2023 10th International Conference on Dependable Systems and Their Applications (DSA) **DSA 2023**

Table of Contents

Message from the Conference Chairs	xxi
Organizing Committee	xxiii
Steering Committee	xxiv
Program Committee	xxv
Additional Reviewers	xxvii
Keynote Speaker I	xxviii
Keynote Speaker II	xxix

Session I-A: AI-Driven Software and Applications I

DVTest: Deep Neural Network Visualization Testing Framework	1
<i>Siqi Gu (Shenzhen Research Institute of Nanjing University, China), Zhaowei Zong (Nanjing University, China), Fangyuan Tian (Nanjing University, China), and Zhenyu Chen (Nanjing University, China)</i>	
A Comprehensive Evaluation of Q-Learning Based Automatic Web GUI Testing	12
<i>Yujia Fan (Southern University of Science and Technology, China), Siyi Wang (Southern University of Science and Technology, China), Sinan Wang (Southern University of Science and Technology, China), Yepang Liu (Southern University of Science and Technology, China), Guoyao Wen (Huawei Inc., China), and Qi Rong (Huawei Inc., China)</i>	
Adversarial Sample Detection for BERT Model Based on Sample Sensitivity Characteristics	24
<i>Jing Liu (Inner Mongolia University, China), Yihao Wang (Inner Mongolia University, China), and Yang Wu (Inner Mongolia University, China)</i>	
Study on Automatic Code Summary Generation Method Based on Graph Neural Network	35
<i>Changsheng Du (Xinjiang Normal University, China; Xinjiang Electronics Research Institute, China), Yong Li (Xinjiang Normal University, China), Yue Wang (Xinjiang Normal University, China), and Junjie Yu (Xinjiang Normal University, China)</i>	

Session I-B: Software Security

Evaluating the Resilience of Software Architecture Based on Minimal Path	42
<i>Bixin Li (Southeast University, China), Donglin Li (Southeast University, China), Zixuan Liu (Southeast University, China), and Jiaxin Pan (Southeast University, China)</i>	
Empirical Study on Secure Software Development	54
<i>Adelina Aleksieva-Petrova (Technical University of Sofia, Bulgaria) and Milen Petrov (Sofia University, Bulgaria)</i>	
Patch Management Planning - Towards One-to-one Policy	60
<i>Veikko Markkanen (University of Jyväskylä, Finland) and Tapio Frantti (University of Jyväskylä, Finland)</i>	
A Software Security Testing Model for Autonomous Systems	70
<i>Jinchang Hu (Army Engineering University of PLA, China), Kang Sun (AVIC The First Aircraft Institute, China), Sen Yang (Academy of Military Science, China), Zhanwei Hui (Academy of Military Science, China), and Song Huang (Army Engineering University of PLA, China)</i>	

Session I-C: Software Testing, Verification, and Bug Reproduction

Towards High-Quality Test Suite Generation with ML-Based Boundary Value Analysis	75
<i>Xiujing Guo (Hiroshima University, Japan), Hiroyuki Okamura (Hiroshima University, Japan), and Tadashi Dohi (Hiroshima University, Japan)</i>	
A Review of Metamorphic Relation Representation Forms	86
<i>Yin Zhao (University of South China, China), Meng Li (University of South China, China; Hunan Engineering Research Center of Software Evaluation and Testing for Intellectual Equipment, China; CNNC Key Laboratory on High Trusted Computing, China), and Jie Liu (University of South China, China; Hunan Engineering Research Center of Software Evaluation and Testing for Intellectual Equipment, China; CNNC Key Laboratory on High Trusted Computing, China)</i>	
Modelling Android Applications Through Static Analysis and Systematic Exploratory Testing	94
<i>Jordan Doyle (SFI Lero & School of computer Science, University College Dublin, Ireland), Thomas Laurent (JSPS International Research Fellow, National Institute of Informatics, Japan), and Anthony Ventresque (SFI Lero & School of Computer Science and Statistics, Trinity College Dublin, Ireland)</i>	
Towards Using Structural Abstraction for Model Checking	105
<i>Christoph Luckeneder (Institute of Computer Technology, Vienna University of Technology, Austria), Ralph Hoch (Institute of Computer Technology, Vienna University of Technology, Austria), and Hermann Kaindl (Institute of Computer Technology, Vienna University of Technology, Austria)</i>	

Towards Effective Bug Reproduction for Mobile Applications	114
<i>Xin Li (State Key Laboratory for Novel Software Technology, Nanjing University, China; Shenzhen Research Institute of Nanjing University, China), Shengcheng Yu (State Key Laboratory for Novel Software Technology, Nanjing University, China; Shenzhen Research Institute of Nanjing University, China), Lifan Sun (State Key Laboratory for Novel Software Technology, Nanjing University, China; Shenzhen Research Institute of Nanjing University, China), Yuexiao Liu (State Key Laboratory for Novel Software Technology, Nanjing University, China; Shenzhen Research Institute of Nanjing University, China), and Chunrong Fang (State Key Laboratory for Novel Software Technology, Nanjing University, China; Shenzhen Research Institute of Nanjing University, China)</i>	

