep Neural Network for Detecting Lines of Codes with Vulnerabilities 1
Arash Mahyari (Florida Institute For Human and Machine Cognition (IHMC), USA)

Social Media Safety Practices and Flagging Sensitive Posts 8
Lisa M. DiSalvo (Arcadia University), Gabriela Viviana Saenz (University of Texas at Dallas), W. Eric Wong (University of Texas at Dallas), and Dongcheng Li (University of Texas at Dallas)

Security Resilience - Considerations from the Application of the Functional Resonance Method (FRAM) to Information Security Incidents 16
Tomoko Kaneko (Koueki University)

Generalized Network Temperature for DDoS detection through Rényi Entropy 24
Xiang Wang (Jiangsu University), Xing Zhang (Jiangsu University), and Changda Wang (Jiangsu University)

A Stochastic Model for Calculating Well-Founded Probabilities of Vulnerability Exploitation 34
Ryohei Sato (NTT Network Innovation Center), Hidetoshi Kawaguchi (NTT Network Innovation Center), and Yuichi Nakatani (NTT Network Innovation Center)

Simulation of Sensor Spoofing Attacks on Unmanned Aerial Vehicles Using the Gazebo Simulator 44
Irdin Pekaric (University of Innsbruck), David Arnold (University of Innsbruck), and Michael Felderer (University of Innsbruck)

Blockchain and Smart Contracts

A Scalable Storage Scheme for On-Chain Big Data Using Historical Blockchains 54
Marcos Felipe (University of Massachusetts Dartmouth) and Haiping Xu (University of Massachusetts Dartmouth)

Multi Pair Swap-Based Weather Derivative DeFi 62
Shinya Haga (University of Tsukuba), Taisei Takahashi (University of Tsukuba), and Kazumasa Omote (University of Tsukuba, National Institute of Information and Communications Technology)

PTLC: Protect the Identity Privacy during Cross-Chain Asset Transaction More Effectively 70
Jingyuan Cai (Southeast University), Ying Zhou (Southeast University), Tianyuan Hu (Southeast University), and Bixin Li (Southeast University)

Modeling Trust Relationships in Blockchain Applications: The Case of Reconfigurable Systems-on-Chip 79
Maxime Méré (STMicroelectronics, INSA Rennes, France), Frédéric Jouault (ESEO-Tech, France), Loïc Pallardy (STMicroelectronics, France), and Richard Perdriau (ESEO-Tech, CNRS, IETR, France)

Technical Usability Assessment of Security Analysis Tools for Ethereum Based Smart Contracts 87
Rana Zeeshan (School of Computing, Dublin City University) and Irina Tal (Lero, School of Computing, Dublin City University)

Hyperledger Fabric-Based Copyright Management System for Clothing design drawings 96
Wenxuan Wang (Wuhan Textile University), Yongqiang Chen (Wuhan Textile University), Jiangchen Zhou (Wuhan Textile University), and Huan Jin (Wuhan Textile University)

Transferable Unique Copyright Across AI Model Trading: A Blockchain-Driven Non-Fungible Token Approach 102
Yixin Fan (Waseda University, Japan), Guozhi Hao (Waseda University, Japan), and Jun Wu (Waseda University, Japan)

Application of Blockchain in Trusted Data Provenance 106
Xiangke Mao (Tsinghua University, China), Chao Li (Tsinghua University, China), Guigang Zhang (Institute of Automation Chinese Academy of Sciences, China), Xin Wei (Tsinghua University, China), and Chunxiao Xing (Tsinghua University)

Real-Time Control Algorithm of Intelligent Energy-Saving Lights Based on IoT 113
Bo Su (School of Aerospace Science and Technology of Xidian University, China), Zeyuan Zhang (School of Aerospace Science and Technology of Xidian University, China), Yuansheng Zhang (State Key Laboratory of Process Automation in Mining & Metallurgy, China), Qingyue Yang (Aerospace Information research Institute of Chinese Academy of Sciences, China), and Jiong Jiang (Shaanxi Land Engineering Construction Group, Co., Ltd., China)

Cyber Forensics, Security, and E-discovery

Trial Application of Risk Assessment Method for Metaverse 120
Ryoichi Sasaki (Tokyo Denki University)

Machine Learning Based Re-identification of Location Histories using Contact Information Collected from Social Networking Services 129
Tekeya Horiuchi (The University of Electro-Communications, Japan), Hiroshi Yoshiura (Kyoto Tachibana University, Japan), Yoichi Midorikawa (SoftBank Corp, Japan), Hideki Yoshii (SoftBank Corp, Japan), and Masatsugu Ichino (The University of Electro-Communications, Japan)

Breaking Anonymity of Social Media by Profiling from Multimodal Information 137
Eina Hashimoto (NTT DOCOMO, INC.), Masatsugu Ichino (University of Electro-Communications), and Hiroshi Yoshiura (Kyoto Tachibana University)

