Volume 12417

Proceedings of SPIE 0277-786X, V. 12417

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Components and Materials XX*, edited by Shubin Jiang, Michel J. Dignonnet, Proc. of SPIE 12417, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510659391

ISBN: 9781510659407 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SESSION 1 FLUORIDE AND CHALCOGENIDE FIBERS

12417 02 **Fabrication of chalcogenide microstructured optical preforms and fibers by additive manufacturing of chalcogenide glasses (Invited Paper) [12417-1]**

SESSION 2 FIBER BRAGG GRATINGS

12417 05 **Apodized, plane-by-plane written chirped fiber Bragg gratings in polarization-maintaining fibers for dispersion control in all-fiber ultrafast lasers [12417-6]**

12417 07 **Characterisation of a polymer-based eccentric FBG 3D shape deformation sensor [12417-8]**

12417 08 **Compact fiber optic spectrometers formed by chirped diffraction gratings inscribed with a femtosecond laser platform [12417-9]**

12417 09 **Gold-coated femtosecond FBGs and their performance as a highly sensitive temperature sensor up to 500°C [12417-10]**

SESSION 3 LASER MATERIALS

12417 0B **Transition metal and rare earth doped $Zn_{1.3}Ga_{1.4}Sn_{0.3}O_4$ persistent phosphors for anti-counterfeiting applications [12417-12]**

12417 0D **Fast-acting halide-perovskite-based RGB fluorescent materials for aggregate Gb/s visible light communication [12417-14]**

SESSION 4 OPTICAL FILTERS AND COATINGS

12417 0E **Method of determination of the optical constants of particulate samples [12417-16]**

12417 0F **Inversely designed miniature light filtering structures with back-reflection minimization [12417-17]**

12417 0G **Executing highly optimized sputtered interference-coating designs for colorimetry and light balance filters using broadband monitoring [12417-18]**

12417 0H **Comparison between effective-medium and structure-distribution models for antireflective nanostructures on functional diffractive optics** [12417-19]

SESSION 5 OPTICAL COMPONENTS

12417 0J **Spectrum converting nanocomposites for sensitive detectors of short-wavelength radiation** [12417-23]

12417 0K **Low-noise AlGaAsSb avalanche photodiodes for 1550 nm light detection** [12417-24]

12417 0L **Bi-encoded metasurfaces for the infrared spectral range** [12417-25]

12417 0M **Variation of sidewall passivation on sub- μm selectively grown Ge-on-Si single photon avalanche detectors** [12417-47]

SESSION 6 SOLID-STATE LASERS

12417 0O **NIR and VIS solid state random lasers: a combined experimental and theoretical study (Invited Paper)** [12417-27]

12417 0Q **Color-tunable upconversion luminescence of Er^{3+} in oxyfluoride nano-glass-ceramics** [12417-29]

SESSION 7 OPTICAL SENSORS

12417 0T **Polymer-optical sensor glove prototype based on eccentric FBGs** [12417-32]

12417 0U **Uncooled nano-thermoelectric bolometers for infrared imaging and sensing** [12417-33]

POSTER SESSION

12417 0W **A compact ring modulator with very large extinction ratio and high quality factor fabricated in AIM photonics technology at Albany Nanotech Complex** [12417-20]

12417 0X **Photonic-integrated wavelength selective switch for S+C+L applications** [12417-21]

12417 0Y **Spectroscopic and optical properties of large-sized Yb:YAG transparent ceramics produced by solid-state reaction method** [12417-34]

12417 0Z **Characterization of optical fiber at cryogenic temperatures** [12417-35]

12417 10 **Characterization of dynamically compressed oxide and hydroxide minerals** [12417-36]

- 12417 11 **Detection of petrol adulteration using TiO₂-coated etched-clad-based FBG sensor [12417-37]**
- 12417 13 **Spatial uniformity of black silicon induced junction photodiode responsivity [12417-39]**
- 12417 14 **Development and manufacturing of micro lens array diffuser for VCSEL with super-wide-angle distribution and high efficiency [12417-40]**
- 12417 15 **Polarization-maintaining chalcogenide all-solid hybrid microstructured optical fibers and their mid-infrared supercontinuum generation [12417-41]**
- 12417 16 **Spectrally resolved temporal coherence of spectrally narrowband filtered high-power supercontinuum light source versus an appropriately treated laser-driven plasma light source [12417-42]**
- 12417 17 **An experimental study of optical anisotropy of blue-phase liquid crystals as a function of alignment layers [12417-43]**
- 12417 18 **A numerical investigation of ultrawideband metamaterial absorber for infrared wavelength spectrum for the solar cell application [12417-44]**
- 12417 1B **Development of hybrid optical coating with multifunction of UV-VIS absorption, NIR transmission, mechanical hardness, and easy cleanability for automotive LiDAR window [12417-48]**
