**Volume 12276**

Proceedings of SPIE 0277-786X, V. 12276

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Artificial Intelligence and Machine Learning in Defense Applications IV*, edited by Judith Dijk, Proc. of SPIE 12276, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510655553

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## SECURITY APPLICATIONS

---

- 12276 02 **Dynamic-automatic pipelines for finding topic-specific information clusters using NLP methods in connection with a model-driven approach** [12276-23]
- 12276 03 **A smart embedded imaging system for true color face analysis** [12276-2]
- 12276 04 **Action recognition algorithm from visual sensor data for contactless robot control systems** [12276-3]

---

## ANNOTATION AND TRAINING

---

- 12276 05 **Automated example selection for iterative training of annotation networks** [12276-4]
- 12276 06 **Learning without gradients: multi-agent reinforcement learning approach to optimization** [12276-5]

---

## EVALUATION OF AI SYSTEMS

---

- 12276 08 **Meaningful machine learning robustness evaluation in real-world machine learning enabled system contexts (Invited Paper)** [12276-10]
- 12276 09 **Evaluating active learning methods for synthetic aperture radar maritime object detection** [12276-11]
- 12276 0A **Performance metrics with operational context for video object detection algorithms** [12276-12]
- 12276 0B **Comparative evaluations of online and offline visual tracking algorithms** [12276-13]
- 12276 0C **ARORA and NavSim: a simulator system for training autonomous agents with geospecific data** [12276-25]
- 12276 0D **Seascope: a due-diligence framework for algorithm acquisition (Invited Paper)** [12276-14]

#### **AERIAL IMAGING**

---

- 12276 0E     **CBAM-YOLOv5 for infrared image object detection** [12276-8]
- 12276 0G     **Hybrid feature extraction based on PCA and CNN for oil rig classification in C-Band SAR imagery** [12276-18]

#### **AERIAL OBJECT DETECTION**

---

- 12276 0I     **Multispectral optical signatures of micro UAV: acquisition and database for usage in a neural network** [12276-19]
- 12276 0J     **Bandwidth constrained cooperative object detection in images** [12276-20]

#### **POSTER SESSION**

---

- 12276 0L     **Formation of an algorithm for increasing the accuracy of restoring the boundaries of objects obtained to create 3D structures** [12276-9]
- 12276 0M     **Video segmentation on static and dynamic textures using a quaternion framework** [12276-22]
- 12276 0N     **Chinese sign language recognition based on multiview deep neural network for millimeter-wave radar** [12276-26]