Session II-A: AI-Driven Software and Applications II

HyperFed: Free-Riding Resistant Federated Learning with Performance-Based Reputation Mechanism and Adaptive Aggregation Using Hypernetworks	126
<i>Sirapop Nuannimnoi (National Yang Ming Chiao Tung University, Taiwan), Florian Delizy (National Yang Ming Chiao Tung University, Taiwan), and Ching-Yao Huang (National Yang Ming Chiao Tung University, Taiwan)</i>	
Activity-Based Modeling Strategy for Reliable Machine Learning System Analysis Targeting GUI-Based Applications	135
<i>Hiroshi Tanaka (Fujitsu Limited, Japan), Masaru Ide (Fujitsu Limited, Japan), Kazuki Munakata (Fujitsu Limited, Japan), Hironori Washizaki (Waseda University, Japan), and Nobukazu Yoshioka (Waseda University, Japan)</i>	
Automated Pricing-Based Provisioning of SDN/NFV Services in Distributed Multi-Access Edge Computing Using Cooperative Multi-Agent Deep Reinforcement Learning	144
<i>Jean Jimmy Julien (National Yang-Ming Chiao Tung University, Taiwan), Sirapop Nuannimnoi (National Yang-Ming Chiao Tung University, Taiwan), and Ching-Yao Huang (National Yang-Ming Chiao Tung University, Taiwan)</i>	
Real-Time Fruit Detection Method Based on RGB-D Image Fusion	156
<i>Lingjie Wang (Nanjing University, China), Yunfeng Zhu (Nanjing University, China), Siqi Gu (Nanjing University, China), and Zhenyu Chen (Nanjing University, China)</i>	
Research on Label Distribution Dimension Reduction Algorithm Based on MLDA	167
<i>Wenquan Tian (Suzhou University, China), Shanshan Li (Suzhou University, China), Chengfang Tan (Suzhou University, China), Zhiwei Zhang (Suzhou University, China), and Lin Cui (Suzhou University, China)</i>	

An Attention Mechanism Based Approach for Multivariate Time Series Anomaly Detection	173
<i>Yihao Xiong (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), Jinbo Wang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), Yuanlin Xin (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), Chi Zhang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), and Panpan Xue (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China)</i>	

Session II-B: Predictive Modeling and Optimization I

Anti-sea Operation Knowledge Modeling of Aircraft Carrier Formation Based on Key Knowledge and Symbiotic Relationship of Conditions	182
<i>Jue Wang (Dalian Naval Academy, China), Yitao Wang (Dalian Naval Academy, China), Dianwen Liu (Dalian Naval Academy, China), and Hao Long (Dalian Naval Academy, China)</i>	
Another Look at Non-Homogeneous Markovian Software Reliability Modeling	190
<i>Nanxiang Qiu (Hiroshima University, Japan), Siqiao Li (Hiroshima University, Japan), Tadashi Dohi (Hiroshima University, Japan), and Hiroyuki Okamura (Hiroshima University, Japan)</i>	
Dynamic Assignment of Multi-UAV Marine Search and Rescue Missions Under the Condition of Intelligence Support	200
<i>Xingjun Chen (Operation Software and Simulation Research Institute of Dalian Naval Academy, China), Zimeng Wang (Postgraduate brigade of Dalian Naval Academy, China), and Junpeng Zhang (Postgraduate brigade of Dalian Naval Academy, China)</i>	
Optimizing Named Entity Recognition for Improving Logical Formulae Abstraction from Technical Requirements Documents	211
<i>Alexander Perko (Graz University of Technology, Austria), Haoran Zhao (Drexel University, USA), and Franz Wotawa (Graz University of Technology, Austria)</i>	
Knowledge Representation and Reasoning of Strong System Confrontation Process Based on Spatio-Temporal Event Evolution Information Flow and Software	223
<i>Hongquan Shi (Dalian Naval Academy, China) and Jinbo Gong (Wuhan University of Technology, China)</i>	
Validity Analysis of Software Defect Prediction Model for Mis-Label Correction Based on CleanLab	233
<i>Ao Xu (Jiangsu Normal University, China), Yi Zhu (Jiangsu Normal University, China; Nanjing University of Aeronautics and Astronautics, China), Yuxiang Gao (Jiangsu Normal University, China), Qiao Yu (Jiangsu Normal University, China), and Guosheng Hao (Jiangsu Normal University, China)</i>	
Research on Aggregation of Federated Model for Software Defect Prediction Based on Dynamic Selection	242
<i>Huiling Song (Xinjiang Normal University, China), Yong Li (Xinjiang Normal University, China), Wenjing Zhang (Xinjiang Normal University, China), and Ying Liu (Xinjiang Normal University, China)</i>	

