**Volume 12270**

Proceedings of SPIE 0277-786X, V. 12270

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Target and Background Signatures VIII*, edited by Karin Stein, Ric Schleijsen, Proc. of SPIE 12270, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## CAMOUFLAGE ASSESSMENT

---

- 12270 02 **Demonstration of adaptive camouflage for the soldier (Invited Paper)** [12270-1]
- 12270 03 **Measuring the dynamics of camouflage in natural scenes using convolutional neural networks** [12270-2]
- 12270 04 **A multi-temporal hyperspectral camouflage detection and transparency experiment** [12270-3]

---

## SCENES AND BACKGROUND

---

- 12270 06 **A comparison of synthetic thermal imagery created using MuSES and thermal imagery captured in the field (Invited Paper)** [12270-5]
- 12270 07 **Validating colour representation in synthetic scenes using a virtual colour checker chart** [12270-6]
- 12270 08 **Hybrid simulation for creating realistic scenes for signature assessment** [12270-7]
- 12270 09 **Local estimation of parametric point spread functions in thermal images via convolutional neural networks** [12270-8]
- 12270 0A **Determination of the cloud coverage using ground based camera images in the visible and infrared spectral range** [12270-9]
- 12270 0B **Obtaining ground truth data in C-UAS trials** [12270-10]

---

## MATERIAL AND SURFACE PROPERTIES

---

- 12270 0C **Adding graphene to low-emissive paint (Invited Paper)** [12270-11]
- 12270 0D **Optical studies of white organic materials for camouflage applications in Arctic environments** (12270-12)
