The Global Energy Transition and De-carbonization

Energy Consumption Tokens for Blockchain-Based end-to-end Trading of Green Energy Certificates	1
<i>Maximilian Eickhoff (Munich University of Applied Sciences, Germany), Armin Exner (Blockchain Consulting GmbH, Germany), and Axel Busboom (Munich University of Applied Sciences, Germany)</i>	
Investigating the Impacts of Resiliency of the Automation System on Distribution Network Resilience	6
<i>Mohammad Sadeghian-Jahromi (Sharif University of Technology, Iran), Mahmud Fotuhi-Firuzabad (Sharif University of Technology, Iran; Aalto University, Finland), Sajjad Fattaheian-Dehkordi (Sharif University of Technology, Iran; Aalto University, Finland), Matti Lehtonen (Aalto University, Finland), and Saeed Heidary (Sharif University of Technology, Iran)</i>	

Short-Term Heat Demand Prediction Using Deep Learning for Decentralized Power-to-Heat Solutions	11
<i>Pavani Ponnaganti (Aalborg University, Denmark), Jayakrishnan R Pillai (Aalborg University, Denmark), and Birgitte Bak-Jensen (Aalborg University, Denmark)</i>	
Electricity Grid Enhancement in Puerto Rico by Establishing Renewable-Based Microgrids in Vieques and Culebra Islands	16
<i>Larissa Affolabi (Illinois Institute of Technology in Chicago), Mohammad Shahidehpour (Illinois Institute of Technology in Chicago; LUMA Energy, LLC), Alexandre B. Nassif (LUMA Energy, LLC, Puerto Rico), Muhidin Lelic (LUMA Energy, LLC, Puerto Rico), Daniel Kushner (LUMA Energy, LLC, Puerto Rico.), and Shay Bahramirad (LUMA Energy, LLC, Puerto Rico.)</i>	
Two-Stage Bi-Level Stochastic Model for Optimal Operation of a Green Hydrogen-Based VPP ..	22
<i>Saman Baharvandi (Shahed University, Iran)</i>	
Implementing Grid Supportive Behavior in Induction Motor-Driven Loads Using Field Oriented Control	28
<i>Zarka Mirza (Indian Institute of Technology (IIT) Roorkee, India) and Himanshu Jain (Indian Institute of Technology (IIT) Roorkee, India)</i>	

Distributed Storage & Generation Systems

Model Identification of Distributed Energy Resources Using Sparse Regression and Koopman Theory	33
<i>Javad Khazaei (Lehigh University, USA) and Faegheh Moazeni (Lehigh University, USA)</i>	
A Coordinated Control Scheme to Integrate Flywheels Energy Storage Systems in AGC	39
<i>Hany E.Z. Farag (York University, Canada), Ahmad O.K Ibrahim (York University, Canada), and Ehab F. El-Sadaany (Khalifa University, UAE)</i>	
Allocation of Battery Energy Storage Systems (BESS) to Mitigate FIDVR in the Con Edison Transmission Systems	44
<i>Chang Chen (The University of Tennessee, USA), Yilu Liu (The University of Tennessee, USA), Resk E Uosef (Con Edison Company of NY, USA), Matthew Koenig (Con Edison Company of NY, USA), and Constantine Spanos (Con Edison Company of NY, USA)</i>	
Battery Sizing and Location for Provision of Network Support Services	50
<i>Njegos Jankovic (IMDEA Energy Institute, Spain), Marcelo Nogales Balderrama (Zalles Electrical Power Services, USA), Javier Roldan-Perez (IMDEA Energy Institute, Spain), and Milan Prodanovic (IMDEA Energy Institute, Spain)</i>	
Evaluation of the Effects of Noise and Sampling Rate on Detection of High Impedance Fault with Machine Learning Methods on the Distribution System	55
<i>Eren Baharozu (Istanbul Technical University, Turkiye), Suat Ilhan (Istanbul Technical University, Turkiye), and Gurkan Soykan (Bahcesehir University, Turkiye)</i>	