Session II-C: Security for Software and Systems

Secure 3rd Party Software Integration	250
<i>Veikko Markkanen (University of Jyväskylä, Finland) and Tapio Frantti (University of Jyväskylä, Finland)</i>	
Achieving Cyber-Informed Engineering Through Bayesian Belief Network And Sensitivity Analysis	260
<i>Chidi Agbo (Boise State University, USA) and Hoda Mehrpouyan (Boise State University, USA)</i>	
Single and Combined Cyberattack Impact on Industrial Wastewater Systems	272
<i>Alvi Jawad (Carleton University, Canada) and Jason Jaskolka (Carleton University, Canada)</i>	
Employing Redundancy to Leverage Cybersecurity Protection of Safety-Critical Systems	282
<i>Elena Troubitsyna (KTH -- Royal Institute of Technology, Sweden)</i>	
Data-Leashing: Towards a Characterization of The Problem and Its Solution	288
<i>Thowayba M. Elkaffash (Qatar University, Qatar) and Armstrong M. Nhlabatsi (Qatar University, Qatar)</i>	
A Comprehensive and Credible Assessment Method for Model Adversarial Robustness Under Modulated Signal Identification	296
<i>Songlin Yang (Harbin Engineering University, China), Zhida Bao (Harbin Engineering University, China), and Yun Lin (Harbin Engineering University, China)</i>	
Analyzing Software Supply Chain Security Risks in Industrial Control System Protocols: An OpenSSF Scorecard Approach	302
<i>Azad A. Younis (Northern Kentucky University, USA), Yi Hu (Northern Kentucky University, USA), and Ramadan Abdunabi (Colorado State University, USA)</i>	
Host Intrusion Detection Method Based on Short Sequence of System Call	312
<i>Bangrui Wan (Chongqing University of Posts and Telecommunications, China; Chongqing Engineering Research Center of Software Quality Assurance, China), Yuduo He (Chongqing University of Posts and Telecommunications, China), Xin Liu (Chongqing University of Posts and Telecommunications, China; Chongqing Engineering Research Center of Software Quality Assurance, China), Shiyu Wang (Chongqing University of Posts and Telecommunications, China), and Ying Qian (Chongqing University of Posts and Telecommunications, China; Chongqing Engineering Research Center of Software Quality Assurance, China)</i>	

Session III-A: AI-Driven Software and Applications III

An Unsupervised Deep Learning Approach for Health Assessment of Distributed Systems	323
<i>Yuanlin Xin (Technology and Engineering Center for Space Utilization Chinese Academy of Sciences, China), Jinbo Wang (Technology and Engineering Center for Space Utilization Chinese Academy of Sciences, China), Yihao Xiong (Technology and Engineering Center for Space Utilization Chinese Academy of Sciences, China), Ruixue Wang (Technology and Engineering Center for Space Utilization Chinese Academy of Sciences, China), and Zhaohui Yao (Nanjing University of Aeronautics and Astronautics, China)</i>	
Research on Deep Learning-Based SAR Image Denoising Algorithm	333
<i>Shengnan Hu (Wuhan University of Technology, China), Ruihan Mao (Wuhan University of Technology, China), and Hua Li (Wuhan University of Technology, China)</i>	
Research and Application of Loitering Detection Based on Deep Learning	339
<i>Yuyang Zhang (Xidian University, China), Jiangcheng Wang (Xidian University, China), Xiaobing Wang (Xidian University, China), Yingnan Wang (Shaanxi Normal University, China), and Sijiang Yu (Xi'an University of Posts and Telecommunications, China)</i>	
A Click-Through Rate Prediction Method Based on Interaction Features Extraction for High-Dimensional Sparse Data	347
<i>Xin Liu (Chongqing University of Posts and Telecommunications, China), Jianping Ma (Chongqing University of Posts and Telecommunications, China), Dengjian Qiao (Sichuan Jiuyuan Yinhai Software CO., LTD, China), and Chunhua Lian (Sichuan Jiuyuan Yinhai Software CO., LTD, China)</i>	

Session III-B: Predictive Modeling and Optimization II

A Priority-Based Dynamic Chain Operation Planning Model	356
<i>Yihong Liu (Dalian naval academy, China) and Xingjun Chen (Dalian naval academy, China)</i>	
A Software Execution Data Component Identification Algorithm Based on Spectral Clustering	360
<i>Yahui Tang (Chongqing University of Posts and Telecommunications, China), Mengqi Rao (Chongqing University of Posts and Telecommunications, China), Qingjie Wei (Chongqing University of Posts and Telecommunications, China), Feng Chen (Chongqing University of Posts and Telecommunications, China), and Xin Liu (Chongqing University of Posts and Telecommunications, China)</i>	
A Quantitative Analysis Method for Model Uncertainty Based on Verification, Validation, and Uncertainty Quantification	369
<i>Hui Tang (BeiHang University, China), Lizhi Wang (BeiHang University, China; Unmanned System Institute, Beihang University, China), Lingfei You (BeiHang University, China; Unmanned System Institute, Beihang University, China), Mengfei Yao (BeiHang University, China), and Xiaohong Wang (BeiHang University, China)</i>	

An Adaptive Learning Feature Model Validation Methodology Based on Formal Methods	379
<i>Chenyu Wang (Jiangsu Normal University, China), Yi Zhu (Jiangsu Normal University, China; Nanjing University of Aeronautics and Astronautics, China), and Mei Song (Jiangsu Normal University, China)</i>	

