PROCEEDINGS OF SPIE

International Conference on Geographic Information and Remote Sensing Technology (GIRST 2022)

Yang Wang
Editor

16–18 September 2022
Kunming, China

Organized by
School of Automation, Nanjing University of Science and Technology (China)

Sponsored by
Faculty of Geography, Yunnan Normal University (China)

Published by
SPIE

Volume 12552

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 12552

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Geographic Information and Remote Sensing Technology (GIRST 2022)*, edited by Yang Wang, Proc. of SPIE 12552, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Conference Committee*

Part One

GEOGRAPHIC INFORMATION AND GEOLOGICAL FEATURE RESEARCH

12552 02 **Research on emergency scheduling for sudden water pollution accident in reservoir based on time-space analysis method** [12552-148]

12552 03 **Research on 3D geographic information recognition and labeling technology based on YOLO** [12552-69]

12552 04 **Spatiotemporal dynamics of $PM_{2.5}$ pollution and associated exposure risks for populations in Shandong Province based on remote sensing data (2000–2020)** [12552-91]

12552 05 **GIS and RS technology were used to analyze the changes of land use types in the main urban areas of Chongqing** [12552-104]

12552 06 **Application of GIS in disaster management: a case study of the 2021 Australian flood** [12552-100]

12552 07 **Spatial distribution characteristics and patterns of daily consumption places in Kunming main city based on POI data** [12552-113]

12552 08 **Risk assessment and zoning of earthquake disaster in Shandong Province based on GIS** [12552-108]

12552 09 **Evaluation of urban resilience against waterlogging disasters by using GIS technology: a case study of Shenzhen, China** [12552-90]

12552 0A **Application of GIS in the planning of scenic trail systems in shallow mountain areas: case study of scenic area planning and design in the context of territorial space planning** [12552-134]

12552 0B **Farmers' livelihood vulnerability to ecological degradation in high-frigid ecological vulnerable region of northern Tibetan plateau based on composite index method** [12552-101]

12552 0C **Investigation of manipulate solid waste management model based on GIS: case study of Ankang Shaanxi** [12552-92]

12552 0D **Impact of urbanization on extreme temperature events in Sichuan Province of China based on RS and GIS techniques** [12552-78]

12552 0E **Ecological vulnerability and its driving factors analysis based on GIS method in Nagqu, Tibet** [12552-79]

12552 0F **Early identification of geological hazards in Shandong areas using Sentinel-1A and SBAS-InSAR** [12552-42]

12552 0G **Spatial and temporal characteristics of vegetation information in Zhejiang Province using the Google Earth Engine** [12552-62]

12552 0H **Study on dynamic change of land usage in Hongta District based on Sentinel-2** [12552-40]

12552 0I **Assessment of ecosystems water yield services based on RS and GIS of new urban areas in Guanshanhu District, Guiyang, Guizhou Province, China** [12552-83]

12552 0J **Study on highway ecological environment evaluation based on GIS** [12552-27]

12552 0K **Spatial analysis of Haikou third-level first-class hospitals based on geographic information system** [12552-33]

12552 0L **Geographic information system based urban pocket park layout control study** [12552-115]

12552 0M **Study on vegetation cover change in the headwaters of three rivers based on remote sensing technology** [12552-84]

12552 0N **Application analysis of automatic extraction of open-pit stope variation information based on GF-1 in mine development** [12552-86]

12552 0O **An improved geographic modeling method to the vulnerability of the traditional village architectural landscape** [12552-51]

12552 0P **Water pollution environment information extraction based on Landsat images** [12552-13]

12552 0Q **Analysis on spatial distribution pattern and change characteristics of cultivated land in Yangzonghai basin in the past fifteen years** [12552-73]

12552 0R **Geoinformatics models show changes in ecological vulnerability in Yushu Tibetan Autonomous Prefecture** [12552-87]