HVDC & Flexible AC Transmission System

A Study of a Damping Control Based Predictive Strategy on an Inter-Area Power System	60
<i>Amro Sarayrah (The University of Jordan, Jordan), Mohammed A. Haj-ahmed (Al-Ahliyya Amman University, Jordan), and Eyad A. Feilat (The University of Jordan, Jordan)</i>	

Oscillation Damping Using Reinforcement Learning Controlled HVDC Transmission	67
<i>Rui Fan (University of Denver, USA), Renke Huang (Shanghai Jiaotong University, China), Qihua Huang (Colorado School of Mines, USA), Jie Tan (Google, USA), and Yu Liu (ShanghaiTech University, China)</i>	
Parametric Analysis of Lightning Overvoltages in High-Voltage Gas Insulated Substation	72
<i>Selma Grebović (University of Sarajevo, Bosnia and Herzegovina), Senad Smaka (University of Sarajevo, Bosnia and Herzegovina), Vahid Helać (University of Sarajevo, Bosnia and Herzegovina), and Nermin Oprašić (University of Sarajevo, Bosnia and Herzegovina)</i>	
An AGC Algorithm for Multi-Area Power Systems in Network Splitting Conditions	77
<i>Armağan Temiz (Automation & Healthcare Systems, Aselsan Inc., Turkey) and A. Nezih Guven (Middle East Technical University, Turkey)</i>	
AMPL Based Optimization Tool for Reliability Assessment of Multi-Terminal HVDC Networks Using the Monte Carlo Method	82
<i>Manuel Valois-Rodriguez (University of Kassel, Germany) and Lothar Löwer (Fraunhofer Institute for Energy Economics and Energy System Technology, Germany)</i>	

Power Quality Issues Associated with Microgrid

Active Damping in LCL-Filter Based Three Phase Converter Using Lead-lag Network and Kalman Filter	87
<i>Imane Biyya (Mohammed V University in Rabat, Morocco), Ahmed Abbou (Mohammed V University in Rabat, Morocco), and Mohamed Maaroufi (Mohammed V University in Rabat, Morocco)</i>	
A PMU Placement Framework in an Active Distribution Network Based on Voltage Profile Estimation Accuracy	92
<i>Amin Salehi (Sharif University of Technology, Iran), Mahmud Fotuhi-Firuzabad (Sharif University of Technology, Iran; Aalto University, Finland), Sajjad Fattaheian-Dehkordi (Sharif University of Technology, Iran; Aalto University, Finland), and Matti Lehtonen (Aalto University, Finland)</i>	
Fast Fault Current Injection of Renewable Energy Sources to Support Voltage During Dips	98
<i>Roozbeh Torkzadeh (Eindhoven Technical University (TU/e), The Netherlands), Vladimir Čuk (Eindhoven University of Technology (TU/e), The Netherlands), and Sjeff Cobben (Eindhoven University of Technology (TU/e), The Netherlands)</i>	
AC Fault Current Limiting Using LC DC Circuit Breaker	104
<i>Dragan Jovcic (University of Aberdeen, UK)</i>	
Computationally Robust Line Outage Detection and Identification in Three-Phase Networks ..	109
<i>Tuna Yildiz (Northeastern University, USA) and Ali Abur (Northeastern University, USA)</i>	
Excitation Current and Harmonic Analyses of a Three-Phase Five-Limb Transformer Under GIC According to Different Core Cross-Section Ratios	114
<i>Emre Kervan (Balıkesir Elektromekanik Sanayi Tesisleri A.Ş., Turkey) and Mahmut Aksoy (Balıkesir Elektromekanik Sanayi Tesisleri A.Ş., Turkey)</i>	

