**Volume 12518**

Proceedings of SPIE 0277-786X, V. 12518

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Window and Dome Technologies and Materials XVII*, edited by W. Howard Poisl, Proc. of SPIE 12518, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## CHALCOGENIDE MATERIALS AND PROCESSING

---

- 12518 02 **Photothermally-realized chalcogenide bulk GRIN media** [12518-2]
- 12518 03 **Expanding the transmission window of visible-MWIR chalcogenide glasses by silicon nitride doping** [12518-3]
- 12518 04 **Luminescent Fe:ZnSe doped As-S-Se optical composites for the mid-infrared** [12518-4]
- 12518 05 **Determining off-stoichiometry within calcium lanthanum sulfide ceramics using Raman spectroscopy** [12518-5]
- 12518 06 **Solute strengthening of multispectral ZnS windows by vapor transport of Ga<sub>2</sub>S<sub>3</sub>** [12518-6]

---

## PROCESSING OF WINDOW AND DOME MATERIALS

---

- 12518 07 **Successful freeform and conformal window manufacturing** [12518-7]
- 12518 08 **IR transparent Y<sub>2</sub>O<sub>3</sub>-MgO nanocomposite ceramic processed by sol-gel synthesis and two-step SPS sintering** [12518-8]

---

## OPTICAL CERAMIC PROPERTIES

---

- 12518 09 **Recent developments in ALON and spinel transparencies at Surmet** [12518-15]
- 12518 0A **Improved strength scaling for large ALON windows** [12518-16]

---

## LASER MATERIALS

---

- 12518 0B **Industry wide uncertainties in measuring key optical characteristics of HE laser components** [12518-17]

DIGITAL POSTER SESSION

---

12518 0C      **Frequency selective diffractive optical element (FSDOE)** [12518-19]