12552 0S **Analysis of the impact of urban landscape ecological planning on haze based on GIS: a case study of Anshan city center** [12552-85]

12552 0T **Time series dynamic changing analysis on the mine geological environment in a natural reserve in Tibet based on the satellite remote sensing technology** [12552-94]

12552 0U **Performance analysis of BDS-2, BDS-3, and GPS in relative positioning through short, medium, and long baselines** [12552-120]

12552 0V **Spatial and temporal dynamic assessment of urban landscape ecological risk based on GIS and RS technology: the case of Xingtai City** [12552-53]

12552 0W **Comprehensive benefit analysis of geographic information monitoring and early warning system for disaster prevention and reduction in rural areas: simulation experiment based on system dynamics** [12552-21]

12552 0X **Research on multi-scale analysis methods of heat island and influencing factors in the core area of the capital** [12552-25]

12552 0Y **Pattern and characteristics of buildings distribution in Guangzhou's urban district based on the geographic information big data** [12552-16]

GEOGRAPHICAL MAPPING AND HYDROGRAPHIC SURVEYING TECHNOLOGY

12552 0Z **Analysis of prototype monitoring and safety limits for plain regulating reservoir during initial operation period** [12552-5]

12552 10 **Rainfall characteristics and trends in Wuhan over the past 60 years based on CMFD and actual measurement data** [12552-3]

12552 11 **GIS-based study on optimal allocation of mine water resources** [12552-4]

12552 12 **Research on slope monitoring of transmission towers integrating Beidou high-precision positioning technology** [12552-2]

12552 13 **Investigation and estimation on vegetation carbon storage and carbon density of subtropical evergreen broad-leaved forests in Jiangxi Province combined with remote sensing technology** [12552-6]

12552 14 **Stress and seismogenic faulting analysis of the earthquake of May 22, 2021 on Maduo, Qinghai studied through D-InSAR measurements** [12552-50]

12552 15 **Flooded cropland mapping based on GF-3 and Mapbox imagery using semantic segmentation: a case study of Typhoon Siamba in western Guangdong in July 2022** [12552-57]

12552 16 **Research on detection of tunnel peeling off blocks based on 3D laser scanning system** [12552-49]

12552 17 **Modeling and expression of parts' relationship of multi-granularity spatio-temporal object based on mereology logic** [12552-125]

12552 18 **Application of seismic comprehensive interpretation technology in coal seam thickness prediction** [12552-75]

12552 19 **A study on position error correction for remote sensing precipitation products from Fengyun-4 geostationary observations in extreme precipitation** [12552-44]

12552 1A **Estimating contribution of permafrost to lake expansion by SBAS-InSAR: a case study from Hohxil Lake basin in the Tibetan Plateau** [12552-146]

12552 1B **Deformation monitoring of viaduct in Hohhot based on Sentinel-1 data** [12552-43]

12552 1C **Studies on construction of real time kinematic inspection field based on geographic information and remote sensing technology** [12552-34]

12552 1D **Study on the coupling of public service facilities and population based on multi-source geographical data: Hongshan District, Wuhan City as an example** [12552-35]

12552 1E **Deformation prediction of mining slope based on grey correlation analysis and GA-BP model** [12552-106]

12552 1F **Quantitative evaluation of biodiversity maintenance function in Chuxiong based on GIS technology and NPP evaluation method** [12552-110]

12552 1G **Monitoring of land use change in Zhengzhou City based on Google Earth Engine** [12552-126]

12552 1H **The influence of traffic vibration on Great Wall deformation is monitored by accelerometer** [12552-82]

12552 1I **Analysis of the variation of gravity measurement results by excavation and filling around gravity measurement points** [12552-28]

12552 1J **Study on multi-source data integration and visualization technology of underwater inspection** [12552-147]

12552 1K **Multi-platform symbolize software development of aerogeophysical data** [12552-103]

12552 1L **Comparing different methods for biomass modeling over tropical region based on Landsat data** [12552-145]

