**Volume 12580**

Proceedings of SPIE 0277-786X, V. 12580

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:  
Author(s), "Title of Paper," in *Research Using Extreme Light: Entering New Frontiers with Petawatt-Class Lasers V*, edited by Sergei V. Bulanov, Luis O. Silva, Proc. of SPIE 12580, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## ACCELERATION OF PARTICLES USING HIGH POWER PW CLASS LASERS I

---

- 12580 02 **On the electron beam loading in radiation-friction dominated regime of direct laser acceleration** [12580-12]
- 12580 03 **Effects of the channel radius on the direct laser acceleration of positrons** [12580-15]

---

## EXTREME LIGHT FACILITIES, PROJECTS, DIRECTIONS I

---

- 12580 04 **Extreme light infrastructure-nuclear physics: overview and perspectives (Invited Paper)** [12580-18]

---

## ACCELERATION OF PARTICLES USING HIGH POWER PW CLASS LASERS II

---

- 12580 05 **Picosecond ramp of ultrashort laser pulse: its effect on laser-driven ion acceleration or plasma shutter** [12580-23]
- 12580 06 **Spiral pulse generation and subsequent ion acceleration via ultra-thin foil and circularly polarized laser pulse** [12580-25]
- 12580 07 **Photon-photon scattering in Born-Infeld electrodynamics** [12580-28]

---

## POSTER SESSION

---

- 12580 08 **Radiation generation during laser and particle beam interactions in particle-in-cell codes** [12580-29]
