Volume 12377

Proceedings of SPIE, 1605-7422, V. 12377

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Interactions with Tissue and Cells XXXIV*, edited by Norbert Linz, Proc. of SPIE 12377, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NOVEL APPLICATIONS OF LASERS AND LIGHT IN BIOMEDICINE

- 12377 02 **Detection of human immunodeficiency virus on a photonic crystal-based platform** [12377-2]
12377 03 **Light-induced cytotoxicity in cells utilizing an automated well plate illuminator** [12377-3]

NOVEL APPLICATIONS OF LASERS AND LIGHT IN BIOMEDICINE II

- 12377 04 **Evaluating the retinal hazard from exposures to the supercontinuum generated by a NIR femtosecond laser** [12377-5]
12377 05 **The effects of cold storage on double integrating sphere optical properties measurements of porcine skin and subcutaneous fat** [12377-7]
12377 06 **High resolution mass spectrometry imaging using 3 micron laser ablation (Best Oral Paper)** [12377-8]

NUMERICAL APPROACHES SIMULATING LASER-TISSUE INTERACTIONS AND RESPONSE

- 12377 07 **Quantitative evaluation of light distribution in skin tissue for short-pulsed laser treatment using Monte Carlo simulation combined with nonlinear absorption model of melanin** [12377-12]

MECHANISMS OF PULSED LASER ABLATION

- 12377 08 **Bone ablation performance of a Ho:YAG laser** [12377-15]
12377 09 **Efficient and tissue-saving bone ablation with a pulsed 3 μm laser source** [12377-32]

OPTICAL PROPERTIES OF TISSUES AND CELLS I

- 12377 0A **Monitoring the effects of heavy metal (Cu) on aquatic plant (*Myriophyllum*) using biospeckle optical coherence tomography and statistical interferometry technique** [12377-17]

12377 0B **Evaluation of sub-nanometric plant growth activities under far-red light illumination using Statistical Interferometry Technique (SIT) [12377-18]**

12377 0C **Laser biospeckle based novel method in the evaluation of far-red light effects on plant growth [12377-19]**

OPTICAL PROPERTIES OF TISSUES AND CELLS II

12377 0D **Depth and structure information in fluorescence molecular tomography obtained from time resolved spectroscopy [12377-20]**

12377 0E **Photonics probing of structural alterations in Alzheimer's disease in human brain cells and tissues [12377-21]**

12377 0F **Fast and reliable micro-bioassay technique based on biospeckle [12377-23]**

POSTER SESSION

12377 0G **Optical detection of structural alteration of brain tissues in Parkinson's disease via Partial Wave Spectroscopy (PWS) [12377-25]**

12377 0H **Low-level laser therapy for treatment of severe acute respiratory syndrome 2 infection [12377-1]**