12552 1M **Application of multiple geophysical prospecting methods and high precision survey in expressway construction** [12552-74]

12552 1N **Time-series surface deformation monitoring and analysis in mining area based on StaMPS technology** [12552-70]

12552 1O **Research on unsupervised lithology classification based on dimension reduction data: a case of Jimusar area of Xinjiang in China** [12552-66]

12552 1P **A single-axis rotation modulation strapdown gravity vector measurement method considering scale factor** [12552-8]

12552 1Q **Analysis of the emotional characteristics of people in earthquake-stricken areas based on social media data mining** [12552-136]

12552 1R **Performance evaluation of public open space recreational services based on GIS technology in Dongguan, China** [12552-93]

12552 1S **A research on urban road congestion detection based on YOLOv3** [12552-76]

12552 1T **Design of campus air environment detection system based on sensor** [12552-38]

Part Two

SATELLITE IMAGE AND REMOTE SENSING DATA ANALYSIS

12552 1U **Take Lake Mead to tackle the drought by remote sensing and two-layer current approximation model** [12552-9]

12552 1V **Inversion of land surface temperature by remote sensing technology: a case study of Shapingba District in Chongqing** [12552-114]

12552 1W **Inversion of chlorophyll concentration in Taihu Lake from HY-1C satellite images** [12552-123]

12552 1X **A buffer method for calculating the fractal dimension of map surface objects** [12552-56]

12552 1Y **Research on gravity potential field separation based on probabilistic imaging method** [12552-89]

12552 1Z **Research on the spatial characteristics of population distribution in the main urban area of Kunming based on geographic information system** [12552-130]

12552 20 **A clump tree instance segmentation based on PhenoCam imagery using MaskRCNN method** [12552-41]

12552 21 **Research on the dynamic overlay of remote sensing image in AutoCAD** [12552-99]

12552 22 **Research on panchromatic and multispectral image fusion methods based on component substitution** [12552-153]

12552 23 **Remote sensing images semantic segmentation method based on improved nested UNet** [12552-81]

12552 24 **Rice lodging disaster monitoring method based on multi-source remote sensing data** [12552-71]

12552 25 **3D digital geoscientific modeling and its significance of Julong'an uranium deposit** [12552-133]

12552 26 **Research on point cloud organization method based on KD tree** [12552-54]

12552 27 **Research on telemetry method of shallow sea front based on ray acoustics theory** [12552-59]

12552 28 **Extraction of individual tree heights using airborne LiDAR and optical images** [12552-119]

12552 29 **Topographic map registration method based on logistic regression** [12552-124]

12552 2A **A method of satellite image positioning based on refined RFM** [12552-24]

12552 2B **Buried object detection from GPR images using improved U-net** [12552-32]

12552 2C **Weakly supervised segmentation for plant disease using class activation maps and weak annotation labels** [12552-128]

12552 2D **Target detecting deep neural network countermeasure technology for space-based remote sensing and its application to mobile radar** [12552-129]

12552 2E **Study on drought monitoring method of Liaoning Province based on FY-3D satellite** [12552-67]

12552 2F **An advanced image registration method based on weighted nuclear norm minimization and SIFT** [12552-144]

12552 2G **Remote sensing monitoring and analysis of coastal infrastructures' water environment effects in the Guangdong-Hong Kong-Macao greater Bay Area** [12552-17]

12552 2H **A time-frequency filtering method against interrupted sampling repeater jamming based on histogram energy analysis** [12552-46]

12552 2I **Extraction of abandoned land in Zhaotong City based on Landsat8 remote sensing image** [12552-19]

12552 2J **Research on hot rolled steel strip defects image processing method based on multi-scale detection** [12552-52]

12552 2K **Seismic deformation analysis of Menyuan, Qinghai Province based on ascending and descending orbits D-InSAR technology** [12552-105]

