Volume 12429

Proceedings of SPIE 0277-786X, V. 12429

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Next-Generation Optical Communication: Components, Sub-Systems, and Systems XII*, edited by Guifang Li, Kazuhide Nakajima, Atul K. Srivastava, Proc. of SPIE 12429, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

ADVANCED COMPONENTS I

- 12429 03 **Data aggregation technique for millimeter wave and terahertz band high frequency migration technology for beyond 5G** [12429-2]
- 12429 04 **Photonic integrated circuits for 5G-and-beyond networks: enabling the mmWave band and beyond with InP-based photomixers in integrated transceivers** [12429-3]

ADVANCED COMPONENTS II

- 12429 07 **Enabling technologies for flexible and scalable spatial cross-connects (Invited Paper)** [12429-6]
- 12429 09 **Imec silicon photonics platforms: performance overview and roadmap (Invited Paper)** [12429-9]

LARGE CAPACITY TRANSMISSION I

- 12429 0A **Power-efficient undersea SDM systems (Invited Paper)** [12429-11]
- 12429 0B **Crosstalk variation in a standard cladding diameter multicore fiber during the cabling and installation processes** [12429-12]
- 12429 0D **Latest standardization trend and future prospects for 800G/1.6T optical transceivers (Invited Paper)** [12429-14]

LARGE CAPACITY TRANSMISSION II

- 12429 0F **Design of three-mode, dual-step index pure silica core fiber with low differential mode delay and low loss characteristics** [12429-16]
- 12429 0G **Erbium-doped fiber amplifiers design strategies to optimize capacity in submarine systems** [12429-17]
- 12429 0H **Transmission capacity of SOA-amplified links (Invited Paper)** [12429-18]

NETWORKING AND ADVANCED DEVICES I

- 12429 0I **Distributed fiber optic sensing over readily available telecom fiber networks (Invited Paper)** [12429-19]
- 12429 0J **Network performance analysis of a PIC-based reconfigurable add-drop multiplexer for multiband applications** [12429-20]
- 12429 0K **Quasi-real-time high resolution spectrum analyzer by two-step spectroscopy** [12429-21]
- 12429 0L **Accurate prediction of performance for a submarine open cable** [12429-22]
- 12429 0M **Optical path management based on machine learning for optical networks (Invited Paper)** [12429-23]

NETWORKING AND ADVANCED DEVICES II

- 12429 0N **Modeling of quad ring resonator for tunable delay line in z-domain analysis** [12429-24]
- 12429 0O **Dynamic vehicular visible light communication for traffic management** [12429-25]
- 12429 0Q **Simplification of etalon spectrometer using inverse matrix data processing algorithm for optical comb spectrum evaluation** [12429-27]
- 12429 0R **Recent advances in wideband Raman amplifiers (Invited Paper)** [12429-28]

WIRELESS AND VISIBLE LIGHT COMMUNICATIONS I

- 12429 0S **Design and analysis of photonic beam forming system using ring resonator for 1×4 phase array antenna in Ka-Band** [12429-30]
- 12429 0U **Reconfigurable multi-beam steering using segmented spatial light modulator for indoor optical wireless communication** [12429-32]
- 12429 0V **Design requirements for mm-wave integrated optical beamforming networks** [12429-33]

WIRELESS AND VISIBLE LIGHT COMMUNICATIONS II

- 12429 0X **Exploiting polarisation state for beyond 10 Gbps underwater optical wireless data transmission in hostile channel conditions** [12429-35]

- 12429 0Y **Cooperative guidance system for mobile users inside large buildings based on visible light communication** [12429-36]
- 12429 0Z **Hybrid LED-laser transmitter for colour-tunable gigabit-per-second class indoor visible light communication** [12429-37]
- 12429 10 **On-off keying and Manchester coding in a visible light communication link** [12429-38]

ACCESS AND SHORT REACH TRANSMISSION I

- 12429 11 **Photonic networking across metro and access for future super-broadband services and 6G mobile networks (Invited Paper)** [12429-40]
- 12429 12 **Asymmetric heterodyne downconversion for fading-free radio-over-fiber systems** [12429-41]
- 12429 13 **Single PD optical detection of optical intensity and polarization-modulated signals in multidimensional optical transmission** [12429-42]
- 12429 14 **A wide temperature operation of EML on high bandwidth sub-mount for 200 Gbps PAM4** [12429-43]
- 12429 15 **Near-packaged optics module with 32Gbps x 16 lanes for short reach interconnect** [12429-44]

ACCESS AND SHORT REACH TRANSMISSION II

- 12429 18 **Dual-polarization direct-detection for data-center optical communications (Invited Paper)** [12429-47]
- 12429 19 **Practical decoy-state sender implemented over analog RoF transmitters for secure 5G and beyond X-haul connections** [12429-48]
- 12429 1A **Techno-economics of 5G transport deployments (Invited Paper)** [12429-49]

ADVANCED TRANSMISSION TECHNOLOGY I

- 12429 1B **Power-over-fiber technologies using double-clad fibers for remote antenna units in mobile networks (Invited Paper)** [12429-50]
- 12429 1C **Toward future generation digital avionics fiber optic communication** [12429-51]
- 12429 1D **Geometric and probabilistic constellation shaping in high spectral efficiency multi-dimensional optical QAM-DPSK-PIRFSK transmission** [12429-53]
- 12429 1E **Investigating probabilistic constellation shaping for dual-polarization PAM8 signals at different data rates** [12429-54]

12429 1F **Scalable architecture for sub-pJ/b multi-Tbps comb-driven DWDM silicon photonic transceiver (Invited Paper)** [12429-55]

ADVANCED TRANSMISSION TECHNOLOGY II

12429 1G **Photonic-assisted microwave quantum-noise randomized cipher generation for signal security of wireless communications (Invited Paper)** [12429-56]

12429 1J **Field-installed fiber transmission of Y-00 quantum noise stream cipher with quantum deliberate signal randomization (Invited Paper)** [12429-59]

POSTER SESSION

12429 1K **A novel approach in passive photonic alignment** [12429-60]
