**Volume 12494**

Proceedings of SPIE 0277-786X, V. 12494

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical and EUV Nanolithography XXXVI*, edited by Anna Lio, Proc. of SPIE 12494, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510660953

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## OPENING REMARKS AND KEYNOTES

---

12494 02 **Memory technology: process and cell architecture (Keynote Paper)** [12494-1]

---

## EUVL STOCHASTICS: JOINT SESSION WITH 12494 AND 12498

---

12494 03 **Distribution of defective sub-cluster formation probability for stochastic hotspot prediction**  
[12494-3]

12494 04 **Chemical approach to make the most of EUVL: stochastic effect mitigation with developer  
and rinse** [12494-4]

---

## EUV PRESENT AND FUTURE OUTLOOK

---

12494 05 **Hyper-NA EUV lithography: an imaging perspective (2023 ASML-Cymer Leadership for Best  
Student Paper Award)** [12494-7]

12494 06 **0.33 NA EUV systems for high volume manufacturing** [12494-9]

---

## MASK

---

12494 07 **Actinic inspection of the EUV optical parameters of lithographic materials with lab-based  
radiometry and reflectometry** [12494-62]

12494 08 **Mask roughness contribution to wafer edge placement error** [12494-12]

12494 09 **EUV refractive index measurements with improved accuracy and their impact in component  
modeling** [12494-13]

---

## OPTICAL AND EUV LITHOGRAPHY

---

12494 0A **Expected performance of digital scanner and the potential application for advanced  
semiconductor fabrication** [12494-16]

- 12494 0B **A holistic approach to model-based stochastic-aware computational lithography** [12494-18]
- 12494 0C **Physical dose modeling and throughput optimization in EUV computational lithography** [12494-19]

---

#### PELLICLES AND ADVANCED MASKS

---

- 12494 0D **EUV pellicle scanner integration for N2 nodes and beyond** [12494-21]
- 12494 0E **CNT pellicles: recent optimization and exposure results (Invited Paper)** [12494-20]
- 12494 0F **Absorber material deficiency impact on a stochastically patterned wafer analyzed with a clustered model** [12494-22]
- 12494 0G **Effect of particle defect to extreme ultra-violet pellicle** [12494-23]
- 12494 0H **Modeling and verification of next-gen EUV mask absorbers** [12494-24]

---

#### COMPUTATIONAL LITHOGRAPHY: JOINT SESSION WITH 12495 AND 12494

---

- 12494 0I **EUV single patterning validation of curvilinear routing** [12494-25]
- 12494 0J **Compact modeling of stochastics and application in OPC** [12494-26]
- 12494 0K **Binary solution for optimization of pixelated EUV source using constrained mathematical programming** [12494-27]

---

#### EUV IMAGING

---

- 12494 0L **Improved methodology for prediction of merged contact hole defect process window** [12494-28]
- 12494 0M **Feasibility of logic metal scaling with 0.55NA EUV single patterning** [12494-29]
- 12494 0N **Experimental local MEEF study using programmed mask variability on hexagonal pitch 40 nm contact hole arrays** [12494-30]
- 12494 0O **Depth of focus in high-NA EUV lithography: the role of assist features and their variability budget** [12494-31]
- 12494 0P **Defining Tatian-Zernike polynomials for use in a lithography simulator** [12494-32]

---

## OVERLAY AND STITCHING

---

- 12494 OQ **Overview of stitching for high NA: imaging and overlay experimental and simulation results (Invited Paper)** [12494-33]
- 12494 OR **Supporting future DRAM overlay and EPE roadmaps with the NXT:2100i** [12494-34]
- 12494 OS **Impact of high-NA half-field to full-field overlay performance by Monte Carlo simulations** [12494-35]

---

## PATTERNING

---

- 12494 OT **Speculation on the EUV photoresist behavior at different dose and pitch** [12494-37]
- 12494 OU **EUV sub-resolution assist feature impact: experimental and simulation evaluation** [12494-38]
- 12494 OV **An investigation on the process control for the solid application of EUV MOR (Invited Paper)** [12494-39]
- 12494 OW **Process optimization for next generation high-NA EUV patterning by computational lithography techniques** [12494-40]

---

## EUV INTEGRATION: JOINT SESSION WITH 12494 AND 12499

---

- 12494 OX **EUV single patterning of random logic via using bright field mask** [12494-41]
- 12494 OY **Improvement of CD uniformity using a new selective exposure focusing method** [12494-42]

---

## LIGHT SOURCES

---

- 12494 OZ **EUV light source for high-NA and low-NA lithography** [12494-43]

---

## POSTER SESSION

---

- 12494 10 **Mask absorber/tone and process impact on resist line-edge-roughness** [12494-49]
- 12494 11 **Development progress of key components for LPP-EUV light sources** [12494-51]
- 12494 12 **Robust and automated methodology for scanner matching using contour-based analysis** [12494-52]

- 12494 13 **Frequency doubling and phase error tolerance exploration for chrome-less phase shift mask** [12494-56]
- 12494 14 **BEOL N2: M2 through SxP process from MP21 to MP26: 193i SAQP vs EUV SADP** [12494-57]
- 12494 15 **Development of novel focus spot detection methods for high-volume manufacturing** [12494-58]
- 12494 16 **Focus spot monitoring: design of an automatable detection, classification, and impact analysis pipeline** [12494-59]
- 12494 17 **EUV SRAFs printing modeling and verification in 2D hole array** [12494-61]
- 12494 18 **Kinetic simulations of plasma dynamics in the EUV sources** [12494-63]
- 12494 19 **Importance sampling in Gaussian random field EUV stochastic model for quantification of stochastic variability of EUV vias** [12494-67]
- 12494 1A **Surface treatment to reduce process defects** [12494-73]
- 12494 1B **Tin fluid dynamics driven by laser-produced plasmas relevant to EUV nanolithography** [12494-50]
- 12494 1C **Impact of mask rule constraints on ideal SRAF placement** [12494-54]
- 12494 1D **Plasma enhanced CO<sub>2</sub> recombination in EUV drive lasers** [12494-72]
- 12494 1E **Modelling of patterning impact from diffraction hot spots in high-NA EUV lenses** [12494-68]
- 12494 1F **Scattering cross sections of tin ions with molecular hydrogen** [12494-74]
- 12494 1G **Hydrogen recycling for EUV** [12494-76]

#### **DIGITAL POSTER SESSION**

---

- 12494 1H **Comprehensive investigation on improvement of local CDU for sub-20nm DRAM devices** [12494-48]