Session III-C: Blockchain, Smart Contract, and IoT

Move Smart Contract Vulnerability Detection Based on Resource-Flow Analysis	389
<i>Jinlei Sun (Academy of Military Science, China), Zhanwei Hui (Academy of Military Science, China), Xiaojuan Wang (Academy of Military Science, China), Xu Cao (Academy of Military Science, China), and Shuang Song (Academy of Military Science, China)</i>	
An Enhanced Approach for RFID Reader Deployment in Industrial IoT Systems with Collision Avoidance and Optimized Coverage	399
<i>Chien-Fu Cheng (National Taiwan Ocean University, Taiwan) and Bo-Yan Liao (Tamkang University, Taiwan)</i>	
Blockchain-Based Model for Privacy-Enhanced Data Sharing	406
<i>Weikang Li (Xinjiang Normal University, China), Yong Li (Xinjiang Normal University, China), Changqing Zheng (Xinjiang Electronics Research Institute, China), and Ruiqi He (Xinjiang Normal University, China)</i>	
Automatic Generation of Solidity Test for Blockchain Smart Contract Using Many Objective Search and Dimensionality Reduction	418
<i>Dongcheng Li (University of Texas at Dallas, USA), W. Eric Wong (University of Texas at Dallas, USA), Sean Pan (RFCyber Corporation, USA), Liang-Seng Koh (RFCyber Corporation, USA), and Nicholas Chau (University of Texas at Dallas, USA)</i>	

Session IV-A: AI-Driven Software and Applications IV

A Systematic Mapping Study of Digital Twins for Diagnosis in Transportation	431
<i>Liliana M. Prikler (Graz University of Technology, Austria) and Franz Wotawa (Graz University of Technology, Austria)</i>	
Using the Deep Learning-Based Approaches for Program Debugging and Repair	443
<i>Tzu-Yang Lin (National Tsing Hua University, Taiwan), Chin-Yu Huang (National Tsing Hua University, Taiwan), and Chih-Chiang Fang (National Tsing Hua University, Taiwan)</i>	
Spatio-Temporal Rule Constraint Guided Safe Reinforcement Learning for CPS	455
<i>Chan Yin (Jiangsu Normal University, China), Yi Zhu (Jiangsu Normal University, China; Nanjing University of Aeronautics and Astronautics, China), Jinyong Wang (Xuzhou Institute of Technology, China; Nanjing University of Aeronautics and Astronautics, China.), and Guosheng Hao (Jiangsu Normal University, China)</i>	

Session IV-B: Fast Abstract & Industry Track I

Task Allocation of Multi UAV Based on Genetic Algorithm	466
<i>Yingqiang He (Institute of Operation Software and Simulation, Dalian Naval Academy, Dalian), Qi Su (Institute of Operation Software and Simulation, Dalian Naval Academy, Dalian), and Hao Long (Institute of Operation Software and Simulation, Dalian Naval Academy, Dalian)</i>	
Visual Feedback Using VR Patient Avatar in Care and Nursing Training Environments	468
<i>Minjeong Lee (Daegu Univeristy, South Korea), Younga Kwon (Daegu University, South Korea), Suyeong Kim (Daegu University, South Korea), and Miran Lee (Daegu University, South Korea)</i>	
A High Availability Microservices Architecture Implementation Using Saga and Backup Mechanism	470
<i>Wen-Tin Lee (National Kaohsiung Normal University, Taiwan), Ping-Yi Song (National Kaohsiung Normal University, Taiwan), Ming-Kai Tsai (National Kaohsiung Normal University, Taiwan), Meng-Hsien Wu (National Kaohsiung Normal University, Taiwan), and Shang-Pin Ma (National Kaohsiung Normal University, Taiwan)</i>	
Containerized Microservices Deployment Approach Based on Ant Colony Optimization	472
<i>Wen-Tin Lee (National Kaohsiung Normal University, Taiwan), Zhi-Yao Yang (National Kaohsiung Normal University, Taiwan), Zhun-Wei Liu (National Kaohsiung Normal University, Taiwan), and Shin-Jie Lee (National Kaohsiung Normal University, Taiwan)</i>	
A Robust and High-Performance Flip-Flop with Complete Soft-Error Recovery	474
<i>Aibin Yan (Anhui University, China; Hefei University of Technology, China), Xuehua Li (Anhui University, China), Tianming Ni (Anhui Polytechnic University, China), Zhengfeng Huang (Hefei University of Technology, China), and Xiaoqing Wen (Kyushu Institute of Technology, China)</i>	
Assessment of Real-World Incident Detection Through a Component-Based Online Log Anomaly Detection Pipeline Framework	477
<i>Scott Lupton (Nomura Securities Co., Ltd., Japan; Waseda University, Japan), Lena Yu (Nomura Securities Co., Ltd., Japan), Hironori Washizaki (Waseda University, Japan), Nobukazu Yoshioka (Waseda University, Japan), and Yoshiaki Fukazawa (Waseda University, Japan)</i>	

Session IV-C: Autonomous Vehicle Software II (AVS)

Image Transmission Based on Semantics Communication in Vehicle-Infrastructure Collaboration System	479
<i>Jingjing Li (Xidian University, China), Kai Sheng (Xidian University, China; Xidian University, China), Lei Ao (Xidian University, China), Itoh Makoto (University of Tsukuba, Japan), and Qinghai Yang (Xidian University, China)</i>	