Analyzing Metadata in PDF Files Published by Police Agencies in Japan 145
Taichi Hasegawa (Tokyo Denki University, Japan), Taiichi Saito (Tokyo Denki University, Japan), and Ryoichi Sasaki (Tokyo Denki University, Japan)

Hierarchical Action Embedding for Effective Autonomous Penetration Testing 152
Hoang Viet Nguyen (College of Information Science and Engineering, Ritsumeikan University, Japan) and Tetsutaro Uehara (College of Information Science and Engineering, Ritsumeikan University, Japan)

Automated and Intelligent Software Testing

Evaluation of Software Testing Adequacy Based on AHP and BPNN 158
Wenhong Liu (Beijing Institute of Tracking and Telecommunication Technology, China), Jinliang Gao (China Aerospace Academy of Systems Science and Engineering, China), Qiong Xue (China Aerospace Academy of Systems Science and Engineering, China), Dong Guo (China Aerospace Academy of Systems Science and Engineering, China), and Wei Zhang (China Aerospace Academy of Systems Science and Engineering, China)

DeepBoundary: A Coverage Testing Method of Deep Learning Software Based on Decision Boundary Representation 166
Yue Liu (Nanjing Tech University), Lichao Feng (Nanjing Tech University), Xingya Wang (Nanjing Tech University, Army Engineering University of PLA, Nanjing University), and Shiyu Zhang (Nanjing Tech University)

TSDTest: An Efficient Coverage Guided Two-Stage Testing for Deep Learning Systems 173
Haoran Li (Beihang University, China), Shihai Wang (Beihang University, China), Tengfei Shi (Beihang University, China), Xinyue Fang (Beihang University, China), and Jian Chen (Nanjing Research Institute of Electronic Engineering, China)

An Empirical Study towards Characterizing Neural Machine Translation Testing Methods 179
Chenxi He (State Key Laboratory for Novel Software Technology, Nanjing University,China), Wenhong Liu (Beijing Institute of Tracking and Telecommunication Technology,Beijing,China), Shuang Zhao (Beijing Institute of Tracking and Telecommunication Technology,Beijing,China), Jiawei Liu (Nanjing University), and Yang Yang (Beijing Institute of Tracking and Telecommunication Technology,Beijing,China)

Evaluation of Intelligent Information 183
Wenhong Liu (Beijing Institute of Tracking and Telecommunication Technology, China), Yong Li (Chengdu Guoxinan Information Industry Base Co., Ltd, China), and Bo Huang (Chengdu Guoxinan Information Industry Base Co., Ltd, China)

IMGA: Improved Microbial Genetic Algorithm 189
Yifei Liu (Beijing Technology and Business University, China), Yankun Gao (Beijing Institute of computer technology and Application, China), and Yang AA Liu (National Digital Switching System Engineering Technology Research Center, China)

Automated Modeling of Web Service Composition and Testing: A UML Sequence Diagram-Based Approach 193
Yao Huang (Beihang University), Bingqing Zhang (Beihang University), and Yichen Wang (Beihang University)

Integration- and System-Testing aligned with Cloud-Native Approaches for DevOps 201
A. Poth (Volkswagen), O. Rrjolli (Volkswagen), and A. Riel (Univ. Grenoble Alpes, CNRS, Grenoble INP)

An Improved Test Case Generation Method based on Test Requirements for Testing Software Component 209
Jinfu Chen (Jiangsu University), Yemin Yin (Jiangsu University), Saihua Cai (Jiangsu University), Ye Geng (Jiangsu University), and Longxia Huang (Jiangsu University)

Attribute-Based Non-interactive Privacy-protected Crowd-sourcing Software Testing Engineer Selection Mechanism 219
Qiliang Yang (Shanghai Development Center of Computer Software Technology, China), Lizhi Cai (Shanghai Development Center of Computer Software Technology, China), Jiayu Gong (Shanghai Development Center of Computer Software Technology, China), Minlu Tang (Shanghai Development Center of Computer Software Technology, China), and Yi Lin (Shanghai Development Center of Computer Software Technology, China)

Dependability Testing and Evaluation of Safety-Critical Systems

Dependability Analysis and Verification Technology of Artificial Intelligence Software 226
Yaming Zhang (China Institute of Marine Technology&Economy), Lijin Wu (China Institute of Marine Technology&Economy), Xiaomei Shen (China Institute of Marine Technology&Economy), Zehua Shen (China Institute of Marine Technology&Economy), and Longli Tang (China Institute of Marine Technology&Economy)

Multiphysics Simulation Methods for Microsystem Interconnections 233
Zhongge Zhao (Avic China Aero-polytechnology Establishment, China), Jiang Shao (Avic China Aero-polytechnology Establishment, China), and Ming Zhang (Avic China Aero-polytechnology Establishment, China)

Analysis of Velocity Deviation of Satellite-Rocket Separation and Orbit Accuracy of Satellite Caused by Multiple Factors 240
Yunyun Pang (China Aero Polytechnical Establishment,China), Qiang Ye (Beijing Minospace Technology Co.,Ltd, China), and Yang Lu (China Aero Polytechnical Establishment, China)