12552 2L **Research on recognition method of the damage degree in earthquake severely stricken areas based on remote sensing images** [12552-98]

12552 2M **Design and implementation of situation map collaborative plotting system based on WebGIS** [12552-63]

12552 2N **Small ship detection based on YOLOX and modified Gaussian Wasserstein distance in SAR images** [12552-12]

12552 2O **A TOPSIS-based approach to evaluating remote sensing satellite mission planning schemes** [12552-37]

12552 2P **Rotated target classification of sonar images via classification after alignment** [12552-137]

INTELLIGENT REMOTE SENSING AND AUTOMATED NETWORK SYSTEM

12552 2Q **A scene information integrating network for object detection in remote sensing images** [12552-122]

12552 2R **Application of adaptive weight fusion algorithm to wetland classification in Yellow River Delta** [12552-131]

12552 2S **Study on application of GIS to network monitoring of pavement roughness** [12552-95]

12552 2T **MODIS aerosol optical thickness retrieval using deep belief network** [12552-60]

12552 2U **Optimization of 3D GIS model reconstruction algorithm based on laser point clouds** [12552-61]

12552 2V **Carbon emission risk prediction based on improved genetic algorithm** [12552-47]

12552 2W **An analysis of smartphone BDS/GPS network RTK positioning results** [12552-45]

12552 2X **Architectural style classification of the Chinese traditional settlements using deep learning** [12552-139]

12552 2Y **A slope-constraint PTD filtering algorithm for LiDAR point clouds** [12552-58]

12552 2Z **Object-oriented multi-feature ensemble classification of mangrove species using UAV imagery** [12552-30]

12552 30 **Multi-UAV collaborative trajectory planning for emergency response mapping based on PSO** [12552-48]

12552 31 **Modeling of cellular automata and its simulation of land use change in Nanning City based on artificial neural network** [12552-20]

12552 32 **Study on PM2.5 DNN-LSTM hybrid neural network prediction model considering climate factors** [12552-77]

12552 33 **Improved algorithm for adaptive fire detection using MODIS data** [12552-96]

12552 34 **Design of improved road sign recognition system based on deep learning** [12552-23]

12552 35 **Design and implementation of urban underground pipeline information system** [12552-14]

12552 36 **Vehicle tracking in satellite videos: improved SiamRPN++ incorporating bounding box constraint optimization and inertia mechanism** [12552-142]

12552 37 **Research on the development trend of shale fracturing technology and its impact on the environment** [12552-107]

12552 38 **Transformer-enhanced convolutional neural network with self-supervised learning for hyperspectral image classification** [12552-22]

12552 39 **Exploring the optimization of urban ecological spaces from a perspective of ecosystem service functions based on remote sensing imagery** [12552-135]

12552 3A **GIS-based mineral prospectivity mapping: a systematic study on machine learning at Hezuo-Meiwu District, Gansu Province** [12552-10]

12552 3B **Automatic simplification and merging algorithm of isobaths based on surface simplification** [12552-117]

12552 3C **Comparing the machine learning and empirical algorithms on remote sensing estimates water quality parameters of constructed wetland** [12552-138]

12552 3D **Application of UAV remote sensing in 3D modeling of ancient buildings and accuracy evaluation** [12552-140]

12552 3E **GNSS/accelerometer robust monitoring model for dynamic displacement of structures and buildings** [12552-15]

12552 3F **Assessment of spatial-temporal changes in ecological environment quality based on RSEI and GEE: a case study in a demonstration area in the Yangtze River Delta on ecologically friendly development** [12552-116]

12552 3G **Analysis of the influence of INS accuracy on chi-square deception detection algorithm** [12552-7]

12552 3H **Compilation and sharing of metadata of surveying and mapping geographic achievements based on intelligent contract technology** [12552-127]

12552 3I **Analysis of characteristics of air quality in Beijing-Tianjin-Hebei region based on remote sensing monitoring** [12552-11]