Spatial-Temporal Hypergraph Neural Network Based on Attention Mechanism for Multi-View Data Action Recognition	487
<i>Zhixuan Wu (Beijing Key Laboratory of Information Service Engineering, College of Robotics, Beijing Union University, China), Nan Ma (Faculty of Information Technology, Beijing University of Technology, China), Tao Zhi (Yunji Technology, China), and Genbao Xu (Faculty of Information Technology, Beijing University of Technology, China)</i>	
Evaluation of Wireless Deauthentication Attacks and Countermeasures on Autonomous Vehicles..	494
<i>Ramnik Singh Reen (Concordia University of Edmonton, Canada), Gaurav Dharmani (Concordia University of Edmonton, Canada), Rahul Gothwal (Concordia University of Edmonton, Canada), and Eslam G. AbdAllah (Concordia University of Edmonton, Canada)</i>	
Evaluation of Man-in-the-Middle Attacks and Countermeasures on Autonomous Vehicles	502
<i>Rahul Gothwal (Concordia University of Edmonton, Canada), Gaurav Dharmani (Concordia University of Edmonton, Canada), Ramnik Singh Reen (Concordia University of Edmonton, Canada), and Eslam G. AbdAllah (Concordia University of Edmonton, Canada)</i>	
An Automatic Sensing Weakness Detection Method for Autonomous Vehicle Assessment	510
<i>Fumito Kuroyanagi (Toyota Technical Development Corporation, Japan), Eriko Uno (Toyota Technical Development Corporation, Japan), Kohji Ichikawa (Toyota Technical Development Corporation, Japan), Kohji Nagase (Toyota Technical Development Corporation, Japan), and Hideo Inoue (Kanagawa Institute Of Technology, Japan)</i>	

Session IV-D: Reliable Decision and Scheduling I (RDS)

Research on Resilience of Maritime Distributed Combat Network Under Targeted Attacks	519
<i>Qi Su (Dalian Naval Academy, China), Feifan Liu (Dalian University of Technology, China), Hongquan Shi (Dalian Naval Academy, China), Haoxiang Xia (Dalian University of Technology, China), and Zhengwei Ma (Dalian Naval Academy, China)</i>	
A Method for Evaluating the Effectiveness of Combat Plans Based on Matter-Element Extension Model with Variable Weight	527
<i>Junfeng Nie (Institute of Operation Software and Simulation, Dalian Naval Academy)</i>	
Research on Multi-Agent PPO Reinforcement Learning Algorithm Based on Knowledge Graph	532
<i>Lian Liu (Operation Software and Simulation Research Institute, Dalian Naval Academy) and Dongpu Su (Operation Software and Simulation Research Institute, Dalian Naval Academy)</i>	
Chat-EasyEdu: An Education Field Intelligent Question-Answering System Based on Knowledge Graphs	537
<i>Zhiquan An (Wuhan Textile University, China), Junyi Huang (Wuhan Textile University, China), Guotao Jiao (Wuhan Textile University, China), Longfei Liu (Wuhan Textile University, China), and Changxi Feng (Wuhan Textile University, China)</i>	
A Stacking-Based Heart Disease Classification Prediction Model	547
<i>Pan Liu (Shanghai Business School, China), Li Li (Yichun University, China), and Yihao Li (Ludong University, China)</i>	

Session V-A: System Performance, Prognostics, and Health Management

Health Trend Prediction of Rolling Bearings Using Transferable Autoregressive Recurrent Adaptation Approach	554
<i>Yudong Cao (Southeast University, China), Minping Jia (Southeast University, China), and Jichao Zhuang (Southeast University, China)</i>	
Performance Degradation Assessment of Rolling Bearing Based on Difference of Eigenvalues in Random Matrix Theory	559
<i>Wenchang Zhu (Southeast University, China) and Peng Huang (Southeast University, China)</i>	
Reliability Analysis for Thin Film Thermocouple Thermal Oxidation Failure Based on Interlayer Diffusion	565
<i>Zhikuan Chen (Beihang University, China), Yufeng Sun (Beihang University, China), and Yuqing Xue (Beihang University, China)</i>	
Software Countermeasures Against DVFS Fault Attack for AES	575
<i>Zikang Tao (Harbin Institute of Technology, China), Rihui Sun (Harbin Institute of Technology, China), and Jian Dong (Harbin Institute of Technology, China)</i>	

Session V-B: Fast Abstract & Industry Track II

Robust Model for Adversarial Attack Protection Through Weak Features Removal	583
<i>Pratomo Adinegoro (National Central University, Taiwan), Chin-Chun Chang (National Taiwan Ocean University, Taiwan), and Deron Liang (National Central University, Taiwan)</i>	
A Multiple-Criteria Ensemble Weight Strategy to Increase the Effectiveness of Deep Learning-Based Fault Localization	585
<i>Chih-Chiang Fang (Department of Computer Science, National Tsing Hua University, Taiwan) and Chin-Yu Huang (Department of Computer Science, National Tsing Hua University, Taiwan)</i>	
An Empirical Evaluation of the Effectiveness of Spider and Proxy Modes for Web Security Testing	587
<i>Kuan-Wei Chiu (National Cheng Kung University, Taiwan), Shih-Sheng Yang (National Cheng Kung University, Taiwan), Shin-Jie Lee (National Cheng Kung University, Taiwan), and Wen-Tin Lee (National Kaohsiung Normal University, Taiwan)</i>	
Automatic Detection of Abstract–Concrete Relationships Between Attack Patterns of ATT&CK and CAPEC with Fine-Tuned BERT	589
<i>Takuma Tsuchida (Waseda University, Japan), Rikuho Miyata (Waseda University, Japan), Hironori Washizaki (Waseda University, Japan), Nobukazu Yoshioka (Waseda University, Japan), and Yoshiaki Fukazawa (Waseda University, Japan)</i>	