Software Bug Prediction Based on Complex Network Considering Control Flow 246
Zhanyi Hou (School of Reliability and Systems Engineering, Beihang University), Linglin Gong (China Electric Power Research Institute), Minghao Yang (School of Reliability and Systems Engineering, Beihang University), Yizhuo Zhang (School of Reliability and Systems Engineering, Beihang University), and Shunkun Yang (School of Reliability and Systems Engineering, Beihang University)

A Multi-layer Fault Triggering Framework Based on Evolutionary Strategy Guided Symbolic Execution for Automated Test Case Generation 255
Zhiyu Duan (Beihang University, China), Yujia Li (China Electric Power Research Institute, China), Pubo Ma (Beihang University, China), Xiaodong Gou (Beihang University, China), and Shunkun Yang (Beihang University, China)

Prefilter: A Fault Localization Method using Unlabelled Test Cases Based on K-Means Clustering and Similarity 263
Dong An (School of Reliability and System Engineering, Beihang University, China), Shihai Wang (School of Reliability and System Engineering, Beihang University, China), Liandie Zhu (School of Reliability and System Engineering, Beihang University, China), Xunli Yang (School of Reliability and System Engineering, Beihang University, China), and Xiaobo Yan (Nanjing Research Institute of Electronic Engineering, China)

Visual-ISAM: A Visualization Method for Software Failure Analysis and Evaluation Based on Knowledge Graph Utilizing Improved SALKU Model 270
Canwei Shi (Beihang University, China), Linglin Gong (China Electric Power Research Institute, China), Qi Shao (Beihang University, China), Qi Yao (Beihang University, China), and Zhiyu Duan (Beihang University, China)

A Software Defect Prediction Classifier Based on Three Minimum Support Threshold Association Rule Mining 278
Wentao Wu (School of Reliability and System Engineering Beihang University, China), Shihai Wang (School of Reliability and System Engineering Beihang University, China), Yuanxun Shao (Aerospace Science and Engineering Network Information development CO., LTD, China), Mingxing Zhang (School of Reliability and System Engineering Beihang University, China), and Wandong Xie (Information Center of China North Industries Group Corporation, China)

IEMT: Inequality-based Metamorphic-testing for Autonomous Driving Models 283
Chao Xiong (Nanjing University of Aeronautics and Astronautics, China), Zhiyi Zhang (Nanjing University of Aeronautics and Astronautics, China), Yuqian Zhou (Nanjing University of Aeronautics and Astronautics, China), Chen Liu (School of Marxism, Yangzhou University, China), and Zhiqiu Huang (Nanjing University of Aeronautics and Astronautics, China)

Quantifying the Effectiveness of Mutant Sets 288
Samia AlBlwi (NJIT), Amani Ayad (Kean University), Besma Khaireddine (University of Tunis El Manar), Imen Marsit (University of Sousse, Tunisia), and Ali Mili (NJIT)

Human and Social Aspects of Software Quality

CIL-BSP: Bug Report Severity Prediction based on Class Imbalanced Learning 298
Yu Su (Nantong University), Xinping Hu (Nantong University), Xiang Chen (Nantong University), Yubin Qu (Jiangsu College of Engineering and Technology), and Qianshuang Meng (Nantong University)

Internet Governance: Social Mentality and Public Emotion Analysis on Online Media during the COVID-19 Epidemic in Mainland China 307
Wei Guo (School of Social and Behavioral Sciences, Nanjing University, China), Leyang Zhou (State Key Laboratory for Novel Software Technology, Nanjing University, China), Jia Liu (Software Institute, Nanjing University, China), and Miaomiao Liu (School of Environment, Nanjing University, China)

Face Recognition Fairness Assessment Based on Data Augmentation: An Empirical Study 315
Fangyuan Tian (State Key Laboratory for Novel Software Technology, Nanjing University, China), Wenhong Liu (Beijing Institute of Tracking and Telecommunication Technology, Beijing, China), Shuang Zhao (Beijing Institute of Tracking and Telecommunication Technology, Beijing, China), and Jiawei Liu (Shenzhen Research Institute of Nanjing University, Shenzhen, China)

Similarity Analysis in Data Element Matching Based on Word2vec 319
Wenhong Liu (Beijing Institute of Tracking and Telecommunication Technology, Beijing, China), Zhiyuan Peng (State Key Laboratory for Novel Software Technology, Nanjing University, China), Shuang Zhao (Beijing Institute of Tracking and Telecommunication Technology, Beijing, China), and Jiawei Liu (Nanjing University)

SemirFL: Boosting Fault localization via Combining Semantic Information and Information Retrieval 324
Xiangyu Shi (Nantong University), Xiaolin Ju (Nantong University), Xiang Chen (Nantong University), Guilong Lu (Nantong University), and Mengqi Xu (Nantong University)