Power Generation & Renewables

- Appropriate Evaluation of Primary Frequency Response and Its Applications 119
Chengwen Zhang (University Of Tennessee, USA), Hongyu Li (University of Tennessee, USA), Zhihao Jiang (University of Tennessee, USA), Weikang Wang (University of Tennessee, USA), Chujie Zeng (University of Tennessee, USA), Chang Chen (University of Tennessee, USA), He Yin (University of Tennessee, USA), Yilu Liu (University of Tennessee, USA), and Mark Baldwin (Dominion Energy, USA)
- Analyzing the Computational Burden of Global-Linking Balance Equations in the Medium-Term Unit Commitment Problem 124
Luis Montero (Institute for Research in Technology (IIT), ICAI School of Engineering, Comillas Pontifical University, Spain), Antonio Bello (Institute for Research in Technology (IIT), ICAI School of Engineering, Comillas Pontifical University, Spain), and Javier Reneses (Institute for Research in Technology (IIT), ICAI School of Engineering, Comillas Pontifical University, Spain)
- Distributed Generation Control Using an Innovative Communication Gateway and Ripple Signaling 129
Nikolaos Pasialis (Innora PC, Greece), Nikolaos Lettas (INNORA PC, Greece), Evangelos Boutsiadis (University of Western Macedonia, Greece), Dimitrios Tsiamitros (University of Western Macedonia, Greece), and Dimitrios Stimoniaris (University of Western Macedonia, Greece)
- Enhancing Machine Learning Based Solar Generation Forecasting with Time Data Utilization . 134
Lejla Pašić (Budapest University of Technology and Economics; ELKH-BME Information Systems Research Group, Hungary), Azra Pašić (Budapest University of Technology and Economics, Hungary), Alija Pašić (Budapest University of Technology and Economics, Hungary), István Vokony (Budapest University of Technology and Economics, Hungary), and József Bíró (Budapest University of Technology and Economics, Hungary)
- Machine Learning Applied to the Operation of Fully Renewable Energy Systems 139
Ruben Chaer (Universidad de la República and Electricity Market Administration, Uruguay), Ignacio Ramírez (Universidad de la República, Uruguay), and Gonzalo Casaravilla (Universidad de la República, Uruguay)
- Maximum Power Point Tracking (MPPT) Enhancement of Variable-Speed wind Energy Conversion Using Sliding Mode Controller (SMC) 144
A. Seaf Aldean (King Fahd University of Petroleum & Minerals Dhahran), M. Al-Dhaifallah (King Fahd University of Petroleum & Minerals Dhahran), A. A. Saif (King Fahd University of Petroleum & Minerals Dhahran), and S. Elferik (King Fahd University of Petroleum & Minerals Dhahran)

Advanced Monitoring, Diagnostic, and Control Techniques

- Distribution System Topology Identification Using Graph Neural Networks 151
Rahul Madbhavi (IIT Madras, India), Balasubramaniam Natarajan (Kansas State University, USA), and Babji Srinivasan (IIT Madras, India)
- Assessment of Non-Intrusive Load Monitoring as a Blind Source Separation Problem 156
G.M. Herath (Sri Lanka Institute of Infomation Technology, Sri Lanka), M.H. Liyanage (Sri Lanka Institute of Infomation Technology, Sri Lanka), and C.J. Angamma (University of Waterloo, Canada)

A Comprehensive State Estimation Methodology for Multimachine Power Systems	161
<i>Natanael Vieyra (Universidad Nacional Autónoma de México (UNAM), México), Paul Maya-Ortiz (Universidad Nacional Autónoma de México (UNAM), México), and Cesar Angeles-Camacho (Universidad Nacional Autónoma de México (UNAM), México)</i>	
Sustainable and Inclusive Demand-Side Resilience: A Semi-Dynamic Model for Outage Costs .	166
<i>Ali Safamanesh (Shahid Beheshti University, Iran), Mohammad Sadegh Ghazizadeh (Shahid Beheshti University, Iran), Mahdi Habibi (Shahid Beheshti University, Iran), and Vahid Vahidinasab (Nottingham Trent University, UK)</i>	
Optimal Dead Band Control of Load Tap Changers in Distribution Networks	171
<i>Alper Savasci (Florida International University, USA), Adedoyin Inaolaji (Florida International University, USA), and Sumit Paudyal (Florida International University, USA)</i>	
Synchronized Multi-Partition Resilience System Based on IoT Platform for Interconnected Neural Power Grid- SynerGRID	176
<i>Srdjan Skok (Algebra University College, Croatia), Hrvoje Josip Balen (Algebra University College, Croatia), and Zeljko Siranovic (Zagreb University of Applied Sciences, Croatia)</i>	

