2022 3rd Asia Conference on Computers and Communications (ACCC) **ACCC 2022**

Table of Contents

| | |
|----------------------------|----|
| Preface | ix |
| Organizing Committee | x |

ACCC 2022

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| A Quantitative Evaluation Method for Cryptography Applications in Industrial Control Systems | 1 |
| <i>Dinghua Zhang (Northwestern Polytechnical University, China), Quan Pan (Northwestern Polytechnical University, China), and Yang Li (Northwestern Polytechnical University, China)</i> | |
| Mobile Application SDK Version Detection and Security Alert Based on Multi-Partition LSH | 8 |
| <i>Siyu Gao (Research Institute of ChinaTelecom, China), Yuanying Xiao (Research Institute of ChinaTelecom, China), Ye He (Research Institute of ChinaTelecom, China), and Jianfeng Wen (Research Institute of ChinaTelecom, China)</i> | |
| Design of AI-Based TCM Prescription Analysis Applet | 13 |
| <i>Ting-Ting Huang (Shanghai University of Medicine & Health Sciences, School of Medical Instrument, Shanghai, China), Xue-Fei Wang (University of Shanghai for Science and Technology, School of Health Science and Engineering, Shanghai, China), Chen-Di Yuan (University of Shanghai for Science and Technology, School of Health Science and Engineering, Shanghai, China), Fei Wang (University of Shanghai for Science and Technology, School of Health Science and Engineering, Shanghai, China), Xin-Yue Wang (Shanghai University of Medicine & Health Sciences, School of Medical Instrument, Shanghai, China), Zhen-Liang Huang (Shanghai University of Medicine & Health Sciences, School of Medical Instrument, Shanghai, China), Jian-Hua Li (Shanghai University of Medicine & Health Sciences, School of Medical Instrument, Shanghai, China), and Ze-Guo Shao (Shanghai University of Medicine & Health Sciences, School of Medical Instrument, Shanghai, China)</i> | |
| AASH: A Lightweight and Efficient Static IoT Malware Detection Technique at Source Code Level | 19 |
| <i>Yasir Glani (Tsinghua University, China), Luo Ping (Tsinghua University, China), and Syed Asad Shah (Bilkent University, Turkey)</i> | |

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Research on Test Task Management Scheduling of Integrated Test Platform Based on Improved Genetic Algorithm | 24 |
| <i>Dandan Guo (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., Ltd, China), Luohui Xia (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., Ltd, China), Yongjun Wang (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., Ltd, China), Lili Liang (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., Ltd, China), Cuiya Qin (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., Ltd, China), and Tongle Fan (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., Ltd, China)</i> | |
| Improved SEIR Model Based on Recovery Rate Optimization to Predict COVID-19 | 29 |
| <i>Shanzhi Yu (Ocean University of China, China), Fucheng Yang (Ocean University of China, China), Rongjia Han (Ocean University of China, China), Haiping Duan (Qingdao Municipal Center for Disease Control and Prevention, China), Feifei Li (Qingdao Municipal Center for Disease Control and Prevention, China), and Peishun Liu (Ocean University of China, China)</i> | |
| Flight Arrival Delay Time Prediction Based on Machine Learning | 35 |
| <i>Ziyu Wang (Nanjing University of Aeronautics and Astronautics, China), Hu Liu (Nanjing University of Aeronautics and Astronautics, China), and Fengguo Chu (Nanjing University of Aeronautics and Astronautics, China)</i> | |
| An Intelligent Security Operation Method for Cloud-Network Integration Services in Multi-Cloud Scenes | 40 |
| <i>Nishui Cai (China Telecom Research Institute, China), Zhuxiang Deng (China Telecom Research Institute, China), and Hao Wu (China Telecom Research Institute, China)</i> | |
| AYAT: A Lightweight and Efficient Code Clone Detection Technique | 47 |
| <i>Yasir Glani (Tsinghua University, China), Luo Ping (Tsinghua University, China), and Syed Asad Shah (Bilkent University, Turkey)</i> | |
| BiLSTM-CNN Text Emotion Analysis Based on Self Attention Mechanism and Dense Connection ... | 53 |
| <i>Sun Jianjun (Shandong Vocational College of Science and Technology, China)</i> | |
| Research on A Three-Dimensional Attention Module | 59 |
| <i>Yance Fang (Ocean University of China, China), Yucheng Xie (Ocean University of China, China), and Peishun Liu (Ocean University of China, China)</i> | |
| Some Blockchain Design Patterns for Overcoming Immutability, Chain-Boundedness, and Gas Fees | 65 |
| <i>Valerio Mandarino (Università di Catania, Italy), Giuseppe Pappalardo (Università di Catania, Italy), and Emiliano Tramontana (Università di Catania, Italy)</i> | |
| An Integrated Neutrosophic SNA-MABAC Approach for Blockchain Applicability Evaluation in Sustainable Supply Chains | 72 |
| <i>Peiwen Wang (Dalian Maritime University, China), Yan Lin (Dalian Maritime University, China), and Zhiping Wang (Dalian Maritime University, China)</i> | |

