

PROCEEDINGS OF SPIE

International Conference on Remote Sensing, Surveying, and Mapping (RSSM 2023)

Chao Zuo
Editor

6–8 January 2023
Changsha, China

Organized by
Anhui University of Science and Technology (China)
Xi'an University of Science and Technology (China)

Supported by
Beijing Institute of Geology of Nuclear Industry (China)
Global Scientific Research Association (China)

Published by
SPIE

Volume 12710

Proceedings of SPIE 0277-786X, V. 12710

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Remote Sensing, Surveying, and Mapping (RSSM 2023)*, edited by Chao Zuo, Proc. of SPIE 12710, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Conference Committee</i>
vii	<i>Introduction</i>

REMOTE SENSING INFORMATION EXTRACTION AND SATELLITE POSITIONING

12710 02	Construction of regional forestry ecological resources protection and sharing platform under the background of big data [12710-10]
12710 03	Research on the method of pure deformation field by GNSS and InSAR [12710-7]
12710 04	MST-GAN: a sentinel-1/2 fusion framework based on multiscale transform and GAN [12710-15]
12710 05	Multitask floor plan analysis based on multi-scale and self-attention [12710-39]
12710 06	Separable nonlinear least squares algorithm based on finite difference [12710-20]
12710 07	Study on target tracking algorithm in active and passive radar seeker data fusion [12710-2]
12710 08	A reverse distance optical system based on an aspheric surface [12710-4]
12710 09	Study on vegetation dynamic changes monitoring by remote sensing based on the vegetation index [12710-16]
12710 0A	Real-time fire detection using meteorological satellites during drought in Hunan Province [12710-19]
12710 0B	An unsupervised remote sensing image segmentation method based on hidden Markov model [12710-8]
12710 0C	Variation of vegetation water use efficiency and its response to climate based MODIS products in Baoji area, China [12710-23]
12710 0D	A slope filtering method for point cloud of dense vegetation terrain based on airborne LiDAR [12710-34]
12710 0E	Application of UAV remote sensing technology in 1:500 topographic map mapping [12710-12]
12710 0F	Latitude and longitude positioning system design [12710-32]
12710 0G	A road extraction method based on improved PSPNet [12710-21]

- 12710 OH **Precise thermal control of space star camera and laser altimeter** [12710-11]
- 12710 OI **Research on the construction of knowledge graph based on multi-source heterogeneous geospatial data** [12710-14]
- 12710 OJ **Multisource remote sensing image registration based on geometric constraints** [12710-40]
- 12710 OK **Optimizing loading strategy for visualizing 3D photo-realistic model using human eye's area of interest** [12710-29]

ENGINEERING MAPPING AND SPATIAL MORPHOLOGY ANALYSIS

- 12710 OL **A rapid measurement method for residual deformation of aircraft structures** [12710-30]
- 12710 OM **Comparative experimental study of bridge detection methods based on deep learning** [12710-35]
- 12710 ON **SBAS-InSAR-based surface deformation monitoring of permafrost on Banks Island** [12710-18]
- 12710 OO **Study on the coordination degree between the urbanization level and the change of the cultivated land quantity in the resource-exhausted cities in the Yellow River Basin** [12710-28]
- 12710 OP **Regional dynamic monitoring of Changzhuang Reservoir during the "7-20" rainstorm in Zhengzhou using multi-source spaceborne SAR** [12710-9]
- 12710 OQ **Extraction of urban built-up areas in Shanghai based on night-time lighting data** [12710-5]
- 12710 OR **A geographically weighted Durbin model for spatial downscaling of land surface temperatures** [12710-6]
- 12710 OS **Measurement of coordination degree between urbanization level and cultivated land resource change: a case study of Zhuhai City** [12710-31]
- 12710 OT **Wetland vegetation identification based on improved JM-Relief F feature optimization algorithm** [12710-33]
- 12710 OU **Lightweight in-harbor ship detection based on UAV aerial images** [12710-42]
- 12710 OV **The spatio-temporal characterization of urban expansion of three urban agglomerations in China** [12710-17]
- 12710 OW **Optical image and SAR image registration based on improved SIFT-Like algorithm** [12710-22]
- 12710 OX **Spatio-temporal analysis of urban heat island in Shanghai over the past 30 years with Landsat images** [12710-38]