Renewable Integration & Operation 1

Estimating the Feasible Operating Region of Active Distribution Networks Using the Genetic Algorithm	182
<i>Georgios K. Papazoglou (Hellenic Energy Exchange S.A.; Aristotle University of Thessaloniki, Greece), Aikaterini A. Forouli (Hellenic Energy Exchange S.A., Greece), Emmanouil A. Bakirtzis (Hellenic Energy Exchange S.A., Greece), Pandelis N. Biskas (Aristotle University of Thessaloniki, Greece), and Anastasios G. Bakirtzis (Aristotle University of Thessaloniki, Greece)</i>	
Operation of Energy Storage System in Renewable-Integrated Electrical Energy Grids: Consideration of Line and Generation Contingencies Besides Exploring Demand-Side Management	188
<i>Hossein Ebrahimi (Urmia University, Iran), Amin Yazdaninejadi (Shahid Rajaei Teacher Training University, Iran), and Sajjad Golshannavaz (Urmia University, Iran)</i>	
Insights for the Next Solar Eclipse in Turkish Grid with Increased Solar Capacity	194
<i>Hasan Yilmaz (Firat Electricity Distribution Company, Turkiye), Sinem Kol (Ozyegin University, Turkiye), and Gokturk Poyrazoglu (Ozyegin University, Turkiye)</i>	
Dual-Objective Optimization Scheduling Model and Analysis for Regional Integrated Electricity-Hydrogen System	199
<i>Qinghan Wang (Aalborg University, Denmark), Yanbo Wang (Aalborg University, Denmark), Yanjun Tian (North China Electric Power University, China), and Zhe Chen (Aalborg University, Denmark)</i>	
The Value of Ambiguity Quantification in Distributionally Robust Economic Dispatch Models for the Wind-Penetrated Power System	205
<i>Yujia Li (The University of Hong Kong, China), Chenxi Hu (The University of Hong Kong, China), and Yunhe Hou (The University of Hong Kong, China)</i>	

Power System Protection

Improving the reliability of the traveling wave fault location	210
<i>Rustem Khuziashhev (KSPEU, Russia) and Ildar Minaev (KSPEU, Russia)</i>	
Analysis of Fault Detection Algorithms used in Line Differential Protection (87L)	215
<i>Marziyeh Hemmati (Politecnico di Milano, Italy), Giambattista Grusso (Politecnico di Milano, Italy), and Massimo Ambroggi (Thytronic, Italy)</i>	
Improvement in Transformer Differential Protection Using Singular Value Decomposition	221
<i>Het Bhalja (Indian Institute of Technology Roorkee, India), Bhavesh R. Bhalja (Indian Institute of Technology Roorkee, India), and Pramod Agarwal (Indian Institute of Technology Roorkee, India)</i>	
Removal of DC Offset Components by Using Two Auxiliary Signals	226
<i>Nader Jalali Marand (Amirkabir University of Technology, Iran), Hassan Sam Daliri (Amirkabir University of Technology, Iran), and Hossein Askarian-Abyaneh (Amirkabir University of Technology, Iran)</i>	
Research on Relay Protection Equipment Maintenance Decision-Making Method Based on Risk Assessment	231
<i>Limin Wang (China Electric Power Research Institute, China), Peng Guo (China Electric Power Research Institute, China), Yiqun Kang (China Electric Power Research Institute, China), and Zhoutian Yan (China Electric Power Research Institute, China)</i>	

