

PROCEEDINGS OF SPIE

AOPC 2022: Optical Information and Networks

Gangxiang Shen
Yongli Zhao
Minming Zhang
Editors

18–19 December 2022
ONLINE, China

Sponsored by
Chinese Society for Optical Engineering (CSOE) (China)

Technical Sponsor
SPIE

Organized by
Tianjin University (China)
University of Electronic Science and Technology of China (China)
Nanjing University of Science and Technology (China)
Beijing Institute of Space Mechanics and Electricity (China)
Science and Technology on Low-light-level Night Vision Laboratory (China)
Science and Technology on Electro-Optical Information Security Control (China)

Volume 12562

Proceedings of SPIE 0277-786X, V. 12562

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2022: Optical Information and Networks*, edited by Gangxiang Shen, Yongli Zhao, Minming Zhang, Proc. of SPIE 12562, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

OPTICAL INFORMATION AND NETWORK

- 12562 02 **Multi-branch monitoring technology of PON based on OTDR** [12562-1]
- 12562 03 **Sensitivity calculation and measurement for fiber optic interferometric accelerometers**
[12562-2]
- 12562 05 **A low-power networked navigation method for underwater moving target supporting beacon autonomous switching** [12562-4]
- 12562 06 **PAPR mitigation based on superimposed training scheme in time-varying underwater acoustic OFDM communications** [12562-5]
- 12562 07 **Research on F5G network evolution** [12562-6]
- 12562 08 **Ultra-low loss and large effective area G.654.E fiber in non-relay ultra-long haul optical transmission** [12562-8]
- 12562 09 **Blood glucose concentration estimation by Raman spectroscopy based on particle swarm optimized SVR** [12562-10]
- 12562 0A **The recovery scheme of improved double random phase coding encryption-hidden images based on deep learning and chaos** [12562-11]
- 12562 0B **Design of bus controller based on FTB system** [12562-12]
- 12562 0C **Speckle-suppressed optical implementation for JTC-based image cryptosystem** [12562-13]
- 12562 0D **Highly sensitive suspended-core ultrasonic sensor based on cascaded fiber Bragg gratings**
[12562-14]
- 12562 0E **A liquid crystal-filled polarization-maintaining dispersion compensation microstructure fiber**
[12562-17]
