2023 IEEE/ACM 45th International Conference on Software Engineering: Companion Proceedings (ICSE-Companion)

ICSE-Companion 2023

Table of Contents

Message from the ICSE 2023 General Chair ..... **xv**
ICSE Demonstrations Committees ..... **xix**
Doctoral Symposium Committees ..... **xx**
ICSE Posters Committees ..... **xxi**
Industry Forum Committees ..... **xxii**
ACM Student Research Competition (SRC) Committees ..... **xxiii**
Technical Briefings Committees ..... **xxiv**
Student Contest on Software Engineering (SCORE) Committees ..... **xxv**

Demonstrations

PCR-Chain: Partial Code Reuse Assisted by Hierarchical Chaining of Prompts on Frozen Copilot 1
Qing Huang (Jiangxi Normal University, China), Jiahui Zhu (Jiangxi Normal University, China), Zhilong Li (Jiangxi Normal University, China), Zhenchang Xing (CSIRO's Data 61 & Australian National University, Australia), Changjing Wang (Jiangxi Normal University, China), and Xiwei Xu (CSIRO's Data61, Australia)

JAttack: Java JIT Testing Using Template Programs 6
Zhiqiang Zang (The University of Texas at Austin, USA), Fu-Yao Yu (The University of Texas at Austin, USA), Nathan Wiatrek (The University of Texas at Austin, USA), Milos Gligoric (The University of Texas at Austin, USA), and August Shi (The University of Texas at Austin, USA)

ActionsRemaker: Reproducing GitHub Actions 11
Hao-Nan Zhu (University of California, Davis, USA), Kevin Z. Guan (University of California, Davis, USA), Robert M. Furth (University of California, Davis, USA), and Cindy Rubio-González (University of California, Davis, USA)

HOME: Heard-Of Based Formal Modeling and Verification Environment for Consensus Protocols .. 16
Shumao Zhai (Beihang University, China), Xiaozhou Li (Beihang University, China), and Ning Ge (Beihang University, China)

CoVeriTeam Service: Verification as a Service 21
Dirk Beyer (LMU Munich, Germany), Sudeep Kanav (LMU Munich, Germany), and Henrik Wachowitz (LMU Munich, Germany)

Proofster: Automated Formal Verification 26
Arpan Agrawal (University of Illinois, USA), Emily First (University of Massachusetts, USA), Zhanna Kaufman (University of Massachusetts, USA), Tom Reichel (University of Illinois, USA), Shizhuo Zhang (University of Illinois, USA), Timothy Zhou (University of Illinois, USA), Alex Sanchez-Stern (University of Massachusetts, USA), Talia Ringer (University of Illinois, USA), and Yuriy Brun (University of Massachusetts, USA)

Siguard: Detecting Signature-Related Vulnerabilities in Smart Contracts 31
Jiashuo Zhang (Peking University, China), Yue Li (Peking University, China), Jianbo Gao (Peking University, China), Zhi Guan (Peking University, China), and Zhong Chen (Peking University, China)

RM2DM: A Tool for Automatic Generation of OO Design Models from Requirements Models 36
Zhen Tian (Beihang University, China), Yilong Yang (Beihang University, China), and Sheng Cheng (Software Engineering and Digitalization Center of China Manned Space Engineering, China)

REXSTEPPER: a Reference Debugger for JavaScript Regular Expressions 41
Luís Almeida (Instituto Superior T´ecnico, Portugal), Miguel Gonzaga (Instituto Superior T´ecnico, Portugal), José Fragoso Santos (Instituto Superior T´ecnico; INESC-ID, Portugal), and Rui Abreu (FEUP;INESC-ID, Portugal)

iTrace-Toolkit: A Pipeline for Analyzing Eye-Tracking Data of Software Engineering Studies..... 46
Joshua Behler (Kent State University, USA), Praxis Weston (Kent State University, USA), Drew T. Guarnera (College of Wooster, USA), Bonita Sharif (University of Nebraska - Lincoln, USA), and Jonathan I. Maletic (Kent State University, USA)

SoapOperaTG: A Tool for System Knowledge Graph Based Soap Opera Test Generation 51
Yanqi Su (Australian National University, Australia), Zheming Han (Australian National University, Australia), Zhenchang Xing (Data61, CSIRO, Australia), Xiwei Xu (Data61, CSIRO, Australia), Liming Zhu (Data61, CSIRO, Australia), and Qinghua Lu (Data61, CSIRO, Australia)