Electrical Vehicles and Charging

Micro Substation with Power Voltage Transformers for EV Charging	236
<i>Tiago Santos Guimaraes (Siemens Energy) and Jorge Martins (REN – Redes Energéticas Nacionais)</i>	
Impacts of State-of-Charge Estimation Errors on Frequency Regulation from Electric Vehicles	241
<i>Chaowanan Jamroen (Kasetsart University, Thailand), Dulpichet Rerkpreedapong (Kasetsart University, Thailand), and Sanchai Dechanupaprittha (Kasetsart University, Thailand)</i>	
Energy Management System of an Electric Vehicle Charging Station Using Q-Learning and Artificial Intelligence	246
<i>Tapiwa N. Matare (University of Cape Town, South Africa) and Komla A Folly (University of Cape Town, South Africa)</i>	
Study of Electric Vehicles for Grid Services – A Gender-Based Approach	251
<i>F. M. Aboshady (Brunel University London, UK; Tanta University, Egypt) and Ioana Pisica (Brunel University London, UK)</i>	

Cyber and Physical Security

A Framework for Service Restoration of Cyber-Physical Power Systems	256
<i>Chaudhry Talha Hassan (Lahore University of Management Sciences, Pakistan) and Dr. Tariq Mahmood Jadoon (Lahore University of Management Sciences, Pakistan)</i>	
Identifying Concept Drift with Supervised Algorithms in Smart Grids	263
<i>Ayşe Sayin (Istanbul Technical University, Turkey), Mostafa Mohammadpourfard (Istanbul Technical University, Turkey), and Mehmet Tahir Sandikkaya (Istanbul Technical University, Turkey)</i>	

Machine Learning Approaches in Anomaly Type Detection and Localization in Distribution System	268
<i>Mehdi Ganjkhani (The University of Utah) and Masood Parvania (The University of Utah)</i>	
Minimizing the Risk of Attacks in Electric Power Systems via Effective Grid Reinforcement of Counter Threat Technologies	273
<i>Lujia Zhan (The George Washington University, USA), Payman Dehghanian (The George Washington University, USA), and Saharnaz Mehrani (Florida Atlantic University, USA)</i>	
A Novel Approach Detection for False Data Injection, and Man in the Middle Attacks in IoT and IIoT	278
<i>Serkan Gönen (Istanbul Gelişim University, Türkiye), Mehmet Ali Barışkan (Istanbul Gelişim University, Türkiye), Derya Yılmaz Kaplan (Istanbul University-Cerrahpasa, Türkiye), Ercan Nurcan Yılmaz (Gazi University Ankara, Türkiye), and Aydın Çetin (Gazi University, Türkiye)</i>	

Advancements in Power Transmission & Distribution

Voltage Regulation in Transmission Systems: the Experience of TERNA	283
<i>Francesco Del Pizzo (TERNA S.p.A., Italy), Cristiano Quaciari (TERNA S.p.A., Italy), Giorgio Maria Giannuzzi (TERNA S.p.A., Italy), Chiara Vergine (TERNA S.p.A., Italy), Cosimo Pisani (TERNA S.p.A., Italy), Alessandro Coretti (TERNA S.p.A., Italy), Tiziano D'Aversa (TERNA S.p.A., Italy), Angelo Raffaele Cassano (TERNA S.p.A., Italy), Vincenzo Galdi (University of Salerno, Italy), Vito Calderaro (University of Salerno, Italy), Lucio Ippolito (University of Salerno, Italy), and Giuseppe Graber (University of Salerno, Italy)</i>	
Parameter-Free Virtual Synchronization Technique for Terminals of Power Transmission Lines.....	288
<i>Dian Lu (ShanghaiTech University, China), Yu Liu (ShanghaiTech University; Key Laboratory of Control of Power Transmission and Conversion (SJTU), Ministry of Education, China), Yuhao Xie (ShanghaiTech University, China), Rui Fan (University of Denver, USA), and Renke Huang (Shanghai jiao Tong University, China)</i>	
Challenges of DLR Systems at the Implementation and Operation Level	293
<i>Levente Rácz (Budapest University of Technology and Economics, Hungary), Dávid Szabó (Budapest University of Technology and Economics, Hungary), Gábor Göcsei (Budapest University of Technology and Economics, Hungary), and Bálint Németh (Budapest University of Technology and Economics, Hungary)</i>	
Identification of Visible Isolation for Substations Maintenance Using Graph Theory	298
<i>Samuel Marín López (ISA INTERCHILE, Chile), Juan Sebastian Salazar Luna (Medellín, Colombia), and Alejandro Garcés-Ruiz (Universidad Tecnológica de Pereira, Pereira-Colombia)</i>	
Distribution Grid Power Flexibility Aggregation at Multiple Interconnections Between the High and Extra High Voltage Grid Levels	303
<i>Neelotpal Majumdar (Leibniz Universität Hannover, Germany), Marcel Sarstedt (Leibniz Universität Hannover, Germany), and Lutz Hofmann (Leibniz Universität Hannover, Germany)</i>	

