Visualizing and Quantifying Drug Distribution in Tissue VII

Kin Foong Chan Conor L. Evans Editors

28 January 2023 San Francisco, California, United States

Sponsored and Published by SPIF

Volume 12357

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Visualizing and Quantifying Drug Distribution in Tissue VII, edited by Kin Foong Chan, Conor L. Evans, Proc. of SPIE 12357, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

 $\hbox{Publication of record for individual papers is online in the SPIE Digital Library.}$

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

٧	Conference Committee
	PHARMACOKINETIC AND PHARMACODYNAMIC TOMOGRAPHY IN PRECLINICAL RESEARCH
12357 09	Development of near-infrared paired-agent imaging for in vivo quantification of drug receptor occupancy in tumor [12357-8]
	NOVEL MODEL AND SCREENING TOOLS FOR DRUG DEVELOPMENT
12357 OB	Higher density of ECM composition in pancreatic cancer correlates with reduced drug delivery [12357-10]
	ADVANCED METHODS IN DRUG DETECTION AND IMAGING
12357 OF	Ex vivo mesoscopic assessment of drug delivery and target engagement via lifetime FRET [12357-16]
12357 0G	Application of Stimulated Raman Scattering (SRS) microscopy for evaluation of olaparib biodistribution in an ovarian cancer cell line [12357-17]