GUI Testing to the Power of Parallel Q-Learning 55
Marco Mobilio (University of Milano-Bicocca, Italy), Diego Clerissi (University of Milano-Bicocca, Italy), Giovanni Denaro (University of Milano-Bicocca, Italy), and Leonardo Mariani (University of Milano-Bicocca, Italy)

A Multi-Faceted Vulnerability Searching Website Powered by Aspect-Level Vulnerability Knowledge Graph 60
Jiamou Sun (CSIRO, Australia), Zhenchang Xing (CSIRO; Australian National University, Australia), Qinghua Lu (CSIRO, Australia), Xiwei Xu (CSIRO, Australia), and Liming Zhu (CSIRO; University of New South Wales, Australia)

DeepJudge: A Testing Framework for Copyright Protection of Deep Learning Models 64
Jialuo Chen (Zhejiang University, China), Youcheng Sun (University of Manchester, UK), Jingyi Wang (Zhejiang University, China), Peng Cheng (Zhejiang University, China), and Xingjun Ma (Fudan University, China)

DeepCrime: from Real Faults to Mutation Testing Tool for Deep Learning 68
Nargiz Humbatova (Università della Svizzera italiana), Gunel Jahangirova (King's College London), and Paolo Tonella (Università della Svizzera italiana)

Cerberus: a Program Repair Framework 73
Ridwan Shariffdeen (National University of Singapore, Singapore), Martin Mirchev (National University of Singapore, Singapore), Yannic Noller (National University of Singapore, Singapore), and Abhik Roychoudhury (National University of Singapore, Singapore)

TSVD4J: Thread-Safety Violation Detection for Java 78
Shanto Rahman (The University of Texas at Austin, USA), Chengpeng Li (The University of Texas at Austin, USA), and August Shi (The University of Texas at Austin, USA)

AVGUST: A Tool for Generating Usage-Based Tests from Videos of App Executions 83
Saghar Talebipour (University of Southern California, USA), Hyojae Park (Sharon High School, USA), Kesina Baral (George Mason University, USA), Leon Yee (Valley Christian High School, USA), Safwat Ali Khan (George Mason University, USA), Kevin Moran (George Mason University, USA), Yuriy Brun (University of Massachusetts Amherst, USA), Nenad Medvidovic (University of Southern California, USA), and Yixue Zhao (University of Massachusetts Amherst, USA)

DeepLog: Deep-Learning-Based Log Recommendation 88
Yang Zhang (Hebei University of Science and Technology, China), Xiaosong Chang (Hebei University of Science and Technology, China), Lining Fang (Hebei University of Science and Technology, China), and Yifan Lu (Hebei University of Science and Technology, China)

ShellFusion: An Answer Generator for Shell Programming Tasks via Knowledge Fusion 93
Zhongqi Chen (Sun Yat-sen University, China), Neng Zhang (Sun Yat-sen University, China), Pengyue Si (Sun Yat-sen University, China), Qinde Chen (Sun Yat-sen University, China), Chao Liu (Chongqing University, China), and Zibin Zheng (Sun Yat-sen University, China)

AIREPAIR: A Repair Platform for Neural Networks 98
Xidan Song (University of Manchester, UK), Youcheng Sun (University of Manchester, UK), Mustafa A. Mustafa (University of Manchester, UK;KU Leuven, Belgium), and Lucas C. Cordeiro (University of Manchester, UK;Federal University of Amazonas, Brazil)

RIdiom: Automatically Refactoring Non-Idiomatic Python Code with Pythonic Idioms 102
Zejun Zhang (Australian National University, Australia), Zhenchang Xing (Data61, CSIRO, Australia; Australian National University, Australia), Liming Zhu (Data61, CSIRO, Australia), and Xiwei Xu (Data61, CSIRO, Australia)

Seldonian Toolkit: Building Software with Safe and Fair Machine Learning 107
Austin Hoag (Berkeley Existential Risk Initiative, USA), James E. Kostas (University of Massachusetts, USA), Bruno Castro da Silva (University of Massachusetts, USA), Philip S. Thomas (University of Massachusetts, USA), and Yuriy Brun (University of Massachusetts, USA)

What Would You do? An Ethical AI Quiz 112
Wei Teo (Monash University, Malaysia), Ze Teoh (Monash University, Malaysia), Dayang Abang Arabi (Monash University, Malaysia), Morad Aboushadi (Monash University, Malaysia), Khairenn Lai (Monash University, Malaysia), Zhe Ng (Monash University, Malaysia), Aastha Pant (Monash University, Australia), Rashina Hoda (Monash University, Australia), Chakkrit Tantithamthavorn (Monash University, Australia), and Burak Turhan (University of Oulu, Finland)

