Volume 12324

Proceedings of SPIE 0277-786X, V. 12324

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Infrared, Millimeter-Wave, and Terahertz Technologies IX*, edited by Cunlin Zhang, Xi-Cheng Zhang, Masahiko Tani, Proc. of SPIE 12324, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Symposium Committee*
xi *Conference Committee*

SESSION 1

DEVICES

- 12324 03 **Spatially multiplexed metasurfaces for polarization conversion and wavefront steering** [12324-2]
- 12324 04 **Preliminary design of a superconducting heterodyne array receiver for Leighton Chajnantor Telescope** [12324-3]
- 12324 05 **High sensitivity terahertz parametric up-conversion detector based on KTP crystal** [12324-4]
- 12324 06 **Noise performance of a 200–280 GHz mixer with Nb-AlN-NbN superconducting tunnel junctions** [12324-6]
- 12324 07 **Microwave photonic radar for distance and direction measurement of multiple targets** [12324-7]
- 12324 08 **Transfer printed GaAs Schottky barrier diode on quartz for terahertz mixer and frequency multiplier** [12324-38]
- 12324 0A **Ultrahigh modulation enhancement in all-optical THz modulators integrated with gold nanobipyramids** [12324-46]

SESSION 2

MATERIALS AND SYSTEMS

- 12324 0B **Nonlinear response of liquid water induced by terahertz pulses (Invited Paper)** [12324-8]
- 12324 0C **Terahertz dielectric characterization of low-loss materials for 6G and ADAS application** [12324-9]
- 12324 0D **Perfect phase matching regulation in cubic semiconductors based on linear electro-optic effect** [12324-10]
- 12324 0F **Generation of tunable THz-radiation with self-sweeping Er-doped fiber laser** [12324-20]
- 12324 0G **Spatial chirping of a THz pulse during generation in InAs crystal** [12324-21]

SESSION 3 TERAHERTZ SPECTRAL APPLICATIONS

- 12324 OH **Metamaterial sensing with ultra-high sensitivity and tunability within terahertz region based on photosensitive semiconductors (Invited Paper)** [12324-11]
- 12324 OI **Wideband one-dimensional range profiles of Lambertian reflectors in the terahertz range** [12324-12]
- 12324 OJ **Study on terahertz spectra of traditional Chinese medicine tablets with porous and non-porous structures** [12324-13]
- 12324 OK **The detection of early rat blast-induced traumatic brain injury based on high wavenumber Raman spectroscopy** [12324-14]

SESSION 4 INFRARED AND MICROWAVE TECHNOLOGY

- 12324 OM **Dual-channel microwave photonic frequency conversion and transmission method with immunity to periodically power fading** [12324-16]
- 12324 ON **The calculation theory of differential model for the infrared radiation characteristics of the high-altitude high-speed unmanned-aerial-vehicle plume** [12324-17]
- 12324 OP **Detection and azimuth information display of infrared moving targets** [12324-19]
- 12324 OQ **Large-area seamless mosaic for UAV thermal infrared sequence images based on prior coordinates and overlap area** [12324-41]

POSTER SESSION

- 12324 OR **Enhancing efficiency of perovskite NIR phototransistor via sulfonated graphene oxide** [12324-22]
- 12324 OS **Polarization insensitive tunable terahertz coding metasurface based on vanadium dioxide** [12324-23]
- 12324 OT **Electromagnetically induced transparency from interlayer coupling of asymmetric split ring resonators** [12324-24]
- 12324 OU **Coherent detection of broadband terahertz pulses using ethanol-water mixtures** [12324-25]
- 12324 OV **Modulation of electromagnetically induced transparency based on bright-bright mode coupling in asymmetric split ring resonators** [12324-26]
- 12324 OW **Low thermal mass long wave infrared metasurface absorber for small pixel microbolometer with fast response** [12324-27]
- 12324 OY **Study of different types of hydroxypropyl celluloses (HPC) based on terahertz time-domain spectroscopy (THz-TDS)** [12324-29]

- 12324 11 **Correlation between dynamic mechanical properties and infrared spectra of HTPB propellant during aging** [12324-32]
- 12324 12 **A frequency-adjustable electromagnetic induced transparency with terahertz metasurface based on vanadium dioxide** [12324-33]
- 12324 13 **2 μ m-compatible avalanche photodetector using Sb-based superlattice** [12324-34]
- 12324 14 **Study on integrated optical beamforming network for microwave photonics network radar** [12324-35]
- 12324 15 **LOS and NLOS channel models for indoor 220-330GHz communications based on ray tracing** [12324-36]
- 12324 16 **Gouy phase shift of terahertz pulses observed using a water column as a probe** [12324-45]
- 12324 18 **Investigation of dispersion properties of congruent lithium niobate crystal in the terahertz frequency range** [12324-37]
- 12324 19 **Transmission and reflection spectra of Si wave-guiding structures for THz integrated photonics** [12324-42]
- 12324 1A **The development of the simulation methodology for steady-state thermoreflectance technique** [12324-43]
- 12324 1B **BiSb structured thin-film as photothermoelectric terahertz detector** [12324-44]
