PROCEEDINGS OF SPIE

International Conference on Network Communication and Information Security (ICNCIS 2022)

Mohiuddin Ahmed
Editor

19–21 August 2022
Qingdao, China

Organized by
Guangzhou Computer Society

Sponsored by
AEIC Academic Exchange Information Center (China)

Published by
SPIE

Volume 12503

Proceedings of SPIE 0277-786X, V. 12503
SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Network Communication and Information Security (ICNCIS 2022)*, edited by Mohiuddin Ahmed, Proc. of SPIE 12503, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

MOBILE COMMUNICATION AND NETWORK ENGINEERING MANAGEMENT

12503 02 **Research on identity authentication key exchange protocol for 5G Internet of Vehicles** [12503-40]

12503 03 **Research on communication network operation and maintenance method based on multi-agent technology** [12503-41]

12503 04 **Design of lightweight satellite status monitoring system based on microservices** [12503-2]

12503 05 **Application of AI+5G network in the therapy and prophylaxis of major epidemics** [12503-38]

12503 06 **AutoGenD: fuzz driver generation for binary libraries without header files and symbol information** [12503-33]

12503 07 **Performance analysis for full-duplex device-to-device underlaid cellular networks** [12503-28]

12503 08 **Bi-stability and bifurcation in an erbium-doped fiber three-ring laser** [12503-20]

12503 09 **A multimodal routing technology for electric power services** [12503-39]

12503 0A **A novel PUF-based protocol to improve the reliability of RSU for anonymous authentication in VANET** [12503-29]

12503 0B **Mutual interference suppression of LFMCW automotive radar based on EEMD and ARIMA models** [12503-17]

12503 0C **Analysis of anti-Gaussian channel interference ability of QPSK coding based on error detection and correction** [12503-35]

12503 0D **A Bidirectional data packet tampering method for Linux system** [12503-31]

12503 0E **PC-TDA: a policy-customized trusted Docker architecture based on attribute-based signature** [12503-25]

12503 0F **Digital frequency spectrum analysis based on discrete Fourier transform** [12503-34]

12503 0G **Study of an erbium-doped fiber three-ring laser guiding a hyperchaos series synchronization network link** [12503-21]

12503 0H **Ballistic extrapolation based on extended Kalman smoothing** [12503-7]

12503 0I **Research on IPv6 address structure based on IPv4-IPv6 dual stack** [12503-13]

INTELLIGENT NETWORK AND INFORMATION SECURITY MONITORING

12503 0J **Safe positioning based on CNN and LSTM for 5G wireless networks** [12503-24]

12503 0K **Implementation of BP neural network acceleration based on FPGA** [12503-23]

12503 0L **Security awareness deployment policy for network slicing** [12503-6]

12503 0M **Research on the application of quantum computing + dynamic face recognition in bank personal business** [12503-3]

12503 0N **Research on information security evaluation technology of electric vehicle charging pile** [12503-9]

12503 0O **Security risk analysis and verification of USIM application toolkit** [12503-8]

12503 0P **Hidden Markov-based path prediction method for malicious attacks in wireless sensor networks** [12503-12]

12503 0Q **Intrusion detection of host security vulnerabilities in cloud environment** [12503-32]

12503 0R **Chaotic prediction of network traffic based on support vector machine optimized by improved beetle swarm optimization algorithm** [12503-10]

12503 0S **PRE-DAC: proxy re-encryption based dynamic access control for secure cloud data** [12503-11]

12503 0T **Heap memory vulnerability utilization method in Zig language** [12503-1]

12503 0U **Intelligent home security system based on Internet of Things** [12503-36]

12503 0V **Fraud attack behavior analysis based on collaborative filtering algorithm of personalized recommender system** [12503-26]

12503 0W **Human body imaging method based on channel state information and deep learning** [12503-5]

12503 0X **Identification of abnormal traffic in combined network based on impulse response feature detection** [12503-19]

12503 0Y **Research on the multi-channel storage mechanism of medical information based on blockchain** [12503-27]

12503 0Z **Cloud computing data security access control model using improved CP-ABE algorithm** [12503-14]

12503 10 **Robust image watermarking algorithm based on DWT and DCT** [12503-4]