A Web-Based Tool for Using Storyboard of Android Apps 117
Yuxin Zhang (Tianjin University, China), Sen Chen (Tianjin University, China), and Lingling Fan (Nankai University, China)

InputGen: A Tool for Automatic Generation of Prototype Inputs to Support Rapid Requirements Validation 122
Shuanglong Chang (Northeast Petroleum University, China), Juntao Gao (Northeast Petroleum University, China), and Yilong Yang (Beihang University, China)

FlaPy: Mining Flaky Python Tests at Scale 127
Martin Gruber (University of Passau, Germany) and Gordon Fraser (University of Passau, Germany)

TECHSUMBOT: A Stack Overflow Answer Summarization Tool for Technical Query 132
Chengran Yang (Singapore Management University, Singapore), Bowen Xu (Singapore Management University, Singapore), Jiakun Liu (Singapore Management University, Singapore), and David Lo (Singapore Management University, Singapore)

Randomized Differential Testing of RDF Stores 136
Rui Yang (Institute of Software, Chinese Academy of Sciences;University of Chinese Academy of Sciences, China), Yingying Zheng (Institute of Software, Chinese Academy of Sciences;University of Chinese Academy of Sciences, China), Lei Tang (Institute of Software, Chinese Academy of Sciences;University of Chinese Academy of Sciences, China), Wensheng Dou (Institute of Software, Chinese Academy of Sciences;University of Chinese Academy of Sciences;University of Chinese Academy of Sciences Nanjing College;Nanjing Institute of Software Technology, China), Wei Wang (Institute of Software, Chinese Academy of Sciences;University of Chinese Academy of Sciences;University of Chinese Academy of Sciences Nanjing College;Nanjing Institute of Software Technology, China), and Jun Wei (Institute of Software, Chinese Academy of Sciences;University of Chinese Academy of Sciences;University of Chinese Academy of Sciences Nanjing College;Nanjing Institute of Software Technology, China)

CryptOpt: Automatic Optimization of Straightline Code 141
Joel Kuepper (University of Adelaide, Australia), David Wu (University of Adelaide, Australia), Andres Erbsen (Massachusetts Institute of Technology, USA), Jason Gross (Massachusetts Institute of Technology, USA), Owen Conoly (Massachusetts Institute of Technology, USA), Chuyue Sun (Stanford University, USA), Samuel Tian (Massachusetts Institute of Technology, USA), Adam Chlipala (Massachusetts Institute of Technology, USA), Chitchanok Chuengsatiansup (University of Melbourne, Australia), Daniel Genkin (Georgia Tech, USA), Markus Wagner (Monash University, Australia), and Yuval Yarom (University of Adelaide, Australia)

WirelessDT: A Digital Twin Platform for Real-Time Evaluation of Wireless Software Applications 146
Zhongzheng Lai (The University of Sydney, Australia), Dong Yuan (The University of Sydney, Australia), Huaming Chen (The University of Sydney, Australia), Yu Zhang (The University of Sydney, Australia), and Wei Bao (The University of Sydney, Australia)

MROS: A Framework for Robot Self-Adaptation 151
Gustavo Rezende Silva (Delft University of Technology, Netherlands), Darko Bozhinoski (University Libre du Bruxelles, Belgium), Mario Garzon Oviedo (Delft University of Technology, Netherlands), Mariano Ramírez Montero (Delft University of Technology, Netherlands), Nadia Hammoudeh Garcia (Fraunhofer Institute for Manufacturing Engineering and Automation IPA, Germany), Harshavardhan Deshpande (Fraunhofer Institute for Manufacturing Engineering and Automation IPA, Germany), Andrzej Wasowski (Computer Science Department IT University Conpenhagen, Denmark), and Carlos Hernandez Corbato (Delft University of Technology, Netherlands)

Task Context: A Tool for Predicting Code Context Models for Software Development Tasks 156
Yifeng Wang (Zhejiang University, China), Yuhang Lin (Zhejiang University, China), Zhiyuan Wan (Zhejiang University, China), and Xiaohu Yang (Zhejiang University, China)

pytest-Inline: An Inline Testing Tool for Python 161
Yu Liu (UT Austin, USA), Zachary Thurston (Cornell University, USA), Alan Han (Cornell University, USA), Pengyu Nie (UT Austin, USA), Milos Gligoric (UT Austin, USA), and Owolabi Legunsen (Cornell University, USA)

