Volume 12644

Proceedings of SPIE 0277-786X, V. 12644

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Workshop on Frontiers of Graphics and Image Processing (FGIP 2022)*, edited by Shinan Lang, Xiaoyue Jiang, Elma Wong, Proc. of SPIE 12644, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committees*

SESSION 1 IMAGE ANALYSIS AND MULTIMEDIA TECHNOLOGY

- 12644 02 **Research on verification framework of image processing IP core based on real-time reconfiguration** [12644-5]
- 12644 03 **Performance optimization of target detection based on edge-to-cloud deep learning** [12644-1]
- 12644 04 **Fast image quantization with efficient color clustering** [12644-2]
- 12644 05 **A lightweight object grasping network using GhostNet** [12644-7]
- 12644 06 **RVFIT: Real-time Video Frame Interpolation Transformer** [12644-3]

SESSION 2 MACHINE VISION AND INTELLIGENT IMAGE PROCESSING

- 12644 07 **Offset correction scheme for human eye positioning in naked eye 3D for Android** [12644-11]
- 12644 08 **Measuring the fine-structure constant on quasar spectra: high spectral resolution gains more than large size of moderate spectral resolution spectra** [12644-12]
- 12644 09 **Application of digital pictures process technique in engineering surveying** [12644-6]
- 12644 0A **Design of parking lot vehicle entry system based on human image recognition analysis technology** [12644-10]
- 12644 0B **SARCUT: contrastive learning for optical-SAR image translation with self-attention and relativistic discrimination** [12644-4]
- 12644 0C **Development of mutual and intelligent water resources circulating utilization system based on image processing technology** [12644-9]