Big Data Utilization & Analytics

Evolutionary-Based Neural Architecture Search for An Efficient CAES and PV Farm Joint Operation Strategy Using Deep Reinforcement Learning	310
<i>Amirhossein Dolatabadi (University of Alberta, Canada), Hussein Abdeltawab (Penn State Behrend, USA), and Yasser Abdel-Rady I. Mohamed (University of Alberta, Canada)</i>	
An Improved Actor-Critic Reinforcement Learning with Neural Architecture Search for the Optimal Control Strategy of a Multi-Carrier Energy System	315
<i>Amirhossein Dolatabadi (University of Alberta, Canada), Hussein Abdeltawab (Penn State Behrend, USA), and Yasser Abdel-Rady I. Mohamed (University of Alberta, Canada)</i>	
Separated Artificial Neural Network Based Distribution System State Estimation	320
<i>Lejla Pašić (Budapest University of Technology and Economics; ELKH-BME Information Systems Research Group, Hungary), Azra Pašić (Budapest University of Technology and Economics, Hungary), Alija Pašić (Budapest University of Technology and Economics, Hungary), István Vokony (Budapest University of Technology and Economics, Hungary), and József Bíró (Budapest University of Technology and Economics, Hungary)</i>	
Consumers' Willingness to Invest in Smart Home Technologies Using Machine Learning: A Survey-Based Analysis in Qatar	325
<i>Taha J. Alhindi (Rutgers, The State University of New Jersey, USA), Farhad Angizeh (Rutgers, The State University of New Jersey, USA), Ammar Abulibdeh (Qatar University, Qatar), and Mohsen A. Jafari (Rutgers, The State University of New Jersey, USA)</i>	
Assessment of Different Health Index Aggregation Techniques for Electric Utilities	330
<i>Swasti R. Khuntia (TenneT, The Netherlands) and Bjoern Heling (TenneT, Germany)</i>	

Renewable Integration & Operation 2

Probabilistic Co-Optimization of Hybrid Battery/Super-Capacitor Systems Integrated into Microgrids	335
<i>Soheil Mohseni (Victoria University of Wellington, New Zealand) and Alan C Brent (Victoria University of Wellington, New Zealand)</i>	
DC Microgrid Applications and Their Control Techniques	340
<i>Lejla Ahmethodžić (University of Sarajevo, Bosnia & Herzegovina), Senad Huseinbegović (University of Sarajevo, Bosnia & Herzegovina), Senad Smaka (University of Sarajevo, Bosnia & Herzegovina), and Amer Smajkić (University of Sarajevo, Bosnia & Herzegovina)</i>	
Building-Integrated Microgrid with Zero Energy Export - Practical Approach to Sizing	345
<i>Lejla Ahmethodžić (University of Sarajevo, Bosnia and Herzegovina), Senad Huseinbegović (University of Sarajevo, Bosnia and Herzegovina), Amer Smajkić (University of Sarajevo, Bosnia and Herzegovina), and Senad Smaka (University of Sarajevo, Bosnia and Herzegovina)</i>	
PV/Fuel Cell/ Superconducting Magnetic Energy Storage Coupled with VSG to Improve Frequency and Voltage Regulation of Power Grid	350
<i>Alhassan Alsharif (King Fahad University of Petroleum and Minerals (KFUPM), Saudi Arabia) and Muhammad Khalid (King Fahad University of Petroleum and Minerals (KFUPM); SDAIA-KFUPM Joint Research Center for Artificial Intelligence, Saudi Arabia)</i>	