Fault Prediction, Localization, and Prevention

The Real-Time General Display and Control Platform Designing Method based on Software Product Line 333
Xiaowei Guo (The 20th Research Institute of China Electronics Technology Group Corporation, China), Ning Cao (The 20th Research Institute of China Electronics Technology Group Corporation, China), and Xibing Yang (The 20th Research Institute of China Electronics Technology Group Corporation, China)

Metamorphic Testing for the Medical Image Classification Model 340
Yue Ma (Southwest University of Science and Technology, China), Ya Pan (Southwest University of Science and Technology, China), and Yong Fan (Southwest University of Science and Technology, China)

Application and Development Prospect of Monitoring Screen Based on Three.js Unit Equipment Control System 347
Boying Wu (Xi'an Shaangu Power Co., Ltd, Xi'an), Sigong Zhang (Xi'an Shaangu Power Co., Ltd, Xi'an), Weirong Tian (Xi'an Shaangu Power Co., Ltd), and Hang Wang (Xi'an Shaangu Power Co., Ltd)

A Software Multi-fault Clustering Ensemble Technology 352
Mingxing Zhang (School of Reliability and System Engineering, Beihang University), Shihai Wang (School of Reliability and System Engineering, Beihang University), Wentao Wu (School of Reliability and System Engineering, Beihang University), Weiguo Qiu (School of Reliability and System Engineering, Beihang University), and Wandong Xie (School of Reliability and System Engineering, Beihang University)

Requirements-Related Fault Prevention Mechanism for SOFL Formal Specification-Based Programming 359
Jiandong Li (Hiroshima University, Japan) and Shaoying Liu (Hiroshima University, Japan)

A Fault Localization Method based on Similarity Weighting with Unlabeled Test Cases 368
Xunli Yang (School of Reliability and Systems Engineering, Beihang University), Bin Liu (School of Reliability and Systems Engineering, Beihang University), Dong An (School of Reliability and Systems Engineering, Beihang University), Wandong Xie (Information Center of China North Industries Group Corporation), and Wei Wu (Information Center of China North Industries Group Corporation)

Detecting Security Vulnerabilities with Vulnerability Nets 375
Pingyan Wang (Hiroshima University, Japan), Shaoying Liu (Hiroshima University, Japan), Ai Liu (Hiroshima University, Japan), and Wen Jiang (Hiroshima University, Japan)

Bug Patterns in Probabilistic Programming Systems 384
Shoma Hamada (Kyushu University, Japan), Haibo Yu (Kyushu Sangyo University, Japan), Vo Dai Trinh (Kyushu Sangyo University, Japan), Yuri Nishimura (Kyushu Sangyo University, Japan), and Jianjun Zhao (Kyushu University)

CFIWSE: A Hybrid Preprocessing Approach for Defect Prediction on Imbalance Real-World Datasets 392
Jiaxi Xu (China Electronic Product Reliability and Environmental Testing Research Institute), Jingwei Shang (China Electronic Product Reliability and Environmental Testing Research Institute), and Zhichang Huang (China Electronic Product Reliability and Environmental Testing Research Institute)

Automatic Labeling of SDN Controller Defect Text Based on Neural Topic Model 402
Bing Zheng (Inner Mongolia University, China; Inner Mongolia Technical College of Construction, China) and Hua Li (Inner Mongolia University, China)

Software Defect Prediction and Analysis

Software Defect Prediction via GIN with Hybrid Graphical Features 411
Xuanye Wang (School of Computer Science and Engineering, South China University of Technology, China), Lu Lu (School of Computer Science and Engineering, South China University of Technology, China), Boye Wang (State Grid Wuxi Power Supply Company, China), Yudong Shang (Guangdong OPPO Mobile Telecommunications Corp., Ltd, China), and Hao Yang (Guangdong OPPO Mobile Telecommunications Corp., Ltd, China)

Generalized Perceptual Modeling: Virtual Human Face Modeling and Expression Recognition Considering Emotion Understanding 417
Ziyang Weng (Wuhan University, China), Ziyu Zhang (Wuhan University, China), Yinger Liang (Wuhan University, China), and Biyi Dai (Wuhan University, China)

Recommendation Algorithm for Graph Convolutional Networks based on Multi-relational Knowledge Graph 425
Yunhao Li (China Three Gorges University, China), Shijie Chen (China Three Gorges University, China), and Jiancheng Zhao (China Three Gorges University, China)

A Dead Code Evaluation Method Based on Complex Network 431
Xinwei Liu (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, China) and Chuanqi Tao (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, China; Key Laboratory of Ministry of Industry and Information Technology for Safety-Critical Software, Nanjing University of Aeronautics and Astronautics, China)

Reliability and Resilience of Complex Systems

A Selective Maintenance Strategy on Network-based System with Constrained Flow 437
Wenjin Zhu (Northwestern Polytechnical University, China) and Zhifeng Zheng (Northwestern Polytechnical University, China)

