## Table of Content

Paper Code	Paper Title	Page
1008	A hybrid CPV/T system equipped with compound parabolic concentrator and Nano-PCM for optimal electricity generation and hot water	1-6
1009	Development Planning Policies for Renewable Electricity Generation in Competition with Fossil Electricity	7-13
1015	Analysis and Comparison of Reactive Power Optimization Using Improved Genetic Algorithm and Improved Quantum Particle Swarm Algorithm in an Active Distribution Network	14-17
1029	Investigating the Impacts of Electric Vehicles on Iran's Distribution Network	18-23
1030	Studying the Implementation of the Smartening Road Map of Iran's Electricity Distribution Network	24-29
1035	Superiority of Turbulent Flow of Water-based Optimization for Speed Control of Brushless DC Motor	30-36
1037	Investigating the Impact of Distributed Generation on Retail Price of Electricity Market in Iran's Electricity Distribution Network	37-43
1038	Intelligence Load Frequency Control in a Deregulated Power System	44-50
1040	The Study Impact of Restructuring on Efficiency of Iran's Electricity Distribution and Transmission Network	51-56
1044	Protection of the Blinding Area in Active Distribution Network by Multi-Function Relays	57-62
1047	Sustainable development through the establishment of zero-carbon villages	63-67
1051	IoT-based Office Buildings Energy Management with Distributed Edge Computing Capability	68-72
1057	A creative way to teach and learn power electronic laboratory equipment in renewable systems	73-77
1069	Wind Generators Ferroresonance Overvoltage Protection Methods: A review	78-84
1070	Optimum Operation of Grid-Independent Microgrid Considering Load Effect on Lifetime Characteristic of Battery Energy Storage System Using Dwarf Mongoose Optimization Algorithm	85-91
1072	Preventing Frequency Instability Using Large-Scale Photovoltaic Resources	92-96
1075	Efficient Multi-Objective Optimization for Analyzing Lifetime Characteristics of Battery Energy Storage System in a Standalone Microgrid Considering Resource and Load Limitations	97-104
1079	Investigating green chemistry and the effect of nanotechnology on the environment	105-108
1081	Photovoltaic Power Forecasting with an Ensemble Multi-Input Deep Learning Approach	109-113
1083	Application of Artificial Neural Network in predicting building's energy consumption	114-118
1085	Pave the Way for Hydrogen-Ready Smart Energy Hubs in Deep Renewable Energy System	119-123
1090	Prediction of Electric Vehicle's Annual Accessibility to Chargers for Providing Ancillary Services Using an Efficient Random Forest Method	124-129
1093	Comparison of effective greenhouse gases and global warming	130-134
1094	A Probabilistic Approach for Scheduling of Wind-Energy-Integrated Power Systems Incorporating Dynamic Lines and Transformers Rating	135-141
1099	Using a Multi-Functional Inverter to Connect the Distributed Generation Source to the Network with Purpose of Reducing Harmonic and Network Imbalance	142-146
1101	Wind Speed Forecasting and Probability Distribution Analysis using Measured Data at Weather Stations in Iran	147-150

1103	A Survey of Renewable Energy Approaches in Cloud Data Centers	151-157
1105	Superiority of Coronavirus Optimization Algorithm for Optimal Designing of Photovoltaic/Wind/Fuel Cell Hybrid System Considering Cost Minimization Approach to Improve Reliability	158-165
1110	Multi-Objective Coordinated Optimal Allocation of Distributed Generation and D-STATCOM in Electrical Distribution Networks Using Ebola Optimization Search Algorithm	166-172
1111	Optimal Energy Management of a Residential Microgrid Considering the Range Anxiety Factor, Uncertainties, and Time-of-Use Tariff Schemes	173-179
1114	Maiden Application of Zebra Optimization Algorithm for Design PIDN-TIDF Controller for Frequency Control in Offshore Fixed Platforms Microgrid in the Presence of Tidal Energy	180-186
1115	A 37-Level Switched-Capacitor Boost Inverter with Reduced Blocking Voltage on Semiconductors	187-191
1116	Comparing Three Separate Discrete Algorithms for Generation Maintenance Optimization	192-198
1117	Disease Diagnosis and Data Protection System for IoT-based Wearable Sensor Network	199-203
1118	An Overview of Rooftop Photovoltaic Power Plant Development Process in Iran	204-208
1124	Mathematical modeling of magneto-electro-elastic energy harvesters considering nonlinearities in curvature and inertia	209-215
1125	A Review of Energy-efficient QoS-aware Composition in the Internet of Things	216-221
1126	Investigating the increase of plutonium extraction from heavy water reactors	222-225
1128	The Performance of Electric and Hybrid Cars and the Effect of Their Use in the Environmental Cycle	226-232
1129	Clean Energy's Role in Power Plant Development	233-239
1132	Intelligent Control of a Domestic Solar Water Heating System with Thermal Storage Using Fuzzy Logic- Modified Model Predictive Controller	240-246
1133	Application of clean energies in agricultural greenhouses	247-251
1134	Energy Analysis of Molten-Salt Storage Integrated with Air-Based Brayton Cycle: Case Study of a Wind Farm in Denmark	252-257
1137	Application of Optical Wireless Communications in IoT Devices of Smart Grids within Smart Sustainable Cities: With Hybrid Perspectives to Metaverse & Quantum IoT	258-264
1143	Maximum Power Point Tracking in a Photovoltaic System by Optimized Fractional Nonlinear Controller	265-269
1147	A Novel Common Grounded Type 1- $\phi$ Five-Level Boost PV Inverter with Reduced Device Count	270-274
1148	Loss Reduction of Distribution Network by Optimal Reconfiguration and Capacitor Placement Using Cuckoo and Cultural Algorithms	275-279
1149	Game-Theoretic Based Energy Sharing Strategy in Microgrid Considering Influence of Neighbors' Social Personality	280-286
1152	Optimal Siting and Sizing of Distributed Generation Under Uncertainties Using Point Estimate Method	287-291
1156	Traffic-Constrained Multiobjective Placement of PEV Parking Lots with Flexible Charging Control in Power Distribution Systems	292-298
1162	An improved H6-type single-phase PV inverter with the suppressed leakage current	299-303
1163	An optimized H6-type single-phase PV inverter with bi-directional quasi-diode clamping	304-309