Regret Cost Analysis of the Generation Expansion Plans of Uruguay 2024-2033	356
<i>Gonzalo Casaravilla (Universidad de la República, Uruguay) and Ximena Caporale (Universidad de la República, Uruguay)</i>	

T&D Monitoring, Control and Automation

The Influence of Fragility Curves in Resilience Assessments Considering Windstorms: A Sensitivity Analysis	361
<i>Zhiyu Liao (The University of Manchester, UK), Alexandre Serrano-Fontova (The University of Manchester, UK), Haiyu Li (The University of Manchester, UK), and Magnus Rory Jamieson (University of Strathclyde, UK)</i>	
A new Method for Determining the C-Divider Capacitances of a Capacitor Voltage Transformer with Frequency Measurements	366
<i>Thomas Bischof (Omicron electronics GmbH, Austria), David Gopp (Omicron electronics GmbH, Austria), and Dmitry Atlas (Omicron electronics GmbH, Austria)</i>	
Assessment of Directional Elements for Power Networks Connected to Inverted Based Renewable Resources: Problems and Mitigation Approach	371
<i>Aarthi V (Hitachi Energy, India), O. D. Naidu (Hitachi Energy, India), and Mahamad Nabab Alam (NIT Warangal, India)</i>	

Microgrids Integration & Operation

Optimal Energy Scheduling in Seaport Integrated Energy Systems	376
<i>Chengzhi Xie (The George Washington University, USA), Jinshun Su (The George Washington University, USA), and Payman Dehghanian (The George Washington University, USA)</i>	
Probabilistic Integration of Demand Flexibilities in a Renewable Energy-Assisted Community Network	381
<i>Farhad Angizeh (Rutgers, The State University of New Jersey, USA), Ammar Abulibdeh (Qatar University, Qatar), and Mohsen A. Jafari (Rutgers, The State University of New Jersey, USA)</i>	
A Review of Data-Driven Smart Energy Management Systems for Distribution Networks	386
<i>Ehtisham Asghar (Munster Technological University, Ireland), Martin Hill (Munster Technological University, Ireland), and Conor Lynch (Munster Technological University, Ireland)</i>	
Grid Connected and Islanded Operation of Microgrids Including SMES, SC, and Li/Ion Based PV Systems	398
<i>Erdal Şehirli (Kastamonu University, Turkey) and Ömer Usta (Istanbul Technical University, Turkey)</i>	

Forecasting for Grid Operation

Comparing Short-Term Net Load Forecasting Methods for Solar Homes	404
<i>Scott Watts (University of New South Wales, Australia) and Iain MacGill (University of New South Wales, Australia)</i>	
Smart Meter Customer Data Synchronization Technique by KMean Clustering	409
<i>Leoni Elizabeth Bule (The University of Auckland, New Zealand) and Nirmal-Kumar C Nair (The University of Auckland, New Zealand)</i>	

Exploring The Effect Of Different Load Models On System Reconfiguration	414
<i>Rawdha H. AlKuwaiti (Khalifa University, UAE), Hany E.Z. Farag (York University, Canada), Wael El-Sayed (Benha University, Egypt), Ahmed Al-Durra (Khalifa University, UAE), and Ehab F. El-Sadaany (Khalifa University, UAE)</i>	
Author Index	419