An Excellence Level Evaluation Model of Intelligent Manufacturing Unit 439
An Wu (Northwestern Polytechnical University), Chen Zheng (Northwestern Polytechnical University), Zao Hou (China Aerospace Science and Technology Corporation), Feng Duan (Northwestern Polytechnical University), and Zhiqiang Cai (Northwestern Polytechnical University)

Resilience Analysis of Urban Rail Transit Network Under Large Passenger Flow 444
Ning Wang (Chang'an University, China)

Reliability Analysis of a Computer-Based Interlocking System with a Double 2-out-of-2 Redundancy Structure Using Algebraic Binary Decision Diagrams 447
Wenjia Long (College of Computer and Information Engineering, Zhixing College of Hubei University, China), Kaizhi Wang (College of Computer, Hubei University of Education, P.R. China), and Xuan Wang (College of Computer and Information Engineering, Zhixing College of Hubei University, P.R. China)

Software Engineering and Knowledge Management

Elevator Maintenance Site Selection Optimization via Fine-tuned K-means 454
Yuegui Feng (Nanjing Special Equipment Safety Supervision Inspection and Research Institute), Guangwei Qing (Nanjing Special Equipment Safety Supervision Inspection and Research Institute), and Qianfei Zhou (Nanjing Special Equipment Safety Supervision Inspection and Research Institute)

Intelligent Guidance Method for Elevator Emergency Treatment Based on Automatic Recommendation and Fault Prediction 462
Guangwei Qing (Nanjing Special Equipment Safety Supervision Inspection and Research Institute), Qianfei Zhou (Nanjing Special Equipment Safety Supervision Inspection and Research Institute), and Huifang Wang (Nanjing Special Equipment Safety Supervision Inspection and Research Institute)

A Learning Path Recommendation Method for Knowledge Graph of Professional Courses 469
Yujuan Cheng (Wuhan Railway Vocational College of Technology, China)

Code Generation Method Based on Structured Tree Input and AST Decoder Attention Augmentation 477
Wenjun Wei (Nanjing Tech University) and Junhua Wu (Nanjing Tech University)

Code Search Method Based on Multimodal Representation 485
Xiao Chen (Nanjing Tech University) and Junhua Wu (Nanjing Tech University)

Chinese Character Creation Algorithm: Evaluation of the Effectiveness of Topological Similarity of Remote Sensing Images Considering the Description of Sparse Geographic Structure 492
Ziyang Weng (Wuhan University, China), Shuhao Wang (Wuhan University, China), Weixin Yan (Shenzhen Museum of Contemporary Art and Urban Planning, China), and Anna Li (Northeastern University, USA)

An Empirical Study of Software Testing Quality Based on Natural Experiments 499
Jiahao Li (BeiHang University,China), Xinhao Cui (BeiHang University,China), Yichen Wang (BeiHang University,China), and Feng Xie (Beijing Sai Ruo Technology Co.,Ltd ,China)

Quantum Random Access Codes with Mutually Unbiased Bases in Three-Dimensional Hilbert Space 509
Qiankun Yao (Nanjing University of Aeronautics and Astronautics), Yuqian Zhou (Nanjing University of Aeronautics and Astronautics), and Yaqi Dong (Nanjing University of Aeronautics and Astronautics)

Characterization of Nonlocality in Chained Quantum Networks 515
Yaqi Dong (Nanjing University of Aeronautics and Astronautics), Yuqian Zhou (Nanjing University of Aeronautics and Astronautics), and Qiankun Yao (Nanjing University of Aeronautics and Astronautics)

An Approach of Locating Minimal Failure-Causing Schema for Boolean-Specifications 521
Tianyu Xu (Nanjing Marine Radar Institute, China), Guanglin Li (Nanjing University of Posts and Telecommunications, China), Jun Lu (Nanjing Marine Radar Institute, Nanjing, China), and Ziyuan Wang (Nanjing University of Posts and Telecommunications, China)

Software Engineering and Big Data

IRRT: An Automated Software Requirements Traceability Tool Based on Information Retrieval Model 525
Sen Zhang (Wuhan Textile University, China), Hongyan Wan (Wuhan Textile University, China), Yong Xiao (Wuhan Textile University, China), and Ziruo Li (Wuhan University of Technology, China)

An Empirical Study on Software Requirements Classification Method Based on Mobile App User Comments 533
Huan Jin (Wuhan Textile University, China), Hongyan Wan (Wuhan Textile University, China), Ziruo Li (Wuhan University of Technology, China), and Wenxuan Wang (Wuhan Textile University, China)

Anti-Money Laundering Risk Identification of Financial Institutions Based on Aspect-Level Graph Neural Networks 542
Yahan Yu (Institute of Automation, Chinese Academy of Sciences, China), Yixuan Xu (Institute of Automation, Chinese Academy of Sciences, China), Jian Wang (Institute of Automation, Chinese Academy of Sciences, China), Zhenxing Li (Beijing AgileCentury Information Technology Co. Ltd., China), and Bin Cao (Beijing AgileCentury Information Technology Co. Ltd., China)