DaMAT: A Data-Driven Mutation Analysis Tool 165
Enrico Viganò (University of Luxembourg, Luxembourg), Oscar Cornejo (University of Luxembourg, Luxembourg), Fabrizio Pastore (University of Luxembourg, Luxembourg), and Lionel Briand (Univrsity of Luxembourg; University of Ottawa)

BURT: A Chatbot for Interactive Bug Reporting 170
Yang Song (William & Mary, USA), Junayed Mahmud (George Mason University, USA), Nadeeshan De Silva (William & Mary, USA), Ying Zhou (The University of Texas at Dallas, USA), Oscar Chaparro (William & Mary, USA), Kevin Moran (George Mason University, USA), Andrian Marcus (The University of Texas at Dallas, USA), and Denys Poshyvanyk (William & Mary, USA)

Patchmatch: A Tool for Locating Patches of Open Source Project Vulnerabilities 175
Kedi Shen (Hangzhou City University, China), Yun Zhang (Hangzhou City University, China), Lingfeng Bao (Zhejiang University, China), Zhiyuan Wan (Zhejiang University, China), Zhuorong Li (Hangzhou City University, China), and Minghui Wu (Hangzhou City University, China)

LicenseRec: Knowledge Based Open Source License Recommendation for OSS Projects 180
Weiwei Xu (Peking University;Ministry of Education, China), Xin Wu (Peking University;Ministry of Education, China), Runzhi He (Peking University;Ministry of Education, China), and Minghui Zhou (Peking University;Ministry of Education, China)

Doctoral Symposium

Detecting Scattered and Tangled Quality Concerns in Source Code to Aid Maintenance and Evolution Tasks 184
Rrezarta Krasniqi (University of North Texas, USA)

Complementing Secure Code Review with Automated Program Analysis 189
Wachiraphan Charoenwet (University of Melbourne)

Automating Code Review 192
Rosalia Tufano (Università della Svizzera italiana (USI), Switzerland)

Static Analysis for Android GDPR Compliance Assurance 197
Mugdha Khedkar (Heinz Nixdorf Institute, Paderborn University, Germany)

Incident Prevention Through Reliable Changes Deployment 200
Eileen Kapel (ING Bank, The Netherlands)

Addressing Performance Regressions in DevOps: Can We Escape from System Performance Testing? 203
Lizhi Liao (Concordia University, Canada)

Toward More Effective Deep Learning-Based Automated Software Vulnerability Prediction, Classification, and Repair 208
Michael Fu (Monash University, Australia)

Enhancing Deep Reinforcement Learning with Executable Specifications 213
Raz Yerushalmi (The Weizmann Institute of Science, Israel)

Boosting Symbolic Execution for Heap-Based Vulnerability Detection and Exploit Generation 218
Haoxin Tu (Singapore Management University, Singapore)

Automating Code Generation for MDE Using Machine Learning 221
Qiaomu Xue (King's College London, UK)

Towards Automated Embedded Systems Programming 224
Imam Nur Bani Yusuf (Singapore Management University)

Assessing Cognitive Load in Software Development with Wearable Sensors 227
Fabian Stolp (University of Potsdam, Germany)

Towards Strengthening Software Library Interfaces with Granular and Interactive Type Migrations 230
Richárd Szalay (Eötvös Loránd University, Hungary)

Designing Adaptive Developer-Chatbot Interactions: Context Integration, Experimental Studies, and Levels of Automation 235
Glaucia Melo (University of Waterloo, Canada)

Towards Machine Learning Guided by Best Practices 240
Anamaria Mojica-Hanke (University of Passau, Germany;Universidad de los Andes, Colombia)

Learning Program Models from Generated Inputs 245
Tural Mammadov (CISPA Helmholtz Center for Information Security; Saarland University, Germany)

Learning Test Input Constraints from Branch Conditions 248
Leon Bettscheider (CISPA Helmholtz Center for Information Security, Germany)

Software Supply Chain Risk Assessment Framework 251
Nusrat Zahan (North Carolina State University, USA)

A Framework to Communicate Software Engineering Data Effectively with Dashboards 256
Alessandra Maciel Paz Milani (University of Victoria, Canada)

Some Investigations of Machine Learning Models for Software Defects 259
Umamaheswara Sharma Bhutamapuram (National Institute of Technology Warangal, India)

Evolutionary Computation and Reinforcement Learning for Cyber-Physical System Design 264
Chengjie Lu (Simula Research Laboratory, Norway)