1164	A Levelized Feed-in Tariff to integrate battery into the PV-Connected system	310-314
1167	Optimal Placement of PEV Parking Lots with Flexible Charging Control in Power Distribution Systems	315-321
1169	Thermal performance enhancement of microchannel heat sinks with a decreasing-height bifurcation plate	322-326
1171	Decentralized Passivity-based control of two distributed generation units in DC microgrids	327-331
1172	Losses calculation of a two-input Boost Converter for Renewable Energy Applications	332-336
1173	Integrated Scheduling and Bidding Strategy for Virtual Power Plants based on Locational Flexibility	337-342
1176	Optimal Scheduling of Active Distribution Networks Considering Dynamic Transformer Rating Under High Penetration of Renewable Energies	343-349
1179	An Ultra Step-Up Non-Pulsating Input-Current DC-DC Converter	350-354
1181	Resiliency-Oriented Planning of Smart City Energy Infrastructure, Considering Energy Hubs, Based on Prioritized Critical Loads	355-360
1184	Optimal Service Restoration with Repair Crew and Mobile Power Source Scheduling: A Step Towards Smarter Grid	361-366
1185	Short- and long-term prediction of Bitcoin energy consumption	367-371
1188	Assessing the effect of biomass generation technologies on a hybrid AC/DC microgrid resilience enhancement	372-377
1190	Short-Term Forecasting of Wind Turbine-Generated Power in the Presence of Actuator Fault	378-383
1193	Combination of Porous Layer and Jet impingement in an Annular Heat sink	384-388
1194	Power Factor Correction of Parallel-Connected Boost Converter Utilizing a Fuzzy Logic-Based Controller	389-394
1195	A comprehensive study of optimal demand management for a distributed network with the EV charging stations	395-400
1202	Asymmetric resonance phenomenon in transmission lines equipped with compensation reactors and study about destructive effects	401-407
1203	Optimal Operation of Reconfigurable Active Distribution Networks Aiming at Resiliency Improvement	408-414
1208	P2P Strategy for Energy Cost Reduction in Multi-Energy Hubs Considering Uncertainty and Flexibility	415-419
1209	Improvement in LFC Performance of Dual Area Thermal Hydro System with Territory Control of TCPS and Redox Flow Battery Units	420-425
1212	Reliable Operation of V2G-Equipped Parking Lots Based on Probabilistic Mobility Patterns of Plug-in Hybrid Electric Vehicles	426-431
1217	Two-dimensional hexagonal sheet of TiO <sub>2</sub> : a promising candidate for use as anode material in Li-ion batteries	432-435
1224	Optimal Energy Operation in DC Microgrids Including Hydro-Pumped Storage in the presence Demand Response Program	436-440
1228	Restructured High-Gain DC-DC Converter with Improved Reliability and Reduced Failure-Rate of Filter-Capacitor	441-446
1229	PV-Fed Transformer-Less Five-Level Grid-Tied Inverter	447-451

1236	Cost optimization for hydrogen integration in energy portfolio based on water-energy and hydrogen nexus in economic zones; case study: Chabahar free zone	452-457
1237	Effect of PV roof coverage on the lighting availability, heating and cooling demands for a Venlo greenhouse in Tehran	458-462
1238	Assessment of Cyber Security in the Renewable Electricity Market Considering System Reliability Using Machine Learning	463-467
1239	Optimal Energy Management of a Parking Lot in the Presence of Renewable Sources	468-472
1242	Modified Cuckoo Optimization Algorithm for Frequency Regulation of Microgrids	473-477
1247	Simultaneous investigation of the increase in organic load of sediment using spirulina algae powder and increase in catholyte conductivity on sediment microbial fuel cell performance	478-482
1248	Local Peer-to-Peer Energy Trading Evaluation in Micro-Grids with Centralized Approach	483-488
1249	Optimal design of 20 kW grid-connected solar power plant for maximizing solar radiation in Tabriz utilizing PVsyst software	489-493
1250	A Two-Stage Stochastic Optimization Scheduling Approach for Integrating Renewable Energy Sources and Deferrable Demand in the Spinning Reserve Market	494-500