Multi-chain Model and Cross-chain Communication Protocol for Financial Transactions 547
Chao Li (Tsinghua University, China), Guigang Zhang (Institute of Automation Chinese Academy of Sciences, China), Xiangke Mao (Tsinghua University, China), Jian Zhang (Tsinghua University, China), and Chunxiao Xing (Tsinghua University, China)

Question Answering Algorithm for Grid Fault Diagnosis Based on Graph Neural Network 552
Yahan Yu (University of Chinese Academy of Sciences, China & Institute of Automation, Chinese Academy of Sciences, China), Yun Wang (Institute of Automation, Chinese Academy of Sciences, China), Guigang Zhang (Institute of Automation, Chinese Academy of Sciences, China), Yi Yang (Institute of Automation, Chinese Academy of Sciences, China), and Jian Wang (Institute of Automation, Chinese Academy of Sciences, China)

Maintenance and Cyber Physical Systems

Maintenance Optimization for Dependent Two-Unit Systems Considering Stochastic Degradation and Imperfect Maintenance 558
Wanqing Cheng (Tianjin University, China) and Xiujie Zhao (Tianjin University, China)

Flexible and Dependable Manufacturing beyond xURLLC: A Novel Framework for Communication-Control Co-design 562
Bin Han (Technische Universitaet Kaiserslautern), Mu-Xia Sun (Tsinghua University), Lai-Kan Muk (Technische Universitaet Kaiserslautern), Yan-Fu Li (Tsinghua University), and Hans D. Schotten (Technische Universitaet Kaiserslautern)

Modeling Method and Correctness Verification of Power Grid Safety and Stability Control Strategy System 569
Hengfei Yang (Northwestern Polytechnical University), Bo Shen (Northwestern Polytechnical University), Gaoyang Xu (NARI Group Corporation/State Grid Electric Power Research Institute), and Yonghua Chen (NARI Group Corporation/State Grid Electric Power Research Institute)

Modeling and Real-Time Verification for CPS Based on Time Automata 576
Mingfu Tuo (Air Force Engineering University,China), Xiaoqiang Zhao (Air Force Engineering University,China), Bo Shen (Northwestern Polytechnical University, China), and Wenliang Wu (Northwestern Polytechnical University, China)

Data Quality and Data Driven-based Decision for Software Engineering

TTAG+R: A Dataset of Google Play Store's Top Trending Android Games and User Reviews 580
Raheela Chand (COMSATS University Islamabad (CUI), Pakistan), Saif Ur Rehman Khan (COMSATS University Islamabad (CUI), Pakistan), Shahid Hussain (School of Engineering, Penn State University, USA), and Wen-Li Wang (School of Engineering, Penn State University, USA)

A Vision of DevOps Requirements Change Management Standardization 587
Muhammad Azeem Akbar (LUT University, Finland), Arif Ali Khan (University of Oulu, Finland), Sajjad Mahmood (King Fahd University of Petroleum and Minerals, Dhahran, Saudi Arabia), and Saima Rafi (University of Murcia, Murcia, Spain)

Towards a Comprehensive Dataset for Next-Day Wildfire Prediction 593
Syed Haider Ali (University of North Texas, USA), Anish Goel (University of North Texas, USA; Texas Academy of Math and Science, USA), Aditya Singirikonda (University of North Texas, USA; Texas Academy of Math and Science, USA), Ali Y. Khan (University of North Texas, USA), and Ting Xiao (University of North Texas, USA)

Intelligent Evolutionary Computation

Data Driven User Feature Construction and Requirement Generation in Mobile Applications 599
Yuanbang Li (Zhoukou normal university), Kai Wang (Zhoukou normal university), Xiaoyu Guo (Zhoukou normal university), Zhongyuan Hua (Wuhan Textile University), and Yong Xiao (Wuhan Textile University)

Knowledge Graph Question Answering Based on Contrastive Learning and Feature Transformation 608
Xinrong Hu (Wuhan Textile University, China), Jingjing Huang (Wuhan Textile University, China), Junping Liu (Wuhan Textile University, China), Qiang Zhu (Wuhan Textile University, China), and Jie Yang (University of Wollongong, Australia)

Exploring the Impact of Grouping Strategies on Cooperative Co-evolutionary Algorithms for Solving the Advertising Budget Allocation Problem 616
Yongfeng Gu (Ant Group), Yuxuan Zhou (Ant Group), Hao Ding (Ant Group), Fan Jia (Ant Group), and Shiping Wang (Ant Group)

A Comparison Analysis of Constraint-Handling Techniques on Rule Selection Problem in Credit Risk Assessment: An Industrial View 621
Yongfeng Gu (Ant Group), Hao Ding (Ant Group), Kecai Gu (Ant Group), Xiaoguang Huang (Ant Group), and Hua Wu (Ant Group)

Colonization Strategy Algorithm: A Deviation Algorithm Optimization Based on Spatial Autocorrelation Theory 626
Zhongyuan Hua (School of Computer Science and Artificial Intelligence, Wuhan Textile University, China) and Ke Ye (School of Media and Communication, Wuhan Textile University, China)

