

PROCEEDINGS OF SPIE

Laser Radar Technology and Applications XXVIII

Gary W. Kamerman
Lori A. Magruder
Monte D. Turner
Editors

3–4 May 2023
Orlando, Florida, United States

Sponsored and Published by
SPIE

Volume 12537

Proceedings of SPIE 0277-786X, V. 12537

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Radar Technology and Applications XXVIII*, edited by Gary W. Kamerman, Lori A. Magruder, Monte D. Turner, Proc. of SPIE 12537, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

3D LIDAR SYSTEMS

- 12537 02 **Lidar tomography for remote sensing** [12537-3]
- 12537 03 **Analysis of time-correlated halos in scattering media for enhanced three-dimensional imaging** [12537-4]
- 12537 04 **Classification of cavities by time-correlated multi-bounce photon counting** [12537-5]
- 12537 05 **Using rapidly tunable photon orbital angular momentum to identify optical channels for remote sensing applications** [12537-17]

CALIBRATION, VALIDATION, AND ACCURACY

- 12537 06 **Trajectory estimation with GNSS, IMU, and LiDAR for terrestrial/kinematic laser scanning** [12537-8]

ATMOSPHERIC PROPAGATION AND SENSING

- 12537 08 **Polarization study in Newtonian telescope components for depolarization parameter correction in atmospheric LiDAR** [12537-10]
- 12537 09 **Optical turbulence correction in the elastic LIDAR equation** [12537-11]
- 12537 0A **Laser particle sizer for lunar plume-surface interaction studies** [12537-12]

LIDAR COMPONENTS

- 12537 0B **Risley prisms for broadband optical beam steering** [12537-13]
- 12537 0C **Non-mechanical beam steering for large field of regard global shutter flash Lidar** [12537-15]
- 12537 0D **Semiconductor optical amplifier array for coherent FMCW LiDAR in autonomous vehicles** [12537-16]

LIDAR COMPONENTS, DATA ACCESS, AND VISUALIZATION

- 12537 OE **PhoREAL: increasing spatial and temporal data accessibility of ICESat-2 through open-source Python repository** [12537-18]
- 12537 OF **A simple point cloud file format and open-source implementation for geospatial analysis and software development** [12537-19]