UTEMS: A Unit Testing Scheme for Event-Driven Microservices	591
<i>Shang-Pin Ma (National Taiwan Ocean University, Taiwan), Yu-Yung Yang (National Taiwan Ocean University, Taiwan), Shin-Jie Lee (National Cheng Kung University, Taiwan), and Hang-Wei Yeh (National Taiwan Ocean University, Taiwan)</i>	
Towards Integrated Model-Based Machine Learning Experimentation Framework	593
<i>Jomphon Runpakprakun (Waseda University, Japan), Jati H. Husen (Waseda University, Japan; Telkom University, Indonesia), Hironori Washizaki (Waseda University, Japan), Nobukazu Yoshioka (Waseda University, Japan), and Yoshiaki Fukazawa (Waseda University, Japan)</i>	
The Impact of ChatGPT on Software Engineering Education: A Quick Peek	595
<i>Yihao Li (Ludong University, China), Jialong Xu (Ludong University, China), Yinghua Zhu (Ludong University, China), Huashuo Liu (Ludong University, China), and Pan Liu (Shanghai Business School, China)</i>	

Session V-C: Autonomous Vehicle Software III (AVS)

An Easy-Portable Displacement-Offset-Based Trajectory Prediction Method for Autonomous Vehicles	597
<i>Cheng Wei (Chang'an university, China), Fei Hui (Chang'an university, China), Xiangmo Zhao (Chang'an university, China), Shanke Li (Chang'an university, China), and Jie Wei (Shaanxi Heavy Duty Automobile Co.Ltd, China)</i>	
Prediction of Autonomous Vehicle Trajectories in Turnaround Scenarios	606
<i>George Daoud (Ontario Tech University, Canada; Assiut University, Egypt), Mohamed El-Darieby (Ontario Tech University, Canada), and Khalid Elgazzar (Ontario Tech University, Canada)</i>	
Towards a Benchmark for Trajectory Prediction of Autonomous Vehicles	614
<i>George Daoud (Ontario Tech University, Canada) and Mohamed El-Darieby (Ontario Tech University, Canada)</i>	
BIR-AHC: Balanced Iterative Reducing and Agglomerative Hierarchical Clustering for Stair Detection	623
<i>Chuansheng Xiao (Beijing University of Technology, China), Nan Ma (Beijing University of Technology, China), Kongjian Qin (China Automotive Technology and Research Center Co. Ltd, China), Genbao Xu (Beijing University of Technology, China), and Mohan Wang (Beijing University of Technology, China)</i>	
Employing Deep Unsupervised Learning Method to Identify Testing Scenarios for Automated Vehicles	628
<i>Shuai Liu (State Key Laboratory of Vehicle NVH and Safety Technology, China; Chongqing University, China), Fan Ren (State Key Laboratory of Vehicle NVH and Safety Technology, China; Changan Automobile Intelligent Research Institute, China), Guo Yang (State Key Laboratory of Vehicle NVH and Safety Technology, China; Changan Automobile Intelligent Research Institute, China), Dingchang He (Chongqing University, China), and Yonggang Liu (State Key Laboratory of Vehicle NVH and Safety Technology, China; Chongqing University, China)</i>	

Automated Labelling of Traffic Police Data Based on Weak Supervision	636
<i>Ying Zheng (China University of Mining and Technology-Beijing, China; Beijing Union University, China), Hailan Zhang (China University of Mining and Technology-Beijing, China), Jialu Du (Southeast University, China), Chiangyu Hu (China University of Mining and Technology-Beijing, China), and Hong Bao (Beijing Union University, China)</i>	

Session V-D: Reliable Decision and Scheduling II (RDS)

Research on Decision Assistant Software for Ship Aircraft Collaborative Search and Rescue	645
<i>Wei Qi (Basic Dalian Naval Academy, China), Hongjin Zhou (Marine navigation Dalian Naval Academy, China), Tianpei Wang (The third Midshipmen Squadron Dalian Naval Academy, China), and Jiawei Hu (Third Midshipmen Squadron Dalian Naval Academy, China)</i>	
An Improved H _∞ Filtering Based on Information Attack Over Discrete Linear Systems	647
<i>Yinggang Zhang (Ludong University, China), Li Liu (Ludong University, China), Jinming Liu (Ludong University, China), Yihao Li (Ludong University, China), and Pan Liu (Shanghai Business School, China)</i>	
QA4C: An Intelligent Question and Answering System for the C Programming Language Based on Knowledge Graph	652
<i>Yujuan Cheng (Wuhan Railway Vocational College of Technology, China)</i>	
A Research on the Factors Influencing Cyberchondria from the Perspective of Online Health Information Seeking	658
<i>Ziyang Weng (Wuhan University, China), Han Zheng (Wuhan University, China), and Ming Yang (Wuhan University, China)</i>	