Grammar-Based String Refinement Types 267
Fengmin Zhu (CISPA Helmholtz Center for Information Security, Germany)

Evaluation of Stakeholder Mapping and Personas for Sustainable Software Development 270
Bimpe Ayoola (Dalhousie University, Canada)

Improving Automatic C-to-Rust Translation with Static Analysis 273
Jaemin Hong (KAIST, South Korea)

Towards an AI-Centric Requirements Engineering Framework for Trustworthy AI 278
Krishna Ronanki (University of Gothenburg, Sweden)

Cost-Effective Strategies for Building Energy Efficient Mobile Applications 281
Abdul Ali Bangash (University of Alberta, Canada)

Towards Utilizing Natural Language Processing Techniques to Assist in Software Engineering Tasks 286
Zishuo Ding (Concordia University, Canada)

Graph Solver as a Service 291
Fozail Ahmad (McGill University, Canada)

ACM Student Research Competition

Toward Automated Tools to Support Ethical GUI Design 294
S M Hasan Mansur (George Mason University, USA)

Domain Specific Languages for Optimisation Modelling 299
Sameela Suharshani Wijesundara (Monash University, Australia)

From Input to Failure: Explaining Program Behavior via Cause-Effect Chains 302
Marius Smytzek (CISPA Helmholtz Center for Information Security, Germany)

The Distribution and Disengagement of Women Contributors in Open-Source: 2008-2021 305
Zihe H Zhao (Rice University, USA)

Path Complexity of Recursive Functions 308
Eli Pregerson (Harvey Mudd College, USA)

Skill Recommendation for New Contributors in Open-Source Software 311
Fabio Santos (Northern Arizona University, USA)

AIGROW: A Feedback-Driven Test Generation Framework for Hardware Model Checkers 314
Wenjing Deng (East China Normal University, China)

Test Scenario Generation for Autonomous Driving Systems with Reinforcement Learning 317
Chengjie Lu (Simula Research Laboratory, Norway)

Posters

GLAD: Neural Predicate Synthesis to Repair Omission Faults 320
Sungmin Kang (KAIST) and Shin Yoo (KAIST)

Poster: Distribution-aware Fairness Test Generation 322
Sai Sathiesh Rajan (SUTD, Singapore), Ezekiel Soremekun (RHUL, UK;University of Luxembourg, Luxembourg), Sudipta Chattopadhyay (Singapore University of Technology and Design), and Yves Le Traon (SnT, University of Luxembourg)

Don't Complete It! Preventing Unhelpful Code Completion for Productive and Sustainable Neural Code Completion Systems 324
Zhensu Sun (ShanghaiTech University, China), Xiaoning Du (Monash University, Australia), Fu Song (ShanghaiTech University, China), Shangwen Wang (National University of Defense Technology, China), Mingze Ni (University of Technology Sydney, Australia), and Li Li (Monash University, Australia)

Closing the Loop for Software Remodularisation - REARRANGE: An Effort Estimation Approach for Software Clustering-Based Remodularisation 326
Alvin Jian Jia Tan (Monash University Malaysia, Malaysia), Chun Yong Chong (Monash University Malaysia, Malaysia), and Aldeida Aleti (Monash University, Australia)

Revisiting Information Retrieval and Deep Learning Approaches for Code Summarization 328
Tingwei Zhu (Nanjing University, China), Zhong Li (Nanjing University, China), Minxue Pan (Nanjing University, China), Chaoxuan Shi (Nanjing University, China), Tian Zhang (Nanjing University, China), Yu Pei (The Hong Kong Polytechnic University, China), and Xuandong Li (Nanjing University, China)

A Control-Theoretic Approach to Auto-Tuning Dynamic Analysis for Distributed Services 330
Chandan Dhal (Washington State University, USA), Xiaoqin Fu (Washington State University, USA), and Haipeng Cai (Washington State University, USA)

Technical Briefings

Quantum Software Testing: A Brief Introduction 332
Shaukat Ali (Simula Research Laboratory, Norway) and Tao Yue (Simula Research Laboratory, Norway)

DevCertOps: Strategies to Realize Continuous Delivery of Safe Software in Regulated Domain..... 334
Marc Zeller (Siemens AG, Germany)

SAIN: A Community-Wide Software Architecture INfrastructure 336
Joshua Garcia (University of California), Mehdi Mirakhorli (Rochester Institute of Technology), Lu Xiao (Stevens Institute of Technology), Sam Malek (University of California), Rick Kazman (University of Hawaii), Yuanfang Cai (Drexel University), and Nenad Medvidovic (University of Southern California)

