Volume 12527

Proceedings of SPIE 0277-786X, V. 12527

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Pattern Recognition and Tracking XXXIV*, edited by Mohammad S. Alam, Vijayan K. Asari, Proc. of SPIE 12527, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510661684
ISBN: 9781510661691 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

DEEP LEARNING

12527 02 **U-PEN++: redesigning U-PEN architecture with multi-head attention for retinal image segmentation (Invited Paper)** [12527-1]

12527 03 **Development of GUI-based deep learning and image processing system for legume nodule segmentation and classification** [12527-2]

12527 04 **Learning disentangled representation of video for pallet decomposition in industrial warehouses** [12527-3]

12527 05 **Multi-class plant type detection in Great Lakes region using remotely operated vehicle and deep learning** [12527-4]

BIOMETRIC RECOGNITION

12527 06 **Residues in succession recurrent U-Net for segmentation of retinal blood vessels** [12527-5]

12527 07 **Blink detection for off-angle iris images using deep learning** [12527-6]

12527 08 **Face recognition and access control applications of the generative classifier pix2pix** [12527-7]

DATA FUSION

12527 09 **A fusion Siamese-ResNet network applied for low shot object detection in warehouses** [12527-9]

12527 0A **The relationship between social media use and Covid vaccine hesitancy in African American communities in Mobile: pilot study** [12527-10]

12527 0B **Deep learning-based long-distance optical UAV detection: color versus grayscale** [12527-11]

12527 0C **Generative classifier pix2pix** [12527-12]

12527 0D **Classroom engagement evaluation using 360-degree view of the camera with deep learning techniques** [12527-13]

12527 0E **Detecting heart diseases through machine learning** [12527-30]

12527 0F **Shipboard tank corrosion segmentation via deep learning** [12527-34]

DETECTION AND TRACKING

12527 0G **Detecting residuals at plastic samples to optimize laser cutting processes (Invited Paper)** [12527-14]

12527 0H **Fine-grained classification of skin cancer types using deep neural networks on medical images** [12527-15]

12527 0I **Multi-class semantic segmentation of wildfire fuel models in Sentinel-2 imagery using R2U-Net** [12527-16]

12527 0J **Adaptive critic network for person tracking using 3D skeleton data** [12527-17]

12527 0K **Expandable SPAD-based real-time gun muzzle flash localization system using FPGAs and deep learning** [12527-29]

IMAGE QUALITY

12527 0M **Image quality and object detection performance of convolutional neural networks** [12527-19]

12527 0O **Automatic detection of a structural chromosomal abnormality: the del(5q) deletion** [12527-21]

NEURAL NETWORK

12527 0P **Deep neural networks for evaluation of specular microscopy images of the corneal endothelium with Fuchs' dystrophy** [12527-23]

12527 0Q **Gtnet: guided transformer network for detecting human-object interactions** [12527-24]

12527 0R **R2UNet for melt pond detection** [12527-25]

POSTER SESSION

12527 0S **MSAGNet: crowd counting network based on multi-scale attention grading** [12527-26]

12527 0T **Makeup transfer based on Laplacian pyramid network** [12527-27]

12527 0U **Real-time crowd counting via mobile-friendly Vision Transformer network** [12527-28]

12527 0V **Leveraging motion saliency via frame differencing for enhanced object detection in videos** [12527-35]
