**Volume 12201**

Proceedings of SPIE 0277-786X, V. 12201

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *UV and Higher Energy Photonics: From Materials to Applications 2022*, edited by Yong-Hoon Cho, Gilles Lérondel, Atsushi Taguchi, Proc. of SPIE 12201, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## NEW METHODS, DEVICES AND INSTRUMENTATIONS I

---

12201 02 **Carbon nanotube microfabricated window with extreme ultraviolet transmission and differential pumping** [12201-16]

---

## FAR- AND DEEP-UV SPECTROSCOPY

---

12201 03 **Graphite to diamond phase transition induced by UV radiation** [12201-3]

12201 04 **Monitoring glycation using the intrinsic fluorescence of biological fluorophores** [12201-2]

12201 05 **Impact of erbium (Er) doping in structural, optical and electrical properties of Ga<sub>2</sub>O<sub>3</sub> nanostructures/Si heterojunction** [12201-4]

---

## NEW METHODS, DEVICES AND INSTRUMENTATIONS II

---

12201 06 **Reflectance measurements of building materials in the far UVC (222 nm) wavelength range** [12201-20]

---

## NANOMATERIALS AND NANOSTRUCTURES

---

12201 07 **Laser interference and nanospheres UV lithography to produce micro and nanostructured TiO<sub>2</sub> and TiN based sol-gel layers (Invited Paper)** [12201-13]

12201 08 **Effect of post-deposition annealing ambient on gallium oxide (Ga<sub>2</sub>O<sub>3</sub>) films** [12201-14]

12201 09 **Development of a programmable UV laser source for the Dragonfly Mass Spectrometer (DraMS)** [12201-22]