Mapping Method Between 2D Landscape Image and 3D Spatial Data Based on Adversarial Relative Depth Constraint Network 634
Shuhao Wang (Wuhan University, China), Zhijun Lin (Wuhan University, China), Zhimo Weng (Zhongnan University of Economics and Law, China), and Anna Li (Northeastern University, USA)

Prototype Algorithm: Number Chain Features in Spatial Similarity Calculation of Time-series Graph Sources 643
Ziyang Weng (Wuhan University, China), Shuhao Wang (Wuhan University, China), Weixin Yan (Shenzhen Museum of Contemporary Art and Urban Planning, China), and Yinger Liang (Wuhan University, China)

A Crawler-Based Vulnerability Detection Method for Cross-Site Scripting Attacks 651
Haocheng Guan (School of Computer Science, China University of Geosciences), Dongcheng Li (University of Texas at Dallas, USA), Hui Li (School of Computer Science, China University of Geosciences), and Man Zhao (School of Computer Science, China University of Geosciences)

A Light-Weight Convolutional Neural Network for Facial Expression Recognition using Mini-Xception Neural Networks 656
Changjian Li (School of Computer Science, China University of Geosciences), Dongcheng Li (University of Texas at Dallas, USA), Man Zhao (School of Computer Science, China University of Geosciences), and Hui Li (School of Computer Science, China University of Geosciences)

A FANETs System for Autonomous Aerocraft Flying Formation 662
Jinyong Lin (Beijing Aerospace Automatic Control Institute), Wenlong Cai (Beijing Aerospace Automatic Control Institute), Xiangrui Fan (Beijing Aerospace Automatic Control Institute), Wenjie Dong (Beijing Aerospace Automatic Control Institute), and Shuo Zhang (Beijing Aerospace Automatic Control Institute)

Software Technology Status Management under the Trend of Ship Informatization 667
Mengao Li (CSSC Systems Engineering Research Institute, China), Hanting Zhao (CSSC Systems Engineering Research Institute, China), Wenxiu Zhang (CSSC Systems Engineering Research Institute, China), Xiqiao Pang (CSSC Systems Engineering Research Institute, China), and Tao Feng (CSSC Systems Engineering Research Institute, China)

Creative Computing

A Natural Language-enabled Virtual Assistant for Human-Robot Interaction in Industrial Environments 673
Chen Li (Aalborg University), Dimitrios Chrysostomou (Aalborg University), and Hongji Yang (University of Leicester)

A General Characterization of Representing Spatiotemporal Knowledge Graph Based on OWL 679
Lin Zhu (Northeastern University, China), Luyi Bai (Northeastern University, China; School of Informatics, University of Leicester, United Kingdom), Xuesong Hao (Northeastern University, China), and Hongji Yang (University of Leicester, United Kingdom)

A Data-Efficient Method of Deep Reinforcement Learning for Chinese Chess 687
Changming Xu (Northeastern University at Qinhuangdao, China; University of Leicester, United Kingdom), Hengfeng Ding (Northeastern University at Qinhuangdao, China), Xuejian Zhang (Northeastern University at Qinhuangdao, China), Cong Wang (Northeastern University at Qinhuangdao, China; University of Leicester, United Kingdom), and Hongji Yang (University of Leicester, United Kingdom)

Script Based Pattern Recognition for a Portrait Tracking System on Broadcast Online Scenes..... 694
Qinyun Liu (Beijing Union University) and Xiaopeng Xu (Anhui University of Finance and Economics)

LLCF: A Load- and Location-Aware Collaborative Filtering Algorithm to Predict QoS of Web Service 700
Chen Li (Aalborg university), Xiaochun Zhang (Anhui University of Finance and Economics), Chengyuan Yu (Jiangxi Agricultural University), Xin Shu (Nanjing Agricultural University), and XiaoPeng Xu (Anhui University of Finance and Economics)

An Empirical Study of the Impact of COVID-19 on OSS Development 708
Lingfei Ma (School of Information Science and Technology, Zhejiang Sci-Tech University, China), Liming Nie (School of Computer Science and Engineering, Nanyang Technological University, Singapore), Chenxi Mao (School of Qixin, Zhejiang Sci-Tech University, China), Yaowen Zheng (School of Computer Science and Engineering, Nanyang Technological University, Singapore), and Yang Liu (Zhejiang Sci-Tech University, China; School of Computer Science and Engineering, Nanyang Technological University, Singapore)

The IoT Service Agent Model Based on Federated Learning to Improve Service Quality 718
Tse-Chuan Hsu (Soochow University, Taiwan), William Cheng-Chung Chu (Tunghai University), and Shyh-Wei Chen (Tunghai University)

A Creative Computing Approach to Optimising Citizens' Fashion Education based on Design Thinking for Responding to Micro-level Needs of Smart City Development 723
Yue Wu (University of Leicester, UK), Xiang Li (Beijing Institute of Fashion Technology, China), and Jiafeng Zhou (Jilin Jianzhu University, China)