Methodology and Guidelines for Evaluating Multi-objective Search-Based Software Engineering 338
Miqing Li (University of Birmingham, United Kingdom) and Tao Chen (Loughborough University, United Kingdom)

Conducting Eye Tracking Studies in Software Engineering - Methodology and Pipeline 340
Bonita Sharif (University of Nebraska - Lincoln, USA), Andrew Begel (Carnegie Mellon University, USA), and Jonathan I. Maletic (Kent State University, USA)

The Landscape of Source Code Representation Learning in AI-Driven Software Engineering Tasks 342
Sridhar Chimalakonda (Indian Institute of Technology Tirupati, India), Debeshee Das (Indian Institute of Technology Tirupati, India), Alex Mathai (IBM India Research Lab, India), Srikanth Tamilselvam (IBM India Research Lab, India), and Atul Kumar (IBM India Research Lab, India)

Technical Briefing on Socio-Technical Grounded Theory for Qualitative Data Analysis 344
Rashina Hoda (Monash University, Australia)

Industry Forum

Personalized Action Suggestions in Low-Code Automation Platforms 346
Saksham Gupta (Microsoft, India), Gust Verbruggen (Microsoft, Belgium), Mukul Singh (Microsoft, India), Sumit Gulwani (Microsoft, USA), and Vu Le (Microsoft, USA)

Automated Feature Document Review via Interpretable Deep Learning 351
Ming Ye (ZTE Coporation, China), Yuanfan Chen (ZTE Coporation, China), Xin Zhang (Peking University, China), Jinning He (ZTE Coporation, China), Jicheng Cao (ZTE Coporation, China), Dong Liu (ZTE Coporation, China), Jing Gao (ZTE Coporation, China), Hailiang Dai (ZTE Coporation, China), and Shengyu Cheng (ZTE Coporation, China)

Challenges of Testing an Evolving Cancer Registration Support System in Practice 355
Christoph Laaber (Simula Research Laboratory, Norway), Tao Yue (Simula Research Laboratory, Norway), Shaukat Ali (Simula Research Laboratory, Norway), Thomas Schwitalla (Cancer Registry of Norway, Norway), and Jan F. Nygård (Cancer Registry of Norway;UiT The Arctic University of Norway, Norway)

Towards Formal Repair and Verification of Industry-Scale Deep Neural Networks 360
Satoshi Munakata (Fujitsu, Japan), Susumu Tokumoto (Fujitsu, Japan), Koji Yamamoto (Fujitsu, Japan), and Kazuki Munakata (Fujitsu, Japan)

Can we Knapsack Software Defect Prediction? Nokia 5G Case 365
Szymon Stradowski (Nokia, Poland) and Lech Madeyski (Wrocław University of Science and Technology, Poland)

Enhancing Maritime Data Standardization and Integrity Using Docker and Blockchain 370
Shuai Wang (DNV AS, Norway), Nikita Karandikar (DNV AS, Norway), Knut Erik Knutsen (DNV AS), Xiao Gang Tony Tong (DNV Global, Singapore), Tom Edseth (DNV AS, Norway), and Zile Zealo Xu (DNV Global, China)

Prioritizing Industrial Security Findings in Agile Software Development Projects 375
Markus Voggenreiter (LMU Munich, Germany) and Ulrich Schöpp (fortiss GmbH, Germany)

UnitTestBot: Automated Unit Test Generation for C Code in Integrated Development Environments 380
Dmitry Ivanov (Huawei), Alexey Babushkin (n/a), Saveliy Grigoryev (Huawei), Pavel Iatchenii (n/a), Vladislav Kalugin (Huawei), Egor Kichin (Huawei), Egor Kulikov (Huawei), Aleksandr Misonizhnik (Huawei), Dmitry Mordvinov (Huawei), Sergey Morozov (Huawei), Olga Naumenko (Huawei), Alexey Pleshakov (n/a), Pavel Ponomarev (n/a), Svetlana Shmidt (Huawei), Alexey Utkin (n/a), Vadim Volodin (n/a), and Arseniy Volynets (n/a)

Challenges of Evolving Legacy Software in a Small Team 385
Bowie Owens (CSIRO, Australia), Geoffrey Lee (CSIRO, Australia), Zili Zhu (CSIRO, Australia), and Thomas Lo (CSIRO, Australia)

Author Index **389**
