Volume 12374

Proceedings of SPIE, 1605-7422, V. 12374

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Microfluidics, BioMEMS, and Medical Microsystems XXI*, edited by Bonnie L. Gray, Bastian E. Rapp, Proc. of SPIE 12374, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MICROFLUIDICS I

12374 02 **A predictive machine learning model to optimize flow rates on an integrated microfluidic pumping system for peptide-based 3D bioprinting** [12374-3]

MICROFABRICATION

12374 03 **A method for the rapid fabrication of solid metal microneedles (Best Student Paper and Presentation Award)** [12374-5]

OPTOFLUIDICS I

12374 04 **A microfluidic chip with immobilization chambers for cardiac organoid imaging** [12374-8]

MICROFLUIDICS II

12374 05 **Molecular diagnostics on smartphone (Invited Paper)** [12374-10]

APPLICATIONS

12374 06 **Modeling carbon dioxide trapping at microscopic pore scale with digital rock representations** [12374-14]

OPTOFLUIDICS II

12374 07 **Speckle imaging offers sensitive detection of bacterial growth in microdroplet antibiotic susceptibility testing assays** [12374-21]

MEDICAL DEVICES

- 12374 08 **Noninvasive medical microsystems on flexible substrates (Invited Paper)** [12374-22]
- 12374 09 **Vibration transmissibility of unimorph piezoelectric actuator on flexible substrate for conductive hearing aids** [12374-24]

DIGITAL POSTERS

- 12374 0A **Study of different membrane shapes for integrated pneumatically actuated microvalves with PDMS** [12374-12]
