Volume 12569

Proceedings of SPIE 0277-786X, V. 12569

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Nonlinear Optics and Applications XIII*, edited by Mario Bertolotti, Anatoly V. Zayats, Alexei M. Zheltikov, Proc. of SPIE 12569, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NONLINEAR OPTICAL IMAGING

- 12569 02 **Infrared upconversion imaging with a spatially shaped pump** [12569-2]
- 12569 03 **Digital harmonic holographic microscope for the study of nanostructures in nonlinear regime (Best Student Paper Award)** [12569-3]
- 12569 04 **Characterization of interface charge traps in PE-TEOS and HDP oxide with different annealing temperatures using time-dependent second-harmonic generation** [12569-5]

ULTRAFAST NONLINEAR OPTICS I

- 12569 05 **Non-degenerate magneto-optical pump-probe spectroscopy of thermal and nonthermal spin dynamics in magnetic and magnetoplasmonic materials with sub-15 fs time resolution** [12569-7]

ULTRAFAST NONLINEAR OPTICS II

- 12569 06 **Seeded optical parametric generator based on OP-GaAs for mid-wave and long-wave infrared beam generation** [12569-12]
- 12569 07 **Characterization of self-pulsing in active silicon ring resonators** [12569-13]

NONLINEAR NANO-OPTICS

- 12569 08 **Transfer function analysis of Si-photonics based add-drop micro-ring resonator for high-speed applications** [12569-17]

NOVEL NONLINEAR MATERIALS, PLASMONIC STRUCTURES

- 12569 09 **Broadband polarization chaos in optically pumped QD spin-VCSELs under optical injection for ultrafast random bit generation** [12569-20]
- 12569 0A **Design of a buried grating structure for the optimization of surface plasmon polariton wave excitation at the lower interface of a metallic nanostrip** [12569-21]

12569 OB **Enhanced third-order nonlinear optical response of gold@carbon (Au@C) core-shell due to Tamm-plasmon cavity** [12569-23]

NONLINEAR OPTICAL DEVICES

12569 OC **Whispering gallery mode resonator surface functionalization for active applications** [12569-25]

POSTER SESSION

12569 OD **A new ultrasensitive nonlinear magneto-optical Voigt device operating in the blue spectral region** [12569-29]

12569 OE **Comparative study of high repetition rate supercontinuum generation in undoped sapphire, YAG, and KGW crystals** [12569-30]

12569 OF **Advanced techniques to improving the transmission capacity of passive optical networks** [12569-31]

12569 OG **Modulation instability of surface plasmon polaritons in graphene double-layer structure** [12569-34]

12569 OH **Fine tuning of the repetition rate and stabilization of harmonically mode-locked fiber laser with CW component in the spectrum** [12569-35]

12569 OI **Brillouin-like effects in rare-earth-doped bi-directional optical fiber amplifiers** [12569-36]
