Volume 12570

Proceedings of SPIE 0277-786X, V. 12570

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum Optics and Photon Counting 2023*, edited by Ivan Prochazka, Roman Sobolewski, Proc. of SPIE 12570, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

QUANTUM OPTICS

12570 02 **Quantum optics with time-frequency degrees of freedom of single photons** [12570-3]

SOLID STATE PHOTON COUNTING AND ITS APPLICATIONS I

12570 03 **National infrastructure for dissemination of precise time and ultra-stable optical frequency also aiming to connect quantum sources: CITAF (Invited Paper)** [12570-5]

12570 04 **Optimisation of control circuit of single photon detector for space projects (Best Student Paper Award)** [12570-6]

12570 05 **Preparing the deployment of quantum key distribution over a classical network infrastructure in Prague** [12570-7]

SOLID STATE PHOTON COUNTING AND ITS APPLICATIONS II

12570 06 **Satellite range finding by photon counting against optical time ruler** [12570-9]

12570 07 **Multimode fiber influence on single-photon avalanche diode timing jitter** [12570-10]

SOLID STATE PHOTON COUNTING AND ITS APPLICATIONS III

12570 08 **Investigation of NbRe for superconducting microstrips single photon detectors (Invited Paper)** [12570-13]

12570 09 **Photon counting carbon dioxide gas sensing at 2.05 μ m wavelength (Invited Paper)** [12570-14]

12570 0A **Investigating the impact of fast count rates on timing jitter in SNSPDs** [12570-15]

12570 0B **Design of integrated SSPD-SFQ two-photon coincidence correlator** [12570-16]

X-RAY AND OTHER PHOTON DETECTION CONCEPTS

- 12570 OC **Picosecond (Cd,Mg)Te detectors for both optical and x-ray photons (Invited Paper)** [12570-18]
- 12570 OD **Hybrid photonic-plasmonic microcavity for enhancing light-matter interaction** [12570-20]
- 12570 OE **Characterizing background photons and dark counts in real field TF-QKD setup** [12570-21]

OTHER PHOTON DETECTION CONCEPTS

- 12570 OF **The contribution of edge number on the optical properties in ZnO pyramidal quantum dots** [12570-23]
- 12570 OG **Fast thermoelectric photodetector for UV radiation** [12570-24]

POSTER SESSION

- 12570 OH **Single photon detection with silicon-based avalanche photodiode** [12570-26]
- 12570 OI **Intraband absorption of GaAs cylindrical quantum dot with Kratzer confinement potential in the presence of external electric and magnetic fields** [12570-27]
- 12570 OJ **Optimal configuration of a superconducting photon number resolving detector** [12570-29]
- 12570 OK **Quantum wire material modulated geometrical factors and electronic band structure within the presence of spin-orbit interaction** [12570-30]