Session VI-A: Reliability/Risk Modeling and Evaluation

Software Reliability Modeling Based on Zero-Truncated and/or Zero-Inflated Compound Distributions	668
<i>Wu Jingchi (1-4-1 Kagamiyama, Higashi-hiroshima, Japan), Tadashi Dohi (1-4-1 Kagamiyama, Higashi-hiroshima, Japan), and Hiroyuki Okamura (1-4-1 Kagamiyama, Higashi-hiroshima, Japan)</i>	
Maintainability Assessment for SOFL Formal Specifications	680
<i>Yu Du (Hiroshima University, Japan) and Shaoying Liu (Hiroshima University, Japan)</i>	
Application of Mathematical Quantification Theory Class III in Software Effort Prediction	688
<i>Kosuke Ito (Tokyo Metropolitan University, Japan), Keita Tanaami (Tokyo Metropolitan University, Japan), and Xiao Xiao (Tokyo Metropolitan University, Japan)</i>	
Analysing Residual Risks when Introducing Monitoring and Diagnosis into Systems	698
<i>Thomas Hirsch (Graz University of Technology, Austria) and Franz Wotawa (Graz University of Technology, Austria)</i>	
Availability Modeling and Evaluation of Switches and Data Centers	710
<i>Shakthivelu Janardhanan (Technical University of Munich, Germany) and Carmen Mas-Machuca (University of the Bundeswehr Munich, Germany)</i>	

Session VI-B: Dependable Intelligent Systems I (DeIS)

Senti-EGCN: An Aspect-Based Sentiment Analysis System Using Edge-Enhanced Graph Convolutional Networks	722
<i>Chen Li (Nagoya University, Japan), Junjun Zheng (Osaka University, Japan), Peng Ju (Hiroshima University, Japan), and Yasuhiko Morimoto (Hiroshima University, Japan)</i>	
A Note on Optimal Retraining Strategy for ML Systems	730
<i>Hisashi Kanda (Hiroshima University, Japan), Hiroyuki Okamura (Hiroshima University, Japan), and Tadashi Dohi (Hiroshima University, Japan)</i>	
An Investigation of the Behaviours of Machine Learning Agents Used in the Game of Go	734
<i>Mingyue Zhang (Southwest University, China), Xiao-Yi Zhang (University of Science and Technology Beijing, China), Paolo Arcaini (National Institute of Informatics, Japan), and Fuyuki Ishikawa (National Institute of Informatics, Japan)</i>	
Using Complex Network Communities to Evaluate the Correctness of Object Detection	743
<i>Tao Zheng (Hefei University of Technology, China; Anhui Engineering Technology Research Center of Industrial Automation, China), Shijun Zhao (Hefei University of Technology, China), Kun Qiu (Hefei University of Technology, China), Pak-Lok Poon (Central Queensland University, Australia), and Lanlin Yu (Hefei University of Technology, China)</i>	
An Empirical Study of Fault Detection Effectiveness of Metamorphic Testing for Object Detectors	751
<i>Kun Qiu (Hefei University of Technology, China), Shuo Wang (Hefei University of Technology, China), and Pak-Lok Poon (Central Queensland University, Australia)</i>	

Session VI-C: Autonomous Vehicle Software IV (AVS)

A Visualization-Aware Loss for Point Cloud Comparison	759
<i>Xingzhe Wu (Tsinghua University, China) and Qiang Zhou (Tsinghua University, China)</i>	
Autonomous and Security-Aware Dynamic Vehicular Platoon Formation	770
<i>Dominic Phillips (Queen's University, Canada), Talal Halabi (Université Laval, Canada), and Mohammad Zulkernine (Queen's University, Canada)</i>	
Two-Stream (2+1)D CNN Based on Frame Difference Attention for Driver Behavior Recognition ...	782
<i>Yang Zou (Xi'an Jiaotong University, China), Shaoyi Du (Xi'an Jiaotong University, China; Shunan Academy of Artificial Intelligence, China), Hongcheng Han (Xi'an Jiaotong University, China), Yuying Liu (Xi'an Jiaotong University, China), and Zhiqiang Tian (Xi'an Jiaotong University, China)</i>	