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Research on the Application of Blockchain Smart Contract in Software Supply Chain Management | 78 |
| <i>Shuaijianni Xu (Research Institute of China Telecom Co., Ltd., China), Yaodong You (Research Institute of China Telecom Co., Ltd., China), and Yuanying Xiao (Research Institute of China Telecom Co., Ltd., China)</i> | |
| Weather China: A 5G RCS Solution for Meteorological Service | 84 |
| <i>Hanhua Qu (Public Meteorological Service Center of China Meteorological Administration, China), Wei Tang (Public Meteorological Service Center of China Meteorological Administration, China), Yanpeng Li (Public Meteorological Service Center of China Meteorological Administration, China), Siyuan Sun (China United Network Communications Co., Ltd, China), Shibo Tang (Guangdong Fontdo Technology Co., Ltd, China), and Xiaoran Zhao (Public Meteorological Service Center of China Meteorological Administration, China)</i> | |
| Analysis to Mitigate Risks in Information Security for Management in Higher Education Institutions | 93 |
| <i>Segundo Moisés Toapanta T (Instituto Tecnológico Superior Rumiñahui, Ecuador), Eriannys Zharayth Gómez Díaz (Instituto Tecnológico Superior Rumiñahui, Ecuador), Carmita Ines Suarez (Instituto Tecnológico Superior Rumiñahui, Ecuador), Angel Ernesto Huerta Vélez (Instituto Tecnológico Superior Rumiñahui, Ecuador), Carmen Inés Huerta Suarez (Instituto Tecnológico Superior Rumiñahui, Ecuador), and Marcelo Zambrano Vizuete (Instituto Tecnológico Superior Rumiñahui, Ecuador)</i> | |
| Classification of Diabetic Retinopathy via Vascular Removal | 97 |
| <i>Yingao Duan (Guilin University of Electronic Technology, China), Shiwen Wang (Guilin University of Electronic Technology, China), and Hui Chen (Guilin University of Electronic Technology, China)</i> | |
| Semantic Segmentation Algorithm for Night Traffic Scene Based on Visible and Infrared Images | 103 |
| <i>Xiaona Xie (Chengdu University of Information Technology, China), Zhiyong Xu (Chengdu University of Information Technology, China), Tao Jiang (Chengdu University of Information Technology, China), JianYing Yuan (Chengdu University of Information Technology, China), and SiDong Wu (Chengdu University of Information Technology, China)</i> | |
| SVC-Based and Flow Assignment Strategy for Multi-Path Concurrent Video Transmission with Low-Latency | 109 |
| <i>Jiling Cai (Fuzhou University, China), Feng Chen (Fuzhou University, China), Daoping Zhu (Fuzhou China, China), and Pingping Chen (Fuzhou University, China)</i> | |
| An Access Middleware for Sensor Traffic Control | 116 |
| <i>Xuejun Liang (Jiangsu Product Quality Testing and Inspection Institute, China), Yunfeng Bian (Jiangsu Product Quality Testing and Inspection Institute, China), Ting Lin (Jiangsu Product Quality Testing and Inspection Institute, China), and Gang Liu (Jiangsu Product Quality Testing and Inspection Institute, China)</i> | |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Using the Relationship Between the Theory of Algebraic Fields and Number Theory for Developing Promising Methods of Digital Signal Processing | 121 |
| <i>Ibragim E. Suleimenov (National Engineering Academy of Republic of Kazakhstan, Republic of Kazakhstan) and Dinara K. Matrassulova (Almaty University of Power Engineering and Telecommunications named after Gumarbek Daukeyev, Republic of Kazakhstan)</i> | |
| Hybrid Number Systems: Application for Calculations in Galois Fields | 126 |
| <i>Ibragim Suleimenov (National Engineering Academy of the Republic of Kazakhstan, Kazakhstan), Yelizaveta Vitulyova (Almaty University of Power Engineering and Telecommunications named after Gumarbek Daukeyev, Kazakhstan), and Akhat Bakirov (Almaty University of Power Engineering and Telecommunications named after Gumarbek Daukeyev, Kazakhstan)</i> | |
| Deep Reinforcement Learning Based Mobile Video Concurrent Multipath Transmission Over Heterogeneous Wireless Networks | 131 |
| <i>Haobin Mao (Fuzhou University, China), Feng Chen (Fuzhou University, China), Sheng Zhang (Fuzhou University, China), and Pingping Chen (Fuzhou University, China)</i> | |
| Optimal Load Scheduling Based on Mobile Edge Computing Technology in 5G Dense Networking | 137 |
| <i>Luohui Xia (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., ltd, China), Dandan Guo (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., ltd, China), Yongjun Wang (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., ltd, China), Dandan Sun (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., ltd, China), Weijing Zhen (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., ltd, China), and Congrui Jing (Science and Technology Innovation Research Academy (Hebei) of CAICT Institute Co., ltd, China)</i> | |