Visual Sensitivity Controlling Colour Model in Creative Computing 732
Yinwei Liu (School of Computing and Mathematical Sciences, University of Leicester)

A Quantum Information and Cybernetics Based Algorithm for Creativity Applying in Cultural Heritage Products Design 740
Qinyun Liu (Beijing Union University, China), William Cheng-Chung Chu (Tunghai University, Taiwan), Xiaochun Zhang (Anhui University of Financial and Economics, China), Shou-Yu Lee (Tunghai University, Taiwan), and Wei Mo (Foshan University, China)

Risk Evaluation of the Destination Port Logistics Based on Self-Organizing Map Computing 746
Chuan Zhao (Beijing Technology and Business University, China) and Huilei Cao (Beijing Technology and Business University, China)

Fast Abstract

Towards Research on Information Gravitation 752
Kai-Yuan Cai (Beihang University, China)

Deep Reinforcement Learning for Vedio Summarization with Semantic Reward 754
Haoran Sun (Jiangsu University), Xiaolong Zhu (Jiangsu University), and Conghua Zhou (Jiangsu University)

What should Abeeha do? An Activity for Phishing Awareness 756
Rubia Fatima (Tsinghua University, China), Affan Yasin (Tsinghua University, China), Lin Liu (Tsinghua University, China), and Jianmin Wang (Tsinghua University, China)

On Securing the Communication in IoT Infrastructure using Elliptic Curve Cryptography 758
Hugo Bourreau (University of Quebec at Chicoutimi), Emeric Guichet (University of Quebec at Chicoutimi), Amine Barrak (University of Quebec at Chicoutimi), Benoît Simon (University of Quebec at Chicoutimi), and Fehmi Jaafar (University of Quebec at Chicoutimi)

RUSTY: Effective C to Rust Conversion via Unstructured Control Specialization 760
Xiangjun Han (University of Science and Technology of China, China), Baojian Hua (University of Science and Technology of China, China), Yang Wang (University of Science and Technology of China, China), and Ziyao Zhang (University of Science and Technology of China, China)

Log Anomaly Detection Method Based on Hybrid Transformer-BiLSTM Models 762
Xuedong Ou (Inner Mongolia University, China) and Jing Liu (Inner Mongolia University, China)

RandomMix: An Effective Framework to Protect User Privacy Information on Ethereum 764
Hao Yin (Southeast University, China), Dongyu Cao (Southeast University,china), and Ying Zhou (Southeast University, China)

TrustAuction: A TEE Based Privacy Protection Framework for Auction Contracts 766
Jiahao He (Southeast University, China), Dongyu Cao (Southeast University, China), and Ying Zhou (Southeast University, China)

Feature Difference based Misclassified Sample Detection for CNN Models Deployed in Online Environment 768
Changtian He (Beihang University, Beijing, China), Qing Sun (Beihang University, Beijing, China), Ji Wu (Beihang University, Beijing, China), Haiyan Yang (Beihang University, Beijing, China), and Tao Yue (Simula Research Laboratory, Oslo, Norway)

Systematic Transformation Method from UML to Event-B 770
Xue Geng (College of Information Engineering, Yangzhou University), Sheng-rong Zou (College of Information Engineering, Yangzhou University), and Ju-yi Yao (College of Information Engineering, Yangzhou University)

Deep Learning Fuzz Testing Methods for Unstructured Case 772
Haotian Yu (School of Information, Liaoning University, China), Xiaoguang Li (School of Information, Liaoning University, China), and Yuefeng Du (School of Information, Liaoning University, China)

Design and Implementation of OOM Module based on Rust 774
Linhan Li (Capital Normal University, China), Qianying Zhang (Capital Normal University, China), Shijun Zhao (Chinese Academy of Sciences, China), Zhiping Shi (Capital Normal University, China), and Yong Guan (Capital Normal University, China)

A New Method for Quality Analysis of Multi-process Manufacture 776
Quanzhou Li (CEPREI), Zhenguo Liu (CEPREI), Ning Hu (CEPREI), Shuqi Zhong (CEPREI), and Keqiang Cheng (CEPREI)

Resilience Analysis under the Impact of Cell Failures in the Practical Telecommunication Base Station Networks 778
Zongqi Xue (Tsinghua University, China) and Zhenglin Liang (Tsinghua University, China)

A Novel Coverage-guided Greybox Fuzzing Method based on Grammar-Aware with Particle Swarm Optimization 780
Shengran Wang (Jiangsu University), Jinfu Chen (Jiangsu University), Saihua Cai (Jiangsu University), Chi Zhang (Jiangsu University), and Haibo Chen (Jiangsu University)

Using Fuzzing to Help Abstract Interpretation Based Program Verification 782
Renjie Huang (National University of Defense Technology, China), Banghu Yin (National University of Defense Technology, China), and Liqian Chen (National University of Defense Technology, China)

Author Index **785**
