SPIE

Volume 12382

Proceedings of SPIE, 1605-7422, V. 12382

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Polarized Light and Optical Angular Momentum for Biomedical Diagnostics 2023*, edited by Jessica C. Ramella-Roman, Hui Ma, Tatiana Novikova, Daniel S. Elson, I. Alex Vitkin, Proc. of SPIE 12382, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

CLINICAL APPLICATIONS OF POLARIMETRY

12382 02 **Mueller matrix polarimetry for in vivo scar tissue diagnostics** [12382-4]

PRE-CLINICAL APPLICATIONS OF POLARIMETRY I

12382 03 **Reflectance full Mueller matrix polarimetry for microstructural validation of diffusion magnetic resonance imaging** [12382-10]

PRE-CLINICAL APPLICATIONS OF POLARIMETRY II

12382 04 **Polarized hyperspectral microscopic imaging for collagen visualization on pathologic slides of head and neck squamous cell carcinoma** [12382-13]

OTHER APPLICATIONS AND INSTRUMENTATION

12382 05 **Enhancing biological tissue structures visualization through polarimetric parameters** [12382-16]

ALGORITHMS AND COMPUTATIONAL APPROACHES

12382 06 **Information extraction in polarization-resolved second harmonic generation microscopy images of human tissues for automatic cancer diagnosis** [12382-24]

MICROSCOPY AND OCT

12382 07 **Polarized hyperspectral microscopic imaging for white blood cells on Wright-stained blood smear slides** [12382-31]

12382 08 **Study of the suitability of polarimetric metrics to implement tissue classification models based on artificial intelligence** [12382-44]

DIGITAL POSTER SESSION

- 12382 09 **A Stokes imaging microscope system with a large field of view** [12382-23]
- 12382 0A **Comparative study of the influence of imaging resolution on polarization properties derived from Mueller matrix** [12382-28]
- 12382 0B **Automatic detection and quantitative evaluation of skin hair follicles based on Mueller matrix polarimetry** [12382-29]
- 12382 0C **Simultaneous measurement of the polarization characteristics and inherent optical properties of suspended particles** [12382-32]
