Volume 12528

Proceedings of SPIE 0277-786X, V. 12528

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Real-Time Image Processing and Deep Learning 2023*, edited by Nasser Kehtarnavaz, Mukul V. Shirvaikar, Proc. of SPIE 12528, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

REAL-TIME DEEP LEARNING I

12528 02 **Quasi real-time autonomous satellite detection and orbit estimation** [12528-1]

12528 03 **LCIP: a retargetable framework for optimized CNN inference** [12528-2]

REAL-TIME METHODS AND ALGORITHMS I

12528 04 **A real-time algorithm for human action recognition in RGB and thermal video** [12528-4]

12528 05 **Facial feature tracking method using a hybrid model of the Kalman filter and the sliding innovation filter** [12528-7]

REAL-TIME METHODS AND ALGORITHMS II

12528 06 **Estimation of road surface quality using real-time video analysis** [12528-9]

12528 07 **Real-time image analysis in IoT-based home security system** [12528-10]

12528 08 **Plume motion characterization in UAV aerial video and imagery** [12528-11]

REAL-TIME DEEP LEARNING II

12528 09 **Real-time generation of realistic defective wafer maps via deep learning network of CycleGAN** [12528-12]

12528 0A **Evolution of hardware-aware neural architecture search (NAS) on the edge** [12528-16]

12528 0B **Real-time waste segregation at the individual level: the smart waste sorter** [12528-28]

DIGITAL POSTER SESSION

- 12528 OC **Face mask detection using machine learning** [12528-22]
- 12528 OD **Algorithm for determining the boundary contours of plasma discharges in the formation of surface of memristor structures** [12528-20]
- 12528 OE **Real-time robotic hand control using human gesture recognition** [12528-18]
- 12528 OF **Formation of an algorithm for determining the degree of human involvement based on the analysis of the movement of the pupils of the operator and data on the position of the head and body** [12528-19]
