Volume 12362

Proceedings of SPIE, 1605-7422, V. 12362

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Mechanisms of Photobiomodulation Therapy XVII*, edited by Ann Liebert, Jeri-Anne Lyons, James D. Carroll, Proc. of SPIE 12362, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

CLINICAL APPLICATIONS OF PHOTOBIOMODULATION I

12362 02 **Photobiomodulation on hard-to-heal ulcers: influence of diabetes mellitus on treatment time to healing in frail elderly patients** [12362-4]

BASIC MECHANISMS OF PHOTOBIOMODULATION

12362 03 **Assessment of NIR and THz photostimulation at the cellular and subcellular levels (Invited Paper)** [12362-11]

12362 04 **Validating homogeneity for a novel 3-dimensional tissue phantom modeling system of the human maxilla** [12362-12]

EMERGING CONCEPTS AND CLINICAL APPLICATIONS

12362 05 **Effectiveness on cognition in Alzheimer's patients by personal red and near-infrared LED photobiomodulation therapy device treatment: a case study (protocol)** [12362-20]

POSTER SESSION

12362 06 **Understanding the mechanisms of photobiostimulation on mitochondrial bioenergetics: the challenges of respirometry with real-time irradiation at 635 nm** [12362-21]

12362 07 **Duodenal multi-wavelength photobiomodulation with light-emitting diode improves glycemic control and hepatic parameters in type 2 diabetes animal model** [12362-22]

12362 08 **Near-infrared photobiomodulation therapy for rehabilitation of patients with long COVID** [12362-25]

DIGITAL POSTER SESSION

12362 09 **Photobiomodulation attenuates microglial activation by enhancing mitophagy** [12362-15]