Lane-Changing Decision-Making Method for Autonomous Vehicles Considering Multi-Vehicle Interactions	789
<i>Tianqi Qie (Beijing Institute of Technology, China; Beijing Institute of Technology Chongqing Innovation Center, China), Weida Wang (Beijing Institute of Technology, China; Beijing Institute of Technology Chongqing Innovation Center, China), Chao Yang (Beijing Institute of Technology, China; Beijing Institute of Technology Chongqing Innovation Center, China), and Ying Li (Beijing Institute of Technology, China; Beijing Institute of Technology Chongqing Innovation Center, China)</i>	
Research on Intelligent Monitoring Method of Medicine Delivery Vehicle Based on Internet of Things Technology	794
<i>XiaoMin Chen (Beijing Union University, China), Xi Han (Beijing Union University, China), and Yuansheng Liu (Beijing Union University, China)</i>	
Study on Roll Oscillation Phenomenon and Controller Design of Deflection-Based Flying Vehicles	800
<i>Wei Wei (Beijing Institute of Technology, China; National Key Laboratory of Vehicular Transmission, Beijing Institute of Technology, China; Chongqing Innovation Center, Beijing Institute of Technology, Chongqing, China), Yongjie Shu (Beijing Institute of Technology, China), Zhifang Ke (Beijing Institute of Technology, China; Institute of Advanced Technology, Beijing Institute of Technology, Jinan, Shandong, China), Kangdi Fan (Beijing Institute of Technology, China; Chongqing Innovation Center, Beijing Institute of Technology, Chongqing, China), and Linwei Dong (Beijing Institute of Technology, China; Chongqing Innovation Center, Beijing Institute of Technology, Chongqing, China)</i>	

Session VI-D: Intelligent Software Engineering (ISE)

Prototypical Networks with Dual Attention and Regularization for Few-Shot Relation Classification	810
<i>Bei Liu (Hohai University, China; Anhui Polytechnic University, China), Wan Tao (Anhui Polytechnic University, China), and Sanmin Liu (Anhui Polytechnic University, China)</i>	
Application in Student Performance Prediction Using Graph Regularization Nonnegative Matrix Factorization	816
<i>Jing Wang (Anhui Polytechnic University, China), Ganyi Tang (Anhui Polytechnic University, China), and Yong Wang (Anhui Polytechnic University, China)</i>	
A RFID-Based Smart Socket Design	821
<i>Yunyun Yi (Anhui Polytechnic University, China) and Jing Wang (Anhui Polytechnic University, China)</i>	
Data-Intelligence Empowering Libraries: Research on Discipline-Specific Precision Services.....	825
<i>Li Li (Anhui Polytechnic University, China), Chen Li (Anhui Polytechnic University, China), Jiaqin Han (Anhui Polytechnic University, China), and Yong Wang (Anhui Polytechnic University, China)</i>	

Session VII-A Reliability and Testing for Artificial Intelligence Systems (RTAIS)

An Evaluation Method for Large Language Models' Code Generation Capability	831
<i>Haoran Su (Beihang University, China), Jun Ai (Beihang University, China), Dan Yu (Beihang University, China), and Hong Zhang (Beihang University, China)</i>	
Assessing ChatGPT's Comprehension of Perturbed Text Through Text Linguistic Features	839
<i>Dan Yu (Beihang University, China), Jun Ai (Beihang University, China), Haoran Su (Beihang University, China), and Hong Zhang (Beihang University, China)</i>	
Improving Accuracy of Small Object Detection in Screen Based on YOLOv7	851
<i>Jianfu Liang (Beihang University, China) and Jun Ai (Beihang University, China)</i>	
An Intelligent Labeling and Dataset Generating Method for Desktop Application Element Object Detection	860
<i>Junda Zhu (Beihang University, China), Jun Ai (Beihang University, China), Tao Shi (Beihang University, China), Congran Zhang (Beihang University, China), and Xinyue Wu (Beihang University, China)</i>	

Session VII-B: Dependable Intelligent Systems II (DeIS)

Tool Development of Daubechies Wavelet Estimation for Stochastic Counting Processes	870
<i>Wu Jingchi (1-4-1 Kagamiyama, Higashi-hiroshima, Japan), Tadashi Dohi (1-4-1 Kagamiyama, Higashi-hiroshima, Japan), and Hiroyuki Okamura (1-4-1 Kagamiyama, Higashi-hiroshima, Japan)</i>	
On the Effectiveness of Graph Data Augmentation for Source Code Learning	880
<i>Zeming Dong (Kyushu University, Japan), Qiang Hu (University of Luxembourg), Zhenya Zhang (Kyushu University, Japan), and Jianjun Zhao (Kyushu University, Japan)</i>	
Convolutional Neural Network Based Digital Twin of Rolling Bearings for CNC Machine Tools in Cloud Computing	890
<i>Zhaoming Wang (Beijing Jiaotong University, China), Siqian Gong (Beijing Jiaotong University, China; Nanjing University, P. R. China), and Yang Liu (Beijing Jiaotong University, China)</i>	
Fault Location and Separation Method of Distributed Inertial Measurement Units Based on IAC	896
<i>Jia Song (Beihang University, China), Weize Shang (Beihang University, China), Boxuan Wu (Beihang University, China), and Shaojie Ai (Beihang University, China)</i>	

Session VII-C: Autonomous Vehicle Software V (AVS)

Profile Dynamic Memory Allocation in Autonomous Driving Software	905
<i>Jin Zhou (University of Massachusetts Amherst), Dexin Li (Inceptio Technology), and Tongping Liu (University of Massachusetts Amherst)</i>	

ChatGPT Integration in AVS: Opportunities and Challenges 915
Yuanzhe Jin (*University of Oxford, United Kingdom*) and Maorong Wang
(*The University of Tokyo, Japan*)
